Communication

## TIM 3V-IE Advanced (for S7-300)

### Overview

- SINAUT communications module TIM for SIMATIC S7-300 for use in wide area network (WAN) as station, node station, and control center
- IP communication via secure VPN (virtual private network) using the Internet
- Wireless communication via mobile wireless routers or wireless devices
- Wired communication via Ethernet, DSL, dialup modems or dedicated line modem
- Complete migration of existing wireless, dedicated line and dial-up technology to IP-based network
- Message frame memory for seamless recording of data and support of redundant communication paths
- Simple configuration and operation without specialist IT knowledge

### Ordering data

#### TIM 3V-IE Advanced communications module

With an RS 232 interface and an RJ45 interface for SINAUT communication via a conventional WAN and an IP-based network (WAN or LAN)

#### Accessories

#### SINAUT Engineering Software V5.5 + SP3

On DVD, comprising

- SINAUT S7 Engineering Software V5.5 + SP3 for the PG
- SINAUT TD7 block library
- Electronic manual in German and English

#### SINAUT S7 Engineering Software Update from Version V5.0x to V5.5

SINAUT Engineering Software V5.5 upgrade; for owners of SINAUT Engineering Software Version V5.0 or higher

#### Engineering Software STEP 7 Professional V17

- SIMATIC STEP 7 Professional V17 floating license
- Upgrade SIMATIC STEP 7 Basic V11 ... V16 → V17 floating license

#### IE FC TP Standard Cable GP 2 x 2 (Type A)

4-wire, shielded TP installation cable for connection to IE FC RJ45 outlet/IE FC RJ45 plug; PROFINET-compatible; with UL approval  
Sold by the meter;  
Max. delivery unit 1 000 m, minimum order quantity 20 m

### Article No.

#### IE FC RJ45 plug 180

RJ45 plug connector for Industrial Ethernet with a rugged metal enclosure and integrated insulation displacement contacts for connecting Industrial Ethernet FC installation cables; with 180° cable outlet; for network components and CPs/CPU with Industrial Ethernet interface

- 1 pack = 1 unit
- 1 pack = 10 units
- 1 pack = 50 units

6GK1901-1BB10-2AA0

6GK1901-1BB10-2AB0

6GK1901-1BB10-2AE0

#### IE FC Stripping Tool

Pre-adjusted stripping tool for fast stripping of Industrial Ethernet FC cables

6GK1901-1GA00

#### Connecting cable

For connecting a TIM (RS 232) with the GSM modem MD720-3; also suitable for third-party modems or radio equipment with standard RS 232 interface; Cable length 2.5 m

6NH7701-5AN

#### Connecting cable

With one end open for connecting a TIM (RS 232) to a third-party modem or radio unit (RS 232); Cable length 2.5 m

6NH7701-4BN

#### Connecting cable

For connecting two TIM modules via their RS 232 interface without modems ("null modem"). Cable length 6 m

6NH7701-0AR

## Overview

- SINAUT communications module TIM with four interfaces for SIMATIC S7-300 or as self-contained unit for the S7-400 for use in the wide area network (WAN)
- For universal use in a SINAUT station, node station and control center
- Internet communication via integrated MSC-VPN tunnel with direct connection to DSL router or operation via IPsec VPN with additional SIMATIC NET components
- Wireless communication via mobile wireless routers or wireless devices
- Wired communication via Ethernet, DSL, dialup modems or dedicated line modem
- Complete migration of existing wireless, dedicated line and dial-up technology to IP-based network
- Message frame memory for seamless recording of data and support of redundant communication paths
- Simple configuration and operation without specialist IT knowledge

### TIM 3V-IE DNP3 (for S7-300)

#### Overview

In a station for the S7-CPU, the communications module TIM 3V-IE DNP3 (TeleControl Interface Module) handles the data exchange with the assigned master system SIMATIC PCS 7 TeleControl V8.0 using the open DNP3 protocol. The module additionally supports master and node functionality.

- With the S7-300 housing, the module can be fully integrated into the S7-300 system
- The module has an RS232 interface for the connection of an external modem for data transmission via a conventional WAN or the connection of a Modbus RTU slave to an S7-300 system
- The RJ45 port is used for data transmission via IP-based networks

## TIM 4R-IE DNP3 (for S7-300/-400)

### Overview

In a station for the S7-CPU, the communication module TIM 4R-IE DNP3 (TeleControl Interface Module) handles the data exchange with the assigned SIMATIC PCS7 TeleControl V8.0 master system using the open DNP3 protocol. In addition, the V3.0 module now also supports master and node functionality.

- With the double-width S7-300 housing, the module can be fully integrated into the S7-300 system
- Can be connected as a stand-alone module to a SIMATIC S7-400 and SIMATIC S7-400 H System
- Two RS 232/RS 485 interfaces support connection of an external modem for data transmission via a conventional WAN or of a Modbus RTU slave to an S7-300 system
- The module has two RJ45 interfaces for data transmission via IP-based networks
- By using physically separate connection paths, the module permits media redundancy without loss of data during the switchover

#### IE FC Stripping Tool

Pre-adjusted stripping tool for fast stripping of Industrial Ethernet FC cables

6GK1901-1GA00

#### Connecting cable

For connecting a TIM (RS 232) with the GSM modem MD720-3; also suitable for third-party modems or radio equipment with standard RS 232 interface; Cable length 2.5 m

6NH7701-5AN

#### Connecting cable

With one end open for connecting a TIM (RS 232) to a third-party modem or radio unit (RS 232); Cable length 2.5 m

6NH7701-4BN

#### Connecting cable

For connecting two TIM modules via their RS 232 interface without modems ("null modem"). Cable length 6 m

6NH7701-0AR

#### SITOP compact 24 V/0.6 A

Single-phase power supply with wide-range input 85 to 264 V AC/110 to 300 V DC, stabilized output voltage 24 V, rated output current value 0.6 A, slim design

6EP1331-5BA00

#### Technical specifications

Article number	<b>6NH7803-4BA00-0AA0</b>
product type designation	TIM 4R-IE DNP3
<b>transfer rate</b>	
transfer rate	
• for Industrial Ethernet	10 ... 100 Mbit/s
• acc. to RS 232	9 600 ... 115 200 bit/s
<b>interfaces</b>	
number of interfaces	2
acc. to Industrial Ethernet	
number of electrical connections	
• for external data transmission acc. to RS 232	2
• for power supply	1
type of electrical connection	
• of Industrial Ethernet interface	RJ45 port
type of electrical connection	
• at interface 1 for external data transmission	9 pin Sub-D-connector, RS232 switchable to RS485
• at interface 2 for external data transmission	9-pole D-sub connector, RS232 can be switched to RS485
• for power supply	2-pole pluggable terminal block
design of the removable storage	
• C-PLUG	Yes
<b>supply voltage, current consumption, power loss</b>	
type of voltage of the supply voltage	DC
supply voltage	24 V
supply voltage	20.4 ... 28.8 V
supply voltage external at DC rated value	24 V
supply voltage external at DC rated value	20.4 ... 28.8 V
consumed current	
• from backplane bus at DC at 24 V maximum	0.2 A
• from external supply voltage at DC at 24 V maximum	0.17 A
power loss [W]	4.6 W
product extension optional backup battery	Yes
type of battery	Lithium AA / 3.6 V / 2.3 Ah
backup current	
• typical	100 µA
• maximum	160 µA
<b>ambient conditions</b>	
ambient temperature	
• during operation	0 ... 60 °C
• during storage	-40 ... +70 °C
• during transport	-40 ... +70 °C
relative humidity	
• at 25 °C without condensation during operation maximum	95 %
protection class IP	IP20

Article number	<b>6NH7803-4BA00-0AA0</b>

Communication

## ASM 475

### Overview

The ASM 475 is a powerful communications module for connecting the MOBY D, SIMATIC RF200, RF300 and SIMATIC MV400, MV500 identification systems to the S7-300 and ET 200M.

### Ordering data

Ordering data	Article No.
<b>ASM 475 communications module</b> For SIMATIC S7-300 and ET 200M, parameterizable	<b>6GT2002-0GA10</b>
<b>Accessories</b>	
<b>Front connector (1 x per ASM 475)</b> <ul style="list-style-type: none"> <li>with screw terminals</li> <li>with spring-loaded terminals</li> </ul>	<b>6ES7392-1AJ00-0AA0</b> <b>6ES7392-1BJ00-0AA0</b>

I/O modules

SIPLUS S7-300 communication

## SIPLUS CP 342-5

### Overview

DP-M	DP-S	FMS	PG/OP	S7/S5
●	●		●	●

- PROFIBUS DP master or slave with electrical interface for connecting the SIMATIC S7-300 to PROFIBUS at up to 12 Mbps (including 45.45 kbps)
- Communication services:
  - PROFIBUS DP
  - PG/OP communication (OP multiplexing)
  - S7 communication (client, server)
  - Open communication (SEND/RECEIVE)
- Easy configuring and programming via PROFIBUS
- Cross-network PG communication using S7 routing
- Modules can be replaced without a PG

resistance to chemically active substances	
• conformity acc. to EN 60721-3-3	Yes; Class 3C4 (RH < 75 %) incl. salt spray in accordance with EN 60068-2-52 (Severity 3). The supplied plug covers must remain in place on the unused interfaces during operation.
• conformity acc. to EN 60721-3-6	Yes
resistance to mechanically active substances	
• conformity acc. to EN 60721-3-3	Yes; Class 3S4 incl. sand, dust. The supplied plug covers must remain in place over the unused interfaces during operation.
• conformity acc. to EN 60721-3-6	Yes; Class 6S3 incl. sand, dust. The supplied plug covers must remain in place over the unused interfaces during operation.
coating for equipped printed circuit board acc. to EN 61086	Yes; Class 2 for high availability
type of coating protection against pollution according to EN 60664-3	Yes; Protection of the type 1
type of test of the coating acc. to MIL-I-46058C	Yes; Coating discoloration during service life possible
product conformity of the coating Qualification and Performance of Electrical Insulating Compound for Printed Board Assemblies acc. to IPC-CC-830A	Yes; Conformal coating, class A
protection class IP	IP20

## Overview

ISO	TCP/UDP	PN	MRP	IT	IP-R	PG/OP	S7/S5
	●	●	●			●	●

- Connection for the SIMATIC S7-300 to Industrial Ethernet (not for SINUMERIK)
  - 2 x RJ45 interface for 10/100 Mbps full/half duplex connection (with autosensing for automatic switchover and autocrossover function)
  - Integrated 2-port real-time switch ERTEC
  - Multi-protocol operation with TCP and UDP transport protocol and PROFINET IO
  - Keep Alive function
- Communications services:
  - Open communication (TCP/IP and UDP)
  - PG/OP communication
  - S7 communication (server)
  - PROFINET IO device
- Multicast for UDP
- Remote programming and initial commissioning is possible over Industrial Ethernet
- IT communication
  - Web function
- Integration into network management through SNMP
- Configuration with STEP 7
- Cross-network PG/OP communication by means of S7 routing
- Diagnostics possibilities in STEP 7 and via web browser

• conformity acc. to EN 60721-3-6	Yes; Class 6B2 mold, fungal and dry rot spores (excluding fauna)	product conformity of the coating Qualification and Performance of Electrical Insulating Compound for Printed Board Assemblies acc. to IPC-CC-830A	
		protection class IP	IP20

## Overview

ISO	TCP/UDP	PN	MRP	IT	IP-R	PG/OP	S7/S5
●	●	●	●			●	●

- The connection of SIMATIC S7-300/SINUMERIK 840D powerline to Industrial Ethernet
  - 2 x RJ45 interface for 10/100 Mbps full/half-duplex connection with autosensing/autonegotiation and autocrossover function
  - Integrated 2-port real-time switch ERTEC
  - Multi-protocol operation with ISO, TCP, UDP transport protocol and PROFINET IO
  - Adjustable keep-alive function

- Communications services:
  - Open communication (ISO, TCP/IP, and UDP)
  - PROFINET IO controller or PROFINET IO device
  - PG/OP communication: Cross-network by means of S7 routing
  - S7 communication (client, server, multiplexing)
- Media redundancy (MRP); within an Ethernet network with ring topology, the CP supports the media redundancy procedure MRP (V2.2 or higher).
- Multicast for UDP
- IP address assignment via DHCP, simple PC tool or via the user program (e.g. HMI)
- Access protection via configurable access list
- Remote programming and commissioning via Industrial Ethernet
- Configuration with STEP 7
- Automatic setting of CPU clock setting over Ethernet with NTP or SIMATIC procedure
- Web diagnostics
- Integration in network management systems via SNMP (MIB2 diagnostics information)
- Diagnostics possibilities in STEP 7 and via web browser

Note:

SIPLUS extreme products are based on SIMATIC standard products. The contents listed here were adopted from the respective standard products. SIPLUS extreme-specific information was added.

## Overview

ISO	TCP/UDP	PN	MRP	IT	IP-R	PG/OP	S7/S5
●	●	●	●	●	●	●	●

- The connection of SIMATIC S7-300/SINUMERIK 840D powerline to Industrial Ethernet
  - Multi-protocol operation with TCP and UDP transport protocol
  - Adjustable keep-alive function
- Two separate interfaces (integrated network separation):
  - Gigabit interface with one RJ45 port with 10/100/1 000 Mbps, full/half-duplex with auto-sensing capability
  - PROFINET interface with two RJ45 ports with 10/100 Mbps full/half-duplex with auto-sensing and auto-crossover functionality via integrated 2-port switch
- Communications services via both interfaces:
  - Open communication (TCP/IP and UDP): Multicast with UDP, including routing between both interfaces
  - PG/OP communication:
    - Cross-network by means of S7 routing
    - S7 communication (client, server, multiplexing) including routing between both interfaces
  - IT communication:
    - HTTP communication supports access to process data via own web pages;
    - e-mail client function, sending of e-mails directly from user program;
    - FTP communication supports program-controlled FTP client communication;
    - access to data blocks through FTP server

- Communications services via PROFINET interfaces:
  - PROFINET IO controller and IO device with real-time properties (RT and IRT)<sup>1)</sup>
  - PROFINET CBA
  - IP address assignment via DHCP, simple PC tool or via program block (e.g. for HMI)
  - Configuration with STEP 7
- Media redundancy (MRP); within an Ethernet network with ring topology, the CP supports the media redundancy procedure MRP (V2.2 or higher).
- Access protection by means of configurable IP access list
- Module replacement without programming device; all information is stored on the C-PLUG (also file system for IT functions)
- Extensive diagnostic functions for all modules in the rack
- IT communication
  - Web function
  - E-mail function
  - FTP
- Integration into network management systems through the support of SNMP V1 MIB-II

- <sup>1)</sup> possible combinations in parallel operation:
- IO controller with IRT and IO device with RT
  - IO controller with RT and IO device with IRT

SIPLUS S7-300 communication

**SIPLUS TIM 3V-IE DNP3****Overview**

In a station for the S7-CPU, the new SIPLUS communication module TIM 3V-IE DNP3 V3.0 (TeleControl Interface Module) handles the data exchange with the assigned master system SIMATIC PCS 7 TeleControl V8.0 using the open DNP3 protocol. In addition, the V3.0 module now also supports master and node functionality.

- With the S7-300 housing, the module can be fully integrated into the S7-300 system
- The module has an RS232 interface for the connection of an external modem for data transmission via a conventional WAN or the connection of a Modbus RTU slave to an S7-300 system
- The RJ45 port is used for data transmission via IP-based networks

Note:

SIPLUS extreme products are based on SIMATIC standard products. The contents listed here were adopted from the respective standard products. SIPLUS extreme-specific information was added.

## SIMATIC S7-300 Advanced Controllers

I/O modules

Connection system

### System cabling for SIMATIC S7-300 and ET 200M

#### Overview

Wiring of SIMATIC S7 I/O modules with the sensors/actuators is a significant factor with respect to time/cost overhead, configuring, control cabinet installation, procurement and ease of service.

With SIMATIC TOP connect system cabling, it is simple and quick to establish a reliable connection for your SIMATIC S7-300 or ET 200M.

With the TIA Selection Tool, a mouse click is all that is required to configure the connection from the SIMATIC S7 module to the I/O. The program automatically checks for plausibility and generates a parts list for the selected connection components that can then be ordered in the Industry Mall.

More information can be found on the Internet at

<http://www.siemens.com/tia-selection-tool>

#### Design

Two cabling variants are available for a wide range of control cabinet concepts:

##### Fully modular connection

Each component is individually inserted.

The system consists of:

- Front connector module
- Connecting cable
- Terminal modules in the following versions: basic module, signal module and function module

Connection errors are thus practically excluded and installation overhead is minimized. Systematic connection of the SIMATIC system. The assembly work for the connecting cables is drastically reduced thanks to the use of pre-assembled cables sold by the meter.

SIMATIC TOP connect for S7-300/ET200M, fully modular connection

##### Flexible connection

Consisting of:

- Front connector with screw-type or crimp connection
- Front connector with fixed single cores
- Single cores also available with UL/CSA-certified cores

The blue wires are numbered sequentially and can be routed direct to each element in the control cabinet. The numbering of the single cores corresponds to the coding of the front connector contacts.

In comparison to conventional single wiring, there is a cost saving of 50% for assembly, since the single cores that have already been checked on the connector are fixed.

This eliminates the time-consuming assembly of up to 40 individual wires per module.

SIMATIC TOP connect for S7-300/ET200M, flexible connection

## Overview

The fully modular connection for connecting to the digital I/O modules of the SIMATIC S7-300 or ET 200M consists of modified front connectors, called front connector modules, preassembled connecting cables of various lengths, and terminal modules. Suitable components can be selected for the application in question and joined by means of simple plug-in connections. The terminal modules are used instead of conventional terminal blocks and act as the interface to the sensors and actuators.

## Benefits

- Front connector module, connecting cable and terminal module are easy to plug in
- Fast, low-cost wiring
- For digital and analog signals, supply voltage can be connected to the front plug-in module or terminal module
- Reduction in wiring errors, clear control cabinet wiring
- Distribution of digital signals by byte or quadruple byte
- Each component can be replaced individually
- Pre-assembled cables can be used in different lengths

## Design

### Front connector module

Modified front connectors, called front connector modules, are available for connecting to the module. These are plugged into the module to be wired instead of the front connector. Many different front connector module versions, for digital I/O modules, 24 V 2-ampère modules or analog I/O modules. The connecting cables are plugged into these front connector modules.

### Connecting cable

There are different versions of the connecting cable.

As a pre-assembled 16-pin or 50-pin round cable (shielded or unshielded) it is available in lengths up to 10 m.

When assembled, there are one or two insulation displacement connectors (female ribbon connectors) at both ends of the cable.

The connecting cable connects the front connector module with the terminal module.

### Terminal module

The system has both digital and analog terminal modules for connecting the I/O signals. These are snapped onto the DIN rail. The terminal modules with basic or signal functionality are available in 1-byte or 4-byte versions.

Terminal modules are available for two different connection methods: with push-in or screw-type terminals. The potential can be fed in at the terminal module or at the front connector module.

If other voltage or power levels are required in the field, the terminal module for TPRo or TPOo output signals is used. For the TPRo terminal module, relays are used for the implementation. For the TPOo terminal module, optocouplers are used for the implementation. This converts the 24 V DC output signal simply and reliably to another voltage or power level. If 230 V AC or 110 V AC input signals have to be transmitted to the controller in the field, a terminal module with relay TPRi is available that simply converts the 230/110 V AC signal to 24 V DC. This means that there is always the same voltage level on the module side.

### Use with optocouplers for the TPRo relay modules

If higher switching frequencies of the relay terminal module are required for the output signals, the relay can simply be replaced with an optocoupler (note technical specifications) in order to increase the switching frequency.

### Shield plate

The shield plate is latched onto the terminal module for 3-core initiators or optionally onto the terminal module for analog signals and then snapped onto the DIN rail with the terminal module. With the shield connection clamps, optimal shield connection is achieved between the shielded round-sheath ribbon cable or the shielded field cables and the grounded DIN rail.

## Overview

Flexible connection enables fast, direct connection of the SIMATIC S7-300/ET 200 M input/output modules to the individual elements in the control cabinet.

Attached single cores reduce the wiring outlay.

Wire cross-sections of 0.5 mm<sup>2</sup> allow higher currents, too.

## Technical specifications

Front connector with single cores for 16 channels	
Rated operating voltage	24 V DC
Permissible continuous current with simultaneous load of all wires, max.	1.5 A
Permissible ambient temperature	0 to 60 °C
Core type	H05V-K or with UL 1007/1569; CSA TR64
Number of single cores	20
Core cross-section	0.5 mm <sup>2</sup> ; Cu
Bundle diameter in mm	approx. 15
Core color	Blue, RAL 5010
Designation of cores	Numbered from 1 to 20 (front connector contact = core number)
Assembly	Screw-type or crimp contacts
Front connector with single cores for 32 channels	
Rated operating voltage	24 V DC
Permissible continuous current with simultaneous load of all wires, max.	1.5 A
Permissible ambient temperature	0 to 60 °C
Core type	H05V-K or with UL 1007/1569; CSA TR64
Number of single cores	40
Core cross-section	0.5 mm <sup>2</sup> ; Cu
Bundle diameter in mm	approx. 17
Core color	Blue, RAL 5010
Designation of cores	Numbered from 1 to 40 (front connector contact = core number)
Assembly	Screw-type or crimp contacts

Connection system

**System cabling for SIMATIC S7-300 and ET 200M > Front connectors with crimp connections****Design*****The front connector is available in two versions:***The 20-pin front connector comprises:

- 20 crimp contact connections for the wiring
- Strain relief for the cables
- Unlocking button for unlatching the front connector when replacing the module
- Receptacle for coding element attachment; there are two coding elements with attachments on the module. The attachments latch into the front connector when inserted for the first time.

The 40-pin front connector comprises:

- 40 crimp contact connections for the wiring
- Strain relief for the cables
- Locking screw for fixing and detaching the front connector when the module is replaced
- Receptacle for coding element attachment; there is one two coding element with attachment on the module. The attachment latches into the front connector when inserted for the first time.

**Integration**Use of the 20-pole front connector with

- 16-channel signal modules
- Function modules
- CPU 312 IFM

Use of the 40-pole front connector with

- 32-channel signal modules
- Compact CPUs

# SIMATIC S7-300 Advanced Controllers

## Power supplies

1-phase, DC 24 V (for S7-300 and ET200M)

### Overview

The design and functionality of the SIMATIC PS307 single-phase load power supply (system and load current supply) with automatic range switching of the input voltage are an optimal match to the SIMATIC S7-300 PLC. The supply to the CPU is quickly established by means of the connecting comb that is supplied with the system and load current supply. It is also possible to provide a 24 V supply to other S7-300 system components, input/output circuits of the input/output modules and, if necessary, the sensors and actuators. Comprehensive certifications such as UL and GL enable universal use (does not apply to outdoor use).

# SIMATIC S7-300 Advanced Controllers

## SIPLUS power supplies

1-phase, 24 V DC (for S7-300 and ET200M)

### Overview

The design and functionality of the SIPLUS PS 305 and PS 307 1-phase load power supplies (system and load current supply) with automatic range switchover of the input voltage are an optimal match for the SIMATIC S7-300 in design and functionality. By means of the connecting comb that is supplied with the system and load current supply, the supply to the CPU is quickly established. It is also possible to provide a 24 V supply to other S7-300 system components, input/output circuits of the input/output modules and, if necessary, the sensors and actuators. Comprehensive certifications, such as UL, ATEX or GL facilitate universal use (does not apply to outdoor use).

### Note

SIPLUS extreme products are based on Siemens standard products. The contents listed here were taken from the respective standard products. SIPLUS extreme-specific information was added.

### Ordering data

### Article No.

#### SIPLUS power supplies

*For industrial applications with extended ambient conditions*

#### SIPLUS S7-300 PS 305

**6AG1305-1BA80-2AA0**

(Extended temperature range and exposure to media)

Input: 24 ... 110 V DC  
Output: 24 V DC/2 A

#### SIPLUS S7-300 PS 307 5 A

**6AG1307-1EA01-7AA0**

(Extended temperature range and exposure to media)

Incl. connection bracket  
120/230 V AC; 24 V DC  
Output current 5 A  
(dimensions 60 x 125 x 120)

#### SIPLUS S7-300 PS 307 10 A

**6AG1307-1KA02-7AA0**

(Extended temperature range and exposure to media)

Incl. connection bracket  
120/230 V AC; 24 V DC  
Output current 10 A  
(dimensions 80 x 125 x 120)

*For rolling stock railway applications*

#### SIPLUS S7-300 PS 305

**6AG1305-1BA80-2AA0**

(Extended temperature range and exposure to media)

Conforms to EN 50155

Input: 24 ... 110 V DC  
Output: 24 V DC/2 A

#### Accessories

#### SIMATIC S7-300 mounting adapter

**6EP1971-1BA00**

For snapping the PS 307 onto a 35 mm DIN rail (EN 60715)

#### Spare part

SIMATIC S7-300 mounting adapter; for snapping the PS 307 onto 35 mm standard rails

**6ES7390-6BA00-0AA0**

<b>Usage in industrial process technology</b>	
- Against chemically active substances acc. to EN 60654-4	Yes; Class 3 (excluding trichlorethylene)
- Environmental conditions for process, measuring and control systems acc. to ANSI/ISA-71.04	Yes; Level GX group A/B (excluding trichlorethylene; harmful gas concentrations up to the limits of EN 60721-3-3 class 3C4 permissible); level LC3 (salt spray) and level LB3 (oil)
<b>Remark</b>	
- Note regarding classification of environmental conditions acc. to EN 60721, EN 60654-4 and ANSI/ISA-71.04	* The supplied plug covers must remain in place over the unused interfaces during operation!

### Overview DIN rail

- The mechanical rack for SIMATIC S7-300
- For accommodating the modules
- Can be attached to walls

### Ordering data

### Article No.

#### DIN rail

160 mm	6ES7390-1AB60-0AA0
482 mm	6ES7390-1AE80-0AA0
530 mm	6ES7390-1AF30-0AA0
830 mm	6ES7390-1AJ30-0AA0
2000 mm	6ES7390-1BC00-0AA0

### Overview Labeling sheets

#### Labeling sheets

- Film sheets for the application-specific labeling of SIMATIC S7-300 I/O modules using standard laser printers
- Plain color films, tear-resistant, dirt-repellent
- Simple handling:
  - perforated label sheets in DIN A4 format for easy separation of the labeling strips.
  - the separated strips can be attached directly onto the I/O modules.
- Different colors to distinguish between different module types or preferred applications:  
The labeling sheets are available in the following colors: petrol, light-beige, red, and yellow. Yellow is reserved for fail-safe systems.

#### Label cover

- Petrol-colored film
- For sealing and fixing of custom labeling strips on normal paper
- Accessories, 10 units

## Overview

### SIMATIC S7-400

#### Overview

**SIMATIC S7-400:**  
**The powerful controller for system solutions in the manufacturing and process industries**

Within the controller family, the SIMATIC S7-400 is designed for system solutions in the manufacturing and process automation industry.

- The modularly designed S7-400H can be flexibly adapted to your requirements. The redundant configuration further increases system availability.
- An additional protective coating (conformal coating) on the circuit board optimally protects the modules against external influences and makes them durable.
- The S7-400H stands out thanks to its long-term availability.
- Safety engineering, SIMATIC F-systems and standard automation can be integrated into a single automation system.
- The configuration of the distributed I/O of the S7-400 can be modified during operation. In addition signal modules can be removed and inserted while live (hot swapping). This makes it very easy to expand the system or replace modules in the event of a fault.
- Storage of the entire project data, including symbols and comments, on the CPU simplifies service and maintenance calls.

### Overview

- The S7-400 is especially suitable for data-intensive tasks in the process industry. High processing speeds and deterministic response times guarantee short machine cycle times on high-speed machines in the manufacturing industry. The high-speed backplane bus of S7-400 ensures efficient linking of central I/O modules.
- The S7-400 is used preferably to coordinate complete plants and to control lower-level devices/stations; this is guaranteed by the high communication power and the integral interfaces.
- The performance is scalable thanks to a graded range of CPUs; Interfaces for the PROFIBUS/PROFINET connection ensure optimal connectivity.
- To further increase ruggedness and durability in the harsh everyday industrial environment, the S7-400 has a "G3" conformal coating.

## Overview

### SIMATIC S7-400

#### Overview

- Safety engineering and standard automation can be integrated into a single S7-400;.
- For demanding, safety-oriented automation in mechanical engineering with S7 Distributed Safety.
- Many S7-400 components are also available in a SIPLUS extreme version for extreme environmental conditions, e.g. for use where there is a corrosive atmosphere/condensation. For more detailed information, visit [www.siemens.com/siplus-extreme](http://www.siemens.com/siplus-extreme)

For more information, refer to:

### Overview

#### Digital modules

##### SM 421 digital input module

Article No.

- Digital inputs for the SIMATIC S7-400
  - For connecting switches and 2-wire proximity switches (BEROs)
- Detailed information on SIMATIC S7-400, see **Catalog ST 400** in Siemens Industry Online Support: [www.siemens.com/industry-catalogs](http://www.siemens.com/industry-catalogs)

16 inputs, 24 V DC, with hardware/diagnostics interrupt

32 inputs, 24 V DC

32 inputs, 120 V UC

16 inputs, 120/230 V UC, inputs according to IEC 1131-2 Type 2

16 inputs, 24 to 60 V UC, with hardware/diagnostics interrupt

**6ES7421-7BH01-0AB0**

**6ES7421-1BL01-0AA0**

**6ES7421-1EL00-0AA0**

**6ES7421-1FH20-0AA0**

**6ES7421-7DH00-0AB0**

##### SM 422 digital output module

Article No.

- Digital outputs for the SIMATIC S7-400
  - For connecting solenoid valves, contactors, small-power motors, lamps and motor starters
- Detailed information on SIMATIC S7-400, see **Catalog ST 400** in Siemens Industry Online Support: [www.siemens.com/industry-catalogs](http://www.siemens.com/industry-catalogs)

16 outputs, 120/230 V AC, 2 A

6 outputs, relay contacts

16 outputs, 24 V DC, 2 A

32 outputs, 24 V DC, 0.5 A

32 outputs; 24 V DC, 0.5 A; with diagnostics

**6ES7422-1FH00-0AA0**

**6ES7422-1HH00-0AA0**

**6ES7422-1BH11-0AA0**

**6ES7422-1BL00-0AA0**

**6ES7422-7BL00-0AB0**

#### Analog modules

##### SM 431 analog input module

Article No.

- Analog inputs for the SIMATIC S7-400
  - For connecting voltage sensors and current sensors, thermocouples, resistors and resistance thermometers
  - Resolution 13 to 16 bit
- Detailed information on SIMATIC S7-400, see **Catalog ST 400** in Siemens Industry Online Support: [www.siemens.com/industry-catalogs](http://www.siemens.com/industry-catalogs)

16 inputs, non-floating, 13 bit

8 inputs, floating, 14 bit

8 inputs, floating, 13 bit

8 inputs, floating, 14 bit, with linearization

16 inputs, floating, 16 bit, hardware interrupt capability

8 inputs, floating, 16 bit, hardware interrupt capability, for thermocouples (I, U)

8 inputs, floating, 16 bit, hardware interrupt capability, for thermal resistors

**6ES7431-0HH00-0AB0**

**6ES7431-1KF20-0AB0**

**6ES7431-1KF00-0AB0**

**6ES7431-1KF10-0AB0**

**6ES7431-7QH00-0AB0**

**6ES7431-7KF00-0AB0**

**6ES7431-7KF10-0AB0**

##### SM 432 analog output module

Article No.

- Analog outputs for the SIMATIC S7-400
  - For connecting analog actuators
- Detailed information on SIMATIC S7-400, see **Catalog ST 400** in Siemens Industry Online Support: [www.siemens.com/industry-catalogs](http://www.siemens.com/industry-catalogs)

8 outputs, floating, 13 bit

**6ES7432-1HF00-0AB0**

### Overview

#### Function modules

#### FM 455 controller module

Article No.

The FM 455 controller module is the intelligent 16-channel controller module for universal control tasks. It can be used, for example, for temperature control, pressure control, flow control or level control.

- Convenient online self-optimization for temperature controls
- Ready-to-use controller structures
- 2 control algorithms
- 2 versions:
  - FM 455 C as continuous controller
  - FM 455 S as step or pulse controller
- With 16 analog outputs (FM 455 C) or 32 digital outputs (FM 455 S) for actuators

Detailed information on SIMATIC S7-400, see **Catalog ST 400** in Siemens Industry Online Support:

[www.siemens.com/industry-catalogs](http://www.siemens.com/industry-catalogs)

With 16 analog outputs for 16 continuous controllers

**6ES7455-0VS00-0AE0**

With 32 digital outputs for 16 step or pulse controllers

**6ES7455-1VS00-0AE0**

Standard CPUs

### CPU 1510SP-1 PN

#### Overview

- CPU 1510SP-1 PN for SIMATIC ET 200SP based on S7-1500 CPU 1511-1 PN
- For high-performance control solutions using ET 200SP
- Increase in availability of systems and machines
- PROFINET IO controller for up to 64 IO devices
- PROFINET I-Device for connecting the CPU as an intelligent PROFINET device with a SIMATIC or non-Siemens PROFINET IO controller
- PROFINET shared I-Device for 4 controllers
- PROFINET IO IRT interface with integrated 3-port switch
- Isochronous mode on PROFINET
- With multiple communication options: Programming device/OP communication, PROFINET IO, open IE communication (TCP, ISO-on-TCP and UDP), web server and S7 communication (with loadable FBs)
- OPC UA Server and Client (Data Access) as runtime option for easy connection of the SIMATIC ET 200SP to non-Siemens devices/systems
- Optional PROFIBUS DP master for 125 PROFIBUS DP slaves (with CM DP module 6ES7545-5DA00-0AB0)
- Optional PROFIBUS DP slave (with CM DP module 6ES7545-5DA00-0AB0)
- Configuration control (option handling)
- Integrated Motion Control functionalities for controlling speed-controlled and positioning axes, support for external encoders, output cams/cam tracks and probes

## Distributed Controllers

based on ET 200SP  
Standard CPUs

### CPU 1510SP-1 PN

#### Technical specifications

Article number	<b>6ES7510-1DJ01-0AB0</b> CPU 1510SP-1 PN, 100KB Prog./750KB Data
<b>General information</b>	
Product type designation	CPU 1510SP-1 PN
<b>Engineering with</b>	
• STEP 7 TIA Portal configurable/ integrated from version	V17 (FW V2.9) / V13 SP1 Update 4 (FW V1.8) or higher
<b>Supply voltage</b>	
Type of supply voltage	24 V DC
<b>Memory</b>	
<b>Work memory</b>	
• integrated (for program)	100 kbyte
• integrated (for data)	750 kbyte
<b>Load memory</b>	
• Plug-in (SIMATIC Memory Card), max.	32 Gbyte
<b>CPU processing times</b>	
for bit operations, typ.	72 ns
for word operations, typ.	86 ns
for fixed point arithmetic, typ.	115 ns
for floating point arithmetic, typ.	461 ns
<b>Counters, timers and their retentivity</b>	
<b>S7 counter</b>	
• Number	2 048
<b>IEC counter</b>	
• Number	Any (only limited by the main memory)
<b>S7 times</b>	
• Number	2 048
<b>IEC timer</b>	
• Number	Any (only limited by the main memory)
<b>Data areas and their retentivity</b>	
<b>Flag</b>	
• Size, max.	16 kbyte
<b>Address area</b>	
<b>I/O address area</b>	
• Inputs	32 kbyte; All inputs are in the process image
• Outputs	32 kbyte; All outputs are in the process image
<b>Address space per module</b>	
• Address space per module, max.	288 byte; For input and output data respectively
<b>Address space per station</b>	
• Address space per station, max.	2 560 byte; for central inputs and outputs; depending on configuration; 2 048 bytes for ET 200SP modules + 512 bytes for ET 200AL modules
<b>Time of day</b>	
<b>Clock</b>	
• Type	Hardware clock

Article number	<b>6ES7510-1DJ01-0AB0</b> CPU 1510SP-1 PN, 100KB Prog./750KB Data
<b>1. Interface</b>	
<b>Interface types</b>	
• RJ 45 (Ethernet)	Yes; X1 P3; opt. X1 P1 and X1 P2 via BusAdapter BA 2x RJ45
• Number of ports	3; 1. integr. + 2. via BusAdapter
• integrated switch	Yes
• BusAdapter (PROFINET)	Yes; compatible BusAdapters: BA 2x RJ45, BA 2x FC, BA 2x M12
<b>Protocols</b>	
• IP protocol	Yes; IPv4
• PROFINET IO Controller	Yes
• PROFINET IO Device	Yes
• SIMATIC communication	Yes
• Open IE communication	Yes; Optionally also encrypted
• Web server	Yes
• Media redundancy	Yes; MRP Automanager according to IEC 62439-2 Edition 2.0
<b>PROFINET IO Controller Services</b>	
- PG/OP communication	Yes
- Isochronous mode	Yes
- Direct data exchange	Yes; Requirement: IRT and isochronous mode (MRPD optional)
- IRT	Yes
- PROFIenergy	Yes; per user program
- Prioritized startup	Yes; Max. 32 PROFINET devices
- Number of connectable IO Devices, max.	64; In total, up to 256 distributed I/O devices can be connected via AS-i, PROFIBUS or PROFINET
- Of which IO devices with IRT, max.	64
- Number of connectable IO Devices for RT, max.	64
- of which in line, max.	64
- Number of IO Devices that can be simultaneously activated/ deactivated, max.	8; in total across all interfaces
- Number of IO Devices per tool, max.	8
- Updating times	The minimum value of the update time also depends on communication share set for PROFINET IO, on the number of IO devices, and on the quantity of configured user data
<b>PROFINET IO Device Services</b>	
- PG/OP communication	Yes
- Isochronous mode	No
- IRT	Yes
- PROFIenergy	Yes; per user program
- Shared device	Yes
- Number of IO Controllers with shared device, max.	4
- activation/deactivation of I-devices	Yes; per user program
- Asset management record	Yes; per user program

**Technical specifications**

Article number	<b>6ES7510-1DJ01-0AB0</b> CPU 1510SP-1 PN, 100KB Prog./750KB Data
<b>2. Interface</b>	
<b>Interface types</b>	
• RS 485	Yes; Via CM DP module
• Number of ports	1
<b>Protocols</b>	
• PROFIBUS DP master	Yes
• PROFIBUS DP slave	Yes
• SIMATIC communication	Yes
<b>PROFIBUS DP master</b>	
• Number of DP slaves, max.	125; In total, up to 256 distributed I/O devices can be connected via AS-i, PROFIBUS or PROFINET
<b>Protocols</b>	
<b>Number of connections</b>	
• Number of connections, max.	96; via integrated interfaces of the CPU and connected CPs / CMs
<b>Redundancy mode</b>	
<b>Media redundancy</b>	
- Media redundancy	Yes; only via BusAdapter
- MRP	Yes; MRP Automanager according to IEC 62439-2 Edition 2.0, MRP Manager; MRP Client
- MRP interconnection, supported	Yes; as MRP ring node according to IEC 62439-2 Edition 3.0
- MRPD	Yes; Requirement: IRT
- Switchover time on line break, typ.	200 ms; For MRP, bumpless for MRPD
- Number of stations in the ring, max.	50
<b>SIMATIC communication</b>	
• S7 routing	Yes
<b>OPC UA</b>	
• OPC UA Client	Yes
• OPC UA Server	Yes; Data access (read, write, subscribe), method call, custom address space
• Alarms and Conditions	Yes
<b>Supported technology objects</b>	
Motion Control	Yes; Note: The number of technology objects affects the cycle time of the PLC program; selection guide via the TIA Selection Tool
• Number of available Motion Control resources for technology objects	800
• Required Motion Control resources	
- per speed-controlled axis	40
- per positioning axis	80
- per synchronous axis	160
- per external encoder	80
- per output cam	20
- per cam track	160
- per probe	40
Controller	
• PID_Compact	Yes; Universal PID controller with integrated optimization
• PID_3Step	Yes; PID controller with integrated optimization for valves
• PID-Temp	Yes; PID controller with integrated optimization for temperature
Counting and measuring	
• High-speed counter	Yes

Article number	<b>6ES7510-1DJ01-0AB0</b> CPU 1510SP-1 PN, 100KB Prog./750KB Data
<b>Ambient conditions</b>	
<b>Ambient temperature during operation</b>	
• horizontal installation, min.	-25 °C; No condensation
• horizontal installation, max.	60 °C
• vertical installation, min.	-25 °C; No condensation
• vertical installation, max.	50 °C
<b>Altitude during operation relating to sea level</b>	
• Installation altitude above sea level, max.	5 000 m; Restrictions for installation altitudes > 2 000 m, see manual
<b>Configuration</b>	
<b>Programming</b>	
<b>Programming language</b>	
- LAD	Yes
- FBD	Yes
- STL	Yes
- SCL	Yes
- GRAPH	Yes
<b>Know-how protection</b>	
• User program protection/ password protection	Yes
• Copy protection	Yes
• Block protection	Yes
<b>Access protection</b>	
• protection of confidential configuration data	Yes
• Protection level: Write protection	Yes
• Protection level: Read/write protection	Yes
• Protection level: Complete protection	Yes
<b>Dimensions</b>	
Width	100 mm
Height	117 mm
Depth	75 mm
<b>Weights</b>	
Weight, approx.	310 g

## Distributed Controllers

based on ET 200SP  
Standard CPUs

### CPU 1512SP-1 PN

#### Overview

- CPU 1512SP-1 PN for SIMATIC ET 200SP based on S7-1500 CPU 1513-1 PN
- For applications with medium requirements in terms of program scope and processing speed, for distributed configurations via PROFINET IO or PROFIBUS DP.
- Increase in availability of systems and machines
- PROFINET IO controller for up to 128 IO devices
- PROFINET I-device for connecting the CPU as an intelligent PROFINET device with a SIMATIC or third-party PROFINET IO controller
- PROFINET shared I-device for 4 controllers
- PROFINET IO IRT interface with integrated 3-port switch
- Isochronous mode on PROFINET
- With multiple communication options: PG/OP communication, PROFINET IO, open IE communication (TCP, ISO-on-TCP and UDP), web server and S7 communication (with loadable FBs)
- OPC UA Server and Client (data access) as runtime option for easy connection of the SIMATIC ET 200SP to third-party devices/systems
- Optional PROFIBUS DP master for 125 PROFIBUS DP slaves (with CM DP module 6ES7545-5DA00-0AB0)
- Optional PROFIBUS DP slave (with CM DP module 6ES7545-5DA00-0AB0)
- Configuration control (option handling)
- Integrated motion control functionalities for controlling speed-controlled and positioning axes, support for external encoders, output cams/cam tracks and probes

#### Note

SIMATIC Memory Card required for operation of the CPU. BusAdapter is not included in scope of supply and is to be ordered separately.

