

Plunger valve 2/2 way direct-acting

- Direct-acting and compact valve up to diameter of DN 6.0
- Vibration-proof, bolted coil system
- Increased leak-tightness with welded plunger guide tube
- Explosion proof versions
- Energy-saving impulse versions

Product variants described in the data sheet may differ from the product presentation and description.

Can be combined with

	Type 1087 Timer	▶

	Type 2513 Cable plug according to DIN EN 175301-803 connector shape A	▶

Type description

Valve 6013 is a direct-acting plunger valve. The stopper and plunger guide tube are welded together to enhance pressure resistance and leak-tightness. Various seal material combinations are available depending on the application. A Bürkert-specific flange design (SFB) enables space-saving arrangement of valves on a manifold. The coils are moulded with polyamide or with chemically resistant epoxy. Pulse coils and 'Kick and Drop' electronics are available for overexcitation (plug 2511) for the reduction of electrical power consumption during operation. Optional manual actuation enables quick commissioning and easy maintenance.

Degree of protection	IP65 with cable plug, ATEX/IECEx junction box version and cable connection version
Environment and installation	
Installation position	As required, preferably with actuator upright
Installation instructions	No oils, fats or silicone to be used during installation
Ambient temperature (max.)	+ 55 °C

2. Product versions

2.1. Analytical version

Solenoid valves for higher requirements

This version is particularly suitable for switching from extremely pure gaseous medium. All medium-affected parts are submitted to additional purification processes, so that the medium is not contaminated under any circumstances.

The tightness test takes place at the Helium leak detector from a min. of 10^{-4} mbar l/sec.

Product properties	
Material	
Seal	Silicon, oil and fat free version Tightness $< 10^{-4}$ mbar l/s
Body	Brass, stainless steel 1.4305

Environment and installation	
Installation instructions	No oils, fats or silicone to be used during installation

2.2. DVGW version

The Type 6013 DVGW solenoid valve is designed primarily as an automatic safety shut-off valve for flammable gases. A strainer is installed in the inlet of the valve.

Product properties	
Material	
Seal	NBR
Body	Brass, stainless steel 1.4305
Circuit function	A. Detailed information can be found in chapter “3. Circuit functions” on page 5.

Manifolds for block mounting

Note:

- Unused, open valve ports must be closed off with covering plates (see accessories).
- Manifold should be fixed on to a rail.
- For detailed information on dimensions [“6.4. Manifold mounting” on page 12.](#)

With manifold mounting, please comply with the permissible duty cycle (5 W models with 100 % continuous rating or standard 8 W model with 60 % duty cycle). The pressure port for the manifold is designated with P (R), and the outlet port with A (B). Only connect together ports with the same designation.

2/2 way valves of Type 6013 can be operated together on a manifold with 3/2 way valves of Type 6014, circuit function C (not D or T!) if the operating pressures matches according to the rating plates. The manifolds can also be expanded if the valve functions are taken into consideration. Connector nipples with O-rings are used to connect the P (R) ports.