#### Ordering data

#### Article No.

<b>CPU 1512SP-1 PN</b> 200 KB work memory for program, 1 MB for data, PROFINET IO IRT interface; SIMATIC Memory Card required	<b>6ES7512-1DK01-0AB0</b>
<b>Accessories</b>	
<b>CM DP for ET 200SP CPU</b> PROFIBUS DP master/slave with electrical interface for connecting the ET 200SP CPUs to PROFIBUS at up to 12 Mbps	<b>6ES7545-5DA00-0AB0</b>

Standard CPUs

## CPU 1512SP-1 PN

### Technical specifications

Article number	<b>6ES7512-1DK01-0AB0</b> CPU 1512SP-1 PN, 200KB Prog./1MB Data
<b>General information</b>	
Product type designation	CPU 1512SP-1 PN
<b>Engineering with</b>	
• STEP 7 TIA Portal configurable/ integrated from version	V17 (FW V2.9) / V13 SP1 Update 4 (FW V1.8) or higher
<b>Supply voltage</b>	
Type of supply voltage	24 V DC
<b>Memory</b>	
<b>Work memory</b>	
• integrated (for program)	200 kbyte
• integrated (for data)	1 Mbyte
<b>Load memory</b>	
• Plug-in (SIMATIC Memory Card), max.	32 Gbyte
<b>CPU processing times</b>	
for bit operations, typ.	48 ns
for word operations, typ.	58 ns
for fixed point arithmetic, typ.	77 ns
for floating point arithmetic, typ.	307 ns
<b>Counters, timers and their retentivity</b>	
<b>S7 counter</b>	
• Number	2 048
<b>IEC counter</b>	
• Number	Any (only limited by the main memory)
<b>S7 times</b>	
• Number	2 048
<b>IEC timer</b>	
• Number	Any (only limited by the main memory)
<b>Data areas and their retentivity</b>	
<b>Flag</b>	
• Size, max.	16 kbyte
<b>Address area</b>	
<b>I/O address area</b>	
• Inputs	32 kbyte; All inputs are in the process image
• Outputs	32 kbyte; All outputs are in the process image
<b>Address space per module</b>	
• Address space per module, max.	288 byte; For input and output data respectively
<b>Address space per station</b>	
• Address space per station, max.	2 560 byte; for central inputs and outputs; depending on configuration; 2 048 bytes for ET 200SP modules + 512 bytes for ET 200AL modules
<b>Time of day</b>	
<b>Clock</b>	
• Type	Hardware clock

Article number	<b>6ES7512-1DK01-0AB0</b> CPU 1512SP-1 PN, 200KB Prog./1MB Data
<b>1. Interface</b>	
<b>Interface types</b>	
• RJ 45 (Ethernet)	Yes; X1 P3; opt. X1 P1 and X1 P2 via BusAdapter BA 2x RJ45
• Number of ports	3; 1. integr. + 2. via BusAdapter
• integrated switch	Yes
• BusAdapter (PROFINET)	Yes; compatible BusAdapters: BA 2x RJ45, BA 2x M12, BA 2x FC, BA 2x LC, BA LC/RJ45, BA LC/FC, BA 2x SCRJ, BA SCRJ/RJ45, BA SCRJ/FC,
<b>Protocols</b>	
• IP protocol	Yes; IPv4
• PROFINET IO Controller	Yes
• PROFINET IO Device	Yes
• SIMATIC communication	Yes
• Open IE communication	Yes; Optionally also encrypted
• Web server	Yes
• Media redundancy	Yes; MRP Automanager according to IEC 62439-2 Edition 2.0
<b>PROFINET IO Controller Services</b>	
- PG/OP communication	Yes
- Isochronous mode	Yes
- Direct data exchange	Yes; Requirement: IRT and isochro- nous mode (MRPD optional)
- IRT	Yes
- PROFIenergy	Yes; per user program
- Prioritized startup	Yes; Max. 32 PROFINET devices
- Number of connectable IO Devices, max.	128; In total, up to 512 distributed I/O devices can be connected via AS-i, PROFIBUS or PROFINET
- Of which IO devices with IRT, max.	64
- Number of connectable IO Devices for RT, max.	128
- of which in line, max.	128
- Number of IO Devices that can be simultaneously activated/ deactivated, max.	8; in total across all interfaces
- Number of IO Devices per tool, max.	8
- Updating times	The minimum value of the update time also depends on communication share set for PROFINET IO, on the number of IO devices, and on the quantity of configured user data
<b>PROFINET IO Device Services</b>	
- PG/OP communication	Yes
- Isochronous mode	No
- IRT	Yes
- PROFIenergy	Yes; per user program
- Shared device	Yes
- Number of IO Controllers with shared device, max.	4
- activation/deactivation of I-devices	Yes; per user program
- Asset management record	Yes; per user program

**Technical specifications**

Article number	<b>6ES7512-1DK01-0AB0</b> CPU 1512SP-1 PN, 200KB Prog./1MB Data
<b>2. Interface</b>	
<b>Interface types</b>	
• RS 485	Yes; Via CM DP module
• Number of ports	1
<b>Protocols</b>	
• PROFIBUS DP master	Yes
• PROFIBUS DP slave	Yes
• SIMATIC communication	Yes
<b>PROFIBUS DP master</b>	
• Number of DP slaves, max.	125; In total, up to 512 distributed I/O devices can be connected via AS-i, PROFIBUS or PROFINET
<b>Protocols</b>	
<b>Number of connections</b>	
• Number of connections, max.	128; via integrated interfaces of the CPU and connected CPs / CMs
<b>Redundancy mode</b>	
<b>Media redundancy</b>	
- Media redundancy	Yes; only via BusAdapter
- MRP	Yes; MRP Automanager according to IEC 62439-2 Edition 2.0, MRP Manager; MRP Client
- MRP interconnection, supported	Yes; as MRP ring node according to IEC 62439-2 Edition 3.0
- MRPD	Yes; Requirement: IRT
- Switchover time on line break, typ.	200 ms; For MRP, bumpless for MRPD
- Number of stations in the ring, max.	50
<b>SIMATIC communication</b>	
• S7 routing	Yes
<b>OPC UA</b>	
• OPC UA Client	Yes
• OPC UA Server	Yes; Data access (read, write, subscribe), method call, custom address space
• Alarms and Conditions	Yes
<b>Supported technology objects</b>	
Motion Control	Yes; Note: The number of technology objects affects the cycle time of the PLC program; selection guide via the TIA Selection Tool
• Number of available Motion Control resources for technology objects	800
• Required Motion Control resources	
- per speed-controlled axis	40
- per positioning axis	80
- per synchronous axis	160
- per external encoder	80
- per output cam	20
- per cam track	160
- per probe	40
Controller	
• PID_Compact	Yes; Universal PID controller with integrated optimization
• PID_3Step	Yes; PID controller with integrated optimization for valves
• PID-Temp	Yes; PID controller with integrated optimization for temperature
Counting and measuring	
• High-speed counter	Yes

Article number	<b>6ES7512-1DK01-0AB0</b> CPU 1512SP-1 PN, 200KB Prog./1MB Data
<b>Ambient conditions</b>	
<b>Ambient temperature during operation</b>	
• horizontal installation, min.	-25 °C; No condensation
• horizontal installation, max.	60 °C
• vertical installation, min.	-25 °C; No condensation
• vertical installation, max.	50 °C
<b>Altitude during operation relating to sea level</b>	
• Installation altitude above sea level, max.	5 000 m; Restrictions for installation altitudes > 2 000 m, see manual
<b>Configuration</b>	
<b>Programming</b>	
<b>Programming language</b>	
- LAD	Yes
- FBD	Yes
- STL	Yes
- SCL	Yes
- GRAPH	Yes
<b>Know-how protection</b>	
• User program protection/ password protection	Yes
• Copy protection	Yes
• Block protection	Yes
<b>Access protection</b>	
• protection of confidential configuration data	Yes
• Protection level: Write protection	Yes
• Protection level: Read/write protection	Yes
• Protection level: Complete protection	Yes

<b>Weights</b>	
Weight, approx.	310 g

## Distributed Controllers

based on ET 200SP  
SIPLUS standard CPUs

### SIPLUS CPU 1510SP-1 PN

#### Overview

- SIPLUS CPU 1510SP-1 PN for SIPLUS ET 200SP based on SIPLUS-S7-1500 CPU 1511-1 PN
- For high-performance control solutions using ET 200SP
- Increase in availability of systems and machines
- PROFINET IO controller for up to 64 IO devices
- PROFINET I-Device for connecting the CPU as an intelligent PROFINET device with a SIMATIC or non-Siemens PROFINET I/O controller
- PROFINET shared I-Device for 4 controllers
- PROFINET IO IRT interface with integrated 3-port switch
- Isochronous mode on PROFINET
- With multiple communication options: PG/OP communication, PROFINET IO, open IE communication (TCP, ISO-on-TCP and UDP), web server and S7 communication (with loadable FBs)
- Optional PROFIBUS DP master for 125 PROFIBUS DP slaves (with CM DP module 6ES7545-5DA00-0AB0)
- Optional PROFIBUS DP slave (with CM DP module 6ES7545-5DA00-0AB0)
- Configuration control (option handling)
- Integrated motion control functionalities for controlling speed-controlled and positioning axes, support for external encoders

#### Note

SIMATIC Memory Card required for operation of the CPU. The BusAdapter is not included in the scope of supply and is to be ordered separately. No BusAdapter can be inserted with the variant for the temperature range -40...+70 °C.

SIPLUS extreme products are based on SIMATIC standard products. The contents listed here were taken from the respective standard products. SIPLUS extreme-specific information was added.

#### Ordering data

##### SIPLUS CPU 1510SP-1 PN

(Extended temperature range and exposure to environmental substances)

Work memory 100 KB for program, 750 KB for data, PROFINET IO IRT interface; SIMATIC Memory Card required

Temperature range -40 ... +60 °C

**6AG1510-1DJ01-2AB0**

Temperature range -40 ... +70 °C; No BusAdapter can be inserted

**6AG1510-1DJ01-7AB0**

##### Accessories

##### BusAdapter BA 2xRJ45

**6AG1193-6AR00-7AA0**

(Extended temperature range and exposure to environmental substances)

##### BusAdapter BA 2xFC for increased vibration and EMC loads

**6AG1193-6AF00-7AA0**

(Extended temperature range and exposure to environmental substances)

##### IE FC RJ45 plugs

RJ45 plug connector for Industrial Ethernet with a rugged metal enclosure and integrated insulation displacement contacts for connecting Industrial Ethernet FC installation cables

##### IE FC RJ45 plug 180

(Extended temperature range and exposure to environmental substances)

180° cable outlet

1 unit

**6AG1901-1BB10-7AA0**

##### SIPLUS Mounting Kit ET 200SP

**6AG1193-6AA00-0AA0**

Mounting accessories for use with increased mechanical vibration and shock loads.

Not approved for SIPLUS CPU 6AG1510-1DJ01-7AB0 and BusAdapter BA 2xRJ45

##### Other accessories

See SIMATIC ET 200SP CPU 1510SP-1 PN, page 7/2

### SIPLUS CPU 1512SP-1 PN

#### Overview

7

- SIPLUS CPU 1512SP-1 PN for SIPLUS ET 200SP based on SIPLUS S7-1500 CPU 1513-1 PN
- For applications with medium requirements regarding the program scope and processing speed, for distributed setup via PROFINET IO or PROFIBUS DP.
- Increase in availability of systems and machines
- PROFINET IO controller for up to 128 IO devices
- PROFINET I-Device for connecting the CPU as an intelligent PROFINET device with a SIMATIC or non-Siemens PROFINET I/O controller
- PROFINET shared I-Device for 4 controllers
- PROFINET IO IRT interface with integrated 3-port switch
- Isochronous mode on PROFINET
- With multiple communication options: PG/OP communication, PROFINET IO, open IE communication (TCP, ISO-on-TCP and UDP), web server and S7 communication (with loadable FBs)
- Optional PROFIBUS DP master for 125 PROFIBUS DP slaves (with CM DP module 6ES7545-5DA00-0AB0)
- Optional PROFIBUS DP slave (with CM DP module 6ES7545-5DA00-0AB0)
- Configuration control (option handling)
- Integrated motion control functionalities for controlling speed-controlled and positioning axes, support for external encoders

### CPU 1510SP F-1 PN

#### Overview

- CPU 1510SP F-1 PN for SIMATIC ET 200SP based on S7-1500 CPU 1511F-1 PN
- For high-performance control solutions using ET 200SP
- Increase in availability of systems and machines
- Supports PROFIsafe in centralized and distributed configuration
- PROFINET IO controller for up to 64 IO devices
- PROFINET I-Device for connecting the CPU as an intelligent PROFINET device with a SIMATIC or non-Siemens PROFINET IO controller
- PROFINET shared I-Device for 4 controllers
- PROFINET IO IRT interface with integrated 3-port switch
- Isochronous mode on PROFINET
- With multiple communication options: Programming device/OP communication, PROFINET IO, open IE communication (TCP, ISO-on-TCP and UDP), web server and S7 communication (with loadable FBs)
- OPC UA Server and Client (Data Access) as runtime option for easy connection of the SIMATIC ET 200SP to non-Siemens devices/systems
- Optional PROFIBUS master for 125 PROFIBUS DP slaves (with CM DP module 6ES7545-5DA00-0AB0)
- Configuration control (option handling)
- Integrated Motion Control functionalities for controlling speed-controlled and positioning axes, support for external encoders

#### Note

SIMATIC Memory Card required for operation of the CPU.

## Distributed Controllers

based on ET 200SP

Fail-safe CPUs

### CPU 1510SP F-1 PN

#### Technical specifications

Article number	<b>6ES7510-1SJ01-0AB0</b> CPU1510SP F-1 PN, 150KB Prog./750KB Data
<b>General information</b>	
Product type designation	CPU 1510SP F-1 PN
<b>Engineering with</b>	
• STEP 7 TIA Portal configurable/ integrated from version	V17 (FW V2.9) / V13 SP1 Update 4 (FW V1.8) or higher
<b>Supply voltage</b>	
Type of supply voltage	24 V DC
<b>Memory</b>	
<b>Work memory</b>	
• integrated (for program)	150 kbyte
• integrated (for data)	750 kbyte
<b>Load memory</b>	
• Plug-in (SIMATIC Memory Card), max.	32 Gbyte
<b>CPU processing times</b>	
for bit operations, typ.	72 ns
for word operations, typ.	86 ns
for fixed point arithmetic, typ.	115 ns
for floating point arithmetic, typ.	461 ns
<b>Counters, timers and their retentivity</b>	
<b>S7 counter</b>	
• Number	2 048
<b>IEC counter</b>	
• Number	Any (only limited by the main memory)
<b>S7 times</b>	
• Number	2 048
<b>IEC timer</b>	
• Number	Any (only limited by the main memory)
<b>Data areas and their retentivity</b>	
<b>Flag</b>	
• Size, max.	16 kbyte
<b>Address area</b>	
<b>I/O address area</b>	
• Inputs	32 kbyte; All inputs are in the process image
• Outputs	32 kbyte; All outputs are in the process image
<b>Address space per module</b>	
• Address space per module, max.	288 byte; For input and output data respectively
<b>Address space per station</b>	
• Address space per station, max.	2 560 byte; for central inputs and outputs; depending on configuration; 2 048 bytes for ET 200SP modules + 512 bytes for ET 200AL modules
<b>Time of day</b>	
<b>Clock</b>	
• Type	Hardware clock

Article number	<b>6ES7510-1SJ01-0AB0</b> CPU1510SP F-1 PN, 150KB Prog./750KB Data
<b>1. Interface</b>	
<b>Interface types</b>	
• RJ 45 (Ethernet)	Yes; X1 P3; opt. X1 P1 and X1 P2 via BusAdapter BA 2x RJ45
• Number of ports	3; 1. integr. + 2. via BusAdapter
• integrated switch	Yes
• BusAdapter (PROFINET)	Yes; compatible BusAdapters: BA 2x RJ45, BA 2x FC, BA 2x M12
<b>Protocols</b>	
• IP protocol	Yes; IPv4
• PROFINET IO Controller	Yes
• PROFINET IO Device	Yes
• SIMATIC communication	Yes
• Open IE communication	Yes; Optionally also encrypted
• Web server	Yes
• Media redundancy	Yes; MRP Automanager according to IEC 62439-2 Edition 2.0
<b>PROFINET IO Controller Services</b>	
- PG/OP communication	Yes
- Isochronous mode	Yes
- Direct data exchange	Yes; Requirement: IRT and isochronous mode (MRPD optional)
- IRT	Yes
- PROFIenergy	Yes; per user program
- Prioritized startup	Yes; Max. 32 PROFINET devices
- Number of connectable IO Devices, max.	64; In total, up to 256 distributed I/O devices can be connected via AS-i, PROFIBUS or PROFINET
- Of which IO devices with IRT, max.	64
- Number of connectable IO Devices for RT, max.	64
- of which in line, max.	64
- Number of IO Devices that can be simultaneously activated/ deactivated, max.	8; in total across all interfaces
- Number of IO Devices per tool, max.	8
- Updating times	The minimum value of the update time also depends on communication share set for PROFINET IO, on the number of IO devices, and on the quantity of configured user data
<b>PROFINET IO Device Services</b>	
- PG/OP communication	Yes
- Isochronous mode	No
- IRT	Yes
- PROFIenergy	Yes; per user program
- Shared device	Yes
- Number of IO Controllers with shared device, max.	4
- activation/deactivation of I-devices	Yes; per user program
- Asset management record	Yes; per user program

**Technical specifications**

Article number	<b>6ES7510-1SJ01-0AB0</b> CPU1510SP F-1 PN, 150KB Prog./750KB Data
<b>2. Interface</b>	
<b>Interface types</b>	
• RS 485	Yes; Via CM DP module
• Number of ports	1
<b>Protocols</b>	
• PROFIBUS DP master	Yes
• PROFIBUS DP slave	Yes
• SIMATIC communication	Yes
<b>PROFIBUS DP master</b>	
• Number of DP slaves, max.	125; In total, up to 256 distributed I/O devices can be connected via AS-i, PROFIBUS or PROFINET
<b>Protocols</b>	
<b>Number of connections</b>	
• Number of connections, max.	96; via integrated interfaces of the CPU and connected CPs / CMs
<b>Redundancy mode</b>	
<b>Media redundancy</b>	
- Media redundancy	Yes; only via BusAdapter
- MRP	Yes; MRP Automanager according to IEC 62439-2 Edition 2.0, MRP Manager; MRP Client
- MRP interconnection, supported	Yes; as MRP ring node according to IEC 62439-2 Edition 3.0
- MRPD	Yes; Requirement: IRT
- Switchover time on line break, typ.	200 ms; For MRP, bumpless for MRPD
- Number of stations in the ring, max.	50
<b>SIMATIC communication</b>	
• S7 routing	Yes
<b>OPC UA</b>	
• OPC UA Client	Yes
• OPC UA Server	Yes; Data access (read, write, subscribe), method call, custom address space
• Alarms and Conditions	Yes
<b>Supported technology objects</b>	
Motion Control	Yes; Note: The number of technology objects affects the cycle time of the PLC program; selection guide via the TIA Selection Tool
• Number of available Motion Control resources for technology objects	800
• Required Motion Control resources	
- per speed-controlled axis	40
- per positioning axis	80
- per synchronous axis	160
- per external encoder	80
- per output cam	20
- per cam track	160
- per probe	40
Controller	
• PID_Compact	Yes; Universal PID controller with integrated optimization
• PID_3Step	Yes; PID controller with integrated optimization for valves
• PID-Temp	Yes; PID controller with integrated optimization for temperature
Counting and measuring	
• High-speed counter	Yes

Article number	<b>6ES7510-1SJ01-0AB0</b> CPU1510SP F-1 PN, 150KB Prog./750KB Data
<b>Standards, approvals, certificates</b>	
<b>Highest safety class achievable in safety mode</b>	
<b>Probability of failure (for service life of 20 years and repair time of 100 hours)</b>	
- Low demand mode: PFDavg in accordance with SIL3	< 2.00E-05
- High demand/continuous mode: PFH in accordance with SIL3	< 1.00E-09
<b>Ambient conditions</b>	
<b>Ambient temperature during operation</b>	
• horizontal installation, min.	-25 °C; No condensation
• horizontal installation, max.	60 °C
• vertical installation, min.	-25 °C; No condensation
• vertical installation, max.	50 °C
<b>Altitude during operation relating to sea level</b>	
• Installation altitude above sea level, max.	5 000 m; Restrictions for installation altitudes > 2 000 m, see manual
<b>Configuration</b>	
<b>Programming</b>	
<b>Programming language</b>	
- LAD	Yes; incl. failsafe
- FBD	Yes; incl. failsafe
- STL	Yes
- SCL	Yes
- GRAPH	Yes
<b>Know-how protection</b>	
• User program protection/ password protection	Yes
• Copy protection	Yes
• Block protection	Yes
<b>Access protection</b>	
• protection of confidential configuration data	Yes
• Protection level: Write protection	Yes
• Protection level: Read/write protection	Yes
• Protection level: Write protection for Failsafe	Yes
• Protection level: Complete protection	Yes
<b>Dimensions</b>	
Width	100 mm
Height	117 mm
Depth	75 mm
<b>Weights</b>	
Weight, approx.	310 g

## Distributed Controllers

based on ET 200SP

Fail-safe CPUs

### CPU 1512SP F-1 PN

#### Overview

- CPU 1512SP F-1 PN for SIMATIC ET 200SP based on S7-1500 CPU 1513F-1 PN
- For applications with medium requirements in terms of program scope and processing speed, for distributed configurations via PROFINET IO or PROFIBUS DP.
- Increase in availability of systems and machines
- Supports PROFI-safe in centralized and distributed configuration
- PROFINET IO controller for up to 128 IO devices
- PROFINET I-Device for connecting the CPU as an intelligent PROFINET device with a SIMATIC or non-Siemens PROFINET IO controller
- PROFINET shared I-Device for 4 controllers
- PROFINET IO IRT interface with integrated 3-port switch
- Isochronous mode on PROFINET
- With multiple communication options: Programming device/OP communication, PROFINET IO, open IE communication (TCP, ISO-on-TCP and UDP), web server and S7 communication (with loadable FBs)
- OPC UA Server and Client (Data Access) as runtime option for easy connection of the SIMATIC ET 200SP to non-Siemens devices/systems
- Optional PROFIBUS master for 125 PROFIBUS DP slaves (with CM DP module 6ES7545-5DA00-0AB0)
- Configuration control (option handling)
- Integrated Motion Control functionalities for controlling speed-controlled and positioning axes, support for external encoders

#### Note

SIMATIC Memory Card required for operation of the CPU.

The BusAdapter is not included in the scope of supply and must be ordered separately.

#### Ordering data

#### Article No.

**CPU 1512SP F-1 PN** **6ES7512-1SK01-0AB0**

300 KB work memory for program, 1 MB for data, PROFINET IO IRT interface, SIMATIC Memory Card required

#### Accessories

**CM DP for ET 200SP CPU** **6ES7545-5DA00-0AB0**

PROFIBUS DP master/slave with electrical interface for connecting the ET 200SP CPUs to PROFIBUS at up to 12 Mbps

#### SIMATIC Memory Card

4 MB	<b>6ES7954-8LC03-0AA0</b>
12 MB	<b>6ES7954-8LE03-0AA0</b>
24 MB	<b>6ES7954-8LF03-0AA0</b>
256 MB	<b>6ES7954-8LL03-0AA0</b>
2 GB	<b>6ES7954-8LP03-0AA0</b>
32 GB	<b>6ES7954-8LT03-0AA0</b>

#### DIN rail, 35 mm

• Length 483 mm for 19" cabinets	<b>6ES710-8MA11</b>
• Length 530 mm for 600 mm cabinets	<b>6ES710-8MA21</b>
• Length 830 mm for 900 mm cabinets	<b>6ES710-8MA31</b>
• Length 2 m	<b>6ES710-8MA41</b>

**PE connection element for 2 000 mm DIN rail** **6ES7590-5AA00-0AA0**

**BusAdapter BA 2xRJ45** **6ES7193-6AR00-0AA0**

**BusAdapter BA 2xFC for increased vibration and EMC loads** **6ES7193-6AF00-0AA0**

**BusAdapter BA 2xSCRJ** **6ES7193-6AP00-0AA0**

**BusAdapter BA SCRJ/RJ45** **6ES7193-6AP20-0AA0**

**BusAdapter BA SCRJ/FC** **6ES7193-6AP40-0AA0**

**Equipment labeling plate** **6ES7193-6LF30-0AW0**

10 sheets of 16 labels

#### Labeling strips

500 labeling strips on roll, light gray, for inscription with thermal transfer roll printer **6ES7193-6LR10-0AA0**

500 labeling strips on roll, yellow, for inscription with thermal transfer roll printer **6ES7193-6LR10-0AG0**

1 000 labeling strips DIN A4, light gray, card, for inscription with laser printer **6ES7193-6LA10-0AA0**

1 000 labeling strips DIN A4, yellow, card, for inscription with laser printer **6ES7193-6LA10-0AG0**

#### IE FC RJ45 plugs

RJ45 plug connector for Industrial Ethernet with a rugged metal enclosure and integrated insulation displacement contacts for connecting Industrial Ethernet FC installation cables

#### IE FC RJ45 plug 90

90° cable outlet	
1 unit	<b>6GK1901-1BB20-2AA0</b>

Fail-safe CPUs

### CPU 1512SP F-1 PN

#### Technical specifications

Article number	<b>6ES7512-1SK01-0AB0</b> CPU 1512SP F-1 PN, 300KB Prog./1MB Data
<b>General information</b>	
Product type designation	CPU 1512SP F-1 PN
<b>Engineering with</b>	
• STEP 7 TIA Portal configurable/ integrated from version	V17 (FW V2.9) / V13 SP1 Update 4 (FW V1.8) or higher
<b>Supply voltage</b>	
Type of supply voltage	24 V DC
<b>Memory</b>	
<b>Work memory</b>	
• integrated (for program)	300 kbyte
• integrated (for data)	1 Mbyte
<b>Load memory</b>	
• Plug-in (SIMATIC Memory Card), max.	32 Gbyte
<b>CPU processing times</b>	
for bit operations, typ.	48 ns
for word operations, typ.	58 ns
for fixed point arithmetic, typ.	77 ns
for floating point arithmetic, typ.	307 ns
<b>Counters, timers and their retentivity</b>	
<b>S7 counter</b>	
• Number	2 048
<b>IEC counter</b>	
• Number	Any (only limited by the main memory)
<b>S7 times</b>	
• Number	2 048
<b>IEC timer</b>	
• Number	Any (only limited by the main memory)
<b>Data areas and their retentivity</b>	
<b>Flag</b>	
• Size, max.	16 kbyte
<b>Address area</b>	
<b>I/O address area</b>	
• Inputs	32 kbyte; All inputs are in the process image
• Outputs	32 kbyte; All outputs are in the process image
<b>Address space per module</b>	
• Address space per module, max.	288 byte; For input and output data respectively
<b>Address space per station</b>	
• Address space per station, max.	2 560 byte; for central inputs and outputs; depending on configuration; 2 048 bytes for ET 200SP modules + 512 bytes for ET 200AL modules
<b>Time of day</b>	
<b>Clock</b>	
• Type	Hardware clock

Article number	<b>6ES7512-1SK01-0AB0</b> CPU 1512SP F-1 PN, 300KB Prog./1MB Data
<b>1. Interface</b>	
<b>Interface types</b>	
• RJ 45 (Ethernet)	Yes; X1 P3; opt. X1 P1 and X1 P2 via BusAdapter BA 2x RJ45
• Number of ports	3; 1. integr. + 2. via BusAdapter
• integrated switch	Yes
• BusAdapter (PROFINET)	Yes; compatible BusAdapters: BA 2x RJ45, BA 2x FC, BA 2x M12
<b>Protocols</b>	
• IP protocol	Yes; IPv4
• PROFINET IO Controller	Yes
• PROFINET IO Device	Yes
• SIMATIC communication	Yes
• Open IE communication	Yes; Optionally also encrypted
• Web server	Yes
• Media redundancy	Yes; MRP Automanager according to IEC 62439-2 Edition 2.0
<b>PROFINET IO Controller Services</b>	
- PG/OP communication	Yes
- Isochronous mode	Yes
- Direct data exchange	Yes; Requirement: IRT and isochronous mode (MRPD optional)
- IRT	Yes
- PROFIenergy	Yes; per user program
- Prioritized startup	Yes; Max. 32 PROFINET devices
- Number of connectable IO Devices, max.	128; In total, up to 512 distributed I/O devices can be connected via AS-i, PROFIBUS or PROFINET
- Of which IO devices with IRT, max.	64
- Number of connectable IO Devices for RT, max.	128
- of which in line, max.	128
- Number of IO Devices that can be simultaneously activated/ deactivated, max.	8; in total across all interfaces
- Number of IO Devices per tool, max.	8
- Updating times	The minimum value of the update time also depends on communication share set for PROFINET IO, on the number of IO devices, and on the quantity of configured user data
<b>PROFINET IO Device Services</b>	
- PG/OP communication	Yes
- Isochronous mode	No
- IRT	Yes
- PROFIenergy	Yes; per user program
- Shared device	Yes
- Number of IO Controllers with shared device, max.	4
- activation/deactivation of I-devices	Yes; per user program
- Asset management record	Yes; per user program

## Technical specifications

Article number	<b>6ES7512-1SK01-0AB0</b> CPU 1512SP F-1 PN, 300KB Prog./1MB Data
<b>2. Interface</b>	
<b>Interface types</b>	
• RS 485	Yes; Via CM DP module
• Number of ports	1
<b>Protocols</b>	
• PROFIBUS DP master	Yes
• PROFIBUS DP slave	Yes
• SIMATIC communication	Yes
<b>PROFIBUS DP master</b>	
• Number of DP slaves, max.	125; In total, up to 512 distributed I/O devices can be connected via AS-i, PROFIBUS or PROFINET
<b>Protocols</b>	
<b>Number of connections</b>	
• Number of connections, max.	128; via integrated interfaces of the CPU and connected CPs / CMs
<b>Redundancy mode</b>	
<b>Media redundancy</b>	
- Media redundancy	Yes; only via BusAdapter
- MRP	Yes; MRP Automanager according to IEC 62439-2 Edition 2.0, MRP Manager; MRP Client
- MRP interconnection, supported	Yes; as MRP ring node according to IEC 62439-2 Edition 3.0
- MRPD	Yes; Requirement: IRT
- Switchover time on line break, typ.	200 ms; For MRP, bumpless for MRPD
- Number of stations in the ring, max.	50
<b>SIMATIC communication</b>	
• S7 routing	Yes
<b>OPC UA</b>	
• OPC UA Client	Yes
• OPC UA Server	Yes; Data access (read, write, subscribe), method call, custom address space
<b>Supported technology objects</b>	
Motion Control	Yes; Note: The number of technology objects affects the cycle time of the PLC program; selection guide via the TIA Selection Tool
• Number of available Motion Control resources for technology objects	800
• Required Motion Control resources	
- per speed-controlled axis	40
- per positioning axis	80
- per synchronous axis	160
- per external encoder	80
- per output cam	20
- per cam track	160
- per probe	40
Controller	
• PID_Compact	Yes; Universal PID controller with integrated optimization
• PID_3Step	Yes; PID controller with integrated optimization for valves
• PID-Temp	Yes; PID controller with integrated optimization for temperature
Counting and measuring	
• High-speed counter	Yes

Article number	<b>6ES7512-1SK01-0AB0</b> CPU 1512SP F-1 PN, 300KB Prog./1MB Data
<b>Standards, approvals, certificates</b>	
<b>Highest safety class achievable in safety mode</b>	
<b>Probability of failure (for service life of 20 years and repair time of 100 hours)</b>	
- Low demand mode: PFDavg in accordance with SIL3	< 2.00E-05
- High demand/continuous mode: PFH in accordance with SIL3	< 1.00E-09
<b>Ambient conditions</b>	
<b>Ambient temperature during operation</b>	
• horizontal installation, min.	-25 °C; No condensation
• horizontal installation, max.	60 °C
• vertical installation, min.	-25 °C; No condensation
• vertical installation, max.	50 °C
<b>Altitude during operation relating to sea level</b>	
• Installation altitude above sea level, max.	5 000 m; Restrictions for installation altitudes > 2 000 m, see manual
<b>Configuration</b>	
<b>Programming</b>	
<b>Programming language</b>	
- LAD	Yes; incl. failsafe
- FBD	Yes; incl. failsafe
- STL	Yes
- SCL	Yes
- GRAPH	Yes
<b>Know-how protection</b>	
• User program protection/password protection	Yes
• Copy protection	Yes
• Block protection	Yes
<b>Access protection</b>	
• protection of confidential configuration data	Yes
• Protection level: Write protection	Yes
• Protection level: Read/write protection	Yes
• Protection level: Write protection for Failsafe	Yes
• Protection level: Complete protection	Yes
<b>Dimensions</b>	
Width	100 mm
Height	117 mm
Depth	75 mm
<b>Weights</b>	
Weight, approx.	310 g

## Distributed Controllers

based on ET 200SP  
SIPLUS fail-safe CPUs

### SIPLUS CPU 1510SP F-1 PN

#### Overview

- SIPLUS CPU 1510SP F-1 PN for SIPLUS ET 200SP based on S7-1500 CPU 1511F-1 PN
- For high-performance control solutions using ET 200SP
- Increase in availability of systems and machines
- Supports PROFIsafe in centralized and distributed configuration
- PROFINET IO controller for up to 64 IO devices
- PROFINET I-Device for connecting the CPU as an intelligent PROFINET device with a SIMATIC or non-Siemens PROFINET I/O controller
- PROFINET shared I-Device for 4 controllers
- PROFINET IO IRT interface with integrated 3-port switch
- Isochronous mode on PROFINET
- With multiple communication options: PG/OP communication, PROFINET IO, open IE communication (TCP, ISO-on-TCP and UDP), web server and S7 communication (with loadable FBs)
- Optional PROFIBUS master for 125 PROFIBUS DP slaves (with CM DP module 6ES7545-5DA00-0AB0)
- Configuration control (option handling)
- Integrated Motion Control functionalities for controlling speed-controlled and positioning axes, support for external encoders

#### Note

SIMATIC Memory Card required for operation of the CPU.

The BusAdapter is not included in the scope of supply and must be ordered separately.

SIPLUS extreme products are based on SIMATIC standard products. The contents listed here were taken from the corresponding standard products. SIPLUS extreme-specific information was added.

#### Ordering data

#### Article No.

##### SIPLUS CPU 1510SP F-1 PN

6AG1510-1SJ01-2AB0

(Extended temperature range and exposure to environmental substances)

Work memory 150 KB for program, 750 KB for data, PROFINET IO IRT interface; SIMATIC Memory Card required

##### Accessories

**Technical specifications**

Article number	<b>6AG1510-1SJ01-2AB0</b>
Based on	<b>6ES7510-1SJ01-0AB0</b> SIPLUS ET 200SP CPU 1510SP F-1PN
<b>Ambient conditions</b>	
<b>Ambient temperature during operation</b>	
• horizontal installation, min.	-25 °C; = Tmin
• horizontal installation, max.	60 °C; = Tmax
• vertical installation, min.	-25 °C; = Tmin
• vertical installation, max.	50 °C; = Tmax
<b>Altitude during operation relating to sea level</b>	
• Installation altitude above sea level, max.	5 000 m
• Ambient air temperature-barometric pressure-altitude	Restrictions for installation altitudes > 2 000 m, see entry ID: 109763260
<b>Relative humidity</b>	
• With condensation, tested in accordance with IEC 60068-2-38, max.	100 %; RH incl. condensation / frost (no commissioning in bedewed state), horizontal installation
<b>Resistance</b>	
<b>Coolants and lubricants</b>	
- Resistant to commercially available coolants and lubricants	Yes; Incl. diesel and oil droplets in the air
<b>Use in stationary industrial systems</b>	
- to biologically active substances according to EN 60721-3-3	Yes; Class 3B2 mold, fungus and dry rot spores (with the exception of fauna); Class 3B3 on request
- to chemically active substances according to EN 60721-3-3	Yes; Class 3C4 (RH < 75 %) incl. salt spray acc. to EN 60068-2-52 (severity degree 3); *
- to mechanically active substances according to EN 60721-3-3	Yes; Class 3S4 incl. sand, dust, *
- Against mechanical environmental conditions acc. to EN 60721-3-3	Yes; Class 3M8 using the SIPLUS Mounting Kit ET 200SP (6AG1193-6AA00-0AA0)
<b>Use on ships/at sea</b>	
- to biologically active substances according to EN 60721-3-6	Yes; Class 6B2 mold and fungal spores (excluding fauna); Class 6B3 on request
- to chemically active substances according to EN 60721-3-6	Yes; Class 6C3 (RH < 75 %) incl. salt spray acc. to EN 60068-2-52 (severity degree 3); *
- to mechanically active substances according to EN 60721-3-6	Yes; Class 6S3 incl. sand, dust; *
- Against mechanical environmental conditions acc. to EN 60721-3-6	Yes; Class 6M4 using the SIPLUS Mounting Kit ET 200SP (6AG1193-6AA00-0AA0)

Article number	<b>6AG1510-1SJ01-2AB0</b>
Based on	<b>6ES7510-1SJ01-0AB0</b> SIPLUS ET 200SP CPU 1510SP F-1PN
<b>Usage in industrial process technology</b>	
- Against chemically active substances acc. to EN 60654-4	Yes; Class 3 (excluding trichlorethylene)
- Environmental conditions for process, measuring and control systems acc. to ANSI/ISA-71.04	Yes; Level GX group A/B (excluding trichlorethylene; harmful gas concentrations up to the limits of EN 60721-3-3 class 3C4 permissible); level LC3 (salt spray) and level LB3 (oil)
<b>Remark</b>	
- Note regarding classification of environmental conditions acc. to EN 60721, EN 60654-4 and ANSI/ISA-71.04	* The supplied plug covers must remain in place over the unused interfaces during operation!
<b>Conformal coating</b>	
• Coatings for printed circuit board assemblies acc. to EN 61086	Yes; Class 2 for high reliability
• Protection against fouling acc. to EN 60664-3	Yes; Type 1 protection
• Military testing according to MIL-I-46058C, Amendment 7	Yes; Discoloration of coating possible during service life
• Qualification and Performance of Electrical Insulating Compound for Printed Board Assemblies according to IPC-CC-830A	Yes; Conformal coating, Class A

## Distributed Controllers

based on ET 200SP  
SIPLUS fail-safe CPUs

### SIPLUS CPU 1512SP F-1 PN

#### Overview

- SIPLUS CPU 1512SP F-1 PN for SIPLUS ET 200SP based on S7-1500 CPU 1513F-1 PN
- For applications with medium requirements in terms of program scope and processing speed, for distributed configurations via PROFINET IO or PROFIBUS DP.
- Increase in availability of systems and machines
- Supports PROFIsafe in centralized and distributed configuration
- PROFINET IO controller for up to 128 IO devices
- PROFINET I-Device for connecting the CPU as an intelligent PROFINET device with a SIMATIC or non-Siemens PROFINET I/O controller
- PROFINET shared I-Device for 4 controllers
- PROFINET IO IRT interface with integrated 3-port switch
- Isochronous mode on PROFINET
- With multiple communication options: PG/OP communication, PROFINET IO, open IE communication (TCP, ISO-on-TCP and UDP), web server and S7 communication (with loadable FBs)
- Optional PROFIBUS master for 125 PROFIBUS DP slaves (with CM DP module 6ES7545-5DA00-0AB0)
- Configuration control (option handling)
- Integrated Motion Control functionalities for controlling speed-controlled and positioning axes, support for external encoders

#### Note

SIMATIC Memory Card required for operation of the CPU.

The BusAdapter is not included in the scope of supply and must be ordered separately.

SIPLUS extreme products are based on SIMATIC standard products. The contents listed here were taken from the corresponding standard products. SIPLUS extreme-specific information was added.

## Distributed Controllers

based on ET 200SP

ET 200SP Open Controllers

Standard CPUs > CPU 1515SP PC2

### Overview

ET 200SP Open Controller, CPU 1515SP PC2, combines robustness and compact dimensions with the flexibility of centralized or decentralized communication in the highest industrial functionality. Furthermore, the CPU offers the entire value added of the ET 200SP system, the S7-1500 controller family and the TIA world together.

- Rugged, compact control system
- Combines the functions of an ET 200SP controller with those of a PC-based platform
- Turnkey all-in-one controller
- High performance automation tasks with the use of new generation Intel Quad Core processors
- Connects high-level language applications and processes high data volumes with support from SIMATIC ODK 1500S

7

### Ordering data

#### SIMATIC ET 200SP Open Controller CPU 1515SP PC2 (+ HMI)

ET 200SP central module with Windows 10 IoT Enterprise 64-bit and pre-installed SIMATIC S7-1500 Software Controller (optionally with WinCC RT Advanced); 8 GB RAM, 128 GB CFast card

Type of delivery:  
German, English, Chinese, Italian, French, Spanish

- CPU 1515SP PC2

With pre-installed WinCC RT Advanced

- CPU 1515SP PC2 + HMI 128PT
- CPU 1515SP PC2 + HMI 512PT
- CPU 1515SP PC2 + HMI 2048PT

#### Accessories

**BusAdapter BA 2xRJ45** 6ES7193-6AR00-0AA0

**BusAdapter BA 2xFC** 6ES7193-6AF00-0AA0

**BusAdapter BA 2xSCRJ** 6ES7193-6AP00-0AA0

**BusAdapter BA SCRJ/RJ45** 6ES7193-6AP20-0AA0

**BusAdapter BA SCRJ/FC** 6ES7193-6AP40-0AA0

For increased vibration and EMC loads

**BusAdapter BA 2XLC** 6ES7193-6AG00-0AA0

**BusAdapter BA LC/RJ45** 6ES7193-6AG20-0AA0

**BusAdapter BA LC/FC** 6ES7193-6AG40-0AA0

**CM DP for ET 200SP CPU** 6ES7545-5DA00-0AB0

PROFIBUS DP master with electrical interface for connecting the ET 200SP CPUs to PROFIBUS at up to 12 Mbps

**Server module** 6ES7193-6PA00-0AA0

Spare part

**Power supply connector** 6ES7193-4JB00-0AA0

Spare part; for connecting the 24 V DC supply voltage; with push-in terminals (10 units)

• Number of ports	2
• integrated switch	Yes
• BusAdapter (PROFINET)	Yes; Compatible BusAdapter: BA 2x RJ45, BA 2x FC, BA 2x SCRJ (from FS03, V2.2), BA SCRJ / RJ45 (from FS03, V3.1), BA SCRJ / FC (from FS03, V3.1), BA 2x LC (from FS03, V3.3), BA LC / RJ45 (from FS03, V3.3), BA LC / FC (from FS03, V3.3)
<b>Protocols</b>	
• PROFINET IO Controller	Yes
• PROFINET IO Device	Yes
• SIMATIC communication	Yes
• Open IE communication	Yes
• Web server	Yes

Article number	<b>6ES7677-2DB42-0GB0</b> CPU1515SP PC2
<b>PROFINET IO Controller</b>	
<b>Services</b>	
- Isochronous mode	Yes
- shortest clock pulse	500 µs
- IRT	Yes
- PROFIenergy	Yes
- Prioritized startup	Yes; max. 32 PROFINET devices; if you want to use the "Prioritized startup" functionality in STEP 7 for the PROFINET interface of the CPU, the CPU and the device must be separated by means of a switch (e.g. SCALANCE X205)
- Number of connectable IO Devices, max.	128
- Of which IO devices with IRT, max.	64
- of which in line, max.	64
- Number of connectable IO Devices for RT, max.	128
- of which in line, max.	128
- Number of IO Devices that can be simultaneously activated/deactivated, max.	8
- IO Devices changing during operation (partner ports), supported	Yes
- Number of IO Devices per tool, max.	8
- Updating times	The minimum value of the update time also depends on communication share set for PROFINET IO, on the number of IO devices, and on the quantity of configured user data
<b>Address area</b>	
- Inputs, max.	8 kbyte
- Outputs, max.	8 kbyte
<b>PROFINET IO Device</b>	
<b>Services</b>	
- Isochronous mode	No
- shortest clock pulse	500 µs
- IRT	Yes
- PROFIenergy	Yes
- Prioritized startup	Yes
- Shared device	Yes
- Number of IO Controllers with shared device, max.	4
- Asset management record	Yes
<b>2. Interface</b>	
Interface type	Integrated Ethernet interface
automatic detection of transmission rate	Yes
Autonegotiation	Yes
Autocrossing	Yes
<b>Interface types</b>	
• RJ 45 (Ethernet)	Yes; Integrated
- Transmission rate, max.	1 000 Mbit/s
- Industrial Ethernet status LED	No
• Number of ports	1

## Technical specifications

Article number	<b>6ES7677-2DB42-0GB0</b> CPU1515SP PC2
<b>3. Interface</b>	
Interface type	PROFIBUS with CM DP
Number of connections via this interface	44
<b>Interface types</b>	
• RS 485	Yes
<b>Protocols</b>	
• PROFIBUS DP master	Yes
• PROFIBUS DP slave	Yes
• SIMATIC communication	Yes
<b>PROFIBUS DP master</b>	
• Number of DP slaves, max.	125
<b>Services</b>	
- Equidistance	No

## Distributed Controllers

based on ET 200SP

ET 200SP Open Controllers

Fail-safe CPUs > CPU 1515SP PC2 F

### Overview

ET 200SP Open Controller, CPU 1515SP PC2 F, combines robustness and compact dimensions with the flexibility of centralized or decentralized communication in the highest industrial functionality. Furthermore, the CPU offers the entire value added of the ET 200SP system, the S7-1500 controller family and the TIA world together.

- Rugged, compact control system
- Combines the functions of an ET 200SP controller with those of a PC-based platform
- Turnkey all-in-one controller
- Can be used up to safety class SIL3 (Safety Integrity Level) according to IEC 61508 2nd Edition or PL e (Performance Level) according to ISO 13849
- High performance automation tasks with the use of new generation Intel Quad Core processors
- Connects high-level language applications and processes high data volumes with support from SIMATIC ODK 1500S

7

### Ordering data

#### SIMATIC ET 200SP Open Controller CPU 1515SP PC2 F (+ HMI)

Fail-safe ET 200SP CPU with Windows 10 IoT Enterprise 64-bit and pre-installed SIMATIC S7-1500 Failsafe Software Controller (optionally with WinCC RT Advanced); 8 GB RAM, 128 GB CFast card;

#### Type of delivery:

German, English, Chinese, Italian, French, Spanish

- CPU 1515SP PC2 F

With pre-installed WinCC RT Advanced

- CPU 1515SP PC2 F + HMI 128PT
- CPU 1515SP PC2 F + HMI 512PT
- CPU 1515SP PC2 F + HMI 2048PT

#### Accessories

**BusAdapter BA 2xRJ45** 6ES7193-6AR00-0AA0

**BusAdapter BA 2xFC** 6ES7193-6AF00-0AA0

**BusAdapter BA 2xSCRJ** 6ES7193-6AP00-0AA0

**BusAdapter BA SCRJ/RJ45** 6ES7193-6AP20-0AA0

**BusAdapter BA SCRJ/FC** 6ES7193-6AP40-0AA0

For increased vibration and EMC loads

**BusAdapter BA 2XLC** 6ES7193-6AG00-0AA0

**BusAdapter BA LC/RJ45** 6ES7193-6AG20-0AA0

**BusAdapter BA LC/FC** 6ES7193-6AG40-0AA0

**CM DP for ET 200SP CPU** 6ES7545-5DA00-0AB0

PROFIBUS DP master with electrical interface for connecting the ET 200SP CPUs to PROFIBUS at up to 12 Mbps

**Server module** 6ES7193-6PA00-0AA0

Spare part

**Power supply connector** 6ES7193-4JB00-0AA0

Spare part; for connecting the 24 V DC supply voltage; with push-in terminals (10 units)

**Technical specifications**

Article number	<b>6ES7677-2SB42-0GB0</b> CPU1515SP PC2 F
<b>General information</b>	
Product type designation	CPU 1515SP PC2 F
<b>Engineering with</b>	
• STEP 7 TIA Portal configurable/integrated from version	V16
<b>Installed software</b>	
• Visualization	No
• Control	S7-1500 Software Controller CPU 1505SP F
<b>Supply voltage</b>	
Type of supply voltage	24 V DC
<b>Processor</b>	
Processor type	Intel Atom E3940, 1.6 GHz, 4 cores
<b>Memory</b>	
Type of memory	DDR3L
Main memory	8 GB RAM
CFast memory card	Yes; 128 GB flash memory
<b>Work memory</b>	
• integrated (for program)	1.5 Mbyte
• integrated (for data)	5 Mbyte
• integrated (for CPU function library of CPU Runtime)	20 Mbyte
<b>Load memory</b>	
• integrated (on PC mass storage)	320 Mbyte
<b>CPU processing times</b>	
for bit operations, typ.	10 ns
for word operations, typ.	12 ns
for fixed point arithmetic, typ.	16 ns
for floating point arithmetic, typ.	64 ns
<b>Counters, timers and their retentivity</b>	
<b>S7 counter</b>	
• Number	2 048
<b>IEC counter</b>	
• Number	Any (only limited by the main memory)
<b>S7 times</b>	
• Number	2 048
<b>IEC timer</b>	
• Number	Any (only limited by the main memory)
<b>Data areas and their retentivity</b>	
<b>Flag</b>	
• Size, max.	16 kbyte
<b>Address area</b>	
<b>I/O address area</b>	
• Inputs	32 kbyte; All inputs are in the process image
• Outputs	32 kbyte; All outputs are in the process image
<b>Hardware configuration</b>	
Integrated power supply	Yes
<b>Time of day</b>	
<b>Clock</b>	
• Type	Hardware clock
• Hardware clock (real-time)	Yes; Resolution: 1 s
<b>Interfaces</b>	
Number of industrial Ethernet interfaces	2
Number of RS 485 interfaces	1; Via CM DP module
Number of USB interfaces	4; 2x USB 2.0, 2x USB 3.0 on front side
Number of SD card slots	1

ET 200SP Open Controllers

Technology CPUs > CPU 1515SP PC2 T

### Technical specifications

Article number	<b>6ES7677-2VB42-0GB0</b> CPU1515SP PC2 T
<b>Video interfaces</b>	
• Graphics interface	1x DisplayPort
<b>1. Interface</b>	
automatic detection of transmission rate	Yes
Autonegotiation	Yes
Autocrossing	Yes
Number of connections	88
<b>Interface types</b>	
• RJ 45 (Ethernet)	Yes; Via BusAdapter BA 2x RJ45
- Transmission rate, max.	100 Mbit/s
- Industrial Ethernet status LED	Yes
• Number of ports	2
• integrated switch	Yes
• BusAdapter (PROFINET)	Yes; Compatible BusAdapter: BA 2x RJ45, BA 2x FC, BA 2x SCRJ (from FS03, V2.2), BA SCRJ / RJ45 (from FS03, V3.1), BA SCRJ / FC (from FS03, V3.1), BA 2x LC (from FS03, V3.3), BA LC / RJ45 (from FS03, V3.3), BA LC / FC (from FS03, V3.3)
<b>Protocols</b>	
• PROFINET IO Controller	Yes
• PROFINET IO Device	Yes
• SIMATIC communication	Yes
• Open IE communication	Yes
• Web server	Yes
<b>PROFINET IO Controller</b>	
<b>Services</b>	
- Isochronous mode	Yes
- shortest clock pulse	500 µs
- IRT	Yes
- PROFlenergy	Yes
- Prioritized startup	Yes; max. 32 PROFINET devices; if you want to use the "Prioritized startup" functionality in STEP 7 for the PROFINET interface of the CPU, the CPU and the device must be separated by means of a switch (e.g. SCALANCE X205)
- Number of connectable IO Devices, max.	128
- Of which IO devices with IRT, max.	64
- of which in line, max.	64
- Number of connectable IO Devices for RT, max.	128
- of which in line, max.	128
- Number of IO Devices that can be simultaneously activated/ deactivated, max.	8
- IO Devices changing during oper- ation (partner ports), supported	Yes
- Number of IO Devices per tool, max.	8
- Updating times	The minimum value of the update time also depends on communication share set for PROFINET IO, on the number of IO devices, and on the quantity of configured user data
<b>Address area</b>	
- Inputs, max.	8 kbyte
- Outputs, max.	8 kbyte

Article number	<b>6ES7677-2VB42-0GB0</b> CPU1515SP PC2 T
<b>PROFINET IO Device</b>	
<b>Services</b>	
- Isochronous mode	No
- shortest clock pulse	500 µs
- IRT	Yes
- PROFlenergy	Yes
- Prioritized startup	Yes
- Shared device	Yes
- Number of IO Controllers with shared device, max.	4
- Asset management record	Yes
<b>2. Interface</b>	
Interface type	Integrated Ethernet interface
automatic detection of transmission rate	Yes
Autonegotiation	Yes
Autocrossing	Yes
<b>Interface types</b>	
• RJ 45 (Ethernet)	Yes; Integrated
- Transmission rate, max.	1 000 Mbit/s
- Industrial Ethernet status LED	No
• Number of ports	1
<b>3. Interface</b>	
Interface type	PROFIBUS with CM DP
Number of connections via this interface	44
<b>Interface types</b>	
• RS 485	Yes
<b>Protocols</b>	
• PROFIBUS DP master	Yes
• PROFIBUS DP slave	Yes
• SIMATIC communication	Yes
<b>PROFIBUS DP master</b>	
• Number of DP slaves, max.	125
<b>Services</b>	
- Equidistance	No
- Isochronous mode	No
<b>Address area</b>	
- Inputs, max.	8 kbyte
- Outputs, max.	8 kbyte
<b>Protocols</b>	
<b>Number of connections</b>	
• Number of connections, max.	88
<b>Redundancy mode</b>	
<b>Media redundancy</b>	
- Switchover time on line break, typ.	200 ms
- Number of stations in the ring, max.	50
<b>SIMATIC communication</b>	
• S7 routing	Yes
<b>OPC UA</b>	
• OPC UA Client	Yes; From SW CPU 1505SP V2.6
• OPC UA Server	Yes; Data access (read, write, subscribe), runtime license required

## Technical specifications

Article number	<b>6ES7677-2VB42-0GB0</b> CPU1515SP PC2 T
<b>Supported technology objects</b>	
Motion Control	Yes
• Number of available Motion Control resources for technology objects	2 400
• Required Motion Control resources	
- per speed-controlled axis	40; per axis
- per positioning axis	80; per axis
- per synchronous axis	160; per axis
- per external encoder	80; per external encoder
- per output cam	20; per cam
- per cam track	160; per cam track
- per probe	40; per probe
• Number of available Extended Motion Control resources for technology objects	120
• Required Extended Motion Control resources	
- per cam (1 000 points and 50 segments)	2
- for each set of kinematics	30
- Per leading axis proxy	3
Controller	
• PID_Compact	Yes; Universal PID controller with integrated optimization
• PID_3Step	Yes; PID controller with integrated optimization for valves
• PID-Temp	Yes; PID controller with integrated optimization for temperature
Counting and measuring	
• High-speed counter	Yes
<b>Ambient conditions</b>	
<b>Ambient temperature during operation</b>	
• min.	-20 °C
• max.	Up to 60 °C with max. 32 ET 200SP modules; up to 55 °C with max. 64 ET 200SP modules
• horizontal installation, min.	-20 °C
• horizontal installation, max.	60 °C
• vertical installation, min.	-20 °C
• vertical installation, max.	50 °C; With max. 32 ET 200SP modules

Article number	<b>6ES7677-2VB42-0GB0</b> CPU1515SP PC2 T
<b>Operating systems</b>	
pre-installed operating system	Windows 10 IoT Enterprise 2016 LTSB, 64bit, MUI
<b>Configuration</b>	
<b>Programming</b>	
<b>Programming language</b>	
- LAD	Yes
- FBD	Yes
- STL	Yes
- SCL	Yes
- CFC	No
- GRAPH	Yes
<b>Know-how protection</b>	
• User program protection/ password protection	Yes
• Copy protection	Yes
• Block protection	Yes
<b>Access protection</b>	
• Protection level: Write protection	Yes
• Protection level: Read/write protection	Yes
• Protection level: Complete protection	Yes
<b>Open Development interfaces</b>	
• Size of ODK SO file, max.	5.8 Mbyte
<b>Peripherals/Options</b>	
SD card	Optionally for additional mass storage
<b>Dimensions</b>	
Width	160 mm
Height	117 mm
Depth	75 mm
<b>Weights</b>	
Weight, approx.	0.83 kg

## Distributed Controllers

based on ET 200SP

ET 200SP Open Controllers

Technology CPUs > CPU 1515SP PC2 TF

### Overview

ET 200SP Open Controller, CPU 1515SP PC2 TF, combines robustness and compact dimensions with the flexibility of centralized or decentralized communication in the highest industrial functionality. Furthermore, the CPU offers the entire value added of the ET 200SP system, the S7-1500 controller family and the TIA world together.

- Rugged, compact control system
- Combines the functions of a ET 200SP controller with those of a PC-based platform
- Turnkey all-in-one controller
- Can be used up to safety class SIL3 (Safety Integrity Level) according to IEC 61508 2nd Edition or PL e (Performance Level) according to ISO 13849
- High performance automation tasks with the use of new generation Intel Quad Core processors
- Connects high-level language applications and processes high data volumes with support from SIMATIC ODK 1500S

7

### Ordering data

#### SIMATIC ET 200SP Open Controller CPU 1515SP PC2 TF

Fail-safe ET 200SP central module with Windows 10 IoT Enterprise 64-bit and pre-installed fail-safe SIMATIC S7-1500 Software Controller (with WinCC RT Advanced option); 8 GB RAM, 128 GB CFast card; with extended Motion Control functionality

Type of delivery:  
German, English, Chinese, Italian, French, Spanish

- CPU 1515SP PC2 TF

With pre-installed  
WinCC RT Advanced

- CPU 1515SP PC2 TF + HMI 128PT
- CPU 1515SP PC2 TF + HMI 512PT
- CPU 1515SP PC2 TF + HMI 2048PT

#### Accessories

**BusAdapter BA 2xRJ45** 6ES7193-6AR00-0AA0

**BusAdapter BA 2xFC** 6ES7193-6AF00-0AA0

**BusAdapter BA 2xSCRJ** 6ES7193-6AP00-0AA0

**BusAdapter BA SCRJ/RJ45** 6ES7193-6AP20-0AA0

**BusAdapter BA SCRJ/FC** 6ES7193-6AP40-0AA0

For increased vibration and EMC loads

**BusAdapter BA 2XLC** 6ES7193-6AG00-0AA0

**BusAdapter BA LC/RJ45** 6ES7193-6AG20-0AA0

**BusAdapter BA LC/FC** 6ES7193-6AG40-0AA0

**CM DP for ET 200SP CPU** 6ES7545-5DA00-0AB0

PROFIBUS DP master with electrical interface for connecting the ET 200SP CPUs to PROFIBUS at up to 12 Mbps

**Server module** 6ES7193-6PA00-0AA0

Spare part

6ES7193-6LA10-0AA0

#### STEP 7 Professional V17

Target system:  
SIMATIC S7-1200, S7-1500, S7-300, S7-400, WinAC

Requirement:

- Windows 10 (64-bit)
  - Windows 10 Professional Version 1909, 2004, 20H2
  - Windows 10 Enterprise Version 1909, 2004, 20H2
  - Windows 10 IoT Enterprise 2016 LTSC
  - Windows 10 IoT Enterprise 2019 LTSC

Windows Server (64-bit)
 

- Windows Server 2016 Standard (full installation)
- Windows Server 2019 Standard (full installation)

Type of delivery:  
9 languages: de, en, zh included, fr, sp, it, ru, jp, kr as download

- Industrial Ethernet status LED	Yes
• Number of ports	2
• integrated switch	Yes
• BusAdapter (PROFINET)	Yes; Compatible BusAdapter: BA 2x RJ45, BA 2x FC, BA 2x SCRJ (from FS03, V2.2), BA SCRJ / RJ45 (from FS03, V3.1), BA SCRJ / FC (from FS03, V3.1), BA 2x LC (from FS03, V3.3), BA LC / RJ45 (from FS03, V3.3), BA LC / FC (from FS03, V3.3)
<b>Protocols</b>	
• PROFINET IO Controller	Yes
• PROFINET IO Device	Yes
• SIMATIC communication	Yes
• Open IE communication	Yes
• Web server	Yes
<b>PROFINET IO Controller</b>	
<b>Services</b>	
- Isochronous mode	Yes
- shortest clock pulse	500 µs
- IRT	Yes
- PROFINergy	Yes
- Prioritized startup	Yes; max. 32 PROFINET devices; if you want to use the "Prioritized startup" functionality in STEP 7 for the PROFINET interface of the CPU, the CPU and the device must be separated by means of a switch (e.g. SCALANCE X205)
- Number of connectable IO Devices, max.	128
- Of which IO devices with IRT, max.	64
- of which in line, max.	64
- Number of connectable IO Devices for RT, max.	128
- of which in line, max.	128
- Number of IO Devices that can be simultaneously activated/ deactivated, max.	8
- IO Devices changing during operation (partner ports), supported	Yes
- Number of IO Devices per tool, max.	8
- Updating times	The minimum value of the update time also depends on communication share set for PROFINET IO, on the number of IO devices, and on the quantity of configured user data
<b>Address area</b>	
- Inputs, max.	8 kbyte
- Outputs, max.	8 kbyte

Article number	<b>6ES7677-2WB42-0GB0</b> CPU1515SP PC2 TF
<b>PROFINET IO Device</b>	
<b>Services</b>	
- Isochronous mode	No
- shortest clock pulse	500 µs
- IRT	Yes
- PROFINergy	Yes
- Prioritized startup	Yes
- Shared device	Yes
- Number of IO Controllers with shared device, max.	4
- Asset management record	Yes
<b>2. Interface</b>	
Interface type	Integrated Ethernet interface
automatic detection of transmission rate	Yes
Autonegotiation	Yes
Autocrossing	Yes
<b>Interface types</b>	
• RJ 45 (Ethernet)	Yes; Integrated
- Transmission rate, max.	1 000 Mbit/s
- Industrial Ethernet status LED	No
• Number of ports	1
<b>3. Interface</b>	
Interface type	PROFIBUS with CM DP
Number of connections via this interface	44
<b>Interface types</b>	
• RS 485	Yes
<b>Protocols</b>	
• PROFIBUS DP master	Yes
• PROFIBUS DP slave	Yes
• SIMATIC communication	Yes
<b>PROFIBUS DP master</b>	
• Number of DP slaves, max.	125
<b>Services</b>	
- Equidistance	No
- Isochronous mode	No
<b>Address area</b>	
- Inputs, max.	8 kbyte
- Outputs, max.	8 kbyte
<b>Protocols</b>	
<b>Number of connections</b>	
• Number of connections, max.	88
<b>Redundancy mode</b>	
<b>Media redundancy</b>	
- Switchover time on line break, typ.	200 ms
- Number of stations in the ring, max.	50
<b>SIMATIC communication</b>	
• S7 routing	Yes
<b>OPC UA</b>	
• OPC UA Client	Yes; From SW CPU 1505SP V2.6
• OPC UA Server	Yes; Data access (read, write, subscribe), runtime license required

## Technical specifications

Article number	<b>6ES7677-2WB42-0GB0</b> CPU1515SP PC2 TF
<b>Supported technology objects</b>	
Motion Control	Yes
• Number of available Motion Control resources for technology objects	2 400
• Required Motion Control resources	
- per speed-controlled axis	40; per axis
- per positioning axis	80; per axis
- per synchronous axis	160; per axis
- per external encoder	80; per external encoder
- per output cam	20; per cam
- per cam track	160; per cam track
- per probe	40; per probe
• Number of available Extended Motion Control resources for technology objects	120
• Required Extended Motion Control resources	
- per cam (1 000 points and 50 segments)	2
- for each set of kinematics	30
- Per leading axis proxy	3
Controller	
• PID_Compact	Yes; Universal PID controller with integrated optimization
• PID_3Step	Yes; PID controller with integrated optimization for valves
• PID-Temp	Yes; PID controller with integrated optimization for temperature
Counting and measuring	
• High-speed counter	Yes
<b>Standards, approvals, certificates</b>	
<b>Highest safety class achievable in safety mode</b>	
• Performance level according to ISO 13849-1	PL e
• SIL acc. to IEC 61508	SIL 3
<b>Probability of failure (for service life of 20 years and repair time of 100 hours)</b>	
- Low demand mode: PFDavg in accordance with SIL3	< 2.00E-05
- High demand/continuous mode: PFH in accordance with SIL3	< 1.00E-09 1/h
<b>Ambient conditions</b>	
<b>Ambient temperature during operation</b>	
• min.	-20 °C
• max.	Up to 60 °C with max. 32 ET 200SP modules; up to 55 °C with max. 64 ET 200SP modules
• horizontal installation, min.	-20 °C
• horizontal installation, max.	60 °C
• vertical installation, min.	-20 °C
• vertical installation, max.	50 °C; With max. 32 ET 200SP modules

Article number	<b>6ES7677-2WB42-0GB0</b> CPU1515SP PC2 TF
<b>Operating systems</b>	
pre-installed operating system	Windows 10 IoT Enterprise 2016 LTSP, 64bit, MUI
<b>Configuration</b>	
<b>Programming</b>	
<b>Programming language</b>	
- LAD	Yes; incl. failsafe
- FBD	Yes; incl. failsafe
- STL	Yes
- SCL	Yes
- CFC	No
- GRAPH	Yes
<b>Know-how protection</b>	
• User program protection/ password protection	Yes
• Copy protection	Yes
• Block protection	Yes
<b>Access protection</b>	
• Protection level: Write protection	Yes
• Protection level: Read/write protection	Yes
• Protection level: Complete protection	Yes
<b>Open Development interfaces</b>	
• Size of ODK SO file, max.	5.8 Mbyte
<b>Peripherals/Options</b>	
SD card	Optionally for additional mass storage
<b>Dimensions</b>	
Width	160 mm
Height	117 mm
Depth	75 mm
<b>Weights</b>	
Weight, approx.	0.83 kg

## Distributed Controllers

based on ET 200SP

SIPLUS ET 200SP Open Controllers

SIPLUS standard CPUs > SIPLUS CPU 1515SP PC2

### Overview

SIPLUS ET 200SP Open Controller, SIPLUS CPU 1515SP PC2, combines robustness and compact dimensions with the flexibility of centralized or decentralized communication in the highest industrial functionality. Furthermore, the CPU offers the entire value added of the SIPLUS ET 200SP system, the SIPLUS S7-1500 controller family and the TIA world together.

- Rugged, compact control system
- Combines the functions of a SIPLUS ET 200SP controller with those of a PC-based platform
- Turnkey all-in-one controller
- High performance automation tasks with the use of new generation Intel Quad Core processors
- Connects high-level language applications and processes high data volumes with support from SIMATIC ODK 1500S

#### Note

SIPLUS extreme products are based on SIMATIC standard products. The contents listed here were adopted from the respective standard products. SIPLUS extreme-specific information was added.

#### SIPLUS ET 200SP Open Controller CPU 1515SP PC2

(Extended temperature range and exposure to environmental substances)

SIPLUS ET 200SP CPU with Windows 10 IoT Enterprise 64-bit and pre-installed SIMATIC S7-1500 Software Controller; 8 GB RAM, 30 GB CFast card

Type of delivery:  
English, German, Chinese, Italian, French, Spanish

- SIPLUS CPU 1515SP PC2

**6AG1677-2DB42-2GB0**

Spare part, without CFast card

- SIPLUS CPU 1515SP PC2

**6AG1677-2DB40-2AA0**

#### Accessories

##### BusAdapter BA 2xRJ45

**6AG1193-6AR00-7AA0**

(Extended temperature range and exposure to environmental substances)

##### SIPLUS BusAdapter BA 2xFC

**6AG1193-6AF00-7AA0**

(Extended temperature range and exposure to environmental substances)

##### BusAdapter BA 2xSCRJ

**6AG1193-6AP00-2AA0**

(Extended temperature range and exposure to environmental substances)

##### BusAdapter BA 2xLC

**6AG1193-6AG00-2AA0**

(Extended temperature range and exposure to environmental substances)

##### SIPLUS Mounting Kit ET 200SP

**6AG1193-6AA00-0AA0**

Mounting accessories for use with increased mechanical vibration and shock loads. Not approved for SIPLUS BusAdapter BA 2xRJ45

#### Other accessories

See SIMATIC CPU 1515SP PC2, page 7/26

SIPLUS ET 200SP Open Controllers

SIPLUS fail-safe CPUs > SIPLUS CPU 1515SP PC2 F

### Overview

SIPLUS ET 200SP Open Controller, SIPLUS CPU 1515SP PC2 F, combines robustness and compact dimensions with the flexibility of centralized or decentralized communication in the highest industrial functionality. Furthermore, the CPU offers the entire value added of the SIPLUS ET 200SP system, the SIPLUS S7-1500 controller family and the TIA world together.

- Rugged, compact control system
- Combines the functions of a SIPLUS ET 200SP controller with those of a PC-based platform
- Turnkey all-in-one controller
- Can be used up to safety class SIL3 (Safety Integrity Level) according to IEC 61508 2nd Edition or PL e (Performance Level) according to ISO 13849
- High performance automation tasks with the use of new generation Intel Quad Core processors
- Connects high-level language applications and processes high data volumes with support from SIMATIC ODK 1500S

## Distributed Controllers

based on ET 200Pro  
Standard CPUs

### IM 154-8 PN/DP CPU

#### Overview

- CPU with PLC functionality equivalent to S7-315-2 PN/DP provides distributed intelligence for preprocessing
- Interface module for exchanging pre-processed I/O data between the ET 200pro and a higher-level master/IO controller via PROFIBUS DP/PROFINET IO
- PROFINET IO controller for operating distributed I/O on PROFINET
- Component-based Automation (CBA) on PROFINET
- PROFINET proxy for intelligent devices on PROFIBUS DP in Component-based Automation (CBA)
- PROFINET interface with 3-port switch
- Isochronous mode on PROFIBUS or PROFINET
- Integrated web server with the option of creating user-defined web pages
- CPU with PLC functionality equivalent to S7-315-2 PN/DP provides distributed intelligence for preprocessing
- Fast, simple and end-to-end programming of a system with modular programs via STEP 7
- Fail-safe IM 154-8F PN/DP CPU PROFIsafe available

#### Note

SIMATIC Micro Memory Card required for operation of CPU.

Standard CPUs

### CPU 1513pro-2 PN

#### Overview

- CPU 1513pro-2 PN for SIMATIC ET 200pro based on S7-1500 CPU 1513-1 PN
- For applications with medium requirements on the program scope and processing speed, for distributed setup via PROFINET IO.
- PROFINET IO controller for operating distributed I/O on PROFINET
- PROFINET I-Device for connecting the CPU as an intelligent PROFINET device with a SIMATIC or non-Siemens PROFINET IO controller
- PROFINET shared I-Device for 4 controllers
- PROFINET IO RT/IRT interface with integrated 3-port switch
- Additional PROFINET IO RT interface with separate IP address
- Isochronous mode on PROFINET
- Integrated motion control functionalities for controlling speed-controlled and positioning axes, support for external encoders, output cams/cam tracks and probes
- OPC UA Server and Client (data access) as runtime option for the easy connection of SIMATIC ET 200pro to non-Siemens devices/systems
- Integrated web server with the option of creating user-defined web pages

#### Note

SIMATIC Memory Card required for operation of the CPU.

## CPU 1513pro-2 PN

### Technical specifications

Article number	<b>6ES7513-2PL00-0AB0</b> ET 200pro: CPU 1513pro-2 PN
<b>General information</b>	
Product type designation	CPU 1513pro-2 PN
<b>Engineering with</b>	
• STEP 7 TIA Portal configurable/ integrated from version	V17 (FW V2.9) / V16 (FW V2.8) or higher
<b>Supply voltage</b>	
Type of supply voltage	24 V DC
<b>Memory</b>	
<b>Work memory</b>	
• integrated (for program)	300 kbyte
• integrated (for data)	1.5 Mbyte
<b>Load memory</b>	
• Plug-in (SIMATIC Memory Card), max.	32 Gbyte
<b>CPU processing times</b>	
for bit operations, typ.	40 ns
for word operations, typ.	48 ns
for fixed point arithmetic, typ.	64 ns
for floating point arithmetic, typ.	256 ns
<b>Counters, timers and their retentivity</b>	
<b>S7 counter</b>	
• Number	2 048
<b>IEC counter</b>	
• Number	Any (only limited by the main memory)
<b>S7 times</b>	
• Number	2 048
<b>IEC timer</b>	
• Number	Any (only limited by the main memory)
<b>Data areas and their retentivity</b>	
<b>Flag</b>	
• Size, max.	16 kbyte
<b>Address area</b>	
<b>I/O address area</b>	
• Inputs	32 kbyte; All inputs are in the process image
• Outputs	32 kbyte; All outputs are in the process image
<b>Time of day</b>	
<b>Clock</b>	
• Type	Hardware clock
<b>1. Interface</b>	
<b>Interface types</b>	
• RJ 45 (Ethernet)	Yes; X1 P3
• Number of ports	3; 2x M12 + 1x RJ45
• integrated switch	Yes
<b>Protocols</b>	
• IP protocol	Yes; IPv4
• PROFINET IO Controller	Yes
• PROFINET IO Device	Yes
• SIMATIC communication	Yes
• Open IE communication	Yes; Optionally also encrypted
• Web server	Yes
• Media redundancy	Yes; MRP Automanager according to IEC 62439-2 Edition 2.0

Article number	<b>6ES7513-2PL00-0AB0</b> ET 200pro: CPU 1513pro-2 PN
<b>PROFINET IO Controller</b>	
<b>Services</b>	
- PG/OP communication	Yes
- Isochronous mode	Yes
- Direct data exchange	Yes; Requirement: IRT and isochronous mode (MRPD optional)
- IRT	Yes
- PROFIenergy	Yes; per user program
- Prioritized startup	Yes; Max. 32 PROFINET devices
- Number of connectable IO Devices, max.	128; In total, up to 512 distributed I/O devices can be connected via AS-i, PROFIBUS or PROFINET
- Of which IO devices with IRT, max.	64
- Number of connectable IO Devices for RT, max.	128
- of which in line, max.	128
- Number of IO Devices that can be simultaneously activated/ deactivated, max.	8; in total across all interfaces
- Number of IO Devices per tool, max.	8
- Updating times	The minimum value of the update time also depends on communication share set for PROFINET IO, on the number of IO devices, and on the quantity of configured user data
<b>PROFINET IO Device</b>	
<b>Services</b>	
- PG/OP communication	Yes
- Isochronous mode	No
- IRT	Yes
- PROFIenergy	Yes; per user program
- Prioritized startup	No
- Shared device	Yes
- Number of IO Controllers with shared device, max.	4
- activation/deactivation of I-devices	Yes; per user program
- Asset management record	Yes; per user program
<b>2. Interface</b>	
<b>Interface types</b>	
• RJ 45 (Ethernet)	No
• Number of ports	1; 1x M12
• integrated switch	No
<b>Protocols</b>	
• IP protocol	Yes; IPv4
• PROFINET IO Controller	Yes
• PROFINET IO Device	Yes
• SIMATIC communication	Yes
• Open IE communication	Yes; Optionally also encrypted
• Web server	Yes
• Media redundancy	No

- Number of connectable IO Devices for RT, max.	32
- of which in line, max.	32
- Number of IO Devices that can be simultaneously activated/deactivated, max.	8; in total across all interfaces
- Number of IO Devices per tool, max.	8
- Updating times	The minimum value of the update time also depends on communication share set for PROFINET IO, on the number of IO devices, and on the quantity of configured user data
<b>PROFINET IO Device</b>	
<b>Services</b>	
- PG/OP communication	Yes
- Isochronous mode	No
- IRT	No
- PROFinergy	Yes; per user program
- Prioritized startup	No
- Shared device	Yes
- Number of IO Controllers with shared device, max.	4
- activation/deactivation of I-devices	Yes; per user program
- Asset management record	Yes; per user program
<b>Protocols</b>	
<b>Number of connections</b>	
• Number of connections, max.	128; Via integrated interfaces of the CPU
<b>Redundancy mode</b>	
<b>Media redundancy</b>	
- Media redundancy	Yes; only via 1st interface (X1)
- MRP	Yes; MRP Automanager according to IEC 62439-2 Edition 2.0, MRP Manager; MRP Client
- MRP interconnection, supported	Yes; as MRP ring node according to IEC 62439-2 Edition 3.0
- MRPD	Yes; Requirement: IRT
- Switchover time on line break, typ.	200 ms; For MRP, bumpless for MRPD
- Number of stations in the ring, max.	50
<b>SIMATIC communication</b>	
• S7 routing	Yes
<b>OPC UA</b>	
• OPC UA Client	Yes
• OPC UA Server	Yes; Data access (read, write, subscribe), method call, custom address space
• Alarms and Conditions	Yes

Article number	<b>6ES7513-2PL00-0AB0</b> ET 200pro: CPU 1513pro-2 PN
<b>Supported technology objects</b>	
Motion Control	Yes; Note: The number of technology objects affects the cycle time of the PLC program; selection guide via the TIA Selection Tool
• Number of available Motion Control resources for technology objects	800
• Required Motion Control resources	
- per speed-controlled axis	40
- per positioning axis	80
- per synchronous axis	160
- per external encoder	80
- per output cam	20
- per cam track	160
- per probe	40
<b>Controller</b>	
• PID_Compact	Yes; Universal PID controller with integrated optimization
• PID_3Step	Yes; PID controller with integrated optimization for valves
• PID-Temp	Yes; PID controller with integrated optimization for temperature
<b>Counting and measuring</b>	
• High-speed counter	Yes
<b>Ambient conditions</b>	
<b>Ambient temperature during operation</b>	
• horizontal installation, min.	-25 °C
• horizontal installation, max.	55 °C
• vertical installation, min.	-25 °C
• vertical installation, max.	55 °C

## Distributed Controllers

based on ET 200Pro  
Standard CPUs

### CPU 1516pro-2 PN

#### Overview

- CPU 1516pro-2 PN for SIMATIC ET 200pro based on S7-1500 CPU 1516-3 PN/DP
- For applications with high requirements on the program scope and processing speed, for distributed setup via PROFINET IO
- PROFINET IO controller for operating distributed I/O on PROFINET
- PROFINET I-Device for connecting the CPU as an intelligent PROFINET device with a SIMATIC or non-Siemens PROFINET IO controller
- PROFINET shared I-Device for 4 controllers
- PROFINET IO RT/IRT interface with integrated 3-port switch
- Additional PROFINET IO RT interface with separate IP address
- Isochronous mode on PROFINET
- Integrated Motion Control functionalities for controlling speed-controlled and positioning axes, support for external encoders, output cams/cam tracks and probes
- OPC UA Server and Client (Data Access) as runtime option for the easy connection of SIMATIC ET 200pro to non-Siemens devices/systems
- Integrated web server with the option of creating user-defined web pages

#### Note

SIMATIC Memory Card required for operation of the CPU

#### Ordering data

## CPU 1516pro-2 PN

### Technical specifications

Article number	<b>6ES7516-2PN00-0AB0</b> ET 200pro: CPU 1516PRO-2 PN
<b>General information</b>	
Product type designation	CPU 1516pro-2 PN
<b>Engineering with</b>	
• STEP 7 TIA Portal configurable/ integrated from version	V17 (FW V2.9) / V14 (FW V2.0) or higher
<b>Supply voltage</b>	
Type of supply voltage	24 V DC
<b>Memory</b>	
<b>Work memory</b>	
• integrated (for program)	1 Mbyte
• integrated (for data)	5 Mbyte
<b>Load memory</b>	
• Plug-in (SIMATIC Memory Card), max.	32 Gbyte
<b>CPU processing times</b>	
for bit operations, typ.	10 ns
for word operations, typ.	12 ns
for fixed point arithmetic, typ.	16 ns
for floating point arithmetic, typ.	64 ns
<b>Counters, timers and their retentivity</b>	
<b>S7 counter</b>	
• Number	2 048
<b>IEC counter</b>	
• Number	Any (only limited by the main memory)
<b>S7 times</b>	
• Number	2 048
<b>IEC timer</b>	
• Number	Any (only limited by the main memory)
<b>Data areas and their retentivity</b>	
<b>Flag</b>	
• Size, max.	16 kbyte
<b>Address area</b>	
<b>I/O address area</b>	
• Inputs	32 kbyte; All inputs are in the process image
• Outputs	32 kbyte; All outputs are in the process image
<b>Time of day</b>	
<b>Clock</b>	
• Type	Hardware clock
<b>1. Interface</b>	
<b>Interface types</b>	
• RJ 45 (Ethernet)	Yes; X1 P3
• Number of ports	3; 2x M12 + 1x RJ45
• integrated switch	Yes
<b>Protocols</b>	
• IP protocol	Yes; IPv4
• PROFINET IO Controller	Yes
• PROFINET IO Device	Yes
• SIMATIC communication	Yes
• Open IE communication	Yes; Optionally also encrypted
• Web server	Yes
• Media redundancy	Yes; MRP Automanager according to IEC 62439-2 Edition 2.0

Article number	<b>6ES7516-2PN00-0AB0</b> ET 200pro: CPU 1516PRO-2 PN
<b>PROFINET IO Controller</b>	
<b>Services</b>	
- PG/OP communication	Yes
- Isochronous mode	Yes
- Direct data exchange	Yes; Requirement: IRT and isochronous mode (MRPD optional)
- IRT	Yes
- PROFIenergy	Yes; per user program
- Prioritized startup	Yes; Max. 32 PROFINET devices
- Number of connectable IO Devices, max.	256; In total, up to 1 000 distributed I/O devices can be connected via AS-I, PROFIBUS or PROFINET
- Of which IO devices with IRT, max.	64
- Number of connectable IO Devices for RT, max.	256
- of which in line, max.	256
- Number of IO Devices that can be simultaneously activated/ deactivated, max.	8; in total across all interfaces
- Number of IO Devices per tool, max.	8
- Updating times	The minimum value of the update time also depends on communication share set for PROFINET IO, on the number of IO devices, and on the quantity of configured user data
<b>PROFINET IO Device</b>	
<b>Services</b>	
- PG/OP communication	Yes
- Isochronous mode	No
- IRT	Yes
- PROFIenergy	Yes; per user program
- Prioritized startup	No
- Shared device	Yes
- Number of IO Controllers with shared device, max.	4
- activation/deactivation of I-devices	Yes; per user program
- Asset management record	Yes; per user program
<b>2. Interface</b>	
<b>Interface types</b>	
• RJ 45 (Ethernet)	No
• Number of ports	1; 1x M12
• integrated switch	No
<b>Protocols</b>	
• IP protocol	Yes; IPv4
• PROFINET IO Controller	Yes
• PROFINET IO Device	Yes
• SIMATIC communication	Yes
• Open IE communication	Yes; Optionally also encrypted
• Web server	Yes
• Media redundancy	No

Weight, approx.	614 g

## Distributed Controllers

based on ET 200Pro

Fail-safe CPUs

### IM 154-8 F PN/DP CPU

#### Overview

- Interface module for SIMATIC ET 200pro with integrated fail-safe CPU
- CPU with PLC functionality equivalent to CPU S7-315F PN/DP; with distributed intelligence for preprocessing
- For constructing a fail-safe automation system for plants with increased safety requirements
- Complies with safety requirements up to SIL 3 according to IEC 61508, IEC 62061 and PL e according to ISO 13849.1:2006
- For high-performance control solutions in ET 200pro
- Increase in availability of systems and machines
- Integral web server with the option of creating user-defined web pages
- Isochronous mode on PROFIBUS or PROFINET
- PROFINET IO controller for up to 128 IO devices
- PROFINET interface with integrated 3-port switch
- With multiple communication options: PG/OP communication, PROFINET IO, PROFINET CBA, open IE communication (TCP, ISO-on-TCP and UDP), web server and S7-communication (with loadable FBs)
- Fast, simple and end-to-end programming of a system with modular programs via STEP 7
- Compact SIMATIC Micro Memory Card (MMC)

#### Note:

SIMATIC Micro Memory Card required for operation of CPU.

#### Ordering data

#### Article No.

##### IM 154-8 F PN/DP CPU interface module, V3.2

Fail-safe PROFINET IO controller for operating distributed I/O on PROFINET, with integrated PLC functionality.

- 512 KB work memory
- 1.5 MB work memory

**6ES7154-8FB01-0AB0**  
**6ES7154-8FX00-0AB0**

##### S7 Distributed Safety V5.4 SP5 Update 2 programming tool

#### Task:

Configuration software for configuring fail-safe user programs for SIMATIC S7-300F, S7-400F, WinAC RTX F, ET 200S, ET 200M, ET 200iSP, ET 200pro, ET 200eco, ET 200SP

#### Requirement:

Windows 7 SP1 (64-bit), Windows 10 Professional/Enterprise (64-bit), Windows Server 2008 R2 SP1 (64-bit), Windows Server 2012 R2 (64-bit), Windows Server 2016 (64-bit); STEP 7 as of V5.5 SP1; Please also consider the operating systems that have been released for the used STEP 7 version

Floating license for 1 user; software and documentation on DVD; license key on USB flash drive

**6ES7833-1FC02-0YA5**

Floating license for 1 user; software, documentation and license key for download<sup>1)</sup>; Email address required for delivery

**6ES7833-1FC02-0YH5**

##### S7 Distributed Safety upgrade

From V5.x to V5.4; floating license for 1 user; software and documentation on DVD; license key on USB flash drive

**6ES7833-1FC02-0YE5**

##### STEP 7 Safety Advanced V17

#### Task:

Engineering tool for configuring and programming fail-safe user programs for SIMATIC S7-1200 FC, S7-1500F, S7-1500F Software Controller, S7-300F, S7-400F, WinAC RTX F, ET 200SP F Controller and the fail-safe ET 200SP, ET 200MP, ET 200S, ET 200M, ET 200iSP, ET 200pro and ET 200eco I/O

#### Requirement:

STEP 7 Professional V17

#### Note:

As of TIA Portal V16, the SIMATIC STEP 7 Safety software is an integral component of the SIMATIC STEP 7 product setup. The functionality of SIMATIC STEP 7 Safety is activated by means of the license key supplied in each case.

Floating license for 1 user; license key on USB flash drive

#### Ordering data

##### 7/8" connecting cable to power supply

- 5-wire, 5 x 1.5 mm<sup>2</sup>, trailing, pre-assembled with two 7/8" plugs (axial cable outlet), 5-pin, up to 50 m, in various lengths:

- 1.5 m
- 2.0 m
- 3.0 m
- 5.0 m
- 10 m
- 15 m

- Other special lengths with 90° or 180° cable outlet

- Trailing power cable, 5 x 1.5 mm<sup>2</sup>, pre-assembled at both ends with 7/8" angled plugs (female contact insert at one end, male contact insert at the other end), in various lengths:

- 3.0 m
- 5.0 m
- 10 m

- Trailing power cable, 5 x 1.5 mm<sup>2</sup>, pre-assembled at one end with 7/8" angled plug with female contact insert (female contact insert at one end, other end open), in various lengths:

- 3.0 m
- 5.0 m
- 10 m

##### Power line

5-wire, 5 x 1.5 mm<sup>2</sup>, trailing type, sold by the meter, minimum order quantity 20 m, maximum order quantity 1 000 m.

##### 7/8" connection plug

For ET 200eco, with axial cable outlet

- With male contact insert, 5-pack
- With female contact insert, 5-pack
- Angled, with female contact insert, 1 unit
- Angled, with male contact insert, 1 unit

7/8" cover cap, 10 per pack

##### Twisted pair cables 4x2 with RJ45 plugs

- 0.5 m
- 1 m
- 2 m
- 6 m
- 10 m

##### Crossed twisted pair cables 4x2 with RJ45 plugs

- 0.5 m
- 1 m
- 2 m
- 6 m
- 10 m

##### M12 sealing cap

For protection of unused M12 connections with ET 200pro

##### M12 sealing caps with female thread

5 units

##### PROFIBUS M12 connecting cable

Pre-assembled, with two 5-pin M12 plugs/sockets, up to 100 m, in various lengths:

- 1.5 m
- 2.0 m
- 3.0 m
- 5.0 m
- 10 m
- 15 m

Other special lengths with 90° or 180° cable outlet

##### M12 bus termination connector for PROFIBUS, female contact insert

##### M12 bus termination connector for PROFIBUS, male contact insert

##### M12 plug connector, axial outlet, with male contact insert

##### PROFIBUS FC standard cable GP

Standard type with special design for quick mounting, 2-wire, shielded.

Sold by the meter; max. delivery unit 1 000 m, minimum order quantity 20 m.

##### PROFIBUS FC trailing cable

2-wire, shielded.

##### PROFIBUS FC food cable

2-wire, shielded.

Sold by the meter; max. delivery unit 1 000 m, minimum order quantity 20 m.

##### PROFIBUS FC robust cable

2-wire, shielded.

Sold by the meter; max. delivery unit 1 000 m, minimum order quantity 20 m.

##### PROFIBUS M12 connection plug

5-pin, B-coded, metal housing, 1 pack = 5 units.

- Female contact insert

## Overview

- Fail-safe CPU 1513pro F-2 PN for SIMATIC ET 200pro based on S7-1500 CPU 1513F-1 PN
- For applications with medium requirements on the program scope and processing speed, for distributed setup via PROFINET IO.
- Can be used for safety functions up to SIL 3 according to IEC 61508 and up to PL e according to ISO 13849
- PROFINET IO controller for operating distributed I/O on PROFINET
- PROFINET I-Device for connecting the CPU as an intelligent PROFINET device with a SIMATIC or non-Siemens PROFINET IO controller
- PROFIsafe in centralized and distributed configurations
- PROFINET shared I-Device for 4 controllers
- PROFINET IO RT/IRT interface with integrated 3-port switch
- Additional PROFINET IO RT interface with separate IP address
- Isochronous mode on PROFINET
- Integrated motion control functionalities for controlling speed-controlled and positioning axes, support for external encoders
- OPC UA Server and Client (data access) as runtime option for the easy connection of SIMATIC ET 200pro to non-Siemens devices/systems
- Integrated web server with the option of creating user-defined web pages

### Note

SIMATIC Memory Card required for operation of the CPU.

Article number	<b>6ES7513-2GL00-0AB0</b> ET 200pro: CPU 1513pro F-2 PN
<b>PROFINET IO Controller</b>	
<b>Services</b>	
- PG/OP communication	Yes
- Isochronous mode	Yes
- Direct data exchange	Yes; Requirement: IRT and isochronous mode (MRPD optional)
- IRT	Yes
- PROFINergy	Yes; per user program
- Prioritized startup	Yes; Max. 32 PROFINET devices
- Number of connectable IO Devices, max.	128; In total, up to 512 distributed I/O devices can be connected via AS-i, PROFIBUS or PROFINET
- Of which IO devices with IRT, max.	64
- Number of connectable IO Devices for RT, max.	128
- of which in line, max.	128
- Number of IO Devices that can be simultaneously activated/ deactivated, max.	8; in total across all interfaces
- Number of IO Devices per tool, max.	8
- Updating times	The minimum value of the update time also depends on communication share set for PROFINET IO, on the number of IO devices, and on the quantity of configured user data
<b>PROFINET IO Device</b>	
<b>Services</b>	
- PG/OP communication	Yes
- Isochronous mode	No
- IRT	Yes
- PROFINergy	Yes; per user program
- Prioritized startup	No
- Shared device	Yes
- Number of IO Controllers with shared device, max.	4
- activation/deactivation of I-devices	Yes; per user program
- Asset management record	Yes; per user program
<b>2. Interface</b>	
<b>Interface types</b>	
• RJ 45 (Ethernet)	No
• Number of ports	1; 1x M12
• integrated switch	No
<b>Protocols</b>	
• IP protocol	Yes; IPv4
• PROFINET IO Controller	Yes
• PROFINET IO Device	Yes
• SIMATIC communication	Yes
• Open IE communication	Yes; Optionally also encrypted
• Web server	Yes
• Media redundancy	No

**Overview**

- Fail-safe CPU 1516pro F-2 PN for SIMATIC ET 200pro based on S7-1500 CPU 1516F-3 PN/DP
- For applications with high requirements on the program scope and processing speed, for distributed setup via PROFINET IO
- Can be used for safety functions up to SIL 3 according to IEC 61508 and up to PL e according to ISO 13849
- PROFINET IO controller for operating distributed I/O on PROFINET

- PROFINET I-Device for connecting the CPU as an intelligent PROFINET device with a SIMATIC or non-Siemens PROFINET IO controller
- Supports PROFIsafe in centralized and distributed configurations
- PROFINET shared I-Device for 4 controllers
- PROFINET IO RT/IRT interface with integrated 3-port switch
- Additional PROFINET IO RT interface with separate IP address
- Isochronous mode on PROFINET
- Integrated Motion Control functionalities for controlling speed-controlled and positioning axes, support for external encoders
- OPC UA Server and Client (Data Access) as runtime option for the easy connection of SIMATIC ET 200pro to non-Siemens devices/systems
- Integrated web server with the option of creating user-defined web pages

Note

SIMATIC Memory Card required for operation of the CPU.

## Software Controllers

### SIMATIC S7-1500 Software Controllers Standard CPUs

#### CPU 1507S

#### Overview

- Software Controller for implementing the functions of a SIMATIC S7-1500 Controller on a SIMATIC IPC
- For use as a PC-based PLC in machines with distributed I/O via PROFINET and PROFIBUS
- For utilizing IPC onboard interfaces and PC plug-in cards for PROFINET and PROFIBUS connections
- Optimized for PC-based control tasks with the IPC427E Microbox PC and the IPC477E Panel PC
- Can also be used on the IPC227E, IPC627D, IPC627E and IPC827D Box PCs, the IPC277E, IPC677D and IPC677E Panel PCs, and the IPC647D, IPC647E, IPC847D and IPC847E Rack PCs
- Execution of functions and algorithms implemented with high-level languages under Windows (C/C++, C#, VB) and locally in the CPU 1507S (C/C++)
- Integrated Motion Control functionalities for controlling speed-controlled and positioning axes as well as synchronous operation, support for external encoders, precise position gearing between axes, output cams/cam tracks and probes
- Integrated web server for diagnostics with the option of creating user-defined web pages
- OPC UA server (data access) and client as runtime option for easy connection of the software controller to Windows applications or non-Siemens devices/systems

### Technical specifications

Article number	<b>6ES7672-7AC01-0YA0</b> SIMATIC Software Controller CPU 1507S
<b>General information</b>	
Product type designation	CPU 1507S
<b>Engineering with</b>	
• STEP 7 TIA Portal configurable/ integrated from version	V16 with HSP 287
<b>Memory</b>	
<b>Work memory</b>	
• integrated (for program)	5 Mbyte
• integrated (for data)	20 Mbyte
• integrated (for CPU function library of CPU Runtime)	50 Mbyte
<b>Load memory</b>	
• integrated (on PC mass storage)	320 Mbyte
<b>CPU processing times</b>	
for bit operations, typ.	1 ns; On IPC427E, Intel Xeon processor
for word operations, typ.	2 ns; On IPC427E, Intel Xeon processor
for fixed point arithmetic, typ.	2 ns; On IPC427E, Intel Xeon processor
for floating point arithmetic, typ.	2 ns; On IPC427E, Intel Xeon processor
<b>Counters, timers and their retentivity</b>	
<b>S7 counter</b>	
• Number	2 048
<b>IEC counter</b>	
• Number	Any (only limited by the main memory)
<b>S7 times</b>	
• Number	2 048
<b>IEC timer</b>	
• Number	Any (only limited by the main memory)
<b>Data areas and their retentivity</b>	
<b>Flag</b>	
• Size, max.	16 kbyte
<b>Address area</b>	
<b>I/O address area</b>	
• Inputs	32 kbyte
• Outputs	32 kbyte
<b>Time of day</b>	
<b>Clock</b>	
• Type	Software clock, synchronizable, no battery backup
<b>Interfaces</b>	
Number of interfaces	3
<b>1. Interface</b>	
Interface type	CP 1625
Number of connections	128
<b>Interface types</b>	
• RJ 45 (Ethernet)	Yes
- Transmission rate, max.	100 Mbit/s
- Industrial Ethernet status LED	Yes
• Number of ports	2
• integrated switch	Yes

Article number	<b>6ES7672-7AC01-0YA0</b> SIMATIC Software Controller CPU 1507S
<b>Protocols</b>	
• PROFINET IO Controller	Yes
• PROFINET IO Device	Yes
• SIMATIC communication	Yes
• Open IE communication	Yes
• Web server	Yes
• Media redundancy	Yes; MRP Automanager according to IEC 62439-2 Edition 2.0
<b>PROFINET IO Controller</b>	
<b>Services</b>	
- Isochronous mode	Yes
- Direct data exchange	Yes; Requirement: IRT and isochronous mode (MRPD optional)
- shortest clock pulse	500 µs
- IRT	Yes
- PROFIenergy	Yes
- Prioritized startup	Yes; max. 32 PROFINET devices; if you want to use the "Prioritized startup" functionality in STEP7 for the PROFINET interface of the CPU, the CPU and the device must be separated by means of a switch (e.g. SCALANCE X205) or CP1625
- Number of connectable IO Devices, max.	256
- Of which IO devices with IRT, max.	64
- Number of connectable IO Devices for RT, max.	256
- of which in line, max.	256
- Number of IO Devices that can be simultaneously activated/ deactivated, max.	8
- IO Devices changing during operation (partner ports), supported	Yes; the CPU and changing IO devices must be separated by a switch (e.g. SCALANCE X205)
- Number of IO Devices per tool, max.	8
- Updating times	The minimum value of the update time also depends on communication share set for PROFINET IO, on the number of IO devices, and on the quantity of configured user data
<b>Address area</b>	
- Inputs, max.	8 kbyte
- Outputs, max.	8 kbyte
<b>PROFINET IO Device</b>	
<b>Services</b>	
- PG/OP communication	Yes
- Isochronous mode	No
- IRT	Yes
- PROFIenergy	Yes
- Prioritized startup	Yes; if you want to use the "Prioritized startup" functionality in STEP 7 for the PROFINET interface of the CPU, the CPU and the device must be separated by means of a switch (e.g. SCALANCE X205)
- Shared device	Yes
- Number of IO Controllers with shared device, max.	4
- Asset management record	Yes

<b>3. Interface</b>	
Interface type	PROFIBUS with CP 5622, CP 5622 onboard
Number of connections via this interface	44
<b>Interface types</b>	
• RS 485	Yes
<b>Protocols</b>	
• PROFIBUS DP master	Yes
• PROFIBUS DP slave	No
• SIMATIC communication	Yes; no PG/STEP 7 connection possible
<b>PROFIBUS DP master</b>	
• Number of DP slaves, max.	64
<b>Services</b>	
- Equidistance	No
- Isochronous mode	No
<b>Address area</b>	
- Inputs, max.	8 kbyte
- Outputs, max.	8 kbyte
<b>4. Interface</b>	
Interface type	PROFIBUS with CP 5623
Number of connections via this interface	44
<b>Interface types</b>	
• RS 485	Yes
<b>Protocols</b>	
• PROFIBUS DP master	Yes
• PROFIBUS DP slave	No
• SIMATIC communication	Yes; no PG/STEP 7 connection possible
<b>PROFIBUS DP master</b>	
• Number of DP slaves, max.	125
<b>Protocols</b>	
<b>Number of connections</b>	
• Number of connections, max.	128
<b>Redundancy mode</b>	
<b>Media redundancy</b>	
- MRP	Yes
- MRPD	Yes; Requirement: IRT
- Switchover time on line break, typ.	200 ms; For MRP, bumpless for MRPD
- Number of stations in the ring, max.	50
<b>SIMATIC communication</b>	
• S7 routing	Yes
<b>OPC UA</b>	
• OPC UA Client	Yes; Data access (read, write), method call
• OPC UA Server	Yes; Data access (read, write, subscribe), method call, custom address space

### Technical specifications

Article number	<b>6ES7672-7AC01-0YA0</b> SIMATIC Software Controller CPU 1507S
<b>Supported technology objects</b>	
Motion Control	Yes; Note: The number of technology objects affects the cycle time of the PLC program; selection guide via the TIA Selection Tool or SIZER
• Number of available Motion Control resources for technology objects	4 800
• Required Motion Control resources	
- per speed-controlled axis	40
- per positioning axis	80
- per synchronous axis	160
- per external encoder	80
- per output cam	20
- per cam track	160
- per probe	40
Controller	
• PID_Compact	Yes; Universal PID controller with integrated optimization
• PID_3Step	Yes; PID controller with integrated optimization for valves
• PID-Temp	Yes; PID controller with integrated optimization for temperature
Counting and measuring	
• High-speed counter	Yes
<b>Hardware requirement</b>	
Hardware required	SIMATIC IPC2x7E, IPC4x7D/E, IPC6x7D/E, IPC8x7D/E
<b>Processor</b>	
• Single-core processor	No
• Single-core processor with hyper-threading	No
• Multi-core processor	Yes
• Multi-core processor with hyper-threading	Yes
• occupied cores	1; For multicore processors with activated Hyper-Threading, one complete physical core is reserved for the CPU 1507S
<b>Memory</b>	
• Work memory, min.	4 Gbyte
• Hard disk memory required for installation	720 Mbyte
• Temporary hard disk memory for installation	230 Mbyte
• Hard disk memory required at runtime	400 Mbyte

Article number	<b>6ES7672-7AC01-0YA0</b> SIMATIC Software Controller CPU 1507S
<b>Operating systems</b>	
<b>Runs under operating system</b>	
• Windows 7	Yes; Professional, Enterprise, Ultimate (32 bit and 64 bit); Windows Embedded Standard 7 with delivery image of the SIMATIC IPC
• Windows 10	Yes; Windows 10 Enterprise 2016 LTSB, 64-bit, MUI on IPC2x7E, IPC4x7E, IPC6x7D, IPC8x7D; Windows 10 Enterprise 2019 LTSC 64-bit, MUI on IPC2x7E, IPC4x7E, IPC6x7E, IPC8x7E
<b>Configuration</b>	
<b>Programming</b>	
<b>Programming language</b>	
- LAD	Yes
- FBD	Yes
- STL	Yes
- SCL	Yes
- CFC	No
- GRAPH	Yes
<b>Know-how protection</b>	
• User program protection/ password protection	Yes
• Copy protection	Yes
• Block protection	Yes
<b>Access protection</b>	
• Protection level: Write protection	Yes
• Protection level: Read/write protection	Yes
• Protection level: Complete protection	Yes
<b>Open Development interfaces</b>	
• Size of ODK SO file, max.	9.8 Mbyte

## Software Controllers

### SIMATIC S7-1500 Software Controllers Standard CPUs

#### CPU 1508S

#### Overview

- Software Controller for implementing the functions of a SIMATIC S7-1500 Controller on a SIMATIC IPC
- For use with control applications with increased requirements for program and data memory
- For use as a PC-based PLC in machines with distributed I/O via PROFINET and PROFIBUS
- For utilizing IPC onboard interfaces and PC plug-in cards for PROFINET and PROFIBUS connections
- Optimized for PC-based control tasks with the IPC627E Box PC, the IPC677E Panel PC, and the IPC647E and IPC847E Rack PCs
- Can also be used on the IPC427E, IPC627D and IPC827D Box PCs, the IPC477E and IPC677D Panel PCs, and the IPC647D and IPC847D Rack PCs
- Execution of functions and algorithms implemented with high-level languages under Windows (C/C++, C#, VB) and locally in the CPU 1508S (C/C++)
- Integrated Motion Control functionalities for controlling speed-controlled and positioning axes as well as synchronous operation, support for external encoders, precise position gearing between axes, output cams/cam tracks and probes
- OPC UA server (data access) and client as runtime option for easy connection of the software controller to Windows applications or non-Siemens devices/systems

##### SIMATIC S7-1500 Software Controller CPU 1508S

For implementing the function of an S7-1500 Controller on SIMATIC IPCs

##### Target system:

Optimized for PC-based control tasks with

Panel PC IPC677E,  
Box PC IPC627E,  
Rack PC IPC647E,  
Rack PC IPC847E;  
can also be used with  
Panel PC IPC477E,  
Panel PC IPC677D,  
Box PC IPC427E,  
Box PC IPC627D,  
Box PC IPC827D,  
Rack PC IPC647D,  
Rack PC IPC847D;

##### Requirement:

Windows 7 /  
Windows Embedded Standard 7 /  
Windows 10 (64-bit)

##### Type of delivery:

en, de, fr, it, es, zh

- Single license for one installation  
Software and documentation on  
DVD, license key on USB flash  
drive
- Single license for one installation;  
Software download including  
license key <sup>1)</sup>

##### CP 1625 communications processor

PCI Express x1 card for  
connecting PROFINET with IRT  
to the SIMATIC S7-1500  
Software Controller

6ES7648-2CF10-1AA0

##### CP 5622 communications processor

PCI Express x1 card (32-bit) for  
connecting a programming device  
or PC to PROFIBUS

6GK1562-2AA00

##### CP 5623 communications processor

PCI Express x1 card (32-bit)  
for connection to PROFIBUS incl.  
DP-Base software with NCM PC;  
DP-RAM interface for DP master  
or DP slave, incl. PG and  
FDL protocols; single license  
for 1 installation, runtime software,  
software and electronic manual on  
CD-ROM, Class A;  
for operating system support  
see SIMATIC NET software  
en/de

## Software Controllers

### SIMATIC S7-1500 Software Controllers Fail-safe CPUs

#### CPU 1507S F

#### Overview

- Software Controller for implementing the functions of a SIMATIC S7-1500 Controller on a SIMATIC IPC
- For use as a PC-based PLC in machines with distributed I/O via PROFINET and PROFIBUS
- For utilizing IPC onboard interfaces and PC plug-in cards for PROFINET and PROFIBUS connections
- Can be used for safety functions up to SIL 3 according to IEC 61508 and up to PL e according to ISO 13849

- Supports PROFIsafe in distributed configurations
- Optimized for PC-based control tasks with the IPC427E Microbox PC and the IPC477E Panel PC (requires configuration with NVRAM)
- Can also be used on IPC227E, IPC627D, IPC627E and IPC827D Box PCs, IPC277E, IPC677D and IPC677E Panel PCs, and IPC647E and IPC847E Rack PCs (configurations with NVRAM are required for the IPC227E, IPC427E, IPC627D, IPC827D, IPC277E, IPC477E and IPC677D PCs)
- Execution of functions and algorithms implemented with high-level languages under Windows (C/C++, C#, VB) and locally in the CPU 1507S F (C/C++)
- Integrated Motion Control functionalities for controlling speed-controlled and positioning axes as well as synchronous operation, support for external encoders, precise position gearing between axes, output cams/cam tracks and probes
- Integrated web server for diagnostics with the option of creating user-defined web pages
- OPC UA server (data access) and client as runtime option for easy connection of the software controller to Windows applications or non-Siemens devices/systems

##### SIMATIC S7-1500 Software Controller CPU 1507S F

For implementing the function of a fail-safe S7-1500 Controller on SIMATIC IPCs

##### Target system:

Optimized for PC-based control tasks with IPC427E Microbox PC and IPC477E Panel PC;

Can also be used with IPC277E Panel PC, IPC677D Panel PC, IPC677E Panel PC, IPC227E Box PC, IPC627D Box PC, IPC627E Box PC, IPC827D Box PC, IPC647E Rack PC, IPC847E Rack PC

##### Requirement:

Windows 7 / Windows Embedded Standard 7 / Windows 10 Enterprise LTSC with MBR boot;

For supported Windows 10 versions, see Technical specifications

For the IPC227E, IPC427E, IPC627D, IPC827D, IPC277E, IPC477E and IPC677D, IPC configurations with NVRAM are required)

##### Type of delivery:

English, German, Chinese, Italian, French, Spanish

- Single license for one installation. Software and documentation on DVD, license key on USB flash drive
- Single license for one installation; Software download including license key <sup>1)</sup>

• Type	Software clock, synchronizable, no battery backup
<b>Interfaces</b>	
Number of interfaces	3
<b>1. Interface</b>	
Interface type	CP 1625
Number of connections	128
<b>Interface types</b>	
• RJ 45 (Ethernet)	Yes
- Transmission rate, max.	100 Mbit/s
- Industrial Ethernet status LED	Yes
• Number of ports	2
• integrated switch	Yes

Article number	<b>6ES7672-7FC01-0YA0</b> SIMATIC Failsafe SW Ctrl CPU 1507S F
<b>Protocols</b>	
• PROFINET IO Controller	Yes
• PROFINET IO Device	Yes
• SIMATIC communication	Yes
• Open IE communication	Yes
• Web server	Yes
<b>PROFINET IO Controller</b>	
<b>Services</b>	
- Isochronous mode	Yes
- Direct data exchange	Yes; Requirement: IRT and isochronous mode (MRPD optional)
- shortest clock pulse	500 µs
- IRT	Yes
- PROFINergy	Yes
- Prioritized startup	Yes; max. 32 PROFINET devices; if you want to use the "Prioritized startup" functionality in STEP7 for the PROFINET interface of the CPU, the CPU and the device must be separated by means of a switch (e.g. SCALANCE X205) or CP1625
- Number of connectable IO Devices, max.	256
- Of which IO devices with IRT, max.	64
- Number of connectable IO Devices for RT, max.	256
- of which in line, max.	256
- Number of IO Devices that can be simultaneously activated/ deactivated, max.	8
- IO Devices changing during operation (partner ports), supported	Yes; the CPU and changing IO devices must be separated by a switch (e.g. SCALANCE X205)
- Number of IO Devices per tool, max.	8
- Updating times	The minimum value of the update time also depends on communication share set for PROFINET IO, on the number of IO devices, and on the quantity of configured user data
<b>Address area</b>	
- Inputs, max.	8 kbyte
- Outputs, max.	8 kbyte
<b>PROFINET IO Device</b>	
<b>Services</b>	
- Isochronous mode	No
- IRT	Yes
- PROFINergy	Yes
- Prioritized startup	Yes; if you want to use the "Prioritized startup" functionality in STEP 7 for the PROFINET interface of the CPU, the CPU and the device must be separated by means of a switch (e.g. SCALANCE X205)
- Shared device	Yes
- Number of IO Controllers with shared device, max.	4
- Asset management record	Yes

- Number of stations in the ring, max.	50
<b>SIMATIC communication</b>	
• S7 routing	Yes
<b>OPC UA</b>	
• OPC UA Client	Yes; Data access (read, write), method call
• OPC UA Server	Yes; Data access (read, write, subscribe), method call, custom address space

### Technical specifications

Article number	<b>6ES7672-7FC01-0YA0</b> SIMATIC Failsafe SW Ctrl CPU 1507S F
<b>Supported technology objects</b>	
Motion Control	Yes; Note: The number of technology objects affects the cycle time of the PLC program; selection guide via the TIA Selection Tool or SIZER
• Number of available Motion Control resources for technology objects	4 800
• Required Motion Control resources	
- per speed-controlled axis	40
- per positioning axis	80
- per synchronous axis	160
- per external encoder	80
- per output cam	20
- per cam track	160
- per probe	40
Controller	
• PID_Compact	Yes; Universal PID controller with integrated optimization
• PID_3Step	Yes; PID controller with integrated optimization for valves
• PID-Temp	Yes; PID controller with integrated optimization for temperature
Counting and measuring	
• High-speed counter	Yes
<b>Standards, approvals, certificates</b>	
<b>Highest safety class achievable in safety mode</b>	
• Performance level according to ISO 13849-1	PLe
• SIL acc. to IEC 61508	SIL 3
<b>Probability of failure (for service life of 20 years and repair time of 100 hours)</b>	
- Low demand mode: PFDavg in accordance with SIL3	< 2.00E-05
- High demand/continuous mode: PFH in accordance with SIL3	< 1.00E-09
<b>Hardware requirement</b>	
Hardware required	SIMATIC IPC2x7E, IPC4x7D/E, IPC627D, IPC677D, IPC827D: configurations with NVRAM required; IPC6x7E, IPC8x7E
<b>Processor</b>	
• Single-core processor	No
• Single-core processor with hyper-threading	No
• Multi-core processor	Yes
• Multi-core processor with hyper-threading	Yes
• occupied cores	1; For multicore processors with activated Hyper-Threading, one complete physical core is reserved for the CPU 1507S

Article number	<b>6ES7672-7FC01-0YA0</b> SIMATIC Failsafe SW Ctrl CPU 1507S F
<b>Memory</b>	
• Work memory, min.	4 Gbyte
• Hard disk memory required for installation	720 Mbyte
• Temporary hard disk memory for installation	230 Mbyte
• Hard disk memory required at runtime	400 Mbyte
<b>Operating systems</b>	
<b>Runs under operating system</b>	
• Windows 7	Yes; Professional, Enterprise, Ultimate (32 bit and 64 bit); Windows Embedded Standard 7 with delivery image of the SIMATIC IPC
• Windows 10	Yes; Windows 10 Enterprise 2016 LTSB, 64-bit, MUI on IPC2x7E, IPC4x7E, IPC6x7D, IPC8x7D; Windows 10 Enterprise 2019 LTSC 64-bit, MUI on IPC2x7E, IPC4x7E, IPC6x7E, IPC8x7E
<b>Configuration</b>	
<b>Programming</b>	
<b>Programming language</b>	
- LAD	Yes; incl. failsafe
- FBD	Yes; incl. failsafe
- STL	Yes
- SCL	Yes
- CFC	No
- GRAPH	Yes
<b>Know-how protection</b>	
• User program protection/ password protection	Yes
• Copy protection	Yes
• Block protection	Yes
<b>Access protection</b>	
• Protection level: Write protection	Yes
• Protection level: Read/write protection	Yes
• Protection level: Write protection for Failsafe	Yes
• Protection level: Complete protection	Yes
<b>Open Development interfaces</b>	
• Size of ODK SO file, max.	9.8 Mbyte

## Software Controllers

### SIMATIC S7-1500 Software Controllers Fail-safe CPUs

#### CPU 1508S F

#### Overview

- Software Controller for implementing the functions of a SIMATIC S7-1500 Controller on a SIMATIC IPC
- For use with control applications with increased requirements for program and data memory
- For use as a PC-based PLC in machines with distributed I/O via PROFINET and PROFIBUS
- For utilizing IPC onboard interfaces and PC plug-in cards for PROFINET and PROFIBUS connections

- Can be used for safety functions up to SIL 3 according to IEC 61508 and up to PL e according to ISO 13849
- Supports PROFIsafe in distributed configurations
- Optimized for PC-based control tasks with the IPC627E Box PC, the IPC677E Panel PC, and the IPC647E and IPC847E Rack PCs
- Can also be used on the IPC427E, IPC627D and IPC827D Box PCs and the IPC477E and IPC677D Panel PCs (configuration with NVRAM required)
- Execution of functions and algorithms implemented with high-level languages under Windows (C/C++, C#, VB) and locally in the CPU 1508S F (C/C++)
- Integrated Motion Control functionalities for controlling speed-controlled and positioning axes as well as synchronous operation, support for external encoders, precise position gearing between axes, output cams/cam tracks and probes
- Integrated web server for diagnostics with the option of creating user-defined web pages
- OPC UA server (data access) and client as runtime option for easy connection of the software controller to Windows applications or non-Siemens devices/systems

##### SIMATIC S7-1500 Software Controller CPU 1508S F

For implementing the function of a fail-safe S7-1500 Controller on SIMATIC IPCs (IPC configuration with NVRAM required)

##### Target system:

Optimized for PC-based control tasks with  
IPC677E Panel PC,  
IPC627E Box PC,  
IPC647E Rack PC,  
IPC847E Rack PC;  
Can also be used with  
IPC477E Panel PC,  
IPC677D Panel PC,  
IPC427E Box PC,  
IPC627D Box PC,  
IPC827D Box PC;

##### Requirement:

Windows 7 /  
Windows Embedded Standard 7 /  
Windows 10 (64-bit);  
for supported Windows 10 versions,  
see technical specifications.

On IPC477E, IPC677D, IPC427E,  
IPC627D and IPC827D,  
configurations with NVRAM are  
required

##### Type of delivery:

English, German, Chinese, Italian,  
French, Spanish

- Single license for one installation  
Software and documentation on  
DVD, license key on USB flash  
drive
- Single license for one installation;  
Software download including  
license key <sup>1)</sup>

## Software Controllers

### SIMATIC S7-1500 Software Controllers Add-on applications

#### ODK 1500S SQL driver, ODK 1500S XML Data Access driver

##### Overview ODK 1500S SQL driver

###### Note

This catalog entry contains non-binding information on a supplementary application software for the SIMATIC S7-1500 Software Controller and the SIMATIC ET 200SP Open Controller.

###### Overview

The ODK 1500S SQL driver enables direct access to an SQL database from the PLC program. In this case the database can be installed on the same computer as the S7-1500 Software Controller or in the network.

- Direct data exchange with SQL-based database by means of SQL commands from the PCL program
- Connection to SQL-based database on the same PC or to database servers in the network

##### Technical specifications

Supported SQL commands	<ul style="list-style-type: none"> <li>• SELECT</li> <li>• INSERT</li> <li>• UPDATE</li> <li>• DELETE</li> </ul>
Supported data types	All standard SQL data types
System requirements	SIMATIC IPC with S7-1500 Software Controller or SIMATIC ET 200SP Open Controller STEP 7 in the TIA Portal V13 SP1
<ul style="list-style-type: none"> <li>• Runtime PC</li> <li>• Engineering</li> </ul>	

##### More information

<http://www.automation.siemens.com/partner/>

You can find Service and Support at:  
<https://support.industry.siemens.com/cs/ww/en/view/109479140>

##### Overview ODK 1500S XML Data Access driver

###### Note

This catalog entry contains non-binding information about supplementary application software for the SIMATIC S7-1500 Software Controller and the SIMATIC ET 200SP Open Controller.

###### Overview

With the function blocks of the ODK 1500S XML Data Access driver it is possible to access specific information in XML files in the Windows file system from the PLC program.

XPath expressions are used for accessing XML file elements since they provide the highest possible flexibility for processing XML data. This means that extremely large XML files can be edited, too.

The driver offers the following functionality:

- XML data can be read into and processed in the PLC.
- XML data can be modified and written back to the XML file.

##### Technical specifications

System requirements	SIMATIC IPC with SIMATIC S7-1500 Software Controller or SIMATIC ET 200SP Open Controller STEP 7 in TIA Portal V13 SP1
<ul style="list-style-type: none"> <li>• Runtime PC</li> <li>• Engineering</li> </ul>

#### Overview ODK 1500S FileServer

##### Note

This catalog entry contains non-binding information about supplementary application software for the SIMATIC S7-1500 Software Controller and the SIMATIC ET 200SP Open Controller.

##### Overview

The ODK 1500S FileServer enhances the SIMATIC S7-1500 Software Controller file function with an option enabling direct access to the Windows file system of the PC from the STEP 7 program.

The driver enables reading and writing of data blocks in/from files in structured form. Various file formats are supported.

There are also FBs available for handling files (e.g. renaming, deleting).

#### Technical specifications

Supported file formats	<ul style="list-style-type: none"> <li>• CSV</li> <li>• ASCII</li> <li>• Windows-INI</li> <li>• XML <sup>1)</sup></li> <li>• Binary</li> </ul>
System requirements	
<ul style="list-style-type: none"> <li>• Runtime PC</li> </ul>	SIMATIC IPC with SIMATIC S7-1500 Software Controller or SIMATIC ET 200SP Open Controller
<ul style="list-style-type: none"> <li>• Engineering</li> </ul>	STEP 7 in TIA Portal V13 SP1

<sup>1)</sup> The XML format is predefined. A DB can be saved and read in as an XML file. It is not possible to parse any particular XML file.

#### More information

If you are interested, please contact your sales representative:  
<http://www.automation.siemens.com/partner/>

You can find Service and Support at:  
<https://support.industry.siemens.com/cs/ww/en/view/109479497>

#### Overview ODK 1500S SMX driver

##### Note

This catalog entry contains non-binding information about supplementary application software for the SIMATIC S7-1500 Software Controller and the SIMATIC ET 200SP Open Controller.

##### Overview

The ODK 1500S SMX driver permits access from a Windows user program to data of the PLC program. A shared memory which can be accessed by the PLC and user program is set up for this purpose. The ODK 1500S simplifies the changeover to the SIMATIC S7-1500 Software Controller of applications that previously used the SMX interface of the SIMATIC WinAC RTX.

#### More information

If you are interested, please contact your sales representative:  
<http://www.automation.siemens.com/partner/>

You can find Service and Support at:  
<https://support.industry.siemens.com/cs/ww/en/view/109741583>

#### Overview ODK 1500S serial driver

##### Note

This catalog entry contains non-binding information about supplementary application software for the SIMATIC S7-1500 Software Controller and the SIMATIC ET 200SP Open Controller.

##### Overview

The ODK 1500S serial driver enables serial communication from the STEP 7 user program via the integrated serial interface of a SIMATIC IPC or, depending on the application environment, via a USB-to-serial adapter. All serial interfaces of the PC are supported, which are addressed in Windows as COM $n$  interface, e.g. RS232, RS422 or RS485.

#### Drive Controllers

#### Overview

SIMATIC Drive Controller Video

[https://players.brightcove.net/1813624294001/70fecf0f-fbad-4fad-a077-d0e26af4d84c\\_default/index.html?videoId=6138318810001](https://players.brightcove.net/1813624294001/70fecf0f-fbad-4fad-a077-d0e26af4d84c_default/index.html?videoId=6138318810001)

The SIMATIC Drive Controller is available in two performance classes and meets even the most demanding Motion Control needs with the two fail-safe technology CPUs (CPU 1504D TF and CPU 1507D TF).

The fail-safe CPUs permit the processing of standard and safety programs on the same controller.

As technology CPUs, they also have extensive Motion Control functions such as:

- Speed and positioning axes
- Synchronous operation functions
  - Synchronizing with/without specifying the synchronization position
  - Actual value coupling
  - Shifting of the master value at following axis
  - Camming
  - Cross-PLC synchronous operation
- Cam
- Cyclic specification of the motion vector from the application (MotionIn interface)
- Kinematics
  - With up to 4 interpolating axes (e.g. cartesian portal, delta picker, roller picker, articulated arm, cylindrical robot, tripod picker and SCARA)
  - User-defined kinematics
- External encoders, output cams and measuring inputs

The extensive integrated interfaces and technology I/Os are consistently available in all performance classes and enable the efficient implementation of compact and modular automation solutions with Motion Control based on the SINAMICS S120 drive system.

Thanks to fast system response times, the SIMATIC Drive Controller is the ideal solution wherever axes with high configuration limits and the shortest cycle times for high machine cycle rates and optimum product quality through deterministic and reproducible machine behavior are required.

The SIMATIC Drive Controller is configured in TIA Portal V16 or higher with the SIMATIC STEP 7 Professional engineering software and SINAMICS Startdrive.

The SIMATIC Drive Controller can be extended with components from the modular SINAMICS S120 drive system and SIMATIC automation components such as HMI and I/O systems.

Additional drive systems such as e.g. SINAMICS S210 or SINAMICS G can easily be integrated via PROFINET.

### Overview CPU 1504D TF

CPU 1504D TF

- For standard and fail-safe applications with medium requirements for program scope and processing speed
- Ultra-compact due to the integration of fail-safe SIMATIC S7-1500 technology CPU, SINAMICS S120 drive control and technology I/Os in a single device
- Extensive integrated communication interfaces and technology I/Os for the efficient implementation of automation solutions with Motion Control
- Tried-and-tested engineering in TIA Portal

### Overview CPU 1507D TF

CPU 1507D TF

- For standard and fail-safe applications with high to very high requirements for program scope and processing speed
- Ultra-compact due to the integration of fail-safe SIMATIC S7-1500 technology CPU, SINAMICS S120 drive control and technology I/Os in a single device
- Extensive integrated communication interfaces and technology I/Os for the efficient implementation of automation solutions with Motion Control
- Tried-and-tested engineering in TIA Portal

- shortest clock pulse	500 µs	250 µs
- IRT	Yes	Yes
- PROFIenergy	Yes; per user program	Yes; per user program
- Prioritized startup	Yes; Max. 32 PROFINET devices	Yes; Max. 32 PROFINET devices
- Number of connectable IO Devices, max.	256; In total, up to 1 000 distributed I/O devices can be connected via AS-i, PROFIBUS or PROFINET	256; In total, up to 1 000 distributed I/O devices can be connected via AS-i, PROFIBUS or PROFINET
- Of which IO devices with IRT, max.	64	64
- Number of connectable IO Devices for RT, max.	256	256
- of which in line, max.	256	256
- Number of IO Devices that can be simultaneously activated/deactivated, max.	8; in total across all interfaces	8; in total across all interfaces
- Number of IO Devices per tool, max.	8	8
- Updating times	The minimum value of the update time also depends on communication share set for PROFINET IO, on the number of IO devices, and on the quantity of configured user data	The minimum value of the update time also depends on communication share set for PROFINET IO, on the number of IO devices, and on the quantity of configured user data
<b>PROFINET IO Device</b>		
<b>Services</b>		
- PG/OP communication	Yes	Yes
- Isochronous mode	No	No
- shortest clock pulse	500 µs	250 µs
- IRT	Yes	Yes
- PROFIenergy	Yes; per user program	Yes; per user program
- Shared device	Yes	Yes
- Number of IO Controllers with shared device, max.	4	4
- activation/deactivation of I-devices	Yes; per user program	Yes; per user program
- Asset management record	Yes; per user program	Yes; per user program
<b>2. Interface</b>		
<b>Interface types</b>		
• RJ 45 (Ethernet)	Yes	Yes
• Number of ports	1	1
• integrated switch	No	No
<b>Protocols</b>		
• IP protocol	Yes; IPv4	Yes; IPv4
• PROFINET IO Controller	Yes	Yes
• PROFINET IO Device	Yes	Yes
• SIMATIC communication	Yes	Yes
• Open IE communication	Yes; Optionally also encrypted	Yes; Optionally also encrypted
• Web server	Yes	Yes
• Media redundancy	No	No

- 10/572 Accessories

## I/O systems

### Introduction

#### I/O systems

#### Overview

#### **SIMATIC ET 200 offers the right solution for every application**

With SIMATIC ET 200 a wide range of distributed I/O systems is available - for solutions in the control cabinet or without a control cabinet directly at the machine, as well as for applications in hazardous areas. The modular design makes it possible to scale and expand the ET 200 systems simply and in small stages. Already integrated add-on modules reduce costs and at the same time offer a widely diverse range of possible applications. You can choose from many different combination options: digital and analog inputs/outputs, intelligent modules with CPU functionality, safety systems, motor starters, pneumatic devices, frequency converters, as well as various different technology modules (e.g. for counting, positioning).

Communication over PROFINET and PROFIBUS, uniform engineering, transparent diagnostic possibilities as well as optimal interfacing to SIMATIC controllers and HMI units prove the unique integration of Totally Integrated Automation.

#### **PROFINET**

PROFINET is the open, cross-vendor Industrial Ethernet standard (IEC 61158/61784) for automation.

Based on Industrial Ethernet, PROFINET enables direct communication between field devices (IO devices) and controllers (IO controllers), up to and including the solution of isochronous drive controls for Motion Control applications.

As PROFINET is based on Standard Ethernet according to IEEE 802.3, any devices from the field level to the management level can be connected.

In this way, PROFINET enables system-wide communication, supports plant-wide engineering and applies IT standards, such as web server or FTP, right down to field level. Tried and tested fieldbus systems, such as PROFIBUS or AS-Interface, can be easily integrated without any modification to the existing devices.

#### **PROFIBUS**

PROFIBUS is the international standard (IEC 61158/61784) for the field level. It is the only fieldbus to allow communication both in manufacturing applications and in process-oriented applications.

PROFIBUS is used to connect field devices, e.g. distributed I/O devices or drives, to automation systems such as SIMATIC S7, SIMOTION, SINUMERIK, or PCs.

PROFIBUS is standardized in accordance with IEC 61158 and is a powerful, open and rugged fieldbus system with short response times. PROFIBUS is available in different forms for various applications.

#### **PROFIBUS DP (distributed I/O)**

PROFIBUS DP is used for connecting distributed field devices, e.g. SIMATIC ET 200, or drives with extremely fast response times. PROFIBUS DP is used when sensors/actuators are distributed at the machine or in the plant (e.g. field level).

#### **AS-Interface**

AS-Interface is the international standard (IEC 62026/EN 50295) which, as an alternative to the cable harness, links especially cost-effective sensors and actuators by means of a two-wire line. This two-wire line is also used to supply the individual stations with power. This makes the AS-Interface the ideal partner for PROFINET and PROFIBUS DP. AS-i communications modules in ET 200SP enable the flexible combination of AS-Interface and distributed I/O. AS-Interface transmits standard data and safety data up to PL e / SIL 3 in the same AS-i network. AS-Interface is not only suitable for efficient transmission of digital and analog I/O signals but also ideal for the user-friendly connection of EMERGENCY STOP pushbuttons and protective doors.

#### **IO-Link**

The communication standard IO-Link permits the intelligent connection of sensors and switching devices to the control level. IO-Link facilitates the integration of all components in the control cabinet and on the field level - for maximum integration and seamless communication on the final meters to the process.

IO-Link solutions from Siemens ensure maximum precision and cost-effectiveness in any production system. IO-Link is completely integrated in Totally Integrated Automation (TIA) and offers many advantages.

- The open standard permits the networking of devices from different manufacturers
- Simple wiring facilitates the installation process
- Reduced wiring effort saves time and money during installation
- Efficient engineering facilitates configuration and commissioning
- High-speed diagnostics ensures short plant standstill times and high plant availability
- High process transparency permits, for example, efficient power management

## Overview

SIMATIC ET 200SP video

[https://players.brightcove.net/1813624294001/70fecf0f-fbad-4fad-a077-d0e26af4d84c\\_default/index.html?videoId=6140549987001](https://players.brightcove.net/1813624294001/70fecf0f-fbad-4fad-a077-d0e26af4d84c_default/index.html?videoId=6140549987001)

### SIMATIC ET 200SP

The scalable SIMATIC ET 200SP I/O system is a highly flexible, modular I/O system with IP20 degree of protection. Via interface modules, it can exchange IO data of the connected I/O modules with a higher-level PLC. The following interface variants are available for this purpose:

- MultiFieldbus: IM155-6MF with the Ethernet-based protocols PROFINET, EtherNet/IP and Modbus TCP
- PROFINET: IM155-6PN
- PROFIBUS: IM155-6DP

Alternatively, as further head-end stations, various PLC, F-PLC and Open Controllers are available as compact S7-1500 Controllers (Distributed Controllers). ET 200SP components in SIPLUS version meet extreme requirements and have a high degree of robustness.

An extensive range of I/O modules, including fail-safe and Ex versions, enable the flexible connection of sensors and actuators:

- Digital input modules (DI), with color coding white
- Digital output modules (DO), with color coding black
- Analog input modules (AI), with color coding light blue
- Analog output modules (AO), with color coding dark blue
- Technology modules (TM), with color coding turquoise
- Communications modules (CM), with color coding light gray
- Special modules, with color coding mint green
- Motor starters as direct-on-line starters (DS) and reversing starters (RS), also as F-version in each case
- Pneumatics

Apart from the standard type of delivery in an individual package, selected I/O modules and BaseUnits are also available in a pack of 10 units.

The pack of 10 units enables the amount of waste to be reduced considerably, as well as saving the time and cost of unpacking individual modules.

#### Compact design

- Modular configuration with up to 64 modules
- System-integrated, self-assembling potential groups, potential group supply without power module with infeed of supply voltage via light BaseUnits
- Small size and highly flexible due to the modular design and comprehensive product range
- Up to 16 channels per module
- Permanent wiring
- Hot swapping: Module replacement without tools in RUN
- Startup and operation with slot gaps (free spaces)

#### Flexible connection system

- Flexible fieldbus connection via BusAdapter (RJ45, FastConnect, plastic or glass fiber-optic cables), also as integrated media converter
- Push-in terminals for cross-sections up to 1.5 mm<sup>2</sup> with wire end ferrule, and up to 2.5 mm<sup>2</sup> without wire end ferrule
- BaseUnits for 1-wire or direct multi-wire connection
- PotDis module for system-integrated and space-saving provision of additional potential terminals
- Optimum accessibility for wiring due to spring release and measuring tap next to the conductor opening
- System-integrated, space-saving shielding for installation without tools

SIMATIC ET 200SP shielding video

[https://players.brightcove.net/1813624294001/70fecf0f-fbad-4fad-a077-d0e26af4d84c\\_default/index.html?videoId=6196729280001](https://players.brightcove.net/1813624294001/70fecf0f-fbad-4fad-a077-d0e26af4d84c_default/index.html?videoId=6196729280001)

## I/O systems

### SIMATIC ET 200 systems for the control cabinet

#### SIMATIC ET 200SP

#### Overview

##### Safety Integrated

- Easy integration of fail-safe modules
- Easy F parameter assignment via software
- Group-by-group disconnection of non-fail-safe modules

##### High performance

- Isochronous PROFINET
- Internal data transfer with up to 100 Mbps
- Record analog values and output as of 50 µs
- Record digital values and output as of 1 µs

##### High-performance technology

- Modules for the functions Servodrive, Counting, Positioning, Weighing, Output cams, PWM, Force measurement, Flow measurement, etc.

##### Energy efficiency

- Energy meter for recording electrical variables
- System-integrated PROFIenergy with interval substitute values

##### Extended functions

- Configuration control: application-based adaptation of the actual configuration via user software (option handling)
- Time-based IO: time stamping of the signals to the µs
- MSI/MSO: Simultaneous access to I/O data from up to 4 PLCs
- MtM: Direct data exchange between IO modules (**Module-to-Module** communication)
- Oversampling: n-fold acquisition or output of digital and analog signals within a PN cycle
- Adaptation of measuring range: increased resolution by adapting the measuring range to a limited section of a measuring range supported by the analog input module
- Scaling of measured values: permits the transmission of the analog value normalized to the required physical value as a REAL value (32-bit floating point)

##### Communication standards

- PROFINET IO
- EtherNet/IP
- Modbus TCP
- PROFIBUS DP V0/V1
- ET connection for connecting the ET 200AL (IP67)
- IO-Link V1.1
- CAN
- DALI
- AS-Interface
- Point-to-point (RS232, RS485, RS422)
- Freeport
- 3964(R)
- USS
- DMX
- Modbus RTU (master/slave)

##### CPU

- PROFINET connection with 3 ports
- IO controller and PN IO device
- Optional expansion as DP master/slave
- Also as fail-safe version and Open Controller

##### Labeling of I/O modules

- Meaningful labeling on the front of the I/O modules
  - Module type in plain text including function class, e.g. "DI 8x24VDC HF"
  - Article No.
  - 2D matrix code with article and serial number (with call via the "Industry Online Support" app, direct link to the support page of the module)
  - Hardware functional status and firmware version
  - Suitable BU type for the respective I/O module
  - Color code of the suitable color-coding label
  - Connection diagram
- Optionally expandable with
  - Labeling strips
  - Equipment labeling plate

#### Overview of ET 200SP components

Basic components	Function
<b>CPU</b>	<p>The CPU:</p> <ul style="list-style-type: none"> <li>• Executes the user program</li> <li>• Is used as IO controller, I-Device on PROFINET IO, or as standalone CPU</li> <li>• Connects the ET 200SP with the IO devices or the IO controller</li> <li>• Exchanges data with the I/O modules via the backplane bus.</li> </ul> <p>Further functions of the CPU:</p> <ul style="list-style-type: none"> <li>• Communication via PROFIBUS DP (in combination with the CM DP communications module, the CPU can be used as DP master or slave)</li> <li>• Integrated web server</li> <li>• Integrated technology</li> <li>• Integrated trace functionality</li> <li>• Integrated system diagnostics</li> <li>• Integrated safety</li> </ul>

Basic components	Function
<b>Open Controller</b>	<p>As the first controller of this type, the SIMATIC ET 200SP Open Controller combines the functions of a PC-based software controller with visualization, PC applications and central I/Os (inputs/outputs) in a single, compact device.</p> <ul style="list-style-type: none"> <li>• All in one</li> <li>• High system availability</li> <li>• Compact and modular</li> <li>• Rugged</li> <li>• User-friendly design</li> <li>• Efficient engineering in TIA Portal</li> </ul>
<b>Interface modules with MultiFieldbus interface (IM 155-6MF)</b>	<p>The MF interface module:</p> <ul style="list-style-type: none"> <li>• Supports the three Ethernet protocols PROFINET IO, EtherNet IP and Modbus TCP</li> <li>• Is easy to configure via MultiFieldbus Configuration Tool (MFCT)</li> <li>• Connects ET 200SP with the IO controller</li> <li>• Exchanges data with the I/O modules via the backplane bus.</li> </ul>

## Overview

Basic components	Function
<b>Interface modules for PROFINET IO (IM 155-6PN)</b>	The interface module: <ul style="list-style-type: none"> <li>Is used as IO device on PROFINET IO</li> <li>Connects ET 200SP with the IO controller</li> <li>Exchanges data with the I/O modules via the backplane bus.</li> </ul>
<b>Interface module for PROFIBUS DP (IM 155-6DP)</b>	The interface module: <ul style="list-style-type: none"> <li>Is used as DP slave on PROFIBUS DP</li> <li>Connects ET 200SP with the DP master</li> <li>Exchanges data with the I/O modules via the backplane bus.</li> </ul>
<b>SIMATIC BusAdapter (BA)</b>	SIMATIC BusAdapters permit the free selection of the connection system and physical connection for head-end stations with PROFINET or MultiFieldbus interface.  Various versions are available for the connection of copper cables or plastic and glass fiber-optic cables. Hybrid copper/fiber-optic versions are also available as integrated media converters.  Cable length between 2 stations: max. 100 m (Cu), max. 50 m (POF), max 100m (PCF), max. 3 km (multi-mode glass FOC).  For expanding the station with the I/O system ET 200AL via ET connection, the BA-Send BusAdapter is available
<b>BaseUnit (BU)</b>	The BaseUnits provide the electrical and mechanical connection for the ET 200SP components. <ul style="list-style-type: none"> <li>Bright BaseUnits permit a new potential group up to max. 10 A</li> <li>Dark BaseUnits forward the self-assembling voltage busbars P1, P2 and AUX from the left to the right BaseUnit.</li> <li>Suitable BaseUnits with 12 to 28 terminals are available for different connection systems (single or direct multi-conductor connection) and functions.</li> <li>The I/O module is plugged onto the desired BaseUnit and determines the potential assignment of the terminals on the BaseUnit.</li> <li>For expanding the station with the I/O system ET 200AL via ET connection, the BaseUnit BU-Send is available.</li> </ul>

Basic components	Function
<b>Potential distributor modules (PotDis BU, PotDis TB)</b>	With the potential distributor modules for SIMATIC ET 200SP, additional potentials required within an ET 200SP station can be set up quickly and in a space-saving manner. Due to the free combinability of PotDis-BUs and PotDis-TBs, the potential distributor modules allow a large number of design variants and thus simple adaptation to individual needs. Within the station, existing potentials can be multiplied or even new potential groups can be formed. With 36 terminals per 15 mm width, the PotDis modules require very little space without compromising on the conductor cross-sections (maximum 2.5 mm <sup>2</sup> ). They allow the connection of voltages up to 48 V DC with a maximum current carrying capacity of 10 A, and with the PotDis TB-BR-W even up to 230 V AC/10 A as well as the possibility to connect a protective conductor.
<b>I/O modules and fail-safe I/O modules</b>	The I/O module determines the function at the terminals. The PLC detects the current process state via the connected sensors and triggers corresponding responses via the connected actuators. Some I/O modules feature extended functions, in part they are also designed as individual operating mode. I/O modules are divided into the following module types; the fail-safe versions are identified by a preceding 'F-' and a yellow module enclosure: <ul style="list-style-type: none"> <li>DI (digital input)</li> <li>DQ (digital output)</li> <li>AI (analog input)</li> <li>AQ (analog output)</li> <li>TM (technology modules)</li> <li>CM (communications modules)</li> <li>SM (special modules)</li> </ul>
<b>Protective cover (BU cover)</b>	The ET 200SP system can be operated with any number of slot gaps (BU slot without I/O module). Applications for this include: <ul style="list-style-type: none"> <li>partial commissioning</li> <li>prewired, and currently unequipped options</li> </ul> To protect against damage, such slot gaps must be covered by a BU cover. Within the BU cover, an equipment labeling plate can be kept for the possible later use of an I/O module.  Versions: <ul style="list-style-type: none"> <li>for BaseUnits with a width of 15 mm</li> <li>for BaseUnits with a width of 20 mm</li> </ul>

## I/O systems

### SIMATIC ET 200 systems for the control cabinet

#### SIMATIC ET 200SP

#### Overview

Basic components	Function
<b>Server module</b>	The server module concludes the setup of an ET 200SP station. On the server module there are holders for 3 spare fuses (5 x 20 mm). The server module is included in the scope of supply of all head-end stations.
<b>DIN rail according to EN 60715</b>	The DIN rail is the module rack of the ET 200SP I/O system. ET 200SP is mounted on the DIN rail.
<b>Coding element</b>	<p>When plugging an I/O module onto a BaseUnit for the first time, the coding element moves from the I/O module to the BaseUnit. There it prevents the destruction of the ET 200SP components in the event of a subsequent module replacement with incorrectly selected I/O module.</p> <p>The coding element is available in two versions:</p> <ul style="list-style-type: none"> <li>• Mechanical coding element</li> <li>• Electronic coding element: additionally features an electronic, re-writable memory for the redundant storage of module-specific configuration data (e.g. F target address for fail-safe modules, parameter data for IO-Link master). Thus these data are automatically backed up during a module replacement.</li> </ul>
<b>System-integrated shield connection</b>	<p>The shield connection permits the connection of cable shields. Compared to external shield supports, the system offers the following advantages:</p> <ul style="list-style-type: none"> <li>• Quick installation without tools by plugging the shield connection element onto the BaseUnit</li> <li>• Automatic low-impedance connection to the functional ground (DIN rail)</li> <li>• Optimized EMC properties by separating the supply voltage lines from the signal cables by means of the shield connection element and short, unshielded cable lengths</li> <li>• Low space requirements</li> </ul>
<b>Labeling strips</b>	<p>Optionally, for system-specific marking the head-end stations and I/O modules can be equipped with labeling strips (13 x 31 mm). The labeling strips can be inscribed mechanically. Labeling strips are available in two versions in the colors light gray and yellow:</p> <ul style="list-style-type: none"> <li>• 500 strips on the roll, for printing on thermal-transfer printers. Core diameter 40 mm, external diameter 70 mm, width 62 mm.</li> <li>• 10 DIN A4 sheets with 100 strips each, card 180 g/mm<sup>2</sup>, perforated, for printing with a laser printer direct from TIA Portal or via print templates.</li> </ul>

Basic components	Function
<b>Equipment labeling plate</b>	<p>Optionally, one equipment labeling plate each can be plugged onto head-end stations, BusAdapters, BaseUnits, potential distributor modules (PotDis BU and PotDis TB), and I/O modules. Equipment labeling plates are supplied in packs of 10 sheets with 16 labels each. The labels can be printed with thermal-transfer card printers or plotters, or stickers can be attached to them. Advantages compared to labels that are attached directly:</p> <ul style="list-style-type: none"> <li>• The inscription on the front is not covered</li> <li>• Simple label replacement when replacing a module</li> <li>• No parallax errors when marking the BaseUnits on the mounting plate</li> </ul> <p>The size of the inscribable area of the labels is 14.8 x 10.5 mm (W x H)</p>
<b>Color-coded labels</b>	<p>The I/O modules that are plugged onto the BaseUnits determine the potentials connected at the process terminals. The +/- potentials can optionally be identified using module-specific color-coded labels. The potentials of the AUX and add-on terminals as well as potential distributor modules can also be marked using color-coded labels. Color-coded labels are supplied in packs of 10 or 50 labels. Advantages of the color-coded labels:</p> <ul style="list-style-type: none"> <li>• Quick installation (one label for marking up to 16 terminals)</li> <li>• Avoidance of wiring errors</li> <li>• Simple detection of potentials during servicing</li> </ul>

## Overview

SIMATIC ET 200SP MultiFieldbus video  
[https://players.brightcove.net/1813624294001/70fecf0f-fbad-4fad-a077-d0e26af4d84c\\_default/index.html?videoid=6144272396001](https://players.brightcove.net/1813624294001/70fecf0f-fbad-4fad-a077-d0e26af4d84c_default/index.html?videoid=6144272396001)

Thanks to their wide scope of functions, the interface modules of the scalable SIMATIC ET 200SP I/O system, even in their basic versions, cover a wide range of applications. The basic functions of the interface modules include:

- Short data update times of typically 1 ms
- Single Hot Swap (withdrawing and insertion of an I/O module during operation without impairing the communication with the remaining modules)
- Operation with gaps (empty BaseUnits)
- Complete diagnostic support, extending to channel-by-channel diagnostics
- Configuration control / option handling (adaptation of the actual configuration via user software)
- Device replacement without programming device, with automatic re-initialization, with and without topological configuring
- I&M data 0 to 3 (electronic rating plate with non-volatile storage of plant data)
- Firmware update
- Pluggable 24 V DC supply connection
- Mains/voltage failure buffering time of at least 5 ms or 10 ms
- Labeling option via optional labeling strips and equipment labeling plates

When using PROFINET interface modules, the following basic functions are also included:

- Media redundancy (MRP)
- Integrated 2-port switch
- Freely selectable connection system (Standard function class and above) and physical connection (High Feature function class and above) by means of SIMATIC BusAdapters, also as system-integrated media converter from fiber-optic to copper cable. Can also be used for interface modules with MultiFieldbus interface.
- Reset button for simple return to factory settings without the need for programming device
- Automatic synchronization of the backplane bus to the PROFINET cycle to minimize the response time fluctuations (jitter)

Listed below is a short overview of the interface modules available for the ET 200SP, showing the essential differences. An up-to-date, clear and more precise comparison of functions of the different interface modules is offered by the TIA Selection Tool.

#### SIMATIC IM155-6DP High Feature with PROFIBUS connection

- Max. 32 I/O modules, also PROFIsafe modules with complete diagnostic support.
- Expansion option with max. 16 modules from the ET 200AL series using the BU-Send BaseUnit and the BA-Send BusAdapter
- Max. 244 bytes in each case for input and output data per module and per station
- Data update time: typ. 5 ms
- PROFIBUS connection via 9-pin D-sub socket
- Package includes server module and PROFIBUS connector with programming device socket

#### SIMATIC IM155-6PN Basic with PROFINET access

- Max. 12 I/O modules, no PROFIsafe modules, with complete diagnostic support
- Max. 32 bytes in each case for input and output data per module and per station
- Data update time: typ. 1 ms
- PROFINET connection via 2 integrated RJ45 sockets (integrated 2-port switch)
- Package includes server module

#### SIMATIC IM 155-6PN Standard with a PROFINET interface for SIMATIC BusAdapters

- Two types of delivery:
  - As package with IM155-6PN ST, with pre-assembled BA 2xRJ45 BusAdapter, including server module
  - As package with IM155-6PN ST, without BusAdapter, including server module
- Max. 32 I/O modules, also PROFIsafe modules, with complete diagnostic support
- Expansion option with max. 16 modules from the ET 200AL series using the BU-Send BaseUnit and the BA-Send BusAdapter
- Max. 256 bytes in each case for input and output data per module and max. 512 bytes per station (depending on configuration)
- Data update time: typ. 1 ms
- Selection of the type of connection of the PROFINET by means of SIMATIC BusAdapter (BusAdapter for copper cables only)

## I/O systems

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200SP

### Interface modules > IM 155-6

#### Overview

SIMATIC IM155-6PN/2 High Feature, 2-port IM with one slot for SIMATIC BusAdapter

- Max. 64 I/O modules, also PROFIsafe modules, with complete diagnostic support
- Expansion option with max. 16 modules from the ET 200AL series using the BU-Send BaseUnit and the BA-Send BusAdapter
- Max. 288 bytes in each case for input and output data per module and max. 1440 bytes per station (depending on configuration)
- Fast data refresh time from 250 µs, also in isochronous mode
- S2 system redundancy
- Choice of connection type and physical connection of the PROFINET by means of SIMATIC BusAdapter. All BusAdapters with a connection for copper and/or fiber-optic cables can be used; BusAdapter must be ordered separately
- Package includes server module

SIMATIC IM155-6MF High Feature, MultiFieldbus IM with two slots for SIMATIC BusAdapters

Differences compared to the 2-port IM155-6PN High Feature:

- Multi-protocol capability  
Operation on Ethernet controllers via the PROFINET, EtherNet/IP and Modbus protocols
- Compatible with IM155-6MF High Feature (as of 6ES7155-6AU01-0CN0);  
Exception: Isochronous mode and prioritized startup

SIMATIC IM155-6PN/3 High Feature, 3-port IM with two slots for SIMATIC BusAdapter

Additional functions compared to 2-port High Feature IM:

- Second slot for SIMATIC BusAdapter, max. 3 ports can be used
- Local IO data coupling between up to 4 controllers

SIMATIC IM 155-6PN High Speed with a PROFINET interface for SIMATIC BusAdapters

- Max. 30 I/O modules, also PROFIsafe modules, with complete diagnostic support
- Max. 32 bytes in each case for input and output data per module and max. 968 bytes per station (depending on configuration)
- Fast data refresh time from isochronous mode from 125 µs
- Performance upgrade for PROFINET
- Choice of connection type and physical connection of the PROFINET by means of SIMATIC BusAdapter. All BusAdapters with a connection for copper and/or fiber-optic cables can be used; BusAdapter must be ordered separately
- Package includes server module

## Overview

- Interface modules for linking the I/O modules to a higher-level PLC with PROFINET or PROFIBUS
- Server module included in the scope of supply
- Station expansion with IP67 I/O system ET 200AL via ET-connection to BU-Send / BA-Send
- PROFINET bus connection
  - 2 ports for line configuration
  - PN connection selected via BusAdapter (ST, HF)
  - Two integrated RJ45 sockets (BA)
- PROFIBUS bus connection
  - 9-pin sub D socket
  - PROFIBUS connector included in scope of supply
  - Hot swapping (module replacement during operation)
  - Startup and operation with gaps
  - Dynamic re-parameterization in RUN mode
  - Configuration control (option handling)
  - Pluggable 24 V DC supply connector
  - Electronically readable rating plate (I&M data)

**Note:**

SIPLUS extreme products are based on SIMATIC standard products. The contents listed here were taken from the respective standard products. SIPLUS extreme-specific information was added.

<b>Conformal coating</b>					
• Coatings for printed circuit board assemblies acc. to EN 61086	Yes; Class 2 for high reliability	Yes; Class 2 for high reliability	Yes; Class 2 for high reliability	Yes; Class 2 for high reliability	Yes; Class 2 for high reliability
• Protection against fouling acc. to EN 60664-3	Yes; Type 1 protection	Yes; Type 1 protection	Yes; Type 1 protection	Yes; Type 1 protection	Yes; Type 1 protection
• Military testing according to MIL-I-46058C, Amendment 7	Yes; Discoloration of coating possible during service life	Yes; Discoloration of coating possible during service life	Yes; Discoloration of coating possible during service life	Yes; Discoloration of coating possible during service life	Yes; Discoloration of coating possible during service life
• Qualification and Performance of Electrical Insulating Compound for Printed Board Assemblies according to IPC-CC-830A	Yes; Conformal coating, Class A	Yes; Conformal coating, Class A	Yes; Conformal coating, Class A	Yes; Conformal coating, Class A	Yes; Conformal coating, Class A

## I/O systems

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200SP

### I/O modules > Digital input modules

#### Overview

- 4, 8 and 16-channel digital input (DI) modules
- Apart from the standard type of delivery in an individual package, selected I/O modules and BaseUnits are also available in a pack of 10 units. The pack of 10 units enables the amount of waste to be reduced considerably, as well as saving the time and cost of unpacking individual modules.

For different requirements, the digital input modules offer:

- Function classes Basic, Standard, High Feature and High Speed as well as fail-safe DI (see "Fail-safe I/O modules")
- BaseUnits for single or multiple-conductor connection with automatic slot coding
- Potential distributor modules for system-integrated expansion with additional potential terminals
- Individual system-integrated potential group formation with self-assembling voltage busbars (a separate power module is no longer required for ET 200SP)

- Option of connecting sensors compliant with IEC 61131 type 1, 2 or 3 (module-dependent) for rated voltages of up to 24 V DC or 230 V AC
- PNP (sinking input) and NPN (sourcing input) versions
- Clear labeling on front of module
- LEDs for diagnostics, status, supply voltage and faults (e.g. wire break/short-circuit)
- Electronically readable and non-volatile writable rating plate (I&M data 0 to 3)
- Extended functions and additional operating modes in some cases
  - MSI operating mode (simultaneous reading of input data from as many as three other PLCs)
  - Counting operating mode (multi-channel counter for pulse generators with 32-bit counting width and up to 10 kHz counting frequency)
  - Oversampling operating mode (n-fold equidistant acquisition of digital values within one PN cycle for increasing the time resolution for slow CPU cycles)
  - Parameterizable input delay time
  - Isochronous mode (simultaneous equidistant reading of all input channels)
  - Hardware interrupts
  - Pulse extension
  - Re-parameterization during operation
  - Firmware update
  - Diagnosis of wire break and short-circuit (on channel or module basis)
  - Value status (optional binary validity information of the input signal in the process image)
  - Supports the PROFlenergy profile
- Optional accessories
  - Labeling strips (film or card)
  - Equipment labeling plate
  - Color-coded label with module-specific CC code
  - Shielding terminal

A quick and clear comparison of the functions of the different DI modules is offered by the TIA Selection Tool.

SIMATIC ET 200SP**I/O modules > Digital input modules****Overview**

Overview of potential distributor modules

Potential distributor module	PU	Article No.	CC codes for push-in terminals
<b>PotDis BU</b> Type P1 (light), 17x P1 potential, 1x P2 potential, for starting a new potential group (max. 10 A)	1	6ES7193-6UP00-0DP1	CC00, CC62
<b>PotDis BU</b> Type P1 (dark), 17x P1 potential, 1x P2 potential, for continuing the potential group	1	6ES7193-6UP00-0BP1	CC00, CC62
<b>PotDis BU</b> Type P2 (light), 1x P1 potential, 17x P2 potential, for starting a new potential group (max. 10 A)	1	6ES7193-6UP00-0DP2	CC00, CC63
<b>PotDis BU</b> Type P2 (dark), 1x P1 potential, 17x P2 potential, for continuing the potential group	1	6ES7193-6UP00-0BP2	CC00, CC63
<b>PotDis TB</b> Type BR-W, 18x internally jumpered terminals, without reference to P1, P2 or AUX, (total current max. 10 A)	1	6ES7193-6TP00-0TP0	CC10 to CC13
<b>PotDis TB</b> Type P1-R, 18x P1 potential, (total current max. 10 A)	1	6ES7193-6TP00-0TP1	CC10, CC12
<b>PotDis TB</b> Type P2-B, 18x P2 potential, (total current max. 10 A)	1	6ES7193-6TP00-0TP2	CC10, CC13
<b>PotDis TB</b> Type n.c.-G, 18x n.c. (not connected) terminals, without reference to P1, P2 or AUX	1	6ES7193-6TP00-0TN0	CC10

**Ordering data****Digital input modules**

Delivery options:

Apart from the standard type of delivery in single-unit package, selected I/O modules and BaseUnits are also available in a pack of 10 units. The pack of 10 units enables the amount of waste to be reduced considerably, as well as saving the time and cost of unpacking individual modules.

The number of modules required is the number of modules ordered. The pack type is selected by selecting the article number. Packs of 10 can therefore only be ordered in integer multiples of 10.

Digital input module  
DI 8x24VDC Basic, BU type A0, color code CC01

- Pack of 1 unit
- Pack of 10 units; to order a pack, please order this article number with an order quantity of 10

Digital input module

**I/O systems**SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200SP**I/O modules > Digital input modules****Ordering data****Article No.****Article No.****Accessories****Equipment labeling plate**

10 sheets of 16 labels, for printing with thermal transfer card printer or plotter

**6ES7193-6LF30-0AW0****Labeling strips**

500 labeling strips on roll, light gray, for inscription with thermal transfer roll printer

**6ES7193-6LR10-0AA0**

500 labeling strips on roll, yellow, for inscription with thermal transfer roll printer

**6ES7193-6LR10-0AG0**

1 000 labeling strips DIN A4, light gray, card, perforated, for inscription with laser printer

**6ES7193-6LA10-0AA0**

1 000 labeling strips DIN A4, yellow, card, perforated, for inscription with laser printer

**6ES7193-6LA10-0AG0****BU cover**

For covering empty slots (gaps); 5 units

- 15 mm wide
- 20 mm wide

**6ES7133-6CV15-1AM0****6ES7133-6CV20-1AM0****Shield connection**

5 shield supports and 5 shield terminals

**6ES7193-6SC00-1AM0****Color-coded labels for 15 mm-wide BaseUnits**

Color code CC00, for 16 push-in terminals, BU type A0, A1, gray (terminals 1 to 8), red (terminals 9 to 16); 10 units

**6ES7193-6CP00-2MA0**

Color code CC01, for 16 push-in terminals, BU type A0, A1, gray (terminals 1 to 8), red (terminals 9 to 16); 10 units

**6ES7193-6CP01-2MA0**

Color code CC01, for 16 push-in terminals, BU type A0, A1, gray (terminals 1 to 8), red (terminals 9 to 16); 50 units

**6ES7193-6CP01-4MA0**

Color code CC02, for 16 push-in terminals, BU type A0, A1, gray (terminals 1 to 8), blue (terminals 9 to 16); 10 units

**6ES7193-6CP02-2MA0**

Color code CC02, for 16 push-in terminals, BU type A0, A1, gray (terminals 1 to 8), blue (terminals 9 to 16); 50 units

**6ES7193-6CP02-4MA0**

Color code CC71, for 10 AUX terminals, BU type A0, yellow/green (terminals 1 A to 10 A); 10 units

**6ES7193-6CP71-2AA0**

Color code CC72, for 10 AUX terminals, BU type A0, red (terminals 1 A to 10 A); 10 units

**6ES7193-6CP72-2AA0**

Color code CC73, for 10 AUX terminals, BU type A0, blue (terminals 1 A to 10 A); 10 units

**6ES7193-6CP73-2AA0**

Color code CC73, for 10 AUX terminals, BU type A0, blue (terminals 1 A to 10 A); 50 units

**6ES7193-6CP73-4AA0****Color-coded labels for 20 mm-wide BaseUnits**

Color code CC41, for 16 push-in terminals, BU type B1, gray (terminals 1 to 4), red (terminals 5 to 8), blue (terminals 9 to 12); 10 units

**6ES7193-6CP41-2MB0****Color-coded labels for PotDis BU**

Color code CC62, for 16 push-in terminals, PotDis BU type P1, red (terminals 1 to 16); 10 units

**6ES7193-6CP62-2MA0**

Color code CC63, for 16 push-in terminals, PotDis BU type P2, blue (terminals 1 to 16); 10 units

**6ES7193-6CP63-2MA0****Color-coded labels for PotDis TB**

Color code CC10, for 18 push-in terminals, PotDis TB, gray (terminals 1 to 18); 10 units

**6ES7193-6CP10-2MT0**

Color code CC11, for 18 push-in terminals, PotDis TB, yellow-green (terminals 1 to 18); 10 units

**6ES7193-6CP11-2MT0**

Color code CC12, for 18 push-in terminals, PotDis TB, type P1 and BR, red (terminals 1 to 18); 10 units

**6ES7193-6CP12-2MT0**

Color code CC13, for 18 push-in terminals, PotDis TB, type P2 and BR, blue (terminals 1 to 18); 10 units

**6ES7193-6CP13-2MT0****Mechanical coding elements**

For automatic coding of I/O modules; spare part. 20 units

## I/O systems

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200SP

### I/O modules > Digital output modules

#### Overview

- 4, 8 and 16-channel digital output (DQ) modules
- Apart from the standard type of delivery in an individual package, selected I/O modules and BaseUnits are also available in a pack of 10 units. The pack of 10 units enables the amount of waste to be reduced considerably, as well as saving the time and cost of unpacking individual modules.

For different requirements, the digital output modules offer:

- Function classes Basic, Standard, High Feature and High Speed as well as fail-safe DQ (see "Fail-safe I/O modules")
- BaseUnits for single or multiple-conductor connection with automatic slot coding
- Potential distributor modules for system-integrated expansion with potential terminals
- Individual system-integrated potential group formation with self-assembling voltage busbars (a separate power module is no longer required for ET 200SP)
- Option of connecting actuators with rated load voltages of up to 120 V DC or 230 V AC and load currents of up to 5 A (depending on module)

- Relay modules
  - NO contact or changeover contact
  - for load or signal voltages (coupling relay)
  - with manual operation (as simulation module for inputs and outputs, jog mode for commissioning or emergency operation on failure of PLC)
- PNP (sourcing output) and NPN (sinking output) versions
- Clear labeling on front of module
- LEDs for diagnostics, status, supply voltage and faults
- Electronically readable and non-volatile writable rating plate (I&M data 0 to 3)
- Extended functions and additional operating modes in some cases
  - MSO operating mode (simultaneous reading of output data from as many as three other PLCs)
  - Pulse width modulation mode (output value as pulse-pause ratio of between 0.0% and 100.0% for controlling the output current)
  - Oversampling operating mode (n-fold equidistant output of digital values within a PN cycle for the precise time control of an output or a sequence of output values)
  - Isochronous mode (simultaneous equidistant output of all output channels)
  - Output of substitute value in the event of interruptions to communication (0, 1 or last value retained)
  - Re-parameterization during operation
  - Firmware update
  - Valve control (output signal does not switch automatically after a set pickup time to a current-saving PWM output)
  - Diagnosis of wire break and short-circuit (on channel or module basis)
  - Value status (optional binary validity information of the output signal in the process image)
  - Supports the PROFlenergy profile
- Optional accessories
  - Labeling strips (film or card)
  - Equipment labeling plate
  - Color-coded label with module-specific CC code
  - Shielding terminal

A quick and clear comparison of the functions of the different DQ modules is offered by the TIA Selection Tool.

10

## Overview

### Overview of digital output modules

Digital output	PU	Article No.	CC code	BU type
DQ 16 x 24 V DC/0.5 A BA	1	6ES7132-6BH00-0AA0	CC00	A0

## Ordering data

### Digital output modules

Type of delivery:  
Apart from the standard type of delivery in an individual package, selected I/O modules and BaseUnits are also available in a pack of 10 units. The pack of 10 units enables the amount of waste to be reduced considerably, as well as saving the time and cost of unpacking individual modules.

The number of modules required is the number of modules ordered. The pack type is selected by selecting the article number. Packs of 10 can therefore only be ordered in integer multiples of 10.

Digital output module  
DQ 16x24VDC/0.5A Basic,  
BU type A0, color code CC00

- Pack of 1 unit
- Pack of 10 units; to order a pack, please order this article number with an order quantity of 10.

**6ES7132-6BH00-0AA0**  
**6ES7132-6BH00-2AA0**

Digital output module  
DQ 16x24VDC/0.5A Standard,  
BU type A0, color code CC00

- Pack of 10 units; to order a pack, please order this article number with an order quantity of 10.

**6ES7132-6BH00-2BA0**

Digital output module  
DQ 16x24VDC/0.5A Standard,  
Source output (switching to P  
potential), BU type A0,  
color code CC00

- Pack of 1 unit
- Pack of 10 units; to order a pack, please order this article number with an order quantity of 10.

**6ES7132-6BH01-0BA0**  
**6ES7132-6BH01-2BA0**

Digital output module  
DQ 8x24VDC/0.5A Sinking output,  
Basic, BU type A0,  
color code CC01

- Pack of 1 unit

**6ES7132-6BF61-0AA0**

Digital output module  
DQ 8x24VDC/0.5A Basic,  
BU type A0, color code CC02

- Pack of 1 unit
- Pack of 10 units; to order a pack, please order this article number with an order quantity of 10.

Digital output module  
DQ 4x24VDC/2A High Feature,  
BU type A0, color code CC02,  
channel-specific diagnostics,  
isochronous mode, shared output  
(MSO)

- Pack of 1 unit

**6ES7132-6BD20-0CA0**

Digital output module  
DQ 4x24VDC/2A High Speed,  
BU type A0, color code CC02,  
3 operating modes  
(fast isochronous DQ with valve  
control, pulse width modulation,  
oversampling)

- Pack of 1 unit

**6ES7132-6BD20-0DA0**

Digital output module  
DQ 4x24VAC...230VAC/2A  
Standard for BU type B1,  
color code CC41

- Pack of 1 unit
- Pack of 10 units; to order a pack, please order this article number with an order quantity of 10.

**6ES7132-6FD00-0BB1**  
**6ES7132-6FD00-2BB1**

Digital output module  
DQ 4x24VAC...230VAC/2A  
High Feature for BU type U0,  
color code CC20,  
2 operating modes: DQ and PC  
(power control via phase angle,  
half-wave and full-wave control)

- Pack of 1 unit

**6ES7132-6FD00-0CU0**

Signal relay module  
RQ CO 4x24VUC/2A Standard,  
changeover contact, BU type A0,  
color code CC00

- Pack of 1 unit

**6ES7132-6GD51-0BA0**

Relay module  
RQ NO 4x120VDC-230VAC/5A  
Standard, NO contact,  
BU type B0, B1

- Pack of 1 unit
- Pack of 10 units; to order a pack, please order this article number with an order quantity of 10.

## Overview

Energy Meter HF module  
for SIMATIC ET 200SP

Energy Meter HF module for SIMATIC ET 200SP video  
[https://players.brightcove.net/1813624294001/70fec0f-fbad-4fad-a077-d0e26af4d84c\\_default/index.html?videoId=5848889024001](https://players.brightcove.net/1813624294001/70fec0f-fbad-4fad-a077-d0e26af4d84c_default/index.html?videoId=5848889024001)

- 2, 4 and 8-channel analog input (AI) modules
- Apart from the standard type of delivery in an individual package, selected I/O modules and BaseUnits are also available in a pack of 10 units. The pack of 10 units enables the amount of waste to be reduced considerably, as well as saving the time and cost of unpacking individual modules.

For different requirements, the digital output modules offer:

- Function classes Basic, Standard, High Feature and High Speed
- BaseUnits for single or multiple-conductor connection with automatic slot coding
- Potential distributor modules for system-integrated expansion with potential terminals
- Individual system-integrated potential group formation with self-assembling voltage busbars (a separate power module is no longer required for ET 200SP)
- Option of connecting current, voltage and resistance sensors, as well as thermocouples
- Option of connecting force and torque sensors

- Energy Meter for recording up to 600 electrical variables
- Clear labeling on front of module
- LEDs for diagnostics, status, supply voltage and faults
- Electronically readable and non-volatile writable rating plate (I&M data 0 to 3)
- Extended functions and additional operating modes in some cases
  - MSI operating mode (simultaneous reading of input data from as many as three other PLCs)
  - Oversampling operating mode (n-fold equidistant acquisition of analog values within one PN cycle for increasing the time resolution for slow CPU cycles)
  - Isochronous mode (simultaneous equidistant reading in of all analog values)
  - Scalable measuring range (adaptation of measuring range, increase of the 16-bit resolution by adapting the measuring range to a limited section)
  - Scaling of the measured values (transmission of the analog value normalized to the required physical value as a 32-bit floating point value)
  - Internal compensation of the line resistance for thermocouples by means of terminal temperature measurement in the BaseUnit for BU type A1
  - Internal compensation also for 2-conductor resistance measurement by means of adjustable line resistance
  - Calibration during runtime
  - Single-channel galvanic isolation
  - HART communication
  - Re-parameterization during operation
  - Firmware update
  - Diagnostics of wire break, short-circuit, overflow, underflow
  - Two upper and lower hardware interrupts in each case, interference frequency suppression, smoothing
  - Value status (optional binary validity information of the analog value status in the process image)
  - Supports the PROFIenergy profile
- Optional accessories
  - Labeling strips (film or card)
  - Equipment labeling plate
  - Color-coded label with module-specific CC code
  - Shielding terminal

A quick and clear comparison of the functions of the AI modules is offered by the TIA Selection Tool.

**Ordering data****Article No.****Article No.****Analog input modules**

Type of delivery:  
Apart from the standard type of delivery in a single-unit package, selected I/O modules and BaseUnits are also available in a pack of 10 units. The pack of 10 units enables the amount of waste to be reduced considerably, as well as saving the time and cost of unpacking individual modules.

The number of modules required is the number of modules ordered. The pack type is selected by selecting the article number. Packs of 10 can therefore only be ordered in integer multiples of 10.

Analog input module  
AI 8xI 2/4-wire BA, BU type A0 or A1, color code CC01

**6ES7 134-6GF00-0AA1**

**6ES7134-6GB00-0BA1**

Analog input module  
AI 4xI 2/4-wire Standard, BU type A0 or A1, color code CC03, 16-bit, ±0.3%

- Pack of 1 unit
- Pack of 10 units; to order a pack, please order this article number with an order quantity of 10.

**6ES7134-6GD01-0BA1**  
**6ES7134-6GD01-2BA1**

Analog input module  
AI 4xI 2-wire 4 ... 20 mA HART, BU type A0 or A1, color code CC03

**6ES7134-6TD00-0CA1**

Analog input module  
AI 2xU/I 2/4-wire High Feature, BU type A0 or A1, color code CC05, 16-bit, ±0.1%, independent channel galvanic isolation, isochronous mode above 1 ms

**6ES7134-6HB00-0CA1**

Analog input module  
AI 2xU/I 2/4-wire High Speed, BU type A0 or A1, color code CC00, 16-bit, ±0.3%, isochronous mode above 250 µs, oversampling above 50 µs

**6ES7134-6HB00-0DA1**

Analog input module  
AI 8xRTD/TC 2-wire High Feature, BU type A0 or A1, color code CC00, 16-bit, ±0.1%, scalable measuring range

- Pack of 1 unit
- Pack of 10 units; to order a pack, please order this article number with an order quantity of 10.

**6ES7134-6JF00-0CA1**  
**6ES7134-6JF00-2CA1**

Analog input module  
AI 4xRTD/TC 2/3/4-wire High Feature, BU type A0 or A1, color code CC00, 16-bit, ±0.1%, scalable measuring range

- Pack of 1 unit
- Pack of 10 units; to order a pack, please order this article number with an order quantity of 10.

**6ES7134-6JD00-0CA1**  
**6ES7134-6JD00-2CA1**

**6ES7193-6BP00-0BU0****6ES7193-6BP00-2BU0****Potential distributor modules****PotDis BU**

PotDis BU, Type P1 (light), 17x P1 potential, 1x P2 potential, for starting a new potential group (max. 10 A)

**6ES7193-6UP00-ODP1**

PotDis BU, Type P1 (dark), 17x P1 potential, 1x P2 potential, for continuing the potential group

**6ES7193-6UP00-OBP1**

PotDis BU, Type P2 (light), 1x P1 potential, 17x P2 potential, for starting a new potential group (max. 10 A)

**6ES7193-6UP00-ODP2**

PotDis BU, Type P2 (dark), 1x P1 potential, 17x P2 potential, for continuing the potential group

**6ES7193-6UP00-OBP2****PotDis TB**

PotDis TB, type BR-W, 18x internally jumpered terminals, without reference to P1, P2 or AUX, (total current max. 10 A)

**6ES7193-6TP00-0TP0**

PotDis TB, type P1-R, 18x P1 potential, (total current max. 10 A)

**6ES7193-6TP00-0TP1**

PotDis TB, type P2-B, 18x P2 potential, (total current max. 10 A)

**6ES7193-6TP00-0TP2**

PotDis TB, type n.c.-G, 18x n.c. (not connected) terminals, without reference to P1, P2 or AUX

**6ES7193-6TP00-0TN0****Accessories****Equipment labeling plate**

10 sheets of 16 labels, for printing with thermal transfer card printer or plotter

**6ES7193-6LF30-0AW0****Labeling strips**

500 labeling strips on roll, light gray, for inscription with thermal transfer roll printer

**6ES7193-6LR10-0AA0**

500 labeling strips on roll, yellow, for inscription with thermal transfer roll printer

**6ES7193-6LR10-0AG0**

1 000 labeling strips DIN A4, light gray, card, perforated, for inscription with laser printer

**6ES7193-6LA10-0AA0**

1 000 labeling strips DIN A4, yellow, card, perforated, for inscription with laser printer

**6ES7193-6LA10-0AG0****BU cover**

For covering empty slots (gaps); 5 units

- 15 mm wide
- 20 mm wide

**6ES7133-6CV15-1AM0****6ES7133-6CV20-1AM0****Shield connection**

5 shield supports and 5 shield terminals

**6ES7193-6SC00-1AM0****Color-coded labels**

Color code CC00, for 16 push-in terminals, BU type A0, A1, gray (terminals 1 to 8), red (terminals 9 to 16); 10 units

**6ES7193-6CP00-2MA0**

Color code CC01, for 16 push-in terminals, BU type A0, A1, gray (terminals 1 to 8), red (terminals 9 to 16); 10 units

**6ES7193-6CP01-2MA0**

Color code CC01, for 16 push-in terminals, BU type A0, A1, gray (terminals 1 to 8), red (terminals 9 to 16); 50 units

**6ES7193-6CP01-4MA0**

Color code CC02, for 16 push-in terminals, BU type A0, A1, gray (terminals 1 to 8), blue (terminals 9 to 16); 10 units

**6ES7193-6CP02-2MA0**

Color code CC02, for 16 push-in terminals, BU type A0, A1, gray (terminals 1 to 8), blue (terminals 9 to 16); 50 units

**6ES7193-6CP02-4MA0**

Color code CC03, for 16 push-in terminals, BU type A0, A1, gray (terminals 1 to 8), red (terminals 9 to 12), gray (terminals 13 to 16); 10 units

**6ES7193-6CP03-2MA0**

Color code CC05, for 16 push-in terminals, BU type A0, A1, gray (terminals 1 to 12), red (terminals 13 to 14), blue (terminals 15 to 16); 10 units

**6ES7193-6CP05-2MA0**

Color code CC71, for 10 AUX terminals, BU type A0, yellow/green (terminals 1 A to 10 A); 10 units

**6ES7193-6CP71-2AA0**

Color code CC72, for 10 AUX terminals, BU type A0, red (terminals 1 A to 10 A); 10 units

**6ES7193-6CP72-2AA0**

Color code CC73, for 10 AUX terminals, BU type A0, blue (terminals 1 A to 10 A); 10 units

**6ES7193-6CP73-2AA0**

Color code CC74, for 2x5 additional terminals, BU type A1, red (terminals 1B to 5B), blue (terminals 1C to 5C); 10 units

**6ES7193-6CP74-2AA0****Color-coded labels for PotDis BU**

Color code CC62, for 16 push-in terminals, PotDis BU type P1, red (terminals 1 to 16); 10 units

**6ES7193-6CP62-2MA0**

Color code CC63, for 16 push-in terminals, PotDis BU type P2, blue (terminals 1 to 16); 10 units

**6ES7193-6CP63-2MA0****Color-coded labels for PotDis TB**

Color code CC10, for 18 push-in terminals, PotDis TB, gray (terminals 1 to 18); 10 units

**6ES7193-6CP10-2MT0**

Color code CC11, for 18 push-in terminals, PotDis TB, yellow-green (terminals 1 to 18); 10 units

**6ES7193-6CP11-2MT0**

**Ordering data**

Color code CC12, for 18 push-in terminals, PotDis TB, type P1 and BR, red (terminals 1 to 18); 10 units

Color code CC13, for 18 push-in terminals, PotDis TB, type P2 and BR, blue (terminals 1 to 18); 10 units

#### Technical specifications

Article number	<b>7MH4134-6LB00-0DA0</b> ET 200SP AI 2 X SG 4-/6-WIRE HS
<b>General information</b>	
Product type designation	AI 2xSG 4-/6-wire HS
<b>Product function</b>	
• I&M data	Yes; I&M0 to I&M3
• Isochronous mode	Yes
• Measuring range scalable	Yes
• Scalable measured values	No
• Adjustment of measuring range	Yes; $\pm 0.5 \dots 320$ mV/V
<b>Engineering with</b>	
• STEP 7 TIA Portal configurable/ integrated from version	V14 SP1
• PROFIBUS from GSD version/ GSD revision	V03.01.105
• PROFINET from GSD version/ GSD revision	GSDML V2.33
<b>Operating mode</b>	
• Oversampling	Yes; 2 channels per module
• MSI	No
<b>Supply voltage</b>	
Rated value (DC)	24 V
Reverse polarity protection	Yes
<b>Analog inputs</b>	
Number of analog inputs	2; Differential inputs
Cycle time (all channels), min.	100 $\mu$ s
Analog input with oversampling	Yes
• Values per cycle, max.	14
• Resolution, min.	100 $\mu$ s
<b>Input ranges</b>	
• Strain gauges (full bridges)	Yes
<b>Cable length</b>	
• shielded, max.	500 m
<b>Analog value generation for the inputs</b>	
Measurement principle	Sigma Delta
<b>Integration and conversion time/ resolution per channel</b>	
• Resolution with overrange (bit including sign), max.	28 bit; 16 bits with oversampling
• Integration time, parameterizable	Yes
• Interference voltage suppression for interference frequency f1 in Hz	60 / 50 Hz / no
• Conversion time (per channel)	100 $\mu$ s
<b>Smoothing of measured values</b>	
• IIR low-pass filter frequency	0.01 ... 600 Hz
• Notch filter frequency	0.1 ... 1 000 Hz
• Notch filter quality	5.00 ... 250.00
• Average value filter	0.1 ... 655.3 ms
<b>Encoder</b>	
<b>Connection of signal encoders</b>	
• For strain gauges (full bridges) with 4-conductor connection	Yes
• For strain gauges (full bridges) with 6-conductor connection	Yes
• Resistance of full bridge, min.	80 $\Omega$
• Resistance of full bridge, max.	5 000 $\Omega$

Article number	<b>7MH4134-6LB00-0DA0</b> ET 200SP AI 2 X SG 4-/6-WIRE HS
<b>Errors/accuracies</b>	
Temperature coefficient, zero point	$\leq \pm 0.25$ $\mu$ V/K
Temperature coefficient, span, 4-wire connection (in relation to end value)	$\leq \pm 5$ ppm/K
Temperature coefficient, span, 6-wire connection (in relation to end value)	$\leq \pm 10$ ppm/K
<b>Basic error limit (operational limit at 25 °C)</b>	
• Voltage, relative to input range, (+/-)	0.05 %; See manual for details
<b>Isochronous mode</b>	
Filtering and processing time (TCI), min.	87 $\mu$ s
Bus cycle time (TDP), min.	125 $\mu$ s

Product type designation	AI Energy Meter CT ST	AI Energy Meter RC ST	AI Energy Meter CT HF	AI Energy Meter RC HF
<b>Product function</b>				
• Voltage measurement	Yes	Yes	Yes	Yes
- without voltage transformer	Yes	Yes	Yes	Yes
- with voltage transformer	Yes	Yes	Yes	Yes
• Current measurement	Yes; max. 3 + neutral conductor	Yes; max. 3 + neutral conductor	Yes; Max. 4	Yes; Max. 4
- without current transformer	No	No	No	No
- with current transformer	Yes; 1 A or 5 A current transformer	No	Yes; 1 A or 5 A current transformer	No
- With Rogowski coil	No	Yes	No	Yes
- With current-voltage-converter	No	Yes; 333 mV interface	No	Yes; 333 mV interface
• Energy measurement	Yes	Yes	Yes	Yes
• Frequency measurement	Yes	Yes	Yes	Yes
• Power measurement	Yes	Yes	Yes	Yes
• Active power measurement	Yes	Yes	Yes	Yes
• Reactive power measurement	Yes	Yes	Yes	Yes
• Power factor measurement	Yes	Yes	Yes	Yes
• Active factor measurement	Yes	Yes	Yes	Yes
• Reactive power compensation	Yes	Yes	Yes	Yes
• Line analysis	No	No	Yes	Yes
- Monitoring of instantaneous and half-wave values			Yes	Yes
- THD measurement for current and voltage			Yes	Yes
- Harmonics for current and voltage			Yes	Yes
- Voltage dip (DIP)			Yes	Yes
- Voltage swell			Yes	Yes
• I&M data	Yes; I&M0 to I&M3	Yes; I&M0 to I&M3	Yes; I&M0 to I&M3	Yes; I&M0 to I&M3
• Isochronous mode	No	No	No	No
<b>Engineering with</b>				
• STEP 7 TIA Portal configurable/integrated from version	STEP 7 V16 or higher with HSP	STEP 7 V16 or higher with HSP	STEP 7 V16 or higher with HSP	STEP 7 V16 or higher with HSP
• STEP 7 configurable/integrated from version	Configurable via GSD file	Configurable via GSD file	V5.5 SP3 or higher	V5.5 SP3 or higher
• PROFIBUS from GSD version/GSD revision	One GSD file each, Revision 3 and 5 and higher	One GSD file each, Revision 3 and 5 and higher	One GSD file each, Revision 3 and 5 and higher	One GSD file each, Revision 3 and 5 and higher
• PROFINET from GSD version/GSD revision	V2.3	V2.3	V2.3	V2.3
<b>Operating mode</b>				
• Switching between operating modes in RUN	Yes; For module version 32 I/20 Q, it is possible to dynamically switch between 25 user data variants, 23 of which are pre-defined and 2 of which can be defined by the specific user	Yes; For module version 32 I/20 Q, it is possible to dynamically switch between 25 user data variants, 23 of which are pre-defined and 2 of which can be defined by the specific user	Yes; For module version 32 I/20 Q, it is possible to dynamically switch between 25 user data variants, 23 of which are pre-defined and 2 of which can be defined by the specific user	Yes; For module version 32 I/20 Q, it is possible to dynamically switch between 25 user data variants, 23 of which are pre-defined and 2 of which can be defined by the specific user
• Cyclic measured value access	Yes	Yes	Yes	Yes
• Acyclic measured value access	Yes	Yes	Yes	Yes
• Fixed measured value sets	Yes	Yes	Yes	Yes
• Freely definable measured value sets	Yes; For cyclic and acyclic measured value access	Yes; For cyclic and acyclic measured value access	Yes; For cyclic and acyclic measured value access	Yes; For cyclic and acyclic measured value access
<b>Installation type/mounting</b>				
Mounting position	any	any	any	any
<b>Supply voltage</b>				
Design of the power supply	DC	DC	DC	DC
Type of supply voltage	24 V DC	24 V DC	24 V DC	24 V DC

<b>Analog inputs</b>				
Cycle time (all channels), typ.	50 ms; Time for consistent update of all measured and calculated values (cyclic and acyclic data)	50 ms; Time for consistent update of all measured and calculated values (cyclic and acyclic data)	50 ms; Time for consistent update of all measured and calculated values (cyclic and acyclic data)	50 ms; Time for consistent update of all measured and calculated values (cyclic and acyclic data)
<b>Cable length</b>				
• shielded, max.	200 m	200 m	200 m	200 m
<b>Interrupts/diagnostics/ status information</b>				
<b>Alarms</b>				
• Diagnostic alarm	Yes	Yes	Yes	Yes
• Limit value alarm	Yes	Yes	Yes	Yes
• Hardware interrupt	Yes; Monitoring of up to 16 freely selectable process values (exceeding or undershooting of value)	Yes; Monitoring of up to 16 freely selectable process values (exceeding or undershooting of value)	Yes; Monitoring of up to 16 freely selectable process values (exceeding or undershooting of value)	Yes; Monitoring of up to 16 freely selectable process values (exceeding or undershooting of value)
<b>Diagnoses</b>				
• Line quality			Yes	Yes
• Supply voltage	Yes	Yes	Yes	Yes
• Hardware interrupt lost	Yes	Yes	Yes	Yes
• Parameter assignment error	Yes	Yes	Yes	Yes
• Module fault	Yes	Yes	Yes	Yes
• Channel not available	Yes	Yes	Yes	Yes
• Overflow/underflow	Yes	Yes	Yes	Yes
• Overload current	Yes	Yes	Yes	Yes
<b>Diagnostics indication LED</b>				
• Monitoring of the supply voltage (PWR-LED)	Yes	Yes	Yes	Yes
• Channel status display	Yes; green LED	Yes; green LED	Yes; green LED	Yes; green LED
• for channel diagnostics	Yes; red Fn LED	Yes; red Fn LED	Yes; red Fn LED	Yes; red Fn LED
• for module diagnostics	Yes; green/red DIAG LED	Yes; green/red DIAG LED	Yes; green/red DIAG LED	Yes; green/red DIAG LED
<b>Integrated Functions</b>				
<b>Measuring functions</b>				
• Measuring procedure for voltage measurement	TRMS	TRMS	TRMS	TRMS
• Measuring procedure for current measurement	TRMS	TRMS	TRMS	TRMS
• Type of measured value acquisition	seamless	seamless	seamless	seamless
• Curve shape of voltage	Sinusoidal or distorted	Sinusoidal or distorted	Sinusoidal or distorted	Sinusoidal or distorted
• Buffering of measured variables	Yes	Yes	Yes	Yes
• Parameter length	128 byte	128 byte	128 byte	128 byte
• Bandwidth of measured value acquisition	3.2 kHz; Harmonics: 63 / 50 Hz, 52 / 60 Hz	3.2 kHz; Harmonics: 63 / 50 Hz, 52 / 60 Hz	3.2 kHz; Harmonics: 63 / 50 Hz, 52 / 60 Hz	3.2 kHz; Harmonics: 63 / 50 Hz, 52 / 60 Hz
<b>Measuring range</b>				
- Frequency measurement, min.	40 Hz	40 Hz	40 Hz	40 Hz
- Frequency measurement, max.	70 Hz	70 Hz	70 Hz	70 Hz
<b>Measuring inputs for voltage</b>				
- Measurable line voltage between phase and neutral conductor	277 V	277 V	277 V	277 V
- Measurable line voltage between the line conductors	480 V	480 V	480 V	480 V
- Measurable line voltage between phase and neutral conductor, min.	3 V	3 V	3 V	3 V
- Measurable line voltage between phase and neutral conductor, max.	300 V	300 V	300 V	300 V
- Measurable line voltage between the line conductors, min.	6 V	6 V	6 V	6 V
- Measurable line voltage between the line conductors, max.	519 V	519 V	519 V	519 V

<b>Measuring inputs for voltage (continued)</b>				
- Internal resistance line conductor and neutral conductor	1.5 MΩ	1.5 MΩ	1.5 MΩ	1.5 MΩ
- Power consumption per phase	60 mW; 300 V AC	60 mW; 300 V AC	60 mW; 300 V AC	60 mW; 300 V AC
- Impulse voltage resistance 1,2/50μs	2.5 kV	2.5 kV	2.5 kV	2.5 kV
- Overvoltage category		CAT II according to IEC 61010 Part 1		CAT II according to IEC 61010 Part 1
<b>Measuring inputs for current</b>				
- measurable relative current (AC), min.	1 %; Relative to measuring range; 1 A, 5 A		1 %; Relative to measuring range; 1 A, 5 A	
- measurable relative current (AC), max.	100 %; Relative to the secondary rated current 5 A		120 %; Relative to the secondary rated current 5 A	
- Continuous current with AC, maximum permissible	5 A		5 A; 6 A permanent thermal overload	
- Apparent power consumption per phase for measuring range 5 A	0.6 V·A		0.6 V·A	
- Rated value short-time withstand current restricted to 1 s	100 A		100 A	
- Input resistance measuring range 0 to 5 A	25 mΩ; At the terminal		25 mΩ; At the terminal	
- Surge strength	10 A; for 1 minute		10 A; for 1 minute	
- Zero point suppression	0 ... 20%, referred to the nominal current		0 ... 20%, referred to the nominal current	
<b>Measuring inputs for current (Rog. or I/U converter)</b>				
- Measurable current at AC, max.		424 mV		424 mV
- Continuous voltage, maximum permissible		2 V		2 V
- Rated value, short-time withstand voltage restricted to 1 s		30 V		30 V
- Input resistance		120 kΩ		120 kΩ
- Zero point suppression		Yes; 0 ... 20%, referred to the nominal current		Yes; 0 ... 20%, referred to the nominal current
<b>Accuracy class according to IEC 61557-12</b>				
- Measured variable apparent power	0.5	0.5	0.5	0.5
- Measured variable active power	0.5	0.5	0.5	0.5
- Measured variable power factor	0.5	0.5	0.5	0.5
- Measured variable active energy	0.5	0.5	0.5	0.5
- Measured variable phase angle	±0.5 °; not covered by IEC 61557-12	±0.5 °; not covered by IEC 61557-12	±0.5 °; not covered by IEC 61557-12	±0.5 °; not covered by IEC 61557-12
- Measured variable frequency	0.05; only valid for the permissible voltage measuring range	0.05; only valid for the permissible voltage measuring range	0.05; only valid for the permissible voltage measuring range	0.05; only valid for the permissible voltage measuring range
<b>Accuracy class line analysis acc. to IEC 61000-4-30</b>				
- Measured variable voltage			Class S	Class S
- Measured variable current			Class S	Class S
- Measured variable frequency			Class S	Class S
- Measured variable voltage interruption			Class S	Class S
- Measured variable voltage dip and swell			Class S	Class S
- Measured variable harmonic voltage			Class S	Class S
- Measured variable harmonic current			Class S	Class S

## Overview

- 2 and 4-channel analog output (AQ) modules
- Apart from the standard type of delivery in an individual package, selected I/O modules and BaseUnits are also available in a pack of 10 units. The pack of 10 units enables the amount of waste to be reduced considerably, as well as saving the time and cost of unpacking individual modules.

For different requirements, the analog output modules offer:

- Function classes Standard, High Feature and High-Speed
- BaseUnits for single or multiple-conductor connection with automatic slot coding
- Potential distributor modules for system-integrated expansion with potential terminals
- Individual system-integrated potential group formation with self-assembling voltage busbars (a separate power module is no longer required for ET 200SP)

- Option for connecting current and voltage actuators
- Clear labeling on front of module
- LEDs for diagnostics, status, supply voltage and faults
- Electronically readable and non-volatile writable rating plate (I&M data 0 to 3)
- Extended functions and additional operating modes in some cases
  - Oversampling operating mode (n-fold equidistant output of an analog value within one PN cycle and thus the precisely timed output of an analog value or a sequence of analog values)
  - Isochronous mode (simultaneous equidistant output of analog values)
  - Output of substitute value in the event of interruptions to communication (shutdown, output adjustable substitute value, or keep last value)
  - Calibration during runtime
  - Re-parameterization during operation
  - Firmware update
  - Diagnostics of wire break, short-circuit, overflow, underflow
  - Value status (optional binary validity information of the analog value status in the process image)
  - Supports the PROFInenergy profile
- Optional accessories
  - Labeling strips (film or card)
  - Equipment labeling plate
  - Color-coded label with module-specific CC code
  - Shielding terminal

A quick and clear comparison of the functions of the AQ modules is offered by the TIA Selection Tool.

## Overview of analog output modules

Analog output	PU	Article No.	CC code	BU type
AQ 2 x U ST	1	6ES7135-6FB00-0BA1	CC00	A0, A1
AQ 2 x I ST	1	6ES7135-6GB00-0BA1	CC00	A0, A1
AQ 4 x U/I ST	1	6ES7135-6HD00-0BA1	CC00	A0, A1
AQ 2 x U/I HF	1	6ES7135-6HB00-0CA1	CC00	A0, A1
AQ 2xU/I HS	1	6ES7135-6HB00-0DA1	CC00	A0, A1
With two operating modes: • High-speed isochronous AQ • Oversampling				
AQ 4xI HART HF	1	6ES7135-6TD00-0CA1	CC00	A0, A1

Type of delivery:  
Apart from the standard type of  
delivery in a single-unit package,  
selected BaseUnits are also  
available in a pack of 10 units.  
The pack of 10 units enables the  
amount of waste to be reduced  
considerably, as well as saving  
the time and cost of unpacking  
individual modules.

The number of modules required is  
the number of modules ordered.  
The pack type is selected by  
selecting the article number.  
Packs of 10 can therefore only be  
ordered in integer multiples of 10.

**BU15-P16+A10+2D**

BU type A0; BaseUnit (light) with  
16 push-in terminals (1 ... 16)  
to the module and an additional  
10 internally jumpered  
AUX terminals (1 A to 10 A);  
for starting a new potential group  
(max. 10 A)

- Pack of 1 unit

<b>Potential distributor modules</b>		<b>Shield connection</b>
<b>PotDis BU</b>		5 shield supports and 5 shield terminals
PotDis BU, Type P1 (light), 17x P1 potential, 1x P2 potential, for starting a new potential group (max. 10 A)	<b>6ES7193-6UP00-ODP1</b>	<b>Color-coded labels</b>
PotDis BU, Type P1 (dark), 17x P1 potential, 1x P2 potential, for continuing the potential group	<b>6ES7193-6UP00-OBP1</b>	Color code CC00, for 16 push-in terminals, BU type A0, A1, gray (terminals 1 to 8), red (terminals 9 to 16); 10 units
PotDis BU, Type P2 (light), 1x P1 potential, 17x P2 potential, for starting a new potential group (max. 10 A)	<b>6ES7193-6UP00-ODP2</b>	Color code CC71, for 10 AUX terminals, BU type A0, yellow/green (terminals 1 A to 10 A); 10 units
PotDis BU, Type P2 (dark), 1x P1 potential, 17x P2 potential, for continuing the potential group	<b>6ES7193-6UP00-OBP2</b>	Color code CC72, for 10 AUX terminals, BU type A0, red (terminals 1 A to 10 A); 10 units
<b>PotDis TB</b>		Color code CC73, for 10 AUX terminals, BU type A0, blue (terminals 1 A to 10 A); 10 units
PotDis TB, type BR-W, 18x internally jumpered terminals, without reference to P1, P2 or AUX, (total current max. 10 A)	<b>6ES7193-6TP00-OTPO</b>	Color code CC74, for 2x5 additional terminals, BU type A1, red (terminals 1B to 5B), blue (terminals 1C to 5C); 10 units
PotDis TB, type P1-R, 18x P1 potential, (total current max. 10 A)	<b>6ES7193-6TP00-OTP1</b>	<b>Color-coded labels for PotDis BU</b>
PotDis TB, type P2-B, 18x P2 potential, (total current max. 10 A)	<b>6ES7193-6TP00-OTP2</b>	Color code CC62, for 16 push-in terminals, PotDis BU type P1, red (terminals 1 to 16); 10 units
PotDis TB, type n.c.-G, 18x n.c. (not connected) terminals, without reference to P1, P2 or AUX	<b>6ES7193-6TP00-OTNO</b>	Color code CC63, for 16 push-in terminals, PotDis BU type P2, blue (terminals 1 to 16); 10 units
<b>Accessories</b>		<b>Color-coded labels for PotDis TB</b>
<b>Equipment labeling plate</b>	<b>6ES7193-6LF30-0AW0</b>	Color code CC10, for 18 push-in terminals, PotDis TB, gray (terminals 1 to 18); 10 units
10 sheets of 16 labels, for printing with thermal transfer card printer or plotter		Color code CC11, for 18 push-in terminals, PotDis TB, yellow-green (terminals 1 to 18); 10 units
<b>Labeling strips</b>		Color code CC12, for 18 push-in terminals, PotDis TB, type P1 and BR, red (terminals 1 to 18); 10 units
500 labeling strips on roll, light gray, for inscription with thermal transfer roll printer	<b>6ES7193-6LR10-0AA0</b>	Color code CC13, for 18 push-in terminals, PotDis TB, type P2 and BR, blue (terminals 1 to 18); 10 units
500 labeling strips on roll, yellow, for inscription with thermal transfer roll printer	<b>6ES7193-6LR10-0AG0</b>	<b>Mechanical coding elements</b>
1 000 labeling strips DIN A4, light gray, card, perforated, for inscription with laser printer	<b>6ES7193-6LA10-0AA0</b>	For automatic coding of I/O modules; spare part. 20 units
1 000 labeling strips DIN A4, yellow, card, perforated, for inscription with laser printer	<b>6ES7193-6LA10-0AG0</b>	Type A
<b>BU cover</b>		Type B
For covering empty slots (gaps); 5 units		Type C
• 15 mm	<b>6ES7133-6CV15-1AM0</b>	Type D
• 20 mm	<b>6ES7133-6CV20-1AM0</b>	
		<b>6ES7193-6KA00-3AA0</b>

### Overview

- 4, 8 and 16-channel digital input (DI) modules

For different requirements, the digital input modules offer:

- Function classes Basic, Standard, High Feature and High Speed as well as fail-safe DI (see "Fail-safe I/O modules")
- BaseUnits for single or multiple-conductor connection with automatic slot coding
- Potential distribution modules for system-integrated expansion with additional potential terminals
- Individual system-integrated load group formation with self-assembling voltage distribution bars (a separate power module is no longer required for ET 200SP)
- Option of connecting sensors compliant with IEC 61131 type 1, 2 or 3 (module-dependent) for rated voltages of up to 24 V DC or 230 V AC
- PNP (sinking input) and NPN (sourcing input) versions
- Clear labeling on front of module

- LEDs for diagnostics, status, supply voltage and faults (e.g. wire break/short-circuit)
- Electronically readable and non-volatile writable rating plate (I&M data 0 to 3)
- Extended functions and additional operating modes in some cases
  - MSI operating mode (simultaneous reading of input data from as many as three other controllers)
  - Counting operating mode (multi-channel counter for pulse generators with 32-bits counting width and up to 10 kHz counting frequency)
  - Oversampling operating mode (n-fold equidistant acquisition of digital values within one PN cycle for increasing the time resolution for slow CPU cycles)
  - Parameterizable input delay time
  - Isochronous mode (simultaneous equidistant reading of all input channels)
  - Hardware interrupt pulse stretching
  - Re-parameterization during operation
  - Firmware update
  - Diagnosis of wire break and short-circuit (on channel or module basis)
  - Value status (optional binary validity information of the input signal in the process image)
  - Supports the PROFlenergy profile
- Optional accessories
  - Labeling strips (film or card)
  - Equipment labeling plate
  - Color-coded label with module-specific CC code
  - Shielding terminal

A quick and clear comparison of the functions of the different DI modules is offered by the TIA Selection Tool.

#### Note:

SIPLUS extreme products are based on SIMATIC standard products. The contents listed here were taken from the respective standard products. SIPLUS extreme-specific information was added.

## 3 Overview

- 4, 8 and 16-channel DQ modules
- 4-channel RQ modules
- BaseUnits for single conductor or multiple-conductor connection
- Function classes Basic, Standard, High Feature and High-Speed as well as fail-safe DQ and RQ
- Clear labeling on front of module
- LEDs for diagnostics, status and errors
- Individual system-integrated load group formation with self-assembling potential multi-terminal busbars (power module not required for ET 200SP)
- Electronically readable rating plate (I&M data)
- Additional operating modes in some cases
- Optional accessories:
  - Labeling strips
  - Equipment marking label
  - Color-coded label with module-specific CC code
  - Shielding terminal

## Overview of digital output modules

Digital output	PU	Article No.	CC code	BU type
DQ 16 x 24 V DC/0.5 A ST	1	6AG1132-6BH01-7BA0	CC00	A0

<b>Conformal coating</b>			
• Coatings for printed circuit board assemblies acc. to EN 61086	Yes; Class 2 for high reliability	Yes; Class 2 for high reliability	Yes; Class 2 for high reliability
• Protection against fouling acc. to EN 60664-3	Yes; Type 1 protection	Yes; Type 1 protection	Yes; Type 1 protection
• Military testing according to MIL-I-46058C, Amendment 7	Yes; Discoloration of coating possible during service life	Yes; Discoloration of coating possible during service life	Yes; Discoloration of coating possible during service life
• Qualification and Performance of Electrical Insulating Compound for Printed Board Assemblies according to IPC-CC-830A	Yes; Conformal coating, Class A	Yes; Conformal coating, Class A	Yes; Conformal coating, Class A

## Overview

- 2, 4 and 8-channel AI modules
- Measuring ranges for current, voltage, thermocouples, resistance thermometer, resistor and PTC
- BaseUnits for 2, 3 and 4-conductor connection
- Function classes Basic, Standard, High Feature and High Speed
- Clear labeling on front of module
- LEDs for diagnostics, status and errors
- Individual system-integrated load group formation with self-assembling potential multi-terminal busbars (power module not required for ET 200SP)
- Electronically readable rating plate (I&M data)
- Additional operating modes in some cases
- Optional accessories:
  - Labeling strips
  - Equipment marking label
  - Color-coded label with module-specific CC code
  - Shielding terminal

## Overview of SIPLUS analog input modules

Analog input	PU	Article No.	CC code	BU type
AI 8 x I 2/4-wire BA	1	6AG1134-6GF00-7AA1	CC01	A0, A1
AI 8 x U BA	1	6AG1134-6FF00-2AA1	CC02	A0, A1
AI 4 x U/I 2-wire ST	1	6AG1134-6HD01-7BA1	CC03	A0, A1
AI 4 x I 2/4-wire ST	1	6AG1134-6GD01-7BA1	CC03	A0, A1
AI 4 x I 2-wire 4 ... 20 mA HART	1	6AG1134-6TD00-2CA1	CC03	A0, A1
AI 2 x U/I 2/4-wire HF	1	6AG1134-6HB00-2CA1	CC05	A0, A1
AI 2xU/I 2/4-wire HS	1	6AG1134-6HB00-2DA1	CC00	A0, A1
With two operating modes: • High-speed isochronous AI • Oversampling				
AI 8 x RTD/TC 2-wire HF	1	6AG1134-6JF00-2CA1	CC00	A0, A1
AI 4 x RTD/TC 2/3/4-wire HF	1	6AG1134-6JD00-2CA1	CC00	A0, A1

**Note:**

SIPLUS extreme products are based on SIMATIC standard products. The contents listed here were adopted from the respective standard products. SIPLUS extreme-specific information was added.

**I/O systems**SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200SP**I/O modules > SIPLUS analog inputs****Ordering data****SIPLUS analog input modules**

(Extended temperature range and exposure to environmental substances)

Analog input module  
AI 8xI 2/4-wire BA, BU type A0 or A1, color code CC01**6AG1134-6GF00-7AA1**Analog input module  
AI 8xU BA, BU type A0 or A1, color code CC02**6AG1134-6FF00-2AA1**Analog input module  
AI 4xU/I 2-wire Standard, BU type A0 or A1, color code CC03, 16-bit, ±0.3%**6AG1134-6HD01-7BA1**Analog input module  
AI 4xI 2-/4-wire Standard, BU type A0 or A1, color code CC03, 16-bit, ±0.3%**6AG1134-6GD01-7BA1**Analog input module  
AI 4xRTD/TC 2-, 3-, 4-wire High Feature, BU type A0 or A1, color code CC00, 16-bit, ±0.1%, scalable measuring range**6AG1134-6JD00-2CA1**Analog input module  
AI 4xI 2-wire 4 ... 20 mA HART, BU type A0 or A1, color code CC03**6AG1134-6TD00-2CA1**Analog input module  
AI 2xU/I 2/4-wire High Feature, BU type A0 or A1, color code CC05, 16-bit, ±0.1%, independent channel isolation, isochronous mode above 1 ms**6AG1134-6HB00-2CA1**

Analog input module AI 2xU/I 2-/4-wire High Speed, BU type A0 or A1, color code CC00, 16-bit, ±0.3%, isochronous mode above 250 µs, oversampling above 50 µs

**6AG1134-6HB00-2DA1**Analog input module  
AI 8xRTD/TC 2-wire High Feature, BU type A0 or A1, color code CC00, 16-bit, ±0.1%, scalable measuring range**6AG1134-6JF00-2CA1**Analog input module  
AI Energy Meter Standard, 480 V AC, BU type D0**6AG1134-6PA20-7BD0****Usable SIPLUS BaseUnits type A0****BU15-P16+A0+2D**

(Extended temperature range and exposure to environmental substances)

BU type A0; BaseUnit (light) with 16 process terminals to the module; for starting a new load group (max. 10 A)

**6AG1193-6BP00-7DA0****BU15-P16+A0+2B**

(Extended temperature range and exposure to environmental substances)

BU type A0; BaseUnit (dark) with 16 process terminals to the module; for continuing the load group

**6AG1193-6BP00-7BA0****BU15-P16+A10+2D**

(Extended temperature range and exposure to environmental substances)

BU type A0; BaseUnit (light) with 16 process terminals (1...16) to the module and an additional 10 internally jumpered AUX terminals (1 A to 10 A); for starting a new load group (max. 10 A)

**6AG1193-6BP20-7DA0****BU15-P16+A10+2B**

(Extended temperature range and exposure to environmental substances)

BU type A0; BaseUnit (dark) with 16 process terminals (1...16) to the module and an additional 10 internally jumpered AUX terminals (1 A to 10 A); for continuing the load group

**6AG1193-6BP20-7BA0****Usable SIPLUS BaseUnits type A1 (temperature detection)****BU15-P16+A0+2D/T**

(Extended temperature range and exposure to environmental substances)

BU type A1; BaseUnit (light) with 16 process terminals to the module; for starting a new load group (max. 10 A)

**6AG1193-6BP00-7DA1****BU15-P16+A0+2B/T**

(Extended temperature range and exposure to environmental substances)

BU type A1; BaseUnit (dark) with 16 process terminals to the module; for continuing the load group

**6AG1193-6BP00-7BA1****BU15-P16+A0+12D/T**

(Extended temperature range and exposure to environmental substances)

BU type A1; BaseUnit (light) with 16 process terminals (1...16) to the module and also 2x5 internally jumpered additional terminals (1 B to 5 B and 1 C to 5 C); for starting a new load group (max. 10 A)

**6AG1193-6BP40-7DA1****BU15-P16+A0+12B/T**

(Extended temperature range and exposure to environmental substances)

BU type A1; BaseUnit (dark) with 16 process terminals (1...16) to the module and also 2x5 internally jumpered additional terminals (1 B to 5 B and 1 C to 5 C); for continuing the load group

**6AG1193-6BP40-7BA1****Usable SIPLUS BaseUnits type D0****BU20-P12+A0+0B**

(Extended temperature range and exposure to environmental substances)

BU type D0; BaseUnit with 12 push-in terminals, without AUX terminals, bridged to the left

**6AG1193-6BP00-7BD0****Accessories****SIPLUS Mounting Kit ET 200SP**

Mounting accessories for use with increased mechanical vibration and shock loads.

**6AG1193-6AA00-0AA0****Other accessories**

## Overview

- 2 and 4-channel analog output (AQ) modules

For different requirements, the digital output modules offer:

- Function classes Standard, High Feature and High-Speed
- BaseUnits for single or multiple-conductor connection with automatic slot coding
- Potential distribution modules for system-integrated expansion with potential terminals
- Individual system-integrated load group formation with self-assembling voltage distribution bars (a separate power module is no longer required for ET 200SP)

- Option for connecting current and voltage actuators
- Clear labeling on front of module
- LEDs for diagnostics, status, supply voltage and faults
- Electronically readable and non-volatile writable rating plate (I&M data 0 to 3)
- Extended functions and additional operating modes in some cases
  - Oversampling operating mode (n-fold equidistant output of an analog value within one PN cycle and thus the precisely timed output of an analog value or a sequence of analog values)
  - Isochronous mode (simultaneous equidistant output of analog values)
  - Output of substitute value in the event of interruptions to communication (shutdown, output adjustable substitute value, or keep last value)
  - Calibration during runtime
  - Re-parameterization during operation
  - Firmware update
  - Diagnosis of wire break, short circuit, overflow, underflow
  - Value status (optional binary validity information of the analog signal in the process image)
  - Supports the PROFlenergy profile
- Optional accessories
  - Labeling strips (film or card)
  - Equipment labeling plate
  - Color-coded label with module-specific CC code
  - Shielding terminal

A quick and clear comparison of the functions of the AQ modules is offered by the TIA Selection Tool.

## Overview of analog output modules

Analog output	PU	Article No.	CC code	BU type
AQ 2 x I ST	1	6AG1135-6GB00-7BA1	CC00	A0, A1
AQ 4 x U/I ST	1	6AG1135-6HD00-7BA1	CC00	A0, A1
AQ 2 x U/I HF	1	6AG1135-6HB00-7CA1	CC00	A0, A1
AQ 2xU/I HS	1	6AG1135-6HB00-2DA1	CC00	A0, A1

With two operating modes:

- High-speed isochronous AQ
- Oversampling

**Note:**

SIPLUS extreme products are based on SIMATIC standard products. The contents listed here were taken from the respective standard products. SIPLUS extreme-specific information was added.

## Overview

## Technical properties

- Counter module for ET 200SP
- Interfaces:
  - 24 V encoder signals A, B and N from P, M or push-pull-switching encoders and sensors
  - 24 V encoder supply output, short-circuit proof
  - 3 digital inputs for controlling the count operation, for saving or for setting the count value
  - 2 digital outputs for fast reactions regardless of the counter status or measured value

- Counting frequency 200 kHz (800 kHz with quadruple evaluation)
- Counting range: +/- 31-bit
- Measurement function
- Parameterizable hardware interrupts
- Parameterizable input filters for suppressing interferences at sensor and digital inputs

## Supported types of encoders/signals

- 24 V incremental encoder with and without N signal
- 24 V pulse encoder with direction signal
- 24 V pulse encoder without direction signal
- 24 V pulse encoder for pulse up and down respectively

## Supported system functions

- Isochronous mode
- Firmware update
- Identification data I&M

## Ordering data

## TM Count 1x24V counter module

With one channel, max. 200 kHz; for 24 V encoder

- Pack of 1 unit
- Pack of 10 units; to order a pack, please order this article number with an order quantity of 10.

Article number	<b>6ES7138-6AA01-0BA0</b> ET 200SP, TM Count 1x24V
<b>General information</b>	
Product type designation	TM Count 1x24V
<b>Product function</b>	
• I&M data	Yes; I&M0 to I&M3
• Isochronous mode	Yes
<b>Engineering with</b>	
• STEP 7 TIA Portal configurable/integrated from version	STEP 7 V15 SP1 or higher
• STEP 7 configurable/integrated from version	V5.6 and higher
• PROFIBUS from GSD version/GSD revision	One GSD file each, Revision 3 and 5 and higher
<b>Supply voltage</b>	
<b>Load voltage L+</b>	
• Rated value (DC)	24 V
• Reverse polarity protection	Yes
<b>Encoder supply</b>	
Number of outputs	1
<b>24 V encoder supply</b>	
• 24 V	Yes; L+ (-0.8 V)
• Short-circuit protection	Yes; electronic/thermal
• Output current, max.	300 mA
<b>Digital inputs</b>	
Number of digital inputs	3
Digital inputs, parameterizable	Yes
Input characteristic curve in accordance with IEC 61131, type 3	Yes

Article number	<b>6ES7138-6AA01-0BA0</b> ET 200SP, TM Count 1x24V
<b>Digital input functions, parameterizable</b>	
• Gate start/stop	Yes
• Capture	Yes
• Synchronization	Yes
• Freely usable digital input	Yes
<b>Input voltage</b>	
• Rated value (DC)	24 V
• for signal "0"	-5 ... +5 V
• for signal "1"	+11 to +30V
• permissible voltage at input, min.	-30 V; -5 V continuous, -30 V brief reverse polarity protection
• permissible voltage at input, max.	30 V
<b>Input current</b>	
• for signal "1", typ.	2.5 mA
<b>Input delay (for rated value of input voltage) for standard inputs</b>	
- parameterizable	Yes; none / 0.05 / 0.1 / 0.4 / 0.8 / 1.6 / 3.2 / 12.8 / 20 ms
- at "0" to "1", min.	6 µs; for parameterization "none"
- at "1" to "0", min.	6 µs; for parameterization "none"
<b>for technological functions</b>	
- parameterizable	Yes
<b>Digital outputs</b>	
Type of digital output	Transistor
Number of digital outputs	2
Digital outputs, parameterizable	Yes
Short-circuit protection	Yes; electronic/thermal
Limitation of inductive shutdown voltage to	L+ (-53 V)
Controlling a digital input	Yes

### Technical specifications

Article number	<b>6ES7138-6AA01-0BA0</b> ET 200SP, TM Count 1x24V
<b>Digital output functions, parameterizable</b>	
• Switching tripped by comparison values	Yes
• Freely usable digital output	Yes
<b>Switching capacity of the outputs</b>	
• with resistive load, max.	0.5 A; Per digital output
• on lamp load, max.	5 W
<b>Load resistance range</b>	
• lower limit	48 Ω
• upper limit	12 kΩ
<b>Output voltage</b>	
• for signal "1", min.	23.2 V; L+ (-0.8 V)
<b>Output current</b>	
• for signal "1" rated value	0.5 A; Per digital output
• for signal "0" residual current, max.	0.5 mA
<b>Output delay with resistive load</b>	
• "0" to "1", max.	50 μs
• "1" to "0", max.	50 μs
<b>Switching frequency</b>	
• with resistive load, max.	10 kHz
• with inductive load, max.	0.5 Hz; Acc. to IEC 60947-5-1, DC-13; observe derating curve
• on lamp load, max.	10 Hz
<b>Total current of the outputs</b>	
• Current per module, max.	1 A
<b>Connectable encoders</b>	
• 2-wire sensor	Yes
- permissible quiescent current (2-wire sensor), max.	1.5 mA
<b>Encoder signals, incremental encoder (asymmetrical)</b>	
• Input frequency, max.	200 kHz
• Counting frequency, max.	800 kHz; with quadruple evaluation
• Cable length, shielded, max.	600 m; depending on input frequency, encoder and cable quality; max. 50 m at 200 kHz
• Signal filter, parameterizable	Yes
• Incremental encoder with A/B tracks, 90° phase offset	Yes
• Incremental encoder with A/B tracks, 90° phase offset and zero track	Yes
• pulse encoder	Yes
• pulse encoder with direction	Yes
• pulse encoder with one impulse signal per count direction	Yes
<b>Encoder signal 24 V</b>	
- permissible voltage at input, min.	-30 V; -5 V continuous, -30 V brief reverse polarity protection
- permissible voltage at input, max.	30 V
<b>Interface types</b>	
• Source/sink input	Yes
• Input characteristic curve in accordance with IEC 61131, type 3	Yes

Article number	<b>6ES7138-6AA01-0BA0</b> ET 200SP, TM Count 1x24V
<b>Interrupts/diagnostics/status information</b>	
Substitute values connectable	Yes; Parameterizable
<b>Alarms</b>	
• Diagnostic alarm	Yes
• Hardware interrupt	Yes
<b>Diagnoses</b>	
• Monitoring the supply voltage	Yes
• Wire-break	Yes
• Short-circuit	Yes
• A/B transition error at incremental encoder	Yes
• Group error	Yes
<b>Diagnostics indication LED</b>	
• Monitoring of the supply voltage (PWR-LED)	Yes; green PWR LED
• Channel status display	Yes; green LED
• for module diagnostics	Yes; green/red DIAG LED
• Status indicator forward counting (green)	Yes
• Status indicator backward counting (green)	Yes
<b>Integrated Functions</b>	
Counter	Yes
• Number of counters	1
• Counting frequency, max.	800 kHz; with quadruple evaluation
Fast mode	Yes
<b>Counting functions</b>	
• Can be used with TO High_Speed_Counter	Yes
• Continuous counting	Yes
• Counter response parameterizable	Yes
• Hardware gate via digital input	Yes
• Software gate	Yes
• Event-controlled stop	Yes
• Synchronization via digital input	Yes
• Counting range, parameterizable	Yes
<b>Comparator</b>	
- Number of comparators	2
- Direction dependency	Yes
- Can be changed from user program	Yes
<b>Position detection</b>	
• Incremental acquisition	Yes
• Suitable for S7-1500 Motion Control	Yes

## Overview

**Technical properties**

- Counter and position detection module for ET 200SP
- Interfaces:
  - Encoder signals A, B and N for 5 V TTL or RS 422 differential signals
  - SSI interface with clock and data for RS 422 differential signals
  - 24 V encoder supply output, short-circuit proof
  - 2 digital inputs for controlling the counting process, for saving or setting the counter or position value
  - 2 digital outputs for fast reactions depending on the counter reading, position value or measured value

- Counter frequency 1 MHz (4 MHz with four-fold evaluation)
- Counting range: +/- 31 bits
- Measurement function
- Parameterizable hardware interrupts
- Parameterizable input filters for suppressing interferences at sensor and digital inputs

**Supported types of encoders/signals**

- Incremental encoders with or without N signal
- Pulse encoders with directional signal
- Pulse encoders without directional signal
- Pulse encoders for forward or reverse pulses
- SSI encoders with a frame length of 10 to 40 bits, of which up to 31 bits position value

**Supported system functions**

- Isochronous mode
- Firmware update
- Identification data (I&M)

**Ordering data****Article No.****Article No.****TM PosInput 1 counter and position detection module**

With one channel, max. 1 MHz for 5 V TTL or RS422 differential signals or SSI absolute encoder

- Pack of 1 unit
- Pack of 10 units; to order a pack, please order this article number with an order quantity of 10.

Depth	58 mm
<b>Weights</b>	
Weight, approx.	45 g

## Overview

- 4 digital inputs, 6 digital outputs
- Inputs for detecting the input edges with  $\mu\text{s}$  accuracy
- Outputs for outputting the switching signals with  $\mu\text{s}$  accuracy
- 32x oversampling
- PWM output
- Counter function
- Outputs can be switched between 0.5 A standard and especially fast 0.1 A high-speed mode

## I/O systems

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200SP

I/O modules > Technology modules > TM Pulse 2x24V pulse output module

### Overview

2-channel pulse output module for ET 200SP

- Operating modes:
  - Single pulse with defined length
  - Pulse chain with defined number of pulses
  - Pulse width modulation (with flexible ON period, optional current control and dither function)
  - PWM signal for controlling a DC motor
  - ON and OFF delay; rising and falling edge can be delayed separately to the microsecond
  - Frequency output with defined output frequency
- Hardware:
  - 2 channels 24 V, 2 A output current
  - Parallel switching for enhanced performance on 4 A output current
  - Switching frequencies to 10 kHz; at reduced output current to 0.1 A up to 100 kHz
  - Push-pull output driver for especially steep edges at the outputs
  - Polarity change in DC motor operation for direction reversal
  - 1 high-speed 24 V digital input per channel with parameterizable input delay from 4 µs
- Channel functions:
  - HW enable; start of signal output with the onboard digital input
  - Parameterizable ON delay; for precise deceleration between the HW enable and the start of output
  - Current measurement in the operating modes pulse-width modulation and pulse chain; enables control of the output current mean value over a period. This allows you to compensate for the effect of temperature on the actuator resistance.
  - Cyclic control of the respective main setpoint from the PLC in every operating mode; other values can be modified flexibly from the user program.
- Supported system functions:
  - Isochronous mode; enables precision-timed connection of the setpoint output to a higher-level controller
  - Firmware update
  - Identification data I&M

## Overview

The TM StepDrive module from Phytron is a high-precision stepper motor control with integrated power output stage for use in the SIMATIC ET 200SP distributed I/O system. It is the 1-step-drive successor model for SIMATIC ET 200S.

The module can be used together with system and I/O components of the ET 200SP distributed I/O system. Operation is possible with the following head modules:

- IM PROFIBUS
- IM PROFINET
- ET 200SP CPU

Corresponding GSD files and an HSP are available.

The ET 200SP TM StepDrive 24...48V/5A is a product of our Phytron GmbH product partner and is only available from the Phytron GmbH company.

**Note**

Product partners are external companies outside Siemens AG and its associated companies. Information about and descriptions of products made by product partners are non-binding, and are the responsibility of the product partners. These products are manufactured independently and under the responsibility of the respective product partner, and are sold and supplied by it under its terms of business and delivery.

Unless compulsory by law, Siemens assumes no liability or warranty for these products or for connection with these products of the product partners.

## Technical specifications

- Suitable for bipolar control of 2-phase stepper motors of 4-, (6-) or 8-wire design (in 4-wire system)
- 5 A peak phase current with adjustable current steps
- Supply voltage from 24 to 48 V DC
- Up to 1/256 microstep (physical resolution: approx. 51 200 positions per revolution (0.007°/step)).
- Maximum stepping rate: 250 000 steps/s
- 2 digital inputs for limit and reference switches
- Diagnostics LEDs (overcurrent, overtemperature, traversing task or motor running ...)
- Short-circuit-proof, overload-proof
- Data record transfer for power output stage parameter assignment and diagnostics during runtime
- Overdrive: Current adaptation for higher clock frequencies
- Booster: Enhanced torque during acceleration or braking
- Adjustable response to CPU stop

## I/O systems

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200SP

I/O modules > Technology modules > SIMATIC ET 200SP ECC charging controllers

### Overview

SIPLUS and SIMATIC Electrical Charge Controller (SECC) are the key components in infrastructure solutions for the conductive charging of electric vehicles.

They perform the following functions:

- Detection of the charging cable and its permissible current carrying capacity
- Transfer of the maximum charging current from the charging station to the electric vehicle
- Evaluation of the status signals from the electric vehicle:
  - Ready for charging
  - Charging
  - Charging with ventilation
- Cost-optimized, space-saving charging infrastructure solutions due to compact design based on SIMATIC ET 200SP.

#### ET 200SP TM ECC 2xPWM ST AC module

- Control of charging outputs according to IEC 61851 by parameterizable SIMATIC ET 200SP TM ECC 2xPWM ST charging controller
- Control of load tap-off
- Control of connector lock
- Evaluation of connector lock or load contactor status

#### ET 200SP TM ECC PL ST DC module

- The SIMATIC ET 200SP TM ECC PL ST charging controller fully controls a DC charging process according to DIN SPEC 70121.
- The following sequences are performed:
  - Session Setup
  - Service Discovery
  - Service and Payment Selection
  - Contract Authentication
  - Charge Parameter Discovery
  - Power Delivery
  - Charging Status
  - Cable Check
  - Pre Charging
  - Current Demand
  - Welding Detection
  - Session Stop

#### Accessories: Calibration Kit TM ECC CCS2

Expansion kit for calibration of the power line signal strength of an EVSE.

- According to DIN SPEC 70121 / ISO15118 or design guidelines for CCS charging stations Type 2
- Suitable for the SIMATIC ET 200SP TM ECC PL ST technology module

## I/O systems

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200SP

I/O modules > Technology modules > SIWAREX WP321

### Overview

SIWAREX WP321 is a versatile and flexible weighing module for the seamless integration of a static scale into the SIMATIC automation environment.

The electronic weighing system is integrated in the SIMATIC ET 200SP series and uses all the features of a modern automation system, such as integrated communication, operator control and monitoring, diagnostic system and configuration tools in the TIA Portal, SIMATIC STEP 7, WinCC flexible and PCS 7.

In conjunction with the digital SIWAREX DB junction box, up to four connected load cells can be diagnosed separately. This enables the weigh beam module to detect the failure of individual load cells and, in the event of an error, to provide relevant load cell data such as order number and location designation directly in the CPU or at the HMI.

This increases the operational reliability of the scale, reduces downtimes, makes commissioning easier and simplifies servicing.

All messages and process values of the individual load cell channels are of course available in the SIMATIC controller.

<b>EMC requirements</b>	According to IEC 61000-6-2, IEC 61000-6-4, OIML R76-1
<b>Dimensions (width)</b>	15 mm (0.6 inch)

<sup>1)</sup> The S7 standard modules may not be operated at temperatures below 0 °C (32 °F). For operating conditions below 0 °C (32 °F), SIMATIC modules from the SIPLUS series must be used.

## Overview

The SIWAREX WP351 is a compact, precise weighing module in the SIMATIC ET 200SP format.

With a width of just 20 mm it is one of the slimmest weighing modules on the market, yet its firmware includes the functionalities of an automatic totalizing weighing instrument and checking, bagging and filling scale.

All operating modes are part of the firmware and certified according to OIML R-51, R-61, R-76 and R-107\*. This means the WP351 can be used in both scales requiring official calibration and those that do not, where demands are high regarding speed and accuracy.

\* certificates available soon

## Article No.

**SIWAREX IS Ex interface**

For intrinsically safe connection  
of load cells. With ATEX approval  
(not UL/FM). Suitable for  
SIWAREX electronic weighing  
systems. Compatibility of load cells  
must be checked separately.

- With short-circuit current  
< 199 mA DC
- With short-circuit current  
< 137 mA DC

7MH4710-5BA

7MH4710-5CA

**Cable (optional)****Cable Li2Y 1 x 2 x 0.75 ST + 2 x (2 x 0.34 ST) – CY**

For connecting SIWAREX electronic  
weighing systems to junction box  
(JB), extension box (EB) and  
Ex interface or between two EBs.  
For permanent installation.  
Occasional bending is possible.

External diameter:  
approx. 10.8 mm (0.43 inch)  
Permissible ambient temperature  
-40 ... +80 °C (-40 ... +176 °F)

Sold by the meter.

- Sheath color: orange
- For hazardous atmospheres.  
Sheath color: blue.

7MH4702-8AG

7MH4702-8AF

**Commissioning****Commissioning charge for one static scale with SIWAREX module**

(Flat charge for travel and setup  
must be ordered separately)

Scope:

- Recording of data
- Checking of mechanical installation  
of the scale
- Checking of electrical wiring and  
function
- Static adjustment of the scale

Requirements:

- Mechanical design functional
- Modules electrically wired and  
tested
- Calibration weights available
- Free access to scale

9LA1110-8SN50-0AA0

**Flat charge for travel and setup in Germany**

9LA1110-8RA10-0AA0

## I/O systems

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200SP

I/O modules > Technology modules > SIWAREX WP351

### Technical specifications

SIWAREX WP351	
Firmware version	V1.0
• FW update possible	Yes
Usable BaseUnits	BU type U0
Reliability	
Mean time between failures (MTBF)	62 years @ TA = 40 °C
Product function	
I&M data	Yes, I&M0 to I&M3
Engineering with	
• STEP 7 TIA Portal can be configured/integrated	Configurable as of V15 using HSP0281
• PROFIBUS as of GSD version/ GSD revision	GSD V04.02.41
• PROFINET as of GSD version/ GSD revision	GSDML V2.34
Supply voltage	
Load voltage L+	
• Rated value (DC)	24 V
• Permissible range, low limit, static (DC)	19.2 V
• Permissible range, high limit, static (DC)	28.8 V
• Permissible range, low limit, dynamic (DC)	18.5 V
• Permissible range, high limit, dynamic (DC)	30.2 V
• Reverse polarity protection	Yes
• Non-periodic overvoltages	35 V DC for 500 ms with a recovery time of 50 s
Input current	
Current consumption, max.	Max. 140 mA @ 24 V DC + [DQ 3 × 0.5 A]
Power loss	
Typical power loss	1.7 W
Address range	
Assigned address range	
• Inputs	32 bytes
• Outputs	32 bytes
Power supply from SIMATIC S7 backplane bus	
Current consumption from ET 200SP backplane bus	Max. 27 mA @ 3.5 V (SBK4)
Analog load cell interface connection	
Error limit according to DIN 1319-1 at 20 °C (-4 °F) +/-10 K	≤ 0.002% v.E.
Relative accuracy (absolute accuracy can only be achieved with local calibration using calibration standards)	
Measuring accuracy in accordance with OIML R76-1:2006/ EN 45501:2015	
• Class	III
• Resolution (d=e)	3 × 6000 d
• Error percentage pi	0.4
• Step voltage	0.4 μV/e

SIWAREX WP351	
Accuracy delivery state	Typ. 0.1% v.E.
The accuracy is relevant for module exchange or theoretical adjustment	
Sampling rate	1.024 ms
Input signal resolution	± 20 000 000
Measuring ranges	0 ... ±1 mV/V 0 ... ±2 mV/V 0 ... ±4 mV/V
Common mode voltage range	+2.8 ... 7.7 V
Strain gauge supply (constant voltage)	10 V DC (+1 % / -3 %) at the EXC terminals
Short-circuit and overload protection	Yes
Connection	6-wire or 4-wire (parameterizable)
Sensor voltage monitoring	Typ. ≤ 5.0 V
Min. strain gauge input resistance per channel	
• Without SIWAREX IS Ex-i interface	56 Ω
• With SIWAREX IS Ex-i interface	Lower impedance by means of external supply possible 87 Ω @ type 7MH4710-5BA 180 Ω @ type 7MH4710-5CA
Max. strain gauge resistance	4 100 Ω
Temperature coefficient range	≤ ±5 ppm/K
Temperature coefficient zero point	≤ ±0.015 μV/K
Linearity error	≤ 0.001%
Measured value filtering	Low-pass and average value filter configurable (DR3)
Galvanic isolation	500 V AC
50 Hz / 60 Hz noise suppression CMRR	> 80 dB
Input resistance	
• Signal line	Typ. 8*10 <sup>6</sup> Ω
• Sense line	Typ. 300*10 <sup>6</sup> Ω
Cable length	
• When using SIWAREX cable 7MH4702-8AG	Max. 500 m
Ambient conditions	
Ambient temperature in operation	
• Horizontal mounting position *	Min. -30 °C Max. +60 °C
• Vertical mounting position *	Min. -30 °C Max. +50 °C
Storage and transport temperature	-40 ... +70 °C (-40 ... +158 °F)

\* At a height of more than 2 000 meters above sea level, a derating of the ambient temperature of -1°C / 100 m has to be adhered to. The maximum permissible height is 5 000 meters above sea level. At over 0.6 A total current of the digital outputs DQ, a derating of the ambient temperature of -1°C per 100 mA has to be adhered to. The max. permissible total current is 1.5 A.

## Overview

**Technical properties**

- Counter module for ET 200SP
- Interfaces:
  - 24 V encoder signals A, B and N from P, M or push-pull-switching encoders and sensors
  - 24 V encoder supply output, short-circuit proof
  - 3 digital inputs for controlling the count operation, for saving or for setting the count value
  - 2 digital outputs for fast reactions regardless of the counter status or measured value

- Counting frequency 200 kHz (800 kHz with quadruple evaluation)
- Counting range: +/- 31 bits
- Measurement function
- Parameterizable hardware interrupts
- Parameterizable input filters for suppressing interferences at sensor and digital inputs

**Supported types of encoders/signals**

- 24 V incremental encoder with and without signal N
- 24 V pulse encoder with direction signal
- 24 V pulse encoder without direction signal
- 24 V pulse encoder for pulse up and down respectively

**Supported system functions**

- Isochronous mode
- Firmware update
- Identification data I&M

Note

### Technical specifications

Article number	<b>6AG1138-6AA01-2BA0</b>
Based on	<b>6ES7138-6AA01-0BA0</b> SIPLUS ET 200SP TM COUNT 1X24V
<b>Ambient conditions</b>	
<b>Ambient temperature during operation</b>	
• horizontal installation, min.	-40 °C; = Tmin (incl. condensation/frost)
• horizontal installation, max.	60 °C; = Tmax; +70 °C with configured empty slots to the left and right of the module
• vertical installation, min.	-40 °C; = Tmin (incl. condensation/frost)
• vertical installation, max.	50 °C; = Tmax
<b>Altitude during operation relating to sea level</b>	
• Installation altitude above sea level, max.	5 000 m; Restrictions for installation altitudes > 2 000 m, see manual
• Ambient air temperature-barometric pressure-altitude	Tmin ... Tmax at 1 140 hPa ... 795 hPa (-1 000 m ... +2 000 m) // Tmin ... (Tmax - 10 K) at 795 hPa ... 658 hPa (+2 000 m ... +3 500 m) // Tmin ... (Tmax -20 K) at 658 hPa ... 540 hPa (+3 500 m ... +5 000 m)
<b>Relative humidity</b>	
• With condensation, tested in accordance with IEC 60068-2-38, max.	100 %; RH incl. condensation / frost (no commissioning in bedewed state), horizontal installation
<b>Resistance</b>	
<b>Coolants and lubricants</b>	
- Resistant to commercially available coolants and lubricants	Yes; Incl. diesel and oil droplets in the air
<b>Use in stationary industrial systems</b>	
- to biologically active substances according to EN 60721-3-3	Yes; Class 3B2 mold, fungus and dry rot spores (with the exception of fauna); Class 3B3 on request
- to chemically active substances according to EN 60721-3-3	Yes; Class 3C4 (RH < 75 %) incl. salt spray acc. to EN 60068-2-52 (severity degree 3); *
- to mechanically active substances according to EN 60721-3-3	Yes; Class 3S4 incl. sand, dust, *
- Against mechanical environmental conditions acc. to EN 60721-3-3	Yes; Class 3M8 using the SIPLUS Mounting Kit ET 200SP (6AG1193-6AA00-0AA0)
<b>Use on ships/at sea</b>	
- to biologically active substances according to EN 60721-3-6	Yes; Class 6B2 mold, fungal and dry rot spores (excluding fauna)
- to chemically active substances according to EN 60721-3-6	Yes; Class 6C3 (RH < 75 %) incl. salt spray acc. to EN 60068-2-52 (severity degree 3); *
- to mechanically active substances according to EN 60721-3-6	Yes; Class 6S3 incl. sand, dust; *
- Against mechanical environmental conditions acc. to EN 60721-3-6	Yes; Class 6M4 using the SIPLUS Mounting Kit ET 200SP (6AG1193-6AA00-0AA0)

Article number	<b>6AG1138-6AA01-2BA0</b>
Based on	<b>6ES7138-6AA01-0BA0</b> SIPLUS ET 200SP TM COUNT 1X24V
<b>Usage in industrial process technology</b>	
- Against chemically active substances acc. to EN 60654-4	Yes; Class 3 (excluding trichlorethylene)
- Environmental conditions for process, measuring and control systems acc. to ANSI/ISA-71.04	Yes; Level GX group A/B (excluding trichlorethylene; harmful gas concentrations up to the limits of EN 60721-3-3 class 3C4 permissible); level LC3 (salt spray) and level LB3 (oil)
<b>Remark</b>	
- Note regarding classification of environmental conditions acc. to EN 60721, EN 60654-4 and ANSI/ISA-71.04	* The supplied plug covers must remain in place over the unused interfaces during operation!
<b>Conformal coating</b>	
• Coatings for printed circuit board assemblies acc. to EN 61086	Yes; Class 2 for high reliability
• Protection against fouling acc. to EN 60664-3	Yes; Type 1 protection
• Military testing according to MIL-I-46058C, Amendment 7	Yes; Discoloration of coating possible during service life
• Qualification and Performance of Electrical Insulating Compound for Printed Board Assemblies according to IPC-CC-830A	Yes; Conformal coating, Class A

## Overview

**Technical properties**

- Counting and position detection module for ET 200SP
- Interfaces:
  - Encoder signals A, B and N for 5 V TTL or RS 422 differential signals
  - SSI interface with clock and data for RS 422 differential signals
  - 24 V encoder supply output, short-circuit proof
  - 2 digital inputs for controlling the counting process, for saving or setting the counter or position value
  - 2 digital outputs for fast reactions depending on the counter reading, position value or measured value
- Counter frequency 1 MHz (4 MHz with four-fold evaluation)
- Counting range: +/- 31 bits
- Measurement function
- Parameterizable hardware interrupts
- Parameterizable input filters for suppressing interferences at sensor and digital inputs

**Supported types of encoders/signals**

- Incremental encoders with or without N signal
- Pulse encoders with directional signal
- Pulse encoders without directional signal
- Pulse encoders for forward or reverse pulses
- SSI encoders with a frame length of 10 to 40 bits, of which up to 31 bits position value

**Supported system functions**

- Isochronous mode
- Firmware update
- Identification data I&M

**Note**

## Overview

- 4 digital inputs, 6 digital outputs
- Inputs for detecting the input edges with  $\mu\text{s}$  accuracy
- Outputs for outputting the switching signals with  $\mu\text{s}$  accuracy
- 32x oversampling
- PWM output
- Counter function
- Outputs can be switched between 0.5 A standard and especially fast 0.1 A high-speed mode

## Overview

2-channel pulse output module for SIPLUS ET 200SP

- Operating modes:
  - Single pulse with defined length
  - Pulse chain with defined number of pulses
  - Pulse width modulation (with flexible ON period, optional current control and dither function)
  - PWM signal for controlling a DC motor
  - ON and OFF delay; rising and falling edge can be delayed separately to the microsecond
  - Frequency output with defined output frequency
- Hardware:
  - 2 channels 24 V, 2 A output current output current can be switched in parallel to boost performance to 4 A of output current
  - Switching frequencies to 10 kHz; at reduced output current to 0.1 A up to 100 kHz
  - Push/pull output driver for especially steep edges at the outputs
  - Polarity change in DC motor operation for direction reversal
  - 1 high-speed 24 V digital input per channel with parameterizable input delay from 4  $\mu$ s
- Channel functions:
  - HW enable; Start of signal output with the onboard digital input
  - Parameterizable ON delay; for precise deceleration between the HW enable and the start of output
  - Current measurement in the operating modes pulse-width modulation and pulse chain; enables control of the output current mean value over a period. Temperature influences can thus be balanced to the resistance of the actuator.
  - Cyclic control of the respective main setpoint from the PLC in every operating mode; other values can be modified flexibly from the user program.
- Supported system functions:
  - Isochronous mode; enables precision-timed connection of the setpoint output to a higher-level controller
  - Firmware update
  - Identification data I&M

- Against mechanical environmental conditions acc. to EN 60721-3-3	Yes; Class 3M8 using the SIPLUS Mounting Kit ET 200SP (6AG1193-6AA00-0AA0)	• Military testing according to MIL-I-46058C, Amendment 7	
		Yes; Discoloration of coating possible during service life	
		• Qualification and Performance of Electrical Insulating Compound for Printed Board Assemblies according to IPC-CC-830A	
		Yes; Conformal coating, Class A	

## Overview

SIPLUS Electrical Charging Controllers are the key components in infrastructure solutions for the conductive charging of electric vehicles.

They perform the following functions:

- Detection of the charging cable and its permissible current carrying capacity
- Transfer of the maximum charging current from the charging station to the electric vehicle
- Evaluation of the status signals from the electric vehicle:
  - Ready for charging
  - Charging
  - Charging with ventilation
- Cost-optimized, space-saving charging infrastructure solutions due to compact design based on SIMATIC ET 200SP

**SIPLUS ET 200SP TM ECC 2xPWM ST AC module**

- Control of charging outputs according to IEC 61851 by parameterizable SIPLUS ET 200SP TM ECC 2xPWM ST charging controller
- Control of load tap-off
- Control of connector lock
- Evaluation of connector lock or load contactor status

Note

## Overview

SIPLUS WP321 is a versatile and flexible weighing module for the seamless integration of a static scale into the SIMATIC automation environment.

The electronic weighing system is integrated in the SIPLUS ET 200SP series and uses all the features of a modern automation system, such as integrated communication, operator control and monitoring, diagnostic system and configuration tools in the TIA Portal, SIMATIC STEP 7, WinCC flexible and PCS 7.

## Note

SIPLUS extreme products are based on SIMATIC standard products. The contents listed here were taken from the respective standard products. SIPLUS extreme-specific information has been added.

SIPLUS WP321	
Article No.	6AG1138-6AA00-2BA8
Article No. based on	7MH4138-6AA00-0BA0
Ambient temperature range	-40 ... +60 °C
Conformal coating	Coating of the printed circuit boards and the electronic components
Technical specifications	The technical specifications of the standard product apply, except for the ambient conditions.

## Ordering data

		• Military testing acc. to MIL-I-46058C, Amendment 7	Yes; coating discoloration possible
		• Qualification and Performance of Electrical Insulating Compound for Printed Wiring Assemblies acc. to IPC-CC-830A	Yes; conformal coating, class A

## Overview

SIMATIC ET 200SP CM PtP video

[https://players.brightcove.net/1813624294001/70fecf0f-fbad-4fad-a077-d0e26af4d84c\\_default/index.html?videoId=6136809673001](https://players.brightcove.net/1813624294001/70fecf0f-fbad-4fad-a077-d0e26af4d84c_default/index.html?videoId=6136809673001)

- CM PtP communications module; module for serial communication connections with RS232 and RS422 interfaces. RS485 for the Freepoint, 3964(R), Modbus RTU, USS and DMX512 protocols, max. 115.2250 kbps, 2 KB frame length, 4 KB receive buffer.
- Protocols supported
  - Freepoint: User-parameterizable frame format for universal communication, also known as ASCII frame
  - 3964(R) for improved transmission reliability
  - Modbus RTU master (requires instructions in SIMATIC S7)
  - Modbus RTU slave (requires instructions in SIMATIC S7)
  - USS, implemented through instructions
  - DMX512, can be implemented through instructions
- Interface properties
  - RS232 with auxiliary signals
  - RS422 for full-duplex connections
  - RS485 for half-duplex and multi-point connections
  - Transmission rates from 300 to 115200 bps for RS232 and RS422
  - Transmission rates from 300 to 25000 bps for RS485
- Frame lengths
  - In universal operation: 2 KB each in send and receive direction
  - In performance-optimized operation: 30 bytes in send direction, 24 bytes in receive direction
- Can be plugged into type A0 BaseUnits (BU) with automatic coding
- LED display for errors, operation and supply voltage
- Communication display for sending and receiving
- Clear labeling on front of module
  - Plain text identification of the module type and function class
  - 2D matrix code (article and serial number)
  - Connection diagram
  - Color coding of the module type
  - Hardware and firmware version
  - Complete Article No.
- Optional labeling accessories
  - Labeling strips
  - Equipment labeling plate
- Optional system-integrated shield connection

### Technical specifications

Article number	<b>6ES7137-6AA01-0BA0</b> ET 200SP, CM PTP, PU 1
<b>General information</b>	
Product type designation	CM PtP
<b>Product function</b>	
• I&M data	Yes; I&M0 to I&M3
<b>Engineering with</b>	
• STEP 7 TIA Portal configurable/ integrated from version	STEP 7 V17 or higher
• STEP 7 configurable/integrated from version	via GSD as of V5.6 HF4
• PROFIBUS from GSD version/ GSD revision	GSD as of Revision 5
<b>Supply voltage</b>	
Rated value (DC)	24 V
Reverse polarity protection	Yes
<b>1. Interface</b>	
<b>Interface types</b>	
• RS 485	Yes
• RS 422	Yes
• RS 232	Yes
• Design of the connection	Push-in terminal
<b>Interface types</b>	
<b>RS 232</b>	
• Transmission rate, max.	115.2 kbit/s
• Cable length, max.	15 m
• RS 232 auxiliary signals	RTS, CTS, DTR, DSR, RI, DCD
<b>RS 485</b>	
• Transmission rate, max.	250 kbit/s
• Cable length, max.	1 200 m; 100 to 1200 m, depending on transmission speed
<b>RS 422</b>	
• Transmission rate, max.	115.2 kbit/s
• Cable length, max.	1 200 m
• 4-wire full duplex connection	Yes
• 4-wire multipoint connection	Yes
<b>Integrated protocols</b>	
<b>Freeport</b>	
- Telegram length, max.	2 kbyte; performance mode: receive data max. 24 byte and send data max. 30 byte
- Bits per character	7 or 8
- Number of stop bits	1 or 2 bit
- Parity	None, even, odd, always 1, always 0, any
<b>3964 (R)</b>	
- Telegram length, max.	2 kbyte; performance mode: receive data max. 24 byte and send data max. 30 byte
- Bits per character	7 or 8
- Number of stop bits	1 or 2 bit
- Parity	None, even, odd, always 1, always 0, any

Weight, approx.	30 g

**I/O systems**

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200SP

I/O modules > Communication > CM 4x IO-Link

**Overview**

- CM 4x IO-Link communications module  
Serial communications module for connecting up to 4 IO-Link devices in accordance with IO-Link specification V1.0 and V1.1. The IO-Link parameters are configured using the Port Configuration Tool (PCT), version V3.0 and higher
- Time-based IO  
Time-based IO ensures that signals are output with a precisely defined response time. By combining inputs and outputs, for example, passing products can be accurately measured or fluids dosed in precise quantities
- Supported data transfer rates
  - COM1 (4.8 kbps)
  - COM2 (38.4 kbps)
  - COM3 (230.4 kbps)

- Expansion limits
  - Length of cable: Max. 20 m
  - Max. 32 bytes of input and output data per port
  - Max. 144 bytes of input data and 128 bytes of output data per module
- Supported ET 200SP system functions
  - Replacement without PG with automatic backup without the engineering tool of the IO-Link device parameters (V1.1 devices only) and the IO-Link master parameters by means of redundant saving of parameters on the e-coding element
  - Re-parameterization during operation
  - Identification data I&M
  - Firmware update
  - PROFlenergy
- Can be plugged into Type A0 BaseUnits (BU) with automatic e-coding
- LEDs
  - DIAG: Operating state indicator (green/red) of the module
  - C1..C4: Port status indicator (green) for Port 1, 2, 3 and 4
  - Q1..Q4: Channel status indicator (green) for Port 1, 2, 3 and 4
  - F1..F4: Port fault indicator (red) for Port 1, 2, 3 and 4
  - PWR: Supply voltage indicator (green)
- Clear labeling on front of module
  - Plain text identification of the module type and function class
  - 2D matrix code (order and serial number)
  - Connection diagram
  - Color-coding of the CM module class: silver
  - Hardware and firmware version
  - Complete Article No.
- Optional accessories
  - Labeling strips
  - Equipment labeling plates
  - Color-coding plate with color code CC04
- Optional system-integrated shield connection

### Technical specifications

Article number	<b>6ES7137-6BD00-0BA0</b> ET 200SP, cm 4 X IO-Link ST
<b>General information</b>	
Product type designation	CM 4 x IO-Link ST
<b>Product function</b>	
• I&M data	Yes; I&M0 to I&M3
• Isochronous mode	No; Only for PROFINET and configuration as version with FW V2.0 or V2.1
<b>Engineering with</b>	
• STEP 7 TIA Portal configurable/integrated from version	STEP 7 V15 or higher
• STEP 7 configurable/integrated from version	STEP 7 V5.5 or higher
• PROFIBUS from GSD version/GSD revision	One GSD file each, Revision 3 and 5 and higher
• PROFINET from GSD version/GSD revision	GSDML V2.3
<b>Supply voltage</b>	
Rated value (DC)	24 V
<b>Encoder supply</b>	
Number of outputs	4
<b>Output current</b>	
• Rated value	200 mA; Per channel
<b>24 V encoder supply</b>	
• Short-circuit protection	Yes
<b>IO-Link</b>	
Number of ports	4
• of which simultaneously controllable	4
IO-Link protocol 1.0	Yes
IO-Link protocol 1.1	Yes
Transmission rate	4.8 kBaud (COM1); 38.4 kBaud (COM2), 230.4 kBaud (COM3)
Cycle time, min.	2 ms; dynamic, depending on user data length
Size of process data, input per port	32 byte; max.
Size of process data, input per module	144 byte; max.
Size of process data, output per port	32 byte; max.
Size of process data, output per module	128 byte; max.
Memory size for device parameter	2 kbyte; for each port
Master backup	Yes
Configuration without S7-PCT	Yes
Cable length unshielded, max.	20 m
<b>Operating modes</b>	
• IO-Link	Yes
• DI	Yes
• DQ	Yes; max. 100 mA per channel

Article number	<b>6ES7137-6BD00-0BA0</b> ET 200SP, cm 4 X IO-Link ST
<b>Time Based IO</b>	
- TIO IO-Link IN	No; Only for PROFINET and configuration as version with FW V2.0 or V2.1
- TIO IO-Link OUT	No; Only for PROFINET and configuration as version with FW V2.0 or V2.1
- TIO IO-Link IN/OUT	No; Only for PROFINET and configuration as version with FW V2.0 or V2.1
<b>Connection of IO-Link devices</b>	
• Port type A	Yes
• Port type B	Yes; 24 V DC via external terminal
• via three-wire connection	Yes
<b>Interrupts/diagnostics/status information</b>	
<b>Alarms</b>	
• Diagnostic alarm	Yes; The port diagnosis is available in the IO-Link mode only.
<b>Diagnoses</b>	
• Monitoring the supply voltage	Yes
• Wire-break	Yes
• Short-circuit	Yes
• Group error	Yes
<b>Diagnostics indication LED</b>	
• Monitoring of the supply voltage (PWR-LED)	Yes; green PWR LED
• Channel status display	Yes; one green LED for channel status Qn (SIO mode) and port status Cn (IO-Link mode) per channel
• for channel diagnostics	Yes; red Fn LED
• for module diagnostics	Yes; green/red DIAG LED
<b>Potential separation</b>	
<b>Potential separation channels</b>	
• between the channels and back-plane bus	Yes
<b>Ambient conditions</b>	
<b>Ambient temperature during operation</b>	
• horizontal installation, min.	-30 °C
• horizontal installation, max.	60 °C
• vertical installation, min.	-30 °C
• vertical installation, max.	50 °C
<b>Altitude during operation relating to sea level</b>	
• Installation altitude above sea level, max.	2 000 m; On request: Installation altitudes greater than 2 000 m
<b>Dimensions</b>	
Width	13 mm
Height	73 mm
Depth	58 mm
<b>Weights</b>	
Weight, approx.	30 g

## I/O systems

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200SP

I/O modules > Communication > CM 1xDALI

### Overview

SIMATIC ET 200SP DALI video  
[https://players.brightcove.net/1813624294001/70fecf0f-fbad-4fad-a077-d0e26af4d84c\\_default/index.html?videoId=6153144008001](https://players.brightcove.net/1813624294001/70fecf0f-fbad-4fad-a077-d0e26af4d84c_default/index.html?videoId=6153144008001)

- DALI 2 multimaster module for 1 bus strand
- Allows the control, diagnostics and parameter assignment of up to 64 luminaires and 63 sensors via a 2-wire bus line
- Typical areas of application: Lighting in tunnels, (factory) halls or ships
- Realization of the control via prefabricated blocks of a function block library in TIA Portal
- DALI (Digital Addressable Lighting Interface) certification according to DALI V2 for IEC 62386-101/-103 parts
- Different DALI device types, such as LED modules, fluorescent lamps, discharge lamps, low-voltage halogen lamps and others, can be used

## I/O systems

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200SP

I/O modules > Communication > CM CAN

### Overview

- For data exchange between an ET 200SP system and CAN Bus 2.0A/B or CANopen Manager or Slave (according to CiA 301 & 302)
- CANopen features:
  - Node / lifeguarding
  - Heartbeat
  - SYNC (producer / consumer)
- Integrated in TIA via HSP, TIA Portal V15.1 or higher
- CAN connection with Push-in terminals
- Integrated CAN bus terminating resistor
- Up to 60 CAN nodes
- 128 receiver and 128 transmitter PDOs
- Galvanic isolation between the two networks
- Diagnostic interrupts
- Optionally with function block SIMATIC ECC CHAdeMO: Realization of digital communication as basis for conductible DC charging of electric vehicles in line with the CHAdeMO standard

### Ordering data

### Article No.

#### ET 200SP CM CAN communications modules

To connect ET 200SP with CAN bus or CANopen networks CAN bus 2.0A/B, CANopen Manager according to CiA301/302, CANopen Slave according to CiA301/302

**6ES7137-6EA00-0BA0**

#### Accessories

#### Function block SIMATIC ECC CHAdeMO

For realization of digital communication between a DC charging station and an electric vehicle according to CHAdeMO 1.x-2.0 specification; can be used with TIA Portal as of V15.1; Single license

**6FE1263-8FB10-0AA0**

#### Usable type A0 BaseUnits

#### More information

SIMATIC ET 200SP Manual Collection,  
see <https://support.industry.siemens.com/cs/ww/en/view/84133942>

Diagnostic blocks with visualization,  
see <https://support.industry.siemens.com/cs/ww/en/view/109479103>

AS-Interface block library for SIMATIC PCS 7 for simple connection of AS-Interface to PCS 7,  
see <https://mall.industry.siemens.com/mall/ww/en/Catalog/Products/10046725?tree=CatalogTree>

Released combinations of the AS-i modules for ET 200SP,  
see <https://support.industry.siemens.com/cs/ww/en/view/103624653>

The CM AS-i Master ST communications module is designed for use in the SIMATIC ET 200SP distributed I/O system and has the following features:

- Connection of up to 62 AS-Interface slaves
- Supports all AS-Interface master functions according to the AS-Interface specification V3.0
- User-friendly configuration with graphic display of the AS-i line in TIA Portal V12 or higher, or via GSD in other systems
- Supply via AS-Interface cable

- Suitable for AS-Interface with 30-V voltage and AS-i Power24V
- Integrated ground-fault monitoring for the AS-Interface cable
- Through connection to AS-Interface, the number of digital inputs and outputs available for the control system is greatly increased (max. 496 DI/496 DQ on the AS-Interface per CM AS-i Master ST)
- Integrated analog value processing

#### AS-i gateways with ET 200SP

An AS-i gateway or AS-i link enables access to the AS-Interface data via PROFINET or PROFIBUS.

With the CM AS-i Master ST module, flexible and powerful PROFINET/AS-i links or PROFIBUS/AS-i link solutions are set up. Depending on the requirements, even several AS-i masters can be plugged into one ET 200SP station, so that the setup can easily be extended from a single master to double masters or multiple masters.

The maximum number of modules is determined by the ET 200SP interface module (IM): up to 8 AS-i masters with PROFINET IM 155-6PN Standard, up to 43 AS-i masters with IM 155-6PN High Feature, or a single AS-i master with IM 155-6PN Basic. For the connection to PROFIBUS, the IM 155-6DP HF interface module with up to 7 AS-i master modules is used.

Since in many plants an ET 200SP station is provided with I/O, motor starter or other peripheral modules, the AS-i master modules are simply plugged in without any additional effort.

An AS-i Safety gateway can also be implemented without any problems by adding the safety-oriented module F-CM AS-i Safety ST in the ET 200SP station. This greatly simplifies the cabling and connection of distributed EMERGENCY STOP pushbuttons and protective door monitoring systems to a Failsafe CPU. The AS-i Safety application is completely configured in TIA Portal/STEP 7.

The ET 200SP modules CM AS-i Master ST and F-CM AS-i Safety ST (see page 10/207) can of course also be used directly on an ET 200SP CPU or F-CPU, so that an extremely compact SIMATIC control system with AS-i bus connection can be set up.

For further application possibilities,  
see the brochure "The modular AS-i Master" at <https://www.siemens.com/as-interface>.

More information, see SIMATIC ET 200SP Manual Collection

#### Design

The CM AS-i Master ST module has an ET 200SP module enclosure with a width of 20 mm. A C0 type BaseUnit (BU) is required for use in the ET 200SP.

The communications module has LED indicators for diagnostics, operation, AS-i voltage and AS-i slave status and offers informative front-side module inscription for:

- Plain-text marking of the module type and function class
- 2D matrix code (Article No. and serial number)
- Connection diagram
- Color coding module type communications module, light gray
- Hardware and firmware version
- Supported BaseUnit type BU: C0

## Overview

### Function

The CM AS-i Master ST supports all specified functions of the AS-Interface Specification V3.0.

The input/output values of the digital AS-i slaves can be activated via the cyclic process image. The values of the analog AS-i slaves are accessible via the cyclic process image or via data record transfer.

If required, master calls can be performed with the command interface, e.g. read/write parameters, read/write configuration.

Changeover of the operating mode, automatic application of the slave configuration and the re-addressing of a connected AS-i slave can be implemented via the control panel of the CM AS-i Master ST in STEP 7.

In order to implement modular machine concepts, the AS-i slaves can be activated or deactivated via the PLC program (option handling). The configuration of AS-i slaves can be modified while being executed, thus enabling variable machine setups and tool changing with integrated input/output modules during ongoing operation. Without deactivating the controller, AS-i input/output modules can be added in the system.

An existing AS-i installation can be read into the STEP 7 hardware configuration and then adapted and documented in the project. Analog values are transmitted via the cyclic process image, the length of which is adjustable and extendable up to 288 bytes (depending on the interface module (IM) used).

Diagnostic information is accessed via automatic alarm messages, via the status information in the process image or data record reading in the user program, or via the graphical status display in the online diagnostics of the TIA Portal. The AS-i network's transmission quality can also be read out. To avoid configuration errors, duplicate addresses in the AS-i network can be detected.

Configuration is possible with SIMATIC CPUs S7-300 up to S7-1500 and with a SINUMERIK 840D sl or other controller.

The online diagnostic status of the AS-i slaves can be displayed directly on the slaves in the network view in TIA Portal (for S7-1500 CPUs with firmware version V 2.0 or higher).

### Notes on security

In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial security concept. Siemens products and solutions represent only one component of such a concept.

For more information on Industrial Security, see <http://www.siemens.com/industrialsecurity>.

## Configuration

The following software is required for configuration of the CM AS-i Master ST module:

- STEP 7 (TIA Portal) or
- STEP 7 (Classic) or
- the GSD file of the ET 200SP with STEP 7 or another engineering tool

STEP 7 enables user-friendly configuration and diagnostics of the AS-i master and any connected slaves.

Alternatively, you can also apply the AS-Interface ACTUAL configuration as the TARGET configuration at the "touch of a button" via the control panel integrated in the TIA Portal or an optional expansion button. Configuration with the GSD file is possible only with the button.

The CM AS-i Master ST module occupies up to 288 input bytes and up to 288 output bytes in the I/O data of the ET 200SP station. The I/O assignment depends on the configuration in STEP 7.

Together with an ET 200SP CPU 1510SP/1512SP or 1515SP PC, preprocessing of AS-i signals directly in the ET 200SP station and setting up of an independent AS-i station without a higher-level CPU are possible.

Configuration of an AS-Interface network with CM AS-i Master ST via the TIA Portal

## Benefits

The CM AS-i Master ST communications module for ET 200SP enables modular, simple and high-performance expansion of AS-interface networks via engineering in the TIA Portal.

Up to eight CM AS-i Master ST units can be plugged into one ET 200SP station with IM 155-6PN Standard. When using the IM 155-6 PN High Feature, the number of CM AS-i Master ST in the ET 200SP station can be further increased. The maximum configuration depends on the interface module used.

Multiple masters as well as single masters can thus be implemented in the ET 200SP depending on the number of modules.

Together with the interface module, a scalable PROFINET/AS-i Link or PROFIBUS/AS-i Link can be assembled.

Using STEP 7, the AS-i network is consistently configured and programmed with only one configuration tool.

## I/O systems

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200SP

### I/O modules > Communication > CM AS-i Master ST for SIMATIC ET 200SP

#### Benefits

The PRONETA PC program (for ET 200SP with PROFINET interface module) is available for convenient input/output testing during the commissioning of an AS-i network without a CPU, see <http://www.siemens.com/proneta>.

For the connection of an AS-i network to systems with Ethernet/IP and Modbus TCP, the ET 200SP MultiFieldbus interface module IM155-6MF in combination with the CM AS-i Master ST module is available.

For diagnostics during ongoing operation, diagnostics blocks with clearly arranged visualization on the SIMATIC HMI panel are available or can be downloaded free of charge via a web browser,

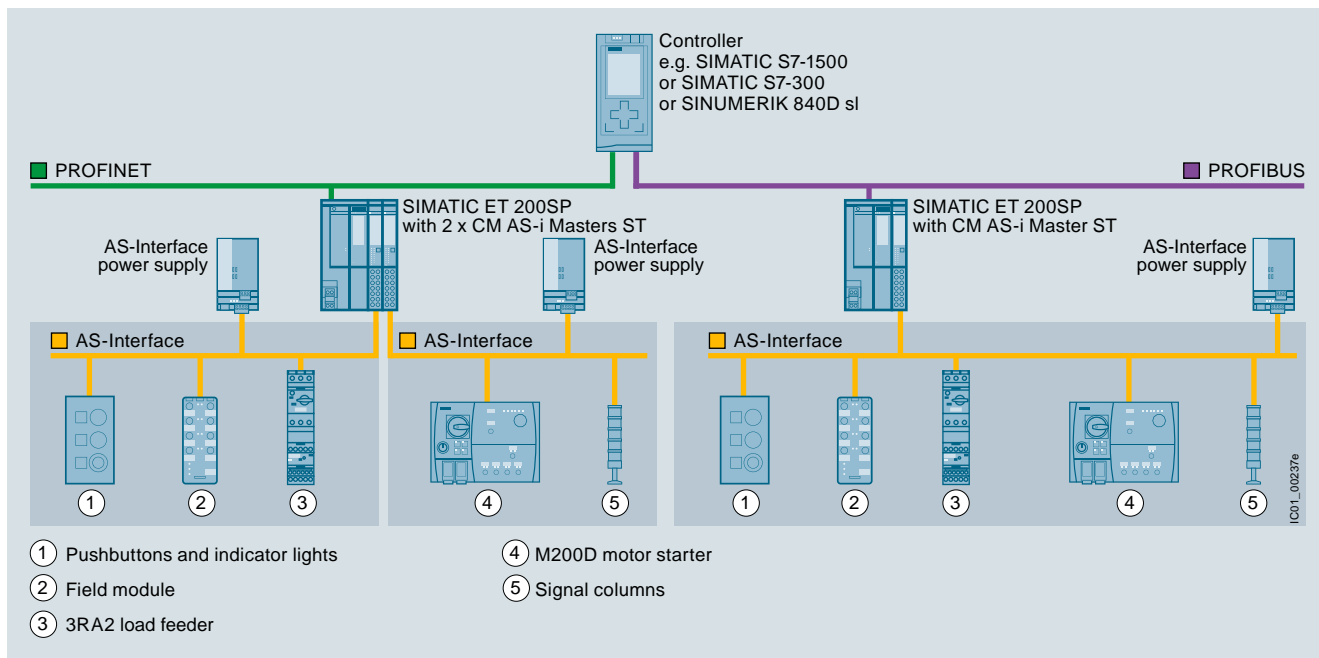

see <https://support.industry.siemens.com/cs/ww/en/view/109479103>.

Diagnostic block for CM AS-i Master ST

## I/O systems

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200SP

I/O modules > Communication > CM DP for ET 200SP CPU

### Overview

- PROFIBUS DP master/slave with electrical interface for connecting the ET 200SP CPUs to PROFIBUS at up to 12 Mbps
- Expands the ET 200SP CPUs 1510SP-1 PN / 1512SP-1 PN by one PROFIBUS connection
- For communication with lower-level PROFIBUS devices at bandwidths of 9.6 Kbps to 12 Mbps
- Communication services:
  - PROFIBUS DP
  - PG/OP communication
  - S7 communication:
 

This makes it possible to establish communication between the ET 200SP CPU and other devices, for example those from the SIMATIC S7-300/400/1500 range.
- Time synchronization
- Simple programming and configuration over PROFIBUS
- Cross-network PG communication using S7 routing
- Data set routing

## I/O systems

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200SP

I/O modules > Communication > CP 1542SP-1

### Overview

ISO	TCP/UDP	PN	MRP	IT	IP-R	PG/OP	S7
	●			●		●	●

G...IKT0...XX...50730

The CP 1542SP-1 communications processor connects the ET 200SP Distributed Controller with Industrial Ethernet networks.

The module can also be used for integrating the ET 200SP Distributed Controller into an IPv6-based network. All functions are configured using STEP 7 Professional V14 (TIA Portal) or higher.

The CP 1542SP-1 supports the following communication services:

- PG/OP communication
- S7 communication
- Open communication (Open User Communication)
- IT communication
  - Sending emails via SMTP for authentication on an email server (also with IPv6)
  - SNMPv1 for transfer of network analysis information
- Integration of the ET 200SP Distributed Controller into IPv6-based networks

### Overview

ISO	TCP/UDP	PN	MRP	IT	IP-R	PG/OP	S7
	●			●		●	●

G\_1K10\_XX\_50730

The CP 1543SP-1 communications processor connects the ET 200SP Distributed Controller with Industrial Ethernet networks. By combining a variety of security features such as an SPI (Stateful Packet Inspection) firewall, VPN and data encryption protocols (e.g. SNMPv3), the communications processor protects individual ET 200SP distributed controllers or even entire automation cells against unauthorized access.

The module can also be used for integrating the ET 200SP Distributed Controller into an IPv6-based network. All functions can be configured with STEP 7 Professional, V14 (TIA Portal) and higher.

The CP 1543SP-1 supports the following communication services:

- PG/OP communication
- S7 communication
- Open communication (Open User Communication)
- IT communication
  - Sending emails via SMTP or ESMTP with "SMTP-Auth" for authentication on an email server (also with IPv6)
- Support of SINEMA Remote Connect with autoconfiguration
- Security Integrated
  - Stateful Packet Inspection Firewall
  - Secure communication via VPN (IPsec)
- Protocols for secure communication
  - Secure access to the web server of the CPU via the HTTPS protocol
  - Secure transfer of the time of day (NTP)
  - SNMPv3 for tap-proof transfer of network analysis information
- Integration of the ET 200SP Distributed Controller into IPv6-based networks

#### CP 1543SP-1 communications processor

6GK7543-6WX00-0XE0

CP 1543SP-1 communications processor for connecting SIMATIC S7-ET 200SP to Industrial Ethernet, Security (firewall and VPN), open IE communication (TCP/IP, ISO-on-TCP, UDP) PG/OP, S7 routing, IP broadcast/multicast, SNMPV1/V3, DHCP, secure email, IPV4/IPV6, time synchronization via NTP, access to web server of CPU, bus adapter required

#### Accessories

##### SIMATIC BusAdapter BA 2xRJ45

6ES7193-6AR00-0AA0

For PROFINET interface modules, standard function class or above; max. cable length 50 m

##### SIMATIC BusAdapter BA 2xFC

6ES7193-6AF00-0AA0

For PROFINET interface modules, standard function class or above; for increased vibration and EMC loads; max. cable length 50 m

##### SIMATIC BusAdapter BA 2xSCRJ

6ES7193-6AP00-0AA0

For PROFINET interface modules, High Feature function class or above; fiber-optic cable connection for POF or PCF; for increased vibration and EMC load capacity; max. cable length 50 m (POF) or 100 m (PCF)

##### SIMATIC BusAdapter BA SCRJ/RJ45

6ES7193-6AP20-0AA0

For PROFINET interface modules, High Feature function class or above; fiber-optic cable connection for POF or PCF; for increased vibration and EMC load capacity; max. cable length 50 m (POF) or 100 m (PCF)

##### SIMATIC BusAdapter BA SCRJ/FC

6ES7193-6AP40-0AA0

For PROFINET interface modules, High Feature function class or above; with media converter FOC-cu; for increased vibration and EMC loads; max. cable length 50 m (POF, copper) or 100 m (PCF)

#### IE FC RJ45 plug 180 2 x 2

RJ45 plug-in connector for Industrial Ethernet with a rugged metal enclosure and integrated insulation displacement contacts for connecting Industrial Ethernet FC installation cables; with 180° cable outlet; for network components and CPs/CPU with Industrial Ethernet interface

- 1 pack = 1 unit
- 1 pack = 10 units
- 1 pack = 50 units

## I/O systems

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200SP

I/O modules > Communication > CP 1542SP-1 IRC

### Overview

ISO	TCP/UDP	PN	MRP	IT	IP-R	PG/OP	S7
	●			●		●	●

G...JK10...XX...50730

The CP 1542SP-1 IRC communications processor connects the ET 200SP Distributed Controller with Industrial Ethernet networks. In addition, control centers can be connected using various telecontrol protocols.

The CP is characterized by the following:

- Ethernet-based connection to TeleControl Server Basic, e.g. via Internet
- Ethernet-based connection to the control center via SINAUT ST7, IEC 60870-5-104 or DNP3 protocol
- Data transfer of measured values, control variable values or alarms optimized for telecontrol systems
- Automatic sending of alert emails
- Data buffering of up to 100,000 values ensures a secure database, even with temporary connection failures
- Clearly laid out LED signaling for fast and easy diagnostics
- Fast commissioning thanks to easy configuration using STEP 7

The module can also be used for integrating the ET 200SP Distributed Controller into an IPv6-based network. All functions are configured using STEP 7 Professional V14 (TIA Portal) or higher.

The CP 1542SP-1 IRC supports the following communication services:

- Support of multiple telecontrol protocols such as SINAUT ST7, DNP3, IEC 60870-5-104 and TeleControl Basic
- PG/OP communication
- S7 communication
- Open communication (Open User Communication)
- IT communication
  - Sending emails via SMTP or SMTPS with "SMTP-Auth" for authentication on an email server (also with IPv6)
  - Email transfer with addressing by program block
  - Email transfer via "Notifications" (alerts)
- Support of SINEMA Remote Connect with autoconfiguration

## I/O systems

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200SP

I/O modules > Communication > SIPLUS CM PtP serial interface

### Overview

- Communications module CM PtP; Module for serial communication connections with RS232, RS422, RS485 interfaces for the Freeport, 3964(R), Modbus RTU and USS protocols, max. 115.2 kbps, 2 KB frame length, 4 KB receive buffer.
- Protocols supported
  - Freeport: User-parameterizable telegram format for universal communication
  - 3964(R) for improved transmission reliability
  - Modbus RTU master (requires instructions in SIMATIC S7)
  - Modbus RTU slave (requires instructions in SIMATIC S7)
  - USS, implemented through instructions
- Interface properties
  - RS232 with auxiliary signals
  - RS422 for full-duplex connections
  - RS485 for half-duplex and multi-point connections
  - Transmission rates from 300 to 115200 bps
- Can be plugged into type A0 BaseUnits (BU) with automatic coding
- LED display for errors, operation, and supply voltage
- Communication display for sending and receiving
- Clear labeling on front of module
  - Plain text identification of the module type and function class
  - 2D matrix code (order and serial number)
  - Connection diagram
  - Color coding of the CM module type: silver
  - Hardware and firmware version
  - Complete Article No.
- Optional labeling accessories
  - Labeling strips
  - Equipment labeling plate
- Optional system-integrated shield connection

#### Note

SIPLUS extreme products are based on SIMATIC standard products. The contents listed here were taken from the respective standard products. SIPLUS extreme-specific information was added.

#### SIPLUS CM PtP communications module

(Extended temperature range and exposure to environmental substances)

PROFIBUS DP master/slave with electrical interface for connecting the ET 200SP CPUs to PROFIBUS at up to 12 Mbps for serial communication connections with the interfaces RS232, RS422, RS485, BU type A0, color code CC00

6AG1137-6AA00-2BA0

#### Accessories

#### SIPLUS BaseUnits type A0

(Extended temperature range and exposure to environmental substances)

#### BU15-P16+A0+2D

BU type A0; BaseUnit (light) with 16 process terminals to the module; for starting a new load group (max. 10 A)

6AG1193-6BP00-7DA0

#### BU15-P16+A0+2B

BU type A0; BaseUnit (dark) with 16 process terminals to the module; for continuing the load group

6AG1193-6BP00-7BA0

#### BU15-P16+A10+2D

BU type A0; BaseUnit (light) with 16 process terminals (1 ... 16) to the module and an additional 10 internally jumpered AUX terminals (1 A to 10 A); for starting a new load group (max. 10 A)

6AG1193-6BP20-7DA0

#### BU15-P16+A10+2B

BU type A0; BaseUnit (dark) with 16 process terminals (1...16) to the module and an additional 10 internally jumpered AUX terminals (1 A to 10 A); for continuing the load group

6AG1193-6BP20-7BA0

#### Accessories

#### SIPLUS Mounting Kit ET 200SP

Mounting accessories for use with increased mechanical vibration and shock loads.

6AG1193-6AA00-0AA0

#### Other accessories

See SIMATIC CM PtP, page 10/136

### Technical specifications

Article number	<b>6AG1137-6AA00-2BA0</b>
Based on	<b>6ES7137-6AA00-0BA0</b> SIPLUS ET 200SP CM PTP
<b>Ambient conditions</b>	
<b>Ambient temperature during operation</b>	
• horizontal installation, min.	-40 °C; = Tmin (incl. condensation/frost)
• horizontal installation, max.	60 °C; = Tmax
<b>Altitude during operation relating to sea level</b>	
• Installation altitude above sea level, max.	5 000 m
• Ambient air temperature-barometric pressure-altitude	Tmin ... Tmax at 1 140 hPa ... 795 hPa (-1 000 m ... +2 000 m) // Tmin ... (Tmax - 10 K) at 795 hPa ... 658 hPa (+2 000 m ... +3 500 m) // Tmin ... (Tmax -20 K) at 658 hPa ... 540 hPa (+3 500 m ... +5 000 m)
<b>Relative humidity</b>	
• With condensation, tested in accordance with IEC 60068-2-38, max.	100 %; RH incl. condensation / frost (no commissioning in bedewed state), horizontal installation
<b>Resistance</b>	
<b>Coolants and lubricants</b>	
- Resistant to commercially available coolants and lubricants	Yes; Incl. diesel and oil droplets in the air
<b>Use in stationary industrial systems</b>	
- to biologically active substances according to EN 60721-3-3	Yes; Class 3B2 mold, fungus and dry rot spores (with the exception of fauna); Class 3B3 on request
- to chemically active substances according to EN 60721-3-3	Yes; Class 3C4 (RH < 75 %) incl. salt spray acc. to EN 60068-2-52 (severity degree 3); *
- to mechanically active substances according to EN 60721-3-3	Yes; Class 3S4 incl. sand, dust, *
- Against mechanical environmental conditions acc. to EN 60721-3-3	Yes; Class 3M8 using the SIPLUS Mounting Kit ET 200SP (6AG1193-6AA00-0AA0)
<b>Use on ships/at sea</b>	
- to biologically active substances according to EN 60721-3-6	Yes; Class 6B2 mold and fungal spores (excluding fauna); Class 6B3 on request
- to chemically active substances according to EN 60721-3-6	Yes; Class 6C3 (RH < 75 %) incl. salt spray acc. to EN 60068-2-52 (severity degree 3); *
- to mechanically active substances according to EN 60721-3-6	Yes; Class 6S3 incl. sand, dust; *
- Against mechanical environmental conditions acc. to EN 60721-3-6	Yes; Class 6M4 using the SIPLUS Mounting Kit ET 200SP (6AG1193-6AA00-0AA0)

Article number	<b>6AG1137-6AA00-2BA0</b>
Based on	<b>6ES7137-6AA00-0BA0</b> SIPLUS ET 200SP CM PTP
<b>Usage in industrial process technology</b>	
- Against chemically active substances acc. to EN 60654-4	Yes; Class 3 (excluding trichlorethylene)
- Environmental conditions for process, measuring and control systems acc. to ANSI/ISA-71.04	Yes; Level GX group A/B (excluding trichlorethylene; harmful gas concentrations up to the limits of EN 60721-3-3 class 3C4 permissible); level LC3 (salt spray) and level LB3 (oil)
<b>Remark</b>	
- Note regarding classification of environmental conditions acc. to EN 60721, EN 60654-4 and ANSI/ISA-71.04	* The supplied plug covers must remain in place over the unused interfaces during operation!
<b>Conformal coating</b>	
• Coatings for printed circuit board assemblies acc. to EN 61086	Yes; Class 2 for high reliability
• Protection against fouling acc. to EN 60664-3	Yes; Type 1 protection
• Military testing according to MIL-I-46058C, Amendment 7	Yes; Discoloration of coating possible during service life
• Qualification and Performance of Electrical Insulating Compound for Printed Board Assemblies according to IPC-CC-830A	Yes; Conformal coating, Class A

## I/O systems

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200SP

I/O modules > Communication > SIPLUS CM 4x IO-Link

### Overview

- SIPLUS CM 4x IO-Link communications module  
Serial communications module for connecting up to 4 IO-Link devices in accordance with IO-Link specification V1.0 and V1.1. The IO-Link parameters are configured using the Port Configuration Tool (PCT), version V3.0 and higher.
- Time-based IO  
Time-based IO ensures that signals are output with a precisely defined response time. By combining inputs and outputs, for example, passing products can be accurately measured or fluids dosed in precise quantities.
- Supported data transfer rates
  - COM1 (4.8 kBd)
  - COM2 (38.4 kBd)
  - COM3 (230.4 kBd)
- Expansion limits
  - Length of cable: Max. 20 m
  - Max. 32 bytes of input and output data per port
  - Max. 144 bytes of input data and 128 bytes of output data per module

- Supported ET 200SP system functions
  - Replacement without PG with automatic backup without the engineering tool of the IO-Link Device Parameter (V1.1 devices only) and the IO-Link master parameters by means of redundant saving of parameters on the e-coding element
  - Re-parameterization during operation
  - Identification data I&M
  - Firmware update
  - PROFlenergy
- Can be plugged into Type A0 BaseUnits (BU) with automatic e-coding
- LED indicators
  - DIAG: Operating state indicator (green/red) of the module
  - C1..C4: Port status indicator (green) for Port 1, 2, 3 and 4
  - Q1..Q4: Channel status indicator (green) for Port 1, 2, 3 and 4
  - F1..F4: Port fault indicator (red) for Port 1, 2, 3 and 4
  - PWR: Supply voltage indicator (green)
- Clear labeling on front of module
  - Plain text identification of the module type and function class
  - 2D matrix code (order and serial number)
  - Connection diagram
  - Color-coding of the module class CM: silver
  - Hardware and firmware version
  - Complete Article No.
- Optional accessories
  - Labeling strips
  - Equipment labeling plate
  - Color-coded label with color code CC04
- Optional system-integrated shield connection

**I/O systems**

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200SP

I/O modules > Communication > SIPLUS CM DP for ET 200SP CPU

**Overview**

- PROFIBUS DP master/slave with electrical interface for connecting the ET 200SP CPUs to PROFIBUS at up to 12 Mbps
- Expands the ET 200SP CPUs 1510SP-1 PN / 1512SP-1 PN by one PROFIBUS connection
- For communication with lower-level PROFIBUS devices at bandwidths of 9.6 kbps to 12 Mbps
- Communication services:
  - PROFIBUS DP
  - PG/OP communication
  - S7 communication:
    - This makes it possible to establish communication between the ET 200SP CPU and other devices, for example those from the SIMATIC S7-300/400/1500 range.
- Time synchronization
- Simple programming and configuration over PROFIBUS
- Cross-network PG communication using S7 routing
- Data set routing

## I/O systems

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200SP

Fail-safe I/O modules > Digital F-input modules

### Overview

SIMATIC ET 200SP Safety F-DI video  
[https://players.brightcove.net/1813624294001/70fecf0f-fbad-4fad-a077-d0e26af4d84c\\_default/index.html?videoId=6151017420001](https://players.brightcove.net/1813624294001/70fecf0f-fbad-4fad-a077-d0e26af4d84c_default/index.html?videoId=6151017420001)

Digital fail-safe input module:  
F-DI 8x24 V DC High Feature for BU type A0, color code CC01

Important features:

- 8-channel digital fail-safe input module for ET 200SP
- For fail-safe reading of sensor information (1 or 2 channels)
- Provides integrated discrepancy evaluation for 2-out-of-2 signals
- 8 internal sensor supplies (incl. test function) onboard
- Certified up to SIL 3 (IEC 61508), PL e (ISO 13849)
- Can be plugged into Type A0 BaseUnits (BU) with automatic coding
- LED display for error, operation, supply voltage and status
- Clear labeling on front of module
  - Plain text identification of the module type and function class
  - 2D matrix code (order and serial number)
  - Connection diagram
  - Color coding of the module type DI: white
  - Hardware and firmware version
  - Color code CC for module-specific color coding of the potentials at the terminals of the BU
  - Complete Article No.
- Optional labeling accessories
  - Labeling strips
  - Equipment labeling plate
- Optional module-specific color identification of the terminals according to the color code CC
- Optional system-integrated shield connection
- The modules support PROFIsafe in both PROFIBUS and PROFINET configurations. Can be used with all fail-safe SIMATIC S7 CPUs.

**SIMATIC ET 200SP F-DQ 8**  
Compact fail-safe digital output module

SIMATIC ET 200SP Safety F-DQ 8 video  
[https://players.brightcove.net/1813624294001/70fecf0f-fbad-4fad-a077-d0e26af4d84c\\_default/index.html?videoId=6154329323001](https://players.brightcove.net/1813624294001/70fecf0f-fbad-4fad-a077-d0e26af4d84c_default/index.html?videoId=6154329323001)

Digital fail-safe output modules:

- F-DQ 4x24VDC/2A PM High Feature
- F-DQ 8x24VDC/0.5A PP High Feature

Important features:

- 4 and 8-channel digital fail-safe output modules for the ET 200SP
- Fail-safe 2-channel activation (switching to P/M potential or switching to P/P potential) of actuators
- Actuators can be controlled up to 2 A or 0.5 A
- Certified up to SIL 3 (IEC 61508), PL e (ISO 13849)
- Can be plugged into Type A0 BaseUnits (BU) with automatic coding
- LED display for error, operation, supply voltage and status
- Clear labeling on front of module
  - Plain text identification of the module type and function class
  - 2D matrix code (order and serial number)
  - Connection diagram
  - Color coding of the DQ module type: black
  - Hardware and firmware version
  - Color code CC for module-specific color coding of the potentials at the terminals of the BU
  - Complete Article No.
- Optional labeling accessories
  - Labeling strips
  - Equipment labeling plate
- Optional system-integrated shield connection
- The modules support PROFIsafe in both PROFIBUS and PROFINET configurations
- They can be used with all fail-safe SIMATIC S7 CPUs

## Overview

The digital F electronic module relay 1 F-RQ DC 24VDC/24.230VAC/5 A has the following characteristics:

- 1 relay output (2 NO contacts)
- Total output current 5 A
- Rated load voltage 24 V DC and 24 ... 230 V AC
- The control circuit of the two safety relays must be routed from the outside to the respective terminals

The attainable safety integrity level is SIL 3 (IEC 61508) when the control of the F-RQ module is implemented via a fail-safe output (e.g. ET 200SP 4F-DQ 24 V DC/2 A PROFIsafe).

## Ordering data

**Digital F output module relay 1 F-RQ**

BU type F0, relay output (2 NO contacts), total output current 5 A, load voltages 24 V DC and 24 ... 230 V AC; can be used up to SIL 3/Cat. 4/PLe if controlled via F-DQ

Article number	<b>6ES7136-6RA00-0BF0</b> ET 200SP, F-RQ 1x24VDC/ 24..230VAC/5A ST
<b>General information</b>	
Product type designation	F-RQ 24 ... 48VDC/24 ... 230VAC/5A ST
<b>Engineering with</b>	
• STEP 7 TIA Portal configurable/ integrated from version	V13
• STEP 7 configurable/integrated from version	V5.5 SP4 and higher
• PROFINET from GSD version/ GSD revision	V2.31
<b>Supply voltage</b>	
Rated value (DC)	24 V; Coil voltage
<b>Digital outputs</b>	
Number of digital outputs	1
Limitation of inductive shutdown voltage to	No
Controlling a digital input	Yes
<b>Switching capacity of the outputs</b>	
• with resistive load, max.	5 A
• on lamp load, max.	25 W
<b>Switching frequency</b>	
• with resistive load, max.	2 Hz
• with inductive load, max.	0.1 Hz; See data in manual
• with inductive load (acc. to IEC 60947-5-1, DC13), max.	0.1 Hz
• with inductive load (acc. to IEC 60947-5-1, AC15), max.	2 Hz
<b>Total current of the outputs (per module)</b>	
<b>horizontal installation</b>	
- up to 40 °C, max.	5 A; note derating data in the manual
- up to 50 °C, max.	4 A; note derating data in the manual
- up to 60 °C, max.	3 A; note derating data in the manual
<b>vertical installation</b>	
- up to 50 °C, max.	3 A; note derating data in the manual
<b>Relay outputs</b>	
• Number of relay outputs	1; 2 NO contacts
• Rated supply voltage of relay coil L+ (DC)	24 V
• Current consumption of relays (coil current of all relays), max.	70 mA
• external protection for relay outputs	yes; 6 A, see data in manual
• Relay approved acc. to UL 508	Yes; Pilot Duty B300, R300

Analog fail-safe input modules:

- F-AI 4xI 0(4)...20 mA 2/4-wire High Feature for BU types A0 and A1, color code CC00
- F-AI 4xU 0..10 V HF, BU type A0, A1, color code CC00

Important features:

- 4-channel analog fail-safe digital inputs for ET 200SP
- 4 analog inputs with galvanic isolation between channels and backplane bus
- Measuring ranges: (0)4...20 mA and 0..10 V
- Possibility of connecting current and voltage sensors for measuring temperature, pressure, flow, level, distance measurement, etc.

10

## Overview

SIMATIC ET 200SP Safety F-PM-E video  
[https://players.brightcove.net/1813624294001/70fecf0f-fbad-4fad-a077-d0e26af4d84c\\_default/index.html?videoId=6154262749001](https://players.brightcove.net/1813624294001/70fecf0f-fbad-4fad-a077-d0e26af4d84c_default/index.html?videoId=6154262749001)

Digital fail-safe power module:  
 F-PM-E PPM 24 V DC/8 A for BU type C0,  
 color code CC52

Important features:

- Certified up to SIL 3 (IEC 61508), PL e (ISO 13849)
- Safety-related shutdown of output modules within the potential group of the F-PM-E
- Two fail-safe digital inputs, for reading of sensor information (1 or 2 channels)
- One fail-safe digital output onboard (switching to PPM potential, up to 2 A, up to SIL 3/PL e)
- Fail-safe digital output and potential supply switching to PP or PM potential can be parameterized
- Parameterizable onboard evaluation of the fail-safe inputs for control of the fail-safe digital outputs and of the potential group
- Digital standard output modules can be shut down up to PL d (ISO 13849) and SIL 2 (IEC61508) (up to 8 A).
- Can be plugged into type C0 BaseUnits (BU) with automatic coding
- LED display for error, operation, supply voltage and status
- Clear labeling on front of module
  - Plain text identification of the module type and function class
  - 2D matrix code (order and serial number)
  - Connection diagram
  - Color coding of the module type DI: white
  - Hardware and firmware version
  - Color code CC for module-specific color coding of the potentials at the terminals of the BU
  - Complete Article No.
- Optional labeling accessories
  - Labeling strips
  - Equipment labeling plate
- Optional module-specific color identification of the terminals according to the color code CC
- Optional system-integrated shield connection
- The modules support PROFIsafe in both PROFIBUS and PROFINET configurations. Can be used with all fail-safe SIMATIC S7 CPUs.

SIMATIC ET 200SP

### Fail-safe I/O modules > Fail-safe technology modules

#### Overview

Fail-safe technology module:  
F-TM Count, 1x1Vpp sin/cos High Feature for BU type A0,  
color code CC00

Important features:

- Technological, fail-safe counter module for ET 200SP
- Certified up to SIL 3 (IEC 61508), PL e (ISO 13849)
- 1x sin/cos interface for recording sin/cos differential encoder signals A, A/, B, B/, N and N/
- Option to connect sin/cos differential encoders
- Short-circuit-proof 5 V DC encoder supply
- High-speed count input up to 200 kHz
- Counting range: 32-bit (-2.147.483.648 to +2.147.483.647)
- SW gate for counter control

- Measured values:
  - Speed
  - Frequency
  - Period duration
- Integrated safety functions:
  - SOS (Safe Operation Stop)
  - SLS (Safely Limited Speed)
  - SDI (Safe Direction)
- Can be plugged onto type A0 BaseUnits (BU)
- LED display for error, operation, supply voltage and status
- Monitoring of encoder signals for wire break, short-circuit and signal strength
- Firmware update
- Identification data I&M
- Value status
- Clear labeling on front of module
  - Plain text identification of the module type and function class
  - 2D matrix code (order and serial number)
  - Connection diagram
  - Hardware and firmware version
  - Color code CC for module-specific color coding of the potentials at the terminals of the BU
  - Complete Article No.
- Optional labeling accessories:
  - Labeling strips
  - Equipment labeling plate
- Optional module-specific color identification of the terminals according to the color code CC
- Optional system-integrated shield connection
- The modules support PROFI-safe in both PROFIBUS and PROFINET configurations. Can be used with all fail-safe SIMATIC S7 CPUs.

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200SP

### Fail-safe I/O modules > Fail-safe technology modules

#### Technical specifications

Article number	<b>6ES7136-6CB00-0CA0</b> F-TM Count 1x1Vpp sin/cos HF
<b>General information</b>	
Product type designation	F-TM Count 1x1Vpp sin/cos HF
<b>Product function</b>	
• I&M data	Yes; I&M0 to I&M3
<b>Engineering with</b>	
• STEP 7 TIA Portal configurable/ integrated from version	Step 7 V17 or higher: use GSDML for prior versions
<b>Supply voltage</b>	
<b>Load voltage L+</b>	
• Rated value (DC)	24 V
• Reverse polarity protection	Yes
<b>Encoder supply</b>	
<b>5 V encoder supply</b>	
• 5 V	Yes; 5.1 V ±3.5 %
• Short-circuit protection	Yes; Electronic overload protection; no protection on applying a normal or counter voltage.
• Output current, max.	300 mA
<b>Digital inputs</b>	
Number of digital inputs	1; (counter input)
Digital inputs, parameterizable	Yes
<b>Digital input functions, parameterizable</b>	
• Gate start/stop	Yes
• Counter for incremental encoder - Number, max.	Yes 1
<b>Input voltage</b>	
• Type of input voltage	sin/cos 1 Vpp
<b>Input delay (for rated value of input voltage)</b>	
• Minimum pulse width for program reactions	2.5 µs for parameterization "none"
<b>for technological functions</b>	
- parameterizable	Yes
<b>Connectable encoders</b>	
• Incremental encoder (symmetrical)	Yes; up to 200 kHz depending on cable type and length
<b>Encoder signals, incremental encoder (symmetrical)</b>	
• Input voltage	1 Vpp, centered at 2.5 V offset
• Input frequency, max.	200 kHz
• Counting frequency, max.	800 kHz; with quadruple evaluation
• Cable length, shielded, max.	150 m
• Incremental encoder with A/B tracks, 90° phase offset	Yes; sin/cos
• Incremental encoder with A/B tracks, 90° phase offset and zero track	Yes; sin/cos/zero

Article number	<b>6ES7136-6CB00-0CA0</b> F-TM Count 1x1Vpp sin/cos HF
<b>Interrupts/diagnostics/ status information</b>	
Diagnostics function	Yes; see chapter "Diagnostic Messages" in the manual
<b>Alarms</b>	
• Diagnostic alarm	Yes
• Hardware interrupt	No
<b>Diagnoses</b>	
• Monitoring the supply voltage	Yes
• Wire-break	Yes
• Short-circuit	Yes
• A/B transition error at incremental encoder	Yes
<b>Diagnostics indication LED</b>	
• RUN LED	Yes; green LED
• ERROR LED	Yes; red LED
• Monitoring of the supply voltage (PWR-LED)	Yes; green LED
• Channel status display	Yes; green LED
• for channel diagnostics	Yes; red LED
• for module diagnostics	Yes; green/red DIAG LED
<b>Integrated Functions</b>	
Counter	
• Number of counters	1
• Counting frequency, max.	800 kHz; with quadruple evaluation
<b>Safety monitoring functions</b>	
• Safe Operating Stop (SOS)	Yes
• Safely-Limited Speed (SLS)	Yes
• Safe Direction (SDI)	Yes
• Safe Speed Monitor (SSM)	Yes
<b>Counting functions</b>	
• Continuous counting	Yes
• Counter response parameterizable	Yes
• Software gate	Yes
• Counting range, parameterizable	Yes
<b>Measuring functions</b>	
<b>Measuring range</b>	
- Frequency measurement, min.	0.04 Hz
- Frequency measurement, max.	800 kHz; with quadruple evaluation
- Cycle duration measurement, min.	1 µs
- Cycle duration measurement, max.	25 s
<b>Accuracy</b>	
- Frequency measurement	up to 100 ppm; depending on measuring interval and signal evaluation; at low frequency external noise may have an effect on accuracy (reference the graph in 2.2.3)
- Cycle duration measurement	up to 100 ppm; depending on measuring interval and signal evaluation; at low frequency external noise may have an effect on accuracy (reference the graph in 2.2.3)
- Velocity measurement	up to 100 ppm; depending on measuring interval and signal evaluation; at low frequency external noise may have an effect on accuracy (reference the graph in 2.2.3)

#### Technical specifications

Article number	<b>6ES7136-6CB00-0CA0</b> F-TM Count 1x1Vpp sin/cos HF
<b>Potential separation</b>	
<b>Potential separation channels</b>	
• between the channels and backplane bus	Yes
<b>Standards, approvals, certificates</b>	
Suitable for safety functions	Yes
<b>Highest safety class achievable in safety mode</b>	
• Performance level according to ISO 13849-1	Cat. 4, PLe
• SIL acc. to IEC 61508	SIL 3
<b>Ambient conditions</b>	
<b>Ambient temperature during operation</b>	
• horizontal installation, min.	0 °C
• horizontal installation, max.	60 °C
• vertical installation, min.	0 °C
• vertical installation, max.	55 °C

Article number	<b>6ES7136-6CB00-0CA0</b> F-TM Count 1x1Vpp sin/cos HF
<b>Altitude during operation relating to sea level</b>	
• Ambient air temperature-barometric pressure-altitude	On request: Installation altitudes greater than 2 000 m
<b>Dimensions</b>	
Width	15 mm
Height	73 mm
Depth	58 mm
<b>Weights</b>	
Weight, approx.	42 g

## I/O systems

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200SP

Fail-safe I/O modules > SIPLUS digital F-input modules

### Overview

Digital fail-safe input module:  
F-DI 8x24 V DC High Feature for BU type A0, color code CC01

Important features:

- 8-channel digital fail-safe input module for the ET 200SP
- For fail-safe reading of sensor information (1 or 2 channels)
- Provides integral discrepancy evaluation for 2-out-of-2 signals
- 8 internal sensor supplies (incl. test function) onboard
- Certified up to SIL 3 (IEC 61508), PL e (ISO 13849)
- Can be plugged into type A0 BaseUnits (BU) with automatic coding
- LED display for error, operation, supply voltage and status
- Clear labeling on front of module
  - Plain text identification of the module type and function class
  - 2D matrix code (order and serial number)
  - Connection diagram
  - Color coding of the module type DI: white
  - Hardware and firmware version
  - Color code CC for module-specific color coding of the potentials at the terminals of the BU
  - Complete Article No.
- Optional labeling accessories
  - Labeling strips
  - Equipment labeling plate
- Optional module-specific color identification of the terminals according to the color code CC
- Optional system-integrated shield connection
- The modules support PROFIsafe in both PROFIBUS and PROFINET configurations. They can be used with all fail-safe SIMATIC S7 CPUs.

#### Note:

SIPLUS extreme products are based on SIMATIC standard products. The contents listed here were taken from the respective standard products. SIPLUS extreme-specific information was added.

#### Usable BaseUnits

##### BU15-P16+A0+2B

(Extended temperature range and exposure to environmental substances)

BU type A0; BaseUnit (light) with 16 process terminals to the module; for starting a new load group (max. 10 A)

**6AG1193-6BP00-7DA0**

##### BU15-P16+A0+2B

(Extended temperature range and exposure to environmental substances)

BU type A0; BaseUnit (dark) with 16 process terminals to the module; for continuing the load group

**6AG1193-6BP00-7BA0**

##### BU15-P16+A10+2D

(Extended temperature range and exposure to environmental substances)

BU type A0; BaseUnit (light) with 16 process terminals (1...16) to the module and an additional 10 internally jumpered AUX terminals (1 A to 10 A); for starting a new load group (max. 10 A)

**6AG1193-6BP20-7DA0**

##### BU15-P16+A10+2B

(Extended temperature range and exposure to environmental substances)

BU type A0; BaseUnit (dark) with 16 process terminals (1...16) to the module and an additional 10 internally jumpered AUX terminals (1 A to 10 A); for continuing the load group

**6AG1193-6BP20-7BA0**

#### Accessories

##### SIPLUS Mounting Kit ET 200SP

Mounting accessories for use with increased mechanical vibration and shock loads.

**6AG1193-6AA00-0AA0**

#### Other accessories

See SIMATIC ET 200SP, digital F-input modules, page 10/177

## Technical specifications

Article number	<b>6AG1136-6BA00-2CA0</b>
Based on	<b>6ES7136-6BA00-0CA0</b> SIPLUS ET 200SP F-DI 4/8x24VDC HF
<b>Ambient conditions</b>	
<b>Ambient temperature during operation</b>	
• horizontal installation, min.	-30 °C; = Tmin (incl. condensation/frost)
• horizontal installation, max.	60 °C; = Tmax; +70 °C with configured empty slots to the left and right of the module
• vertical installation, min.	-30 °C; = Tmin
• vertical installation, max.	50 °C; = Tmax
<b>Altitude during operation relating to sea level</b>	
• Installation altitude above sea level, max.	4 000 m
• Ambient air temperature-barometric pressure-altitude	Restrictions for installation altitudes > 2 000 m, see entry ID: 109771992
<b>Relative humidity</b>	
• With condensation, tested in accordance with IEC 60068-2-38, max.	100 %; RH incl. condensation / frost (no commissioning in bedewed state), horizontal installation
<b>Resistance</b>	
<b>Coolants and lubricants</b>	
- Resistant to commercially available coolants and lubricants	Yes; Incl. diesel and oil droplets in the air
<b>Use in stationary industrial systems</b>	
- to biologically active substances according to EN 60721-3-3	Yes; Class 3B2 mold, fungus and dry rot spores (with the exception of fauna); Class 3B3 on request
- to chemically active substances according to EN 60721-3-3	Yes; Class 3C4 (RH < 75 %) incl. salt spray acc. to EN 60068-2-52 (severity degree 3); *
- to mechanically active substances according to EN 60721-3-3	Yes; Class 3S4 incl. sand, dust, *
- Against mechanical environmental conditions acc. to EN 60721-3-3	Yes; Class 3M8 using the SIPLUS Mounting Kit ET 200SP (6AG1193-6AA00-0AA0)

Article number	<b>6AG1136-6BA00-2CA0</b>
Based on	<b>6ES7136-6BA00-0CA0</b> SIPLUS ET 200SP F-DI 4/8x24VDC HF
<b>Use on land craft, rail vehicles and special-purpose vehicles</b>	
- Against mechanical environmental conditions acc. to EN 60721-3-5	Yes; Class 5M2 using the SIPLUS Mounting Kit ET 200SP (6AG1193-6AA00-0AA0)
- against mechanical environmental conditions in agriculture acc. to ISO 15003	Yes; level 1 (Location LE) using the SIPLUS Mounting Kit ET 200SP (6AG1193-6AA00-0AA0)
<b>Use on ships/at sea</b>	
- to biologically active substances according to EN 60721-3-6	Yes; Class 6B2 mold, fungal and dry rot spores (excluding fauna)
- to chemically active substances according to EN 60721-3-6	Yes; Class 6C3 (RH < 75 %) incl. salt spray acc. to EN 60068-2-52 (severity degree 3); *
- to mechanically active substances according to EN 60721-3-6	Yes; Class 6S3 incl. sand, dust; *
- Against mechanical environmental conditions acc. to EN 60721-3-6	Yes; Class 6M4 using the SIPLUS Mounting Kit ET 200SP (6AG1193-6AA00-0AA0)
<b>Usage in industrial process technology</b>	
- Against chemically active substances acc. to EN 60654-4	Yes; Class 3 (excluding trichlorethylene)
- Environmental conditions for process, measuring and control systems acc. to ANSI/ISA-71.04	Yes; Level GX group A/B (excluding trichlorethylene; harmful gas concentrations up to the limits of EN 60721-3-3 class 3C4 permissible); level LC3 (salt spray) and level LB3 (oil)
<b>Remark</b>	
- Note regarding classification of environmental conditions acc. to EN 60721, EN 60654-4 and ANSI/ISA-71.04	* The supplied plug covers must remain in place over the unused interfaces during operation!
<b>Conformal coating</b>	
• Coatings for printed circuit board assemblies acc. to EN 61086	Yes; Class 2 for high reliability
• Protection against fouling acc. to EN 60664-3	Yes; Type 1 protection
• Military testing according to MIL-I-46058C, Amendment 7	Yes; Discoloration of coating possible during service life
• Qualification and Performance of Electrical Insulating Compound for Printed Board Assemblies according to IPC-CC-830A	Yes; Conformal coating, Class A

**Fail-safe I/O modules > SIPLUS digital F-output modules****Overview**

Digital fail-safe output module:  
F-DQ 4x24VDC High Feature, BU type A0, color code CC01

Important features:

- 4-channel digital fail-safe output module for the ET 200SP
- Fail-safe 2-channel activation (switching to P/M potential) of actuators
- Actuators can be controlled up to 2 A
- Certified up to SIL 3 (IEC 61508), PL e ISO 13849)
- Can be plugged into type A0 BaseUnits (BU) with automatic coding
- LED display for error, operation, supply voltage and status
- Clear labeling on front of module
  - Plain text identification of the module type and function class
  - 2D matrix code (order and serial number)
  - Connection diagram
  - Color coding of the module type DI: white
  - Hardware and firmware version
  - Color code CC for module-specific color coding of the potentials at the terminals of the BU
  - Complete Article No.
- Optional labeling accessories
  - Labeling strips
  - Equipment labeling plate
- Optional module-specific color identification of the terminals according to the color code CC
- Optional system-integrated shield connection
- The modules support PROFIsafe in both PROFIBUS and PROFINET configurations
- They can be used with all fail-safe SIMATIC S7 CPUs

**Note:**

SIPLUS extreme products are based on SIMATIC standard products. The contents listed here were taken from the respective standard products. SIPLUS extreme-specific information was added.

**Overview**

The digital F-electronic module relay 1 F-RQ DC 24VDC/24.230VAC/5 A has the following characteristics:

- 1 relay output (2 NO contacts)
- Total output current 5 A
- Rated load voltage 24 V DC and 24 ... 230 V AC
- The control circuit of the two safety relays must be routed from the outside to the respective terminals.

The attainable safety integrity level is SIL 3 (IEC 61508) when the control of the F-RQ module is implemented via a fail-safe output (e.g. ET 200SP 4F-DQ 24 V DC/2 A PROFIsafe).

**Note:**

SIPLUS extreme products are based on SIMATIC standard products. The contents listed here were taken from the respective standard products. SIPLUS extreme-specific information was added.

## Overview

Analog fail-safe input module:  
SIPLUS F-AI 4xI 0(4) ... 20 mA 2/4-wire High Feature  
for BU type A0 and A1, color code CC00

Important features:

- 4 analog inputs with galvanic isolation between channels and backplane bus (up to SIL 3/Cat. 4/PL d)
- Short-circuit-proof power supply of 2 or 4-wire transducers
- Measuring ranges: 0 ... 20 mA and 4 ... 20 mA
- Resolution: 16 bits including sign

- Certified up to SIL 3 (IEC 61508), PL e (ISO 13849)
- Can be plugged onto type A0 and A1 BaseUnits (BU)
- LED display for error, operation, supply voltage and status
- Clear labeling on front of module
  - Plain text identification of the module type and function class
  - 2D matrix code (order and serial number)
  - Connection diagram
  - Color coding of the module type DI: white
  - Hardware and firmware version
  - Color code CC for module-specific color coding of the potentials at the terminals of the BU
  - Complete Article No.
- Optional labeling accessories
  - Labeling strips
  - Equipment labeling plate
- Optional module-specific color identification of the terminals according to the color code CC
- Optional system-integrated shield connection
- The modules support PROFIsafe in both PROFIBUS and PROFINET configurations. They can be used with all fail-safe SIMATIC S7 CPUs.

Note:

SIPLUS extreme products are based on SIMATIC standard products. The contents listed here were adopted from the respective standard products. SIPLUS extreme-specific information was added.

## Overview

Digital fail-safe power module:  
F-PM-E PPM 24 V DC/8 A for BU type C0,  
color code CC52

## Important features:

- Certified up to SIL 3 (IEC 61508), PL e (ISO 13849)
- Safety-related shutdown of output modules within the potential group of the F-PM-E
- Two fail-safe digital inputs, for reading of sensor information (1 or 2 channels)
- One fail-safe digital output onboard (switching to PPM potential, up to 2 A, up to SIL 3/PL e)
- Fail-safe digital output and potential supply switching to PP or PM potential can be configured

- Configurable onboard evaluation of the fail-safe inputs for control of the fail-safe digital output and of the potential group
- Digital standard output modules can be shut down up to PL d (ISO 13849) and SIL 2 (IEC61508) (up to 8 A).
- Can be plugged into type C0 BaseUnits (BU) with automatic coding
- LED display for error, operation, supply voltage and status
- Clear labeling on front of module
  - Plain text identification of the module type and function class
  - 2D matrix code (order and serial number)
  - Connection diagram
  - Color coding of the module type DI: white
  - Hardware and firmware version
  - Color code CC for module-specific color coding of the potentials at the terminals of the BU
  - Complete Article No.
- Optional labeling accessories
  - Labeling strips
  - Equipment labeling plate
- Optional module-specific color identification of the terminals according to the color code CC
- Optional system-integrated shield connection
- The modules support PROFIsafe in both PROFIBUS and PROFINET configurations.
- They can be used with all fail-safe SIMATIC S7 CPUs.

Released combinations of the AS-i modules for ET 200SP,  
see <https://support.industry.siemens.com/cs/ww/en/view/103624653>

The F-CM AS-i Safety ST fail-safe communications module supplements an AS-Interface network without additional wiring to produce a safety-related AS-i network.

Important features:

- Fail-safe communications module for the ET 200SP
  - 31 fail-safe input channels in the process image
  - 16 fail-safe output channels in the process image
  - Certified up to SIL 3 (IEC 62061), PL e (EN ISO 13849-1)
  - Parameterization conforms with other Failsafe I/O modules of the ET 200SP
- The communications module supports PROFINET and PROFIBUS configurations. It can be used with fail-safe SIMATIC S7-300F/S7-400F CPUs and S7-1500F CPUs and also the Failsafe versions of the ET 200SP station with ET 200SP F-CPU 1510SP F / 1512SP F or 1515SP PC F.
- For reading up to 31 fail-safe AS-i input slaves
  - Two sensor inputs/signals for each fail-safe AS-i input slave
  - Adjustable evaluation of sensor signals: two-channel or 2 x single-channel
  - Integrated discrepancy evaluation in the case of two-channel signals
  - Integrated AND operation in the case of 2 x single-channel signals
  - Input delay can be parameterized
  - Start-up test can be set
  - Sequence monitoring can be activated

- For control of up to 16 fail-safe AS-i output circuit groups
  - The output circuit groups are controlled independently of one another
  - One output circuit group can act on one or more actuators (e.g. to switch drives simultaneously)
  - An actuator (e.g. a contactor) is interfaced via an AS-i safety output module (e.g. SlimLine S45F safety module, Article No. 3RK1405-1SE15-0AA2; see <https://mall.industry.siemens.com/mall/en/WW/Catalog/Products/10011823?tree=CatalogTree>).
  - Simple fault acknowledgment via the process image
- Simple module replacement thanks to automatic importing of the safety parameters from the coding element
- Comprehensive diagnostics options
- Can be plugged onto type C1 or type C0 BaseUnits (BU)
- Informative automatic alarm indications
- Supply via AS-Interface voltage
- Eight LED indicators for diagnostics, operating state, fault indication and supply voltage
- Informative front-side module inscription
  - Plain-text marking of the module type and function class
  - 2D matrix code (Article No. and serial number)
  - Connection diagram
  - Color coding module type communications module: light gray
  - Hardware and firmware version
  - Supported BaseUnit type BU: C1, C0

## Design

The fail-safe F-CM AS-i Safety ST module has an ET 200SP module enclosure with a width of 20 mm.

One AS-i master according to the AS-i Specification V3.0, as well as fail-safe AS-i input slaves and/or AS-i safety output modules are needed for operation. The CM AS-i master ST communications module (Article No. 3RK7137-6SA00-0BC1) is recommended as the AS-i master for the ET 200SP, see from page 10/149.

Simple combination of the CM AS-i Master ST and F-CM AS-i Safety ST modules in one ET 200SP station results in a powerful, safety-oriented network transition between PROFINET (or PROFIBUS) and AS-Interface, which can be expanded further in a modular fashion.

Combination of an ET 200SP interface module, CM AS-i Master ST and F-CM AS-i Safety ST

## I/O systems

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200SP

Fail-safe modules > Fail-safe communication > F-CM AS-i Safety ST for SIMATIC ET 200SP

### Overview

With the digital and analog I/O modules of the ET 200SP, additional local inputs and outputs can be realized so as to ensure that the modular AS-i router complies precisely with customer requirements. Expansion variants for almost every application are possible thanks to the selection of standard and Failsafe I/O modules.

Besides the single AS-i master, double, triple or generally multiple masters can also be realized with or without fail-safe functionality.

#### Supported BaseUnits

With the combination of the CM AS-i Master ST and F-CM AS-i Safety ST modules, the CM module is plugged onto a light type C0 BaseUnit and, directly to the right of it, the F-CM module is plugged onto a dark type C1 BaseUnit. The AS-i cable is connected only on the light BaseUnit of the CM module.

#### Notes on security

In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial security concept. Siemens products and solutions represent only one component of such a concept.

For more information on Industrial Security, see <http://www.siemens.com/industrialsecurity>.

#### Configuration

The following software is required for configuration of the F-CM AS-i Safety ST module:

- STEP 7 (TIA Portal) and Safety Advanced
- or
- STEP 7 (Classic) and Distributed Safety or F-Configuration Pack or SIMATIC S7 F/FH systems

Configuration and programming are done entirely in the STEP 7 user interface. No additional configuration software is needed for commissioning.

Data management – together with all other configuration data of the SIMATIC – is realized completely in the S7 project.

The input and output channels are assigned to the process image automatically and manual linking via configuration function blocks is not necessary.

If the F-CM AS-i Safety ST module is replaced, all necessary settings are automatically imported into the new module.

The F-CM AS-i Safety ST module occupies 16 input bytes and 8 output bytes in the I/O data of the ET 200SP station.

For diagnostics during ongoing operation, diagnostics blocks with clearly arranged visualization on the SIMATIC HMI panel are available or can be downloaded free of charge via a web browser, see <https://support.industry.siemens.com/cs/ww/en/view/109479103>.

Diagnostic block for F-CM AS-i Safety ST

### Application

Thanks to use of the fail-safe module in the ET 200SP, it is possible to fulfill the safety-related application requirements in a manner that is integrated in the overall automation solution.

The safety functions required for fail-safe operation are integrated in the modules. Communication with the fail-safe SIMATIC S7 CPUs is realized via PROFIsafe.

The safety application is programmed in the SIMATIC S7 F-CPU with Distributed Safety / S7 F/FH Systems / Safety Advanced. The fail-safe input signals of the ASIsafe slave modules are read via the AS-i bus line and are combined with any chosen further signals in the fail-safe program.

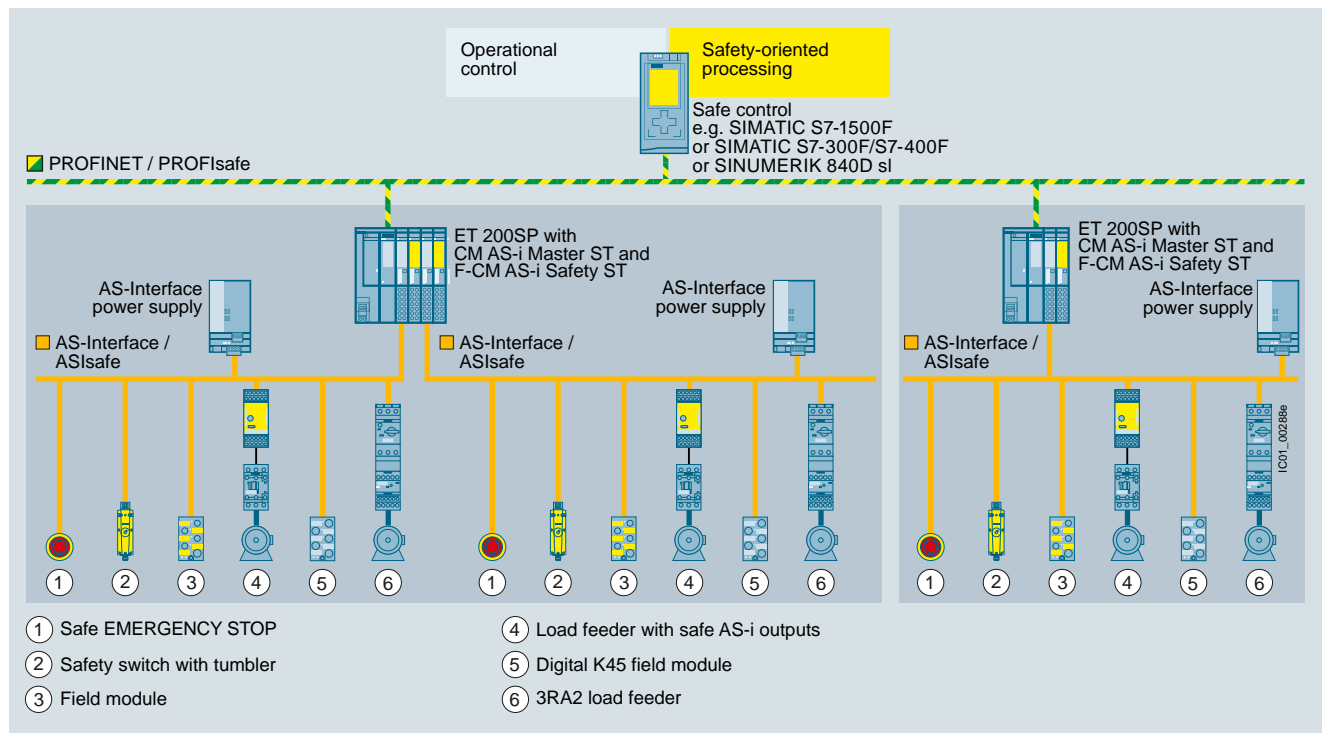

The fail-safe output signals can be output via safe SIMATIC output modules or also directly via AS-i – with the help of safe AS-i output modules, e.g. SlimLine S45F safety modules, article number 3RK1405-1SE15-0AA2 (see <https://mall.industry.siemens.com/mall/en/WW/Catalog/Products/10011823?tree=CatalogTree>). No special functions are required for this in the program.

Operation with SINUMERIK 840D sl is possible with SINUMERIK software version V4.7 SP2 HF1 or higher.

Together with an ET 200SP station with ET 200SP F-CPU 1510SP F / 1512SP F or 1515SP PC F, pre-processing of safe AS-i signals directly in the ET 200SP station is possible, as well as the configuration of an autonomous AS-i Safety station without a higher-level CPU.

## I/O systems

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200SP

### Ex I/O modules

#### Overview

The intrinsically safe ET 200SP HA Ex I/O modules extend the SIMATIC ET 200SP HA and SIMATIC ET 200SP distributed I/O systems with the option of integrating devices located in hazardous areas (intrinsically safe sensors, actuators and HART field devices) into the system.

The ET 200SP HA Ex I/O modules with device protection according to intrinsic safety "i" offer channel outputs in Zone 0 or 1, 2-channel HART analog input and output modules and 2/4-channel digital input and output modules with different characteristic curves as well as a power module for intrinsically safe power supply of the modules.

Separate Ex isolators with correspondingly complex wiring and high space requirements are no longer required. The I/O modules can be installed up to ATEX Zone 2 and offer intrinsically safe circuits in Ex ia design for field devices up to Zone 0.

The Ex modules offer channel diagnostics and configuration in Run and are approved for ambient temperatures from -40 to +70 °C.

Overview

The new ET 200SP technology module F-TM StepDrive ST allows positioning and speed control of stepper motors up to 10 A peak current in very confined spaces.

Engineering in the TIA Portal stands for consistency in a single tool. This facilitates drive dimensioning, commissioning and servicing.

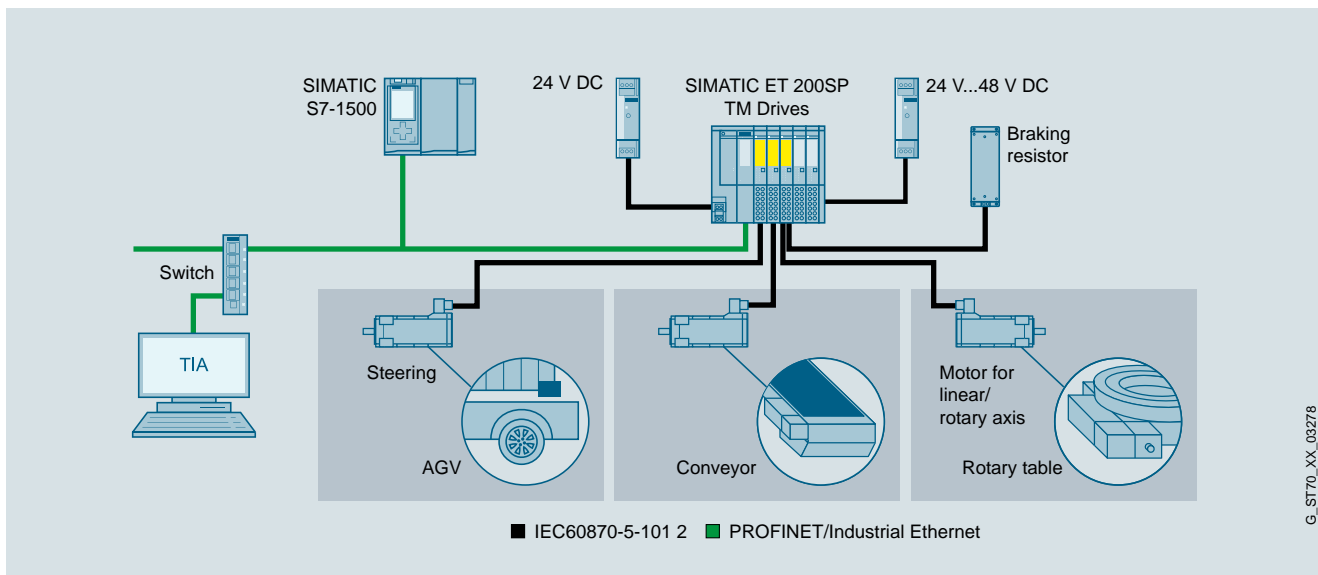

The new drive system consists of

- The F-TM StepDrive ST as a new member of the SIMATIC MICRO-DRIVE family
- The BaseUnit (U0)

Further information on the distributed I/O system SIMATIC ET 200SP is available on the Internet at <http://www.siemens.com/et200sp>

Characteristics

- PROFIdrive profile via PROFINET
- Hardware STO (SIL3)
- Digital input
- Encoderless operation
- Encoder connection for - Incremental encoders

## ET 200SP motor starters

ET 200SP is a scalable and extremely flexible modular I/O system with IP20 degree of protection.

As I/O modules, the ET 200SP motor starters are an integral part of this I/O system. They are switching and protection devices for single- and three-phase loads and are available as direct-on-line or reversing starters.

SIMATIC ET 200SP motor starter video

## Basic functionality

All versions of the ET 200SP motor starter feature the following functionality:

- Fully pre-wired motor starters for switching and protecting any AC loads up to 5.5 kW from 48 V AC to 500 V AC
- Disconnection possible via fail-safe motor starters up to SIL 3 and PL e Cat. 4
- With self-assembling 32 A power bus, i.e. the load voltage is only fed in once for a group of motor starters
- All control supply voltages connected only once, i.e. when modules are added they are automatically connected to the next module
- Hot swapping is permissible
- Digital inputs can optionally be used via a 3DI/LC module

- Control of the motor starter from the control system and diagnostics status via the cyclic process image
- Diagnostics capability for active monitoring of the switching and protection functions
- The signal states in the process image of the motor starter provide information about protective devices (short circuit or overload), the switching states of the motor starter, and system faults.

## Starter Kit

The 3RK1908-1SK00 Starter Kit is a favorably priced complete package for switching and monitoring motors in the ET 200SP system, see page 10/233.

It contains:

- a 3RK1308-0BC00-0CP0 reversing starter (0.9 to 3 A)
- a 3RK1908-0AP00-0AP0 BaseUnit with 500 V and 24 V AC/DC infeed
- an EMC distance module (consisting of 6ES7193-6BP00-0BA0 BaseUnit plus 6ES7133-6CV15-1AM0 BU cover 15 mm)

## Use of fan

For motor starters with a 12 A rated current, the 3RW4928-8VB00 fan is included in the scope of supply.

This fan can also be ordered as an option for motor starters with lower rated currents, if the boundary conditions demand this. For information on the ambient conditions for the use of motor starters, see chapter "Product overview" in the Equipment Manual.

## I/O systems

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200SP

### I/O modules > ET 200SP motor starters

#### Designing interference-free motor starters

For interference-free operation of the ET 200SP station in accordance with IEC 60947-4-2 standard, use a dummy module before the first motor starter. The dummy module consists of the 6ES7193-6BP00-0BA0 or 6ES7193-6BP00-0DA0 BaseUnit and the 6ES7133-6CV15-1AM0 BU cover 15 mm.

The 15 mm BU cover protects the plug contacts of the BaseUnit against dirt.

#### Electromechanical switching devices in series with hybrid motor starters

Switching an inductive load - in particular of motors <1 kW with high inductance - with an electromechanical switching device (e.g. contactor) can cause high and steep voltage edges.

The resulting faults/damage can be prevented by first disconnecting with the hybrid motor starter or by using EMC suppression modules:

- For 3RT2916-1P.. EMC suppression modules for direct mounting on the contactor, see <https://mall.industry.siemens.com/mall/en/WW/Catalog/Products/10047575>
- For motor suppression modules that are fitted in the main circuit, see page 10/233

#### Note:

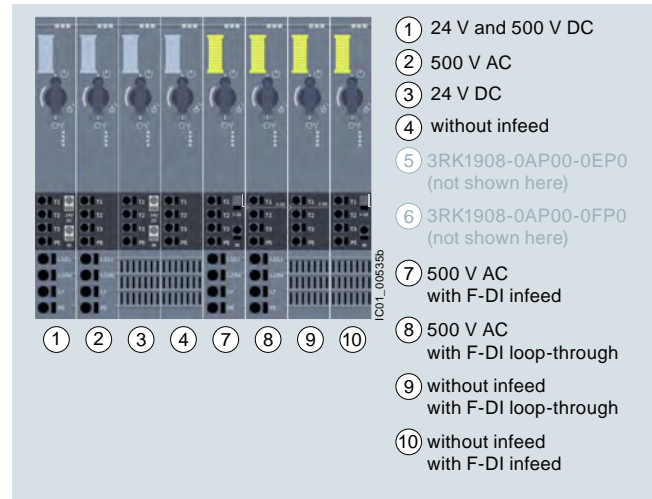

For more information, see <https://support.industry.siemens.com/cs/ww/en/view/109758696>.

#### 3DI/LC control module

This is a digital input module with three inputs for local motor starter functions such as "manual local control", "implementation of fast inputs" or "end position disconnection". For a list of all the functions permitted by the 3DI/LC module, see chapter "Overview of functions" in the Equipment Manual.

The module is plugged into the front of the motor starter from which it is supplied with a 24 V DC operating voltage.

#### BaseUnits for motor starters

View of the BaseUnit infeeds for the motor starters

BaseUnits are components for accommodating the ET 200SP I/O modules.

The self-assembling voltage buses integrated into the BaseUnits reduce wiring outlay to the single infeed (both of auxiliary and load voltage).

All modules following on the right are automatically supplied upon plugging the BaseUnits together, if BaseUnits are inserted with routing.

The rugged design and keyed connection technology enables use in harsh industrial conditions.

The BaseUnits are available with various infeeds for the motor starters.

**Benefits****Product advantages**

The ET 200SP motor starters offer a number of advantages:

- Fully integrated into the ET 200SP I/O system (including TIA Selection Tool and TIA Portal)
- High degree of flexibility when it comes to safety applications via SIMATIC F-CPU or SIRIUS 3SK safety relays up to SIL 3 and PL e Cat. 4.
- Simple, integrated current value transmission
- Extensive parameterization by means of TIA Portal
- Increase of plant availability through fast replacement of units (easy mounting and plug-in technology)
- Greater endurance and reduced heat losses thanks to hybrid technology
- Less space required in the control cabinet (20 to 80%) as a result of greater functional density (direct-on-line and reversing starters in same width)
- Extensive diagnostics and information for preventive maintenance
- Parameterizable inputs via 3DI/LC control module
- Less wiring and testing required as a result of integrating several functions into a single device
- Lower overheads for stock keeping and configuration as a result of the wide setting range of the electronic overload release (up to 1:3)
- Technology has lower inherent power losses than speed-controlled drive systems, so that less cooling (and smaller footprint) are possible

- The ET 200SP motor starters can be used with highly energy-efficient IE3/IE4 motors, [see Application Manual](#). Take the current characteristics of the connected motor and motor starter into account when dimensioning. In addition to the rated current, the maximum permissible current range of the motor starter and the ratio of the rated current to the starting current of the motor are relevant.

**Standards and approvals**

- IEC/EN 60947-4-2
- UL 60947-4-2
- CSA
- ATEX
- IEC 61508-1: SIL 3
- ISO 13849: PL e
- CCC approval for China

## I/O systems

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200SP

### I/O modules > ET 200SP motor starters

#### Application

The ET 200SP motor starters are suitable for the following applications:

- Switching and monitoring of
  - Three-phase motors with overload and short-circuit protection (e.g. 400 V asynchronous motors for secondary drives in conveyor systems)
  - Single-phase motors with overload and short-circuit protection (e.g. 230 V motors for pump applications)
  - Resistive loads by means of current value and diagnostics via the maintenance function (e.g. for heaters)
- Plant monitoring and energy management in conveyor systems:
  - By means of the phase asymmetry and zero current detection during current measurement, for example, drive belt monitoring and blocking monitoring are possible.

- Track switching and lifting table control in conveyor systems: Track switches can be implemented using the quick stop function and lifting table controls by means of the "immediate end position disconnection" function without any laborious programming.
- Safe isolation of the drive from main power supply: The isolating functions according to IEC 60947-1 offer protection against inadvertent activation during plant maintenance.

#### Motor starters in the process industry

For the ET 200SP motor starters, special BaseUnits are available that enable the device to be used in the ET 200SP HA I/O system, too. This is typically used in process engineering applications.

## I/O systems

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200SP

Pneumatics > Valve terminals AirLINE SP Typ 8647 (Bürkert Co.)

### Overview

- For pneumatic control of actuators with ET 200SP
- Can be used together with system and IO components of the ET 200SP distributed I/O system.
- Product of the product partners Bürkert Fluid Control Systems, and can only be obtained from Bürkert Fluid Control Systems.

#### Note

Product partners are external companies outside Siemens AG and its associated companies. Information and descriptions of products made by product partners are non-binding, and are the responsibility of the product partners. These products are manufactured independently and under the responsibility of the particular product partner, and are sold and supplied by it under its terms of business and delivery.

Unless compulsory by law, Siemens assumes no liability and makes no guarantee for for these products or for the connection with these products of the product partners. Please refer also to the note on exemption from liability/use of hyperlinks.

### Benefits

- High process safety by using non-return valves and pneumatic infeed modules with pressure monitoring.
- System-wide detailed diagnostics in plain text, and also locally on an LC display
- Quick and easy valve change during operation (hot swapping)
- Reduced number of components in the control cabinet (compact control cabinet is possible)
- Quick installation & configuration of the pneumatic connections

### Application

Valve terminals are widely used in industrial automation, and serve as pilot valves for controlling actuators in the food, pharmaceutical and water treatment industries. In combination with the AirLINE SP, type 8647 from the Bürkert Co., the ET 200SP forms a universal interface between process and plant control, and enables the flexible, modular structure of pilot valves and I/O modules. The valve terminal can also be attached to a control cabinet floor with an AirLINE Quick Adapter, which further reduces the space required in the control cabinet, and significantly simplifies the pneumatic installation.

### More information

For more detailed information about the AirLINE SP, type 8647 (e.g. data sheet, operating manual) please contact Bürkert directly:

<http://www.burkert.com/en/type/8647>

#### Disclaimer of liability

This information and the descriptions have been compiled with great care. However, it is not possible for Siemens to verify that the data supplied by product partners is complete, correct and up-to-date. The possibility that individual items of information might be incorrect, incomplete, or not up-to-date cannot therefore be ruled out. Unless compulsory by law, Siemens accepts no liability for the usability of the data or of the products for the user per se.

## Overview

In terms of design and functionality, the SIMATIC ET 200SP PS single-phase load power supply with automatic range switching of the input voltage is perfectly matched to the SIMATIC ET 200SP. The SIMATIC component and the power supply are wired by means of uniform push-in terminal technology. The 24 V supply provides power to the ET 200SP system components such as the interface module, technology module and communications module, as well as the digital or analog inputs/outputs. Comprehensive certifications, such as UL or GL, facilitate universal use. Its extremely flat design also makes this power supply ideally suited for installation in compact on-site control boxes.

### Overview

With the BaseUnits (BUs), the ET 200SP offers a rugged and service-friendly design with permanent wiring:

- No tools needed for one-handed wiring using push-in terminals
- Actuation of the spring NC contacts with a standard screwdriver, with a blade width up to 3.5 mm
- Outstanding access due to arrangement of measuring tap, spring NC contacts and cable entry in columns, while at the same time reducing the space required by 64%
- Fault-proof color coding of the spring NC contacts for better orientation in the terminal panel
- Replacement of I/O modules during operation without affecting the wiring
- Operation with module gaps (gaps without I/O module)
- Automatic coding of the I/O modules prevents destruction of the electronics if a module is accidentally inserted in the wrong slot during replacement
- High EMC interference immunity:
  - self-assembling shielded backplane bus
  - multi-layer conductor plate with shield levels for interference-free signal transmission from the terminal to the I/O module
  - system-integrated, space-saving shield connection for quick installation
- Self-assembling potential groups without external wiring or jumpers
- Replaceable terminal box
- Side-by-side latching of the BUs for high mechanical and EMC loads
- Optional module-specific color identification of the terminals according to the color code CC
- Optional equipment marking using slide-in equipment labeling plates

An ET 200SP station can be expanded via one 'BU-Send' BaseUnit with a "BA-Send" BusAdapter plugged onto it with up to 16 modules from the ET 200AL series of I/O devices with IP67 protection.

#### Type A0 BaseUnits

#### BU15-P16+A10+2D

BU type A0; BaseUnit (light) with 16 push-in terminals (1 ... 16) to the module and an additional 10 internally jumpered AUX terminals (1 A to 10 A); for starting a new potential group (max. 10 A)

- Pack of 1 unit
- Pack of 10 units; to order a pack, please order this article number with an order quantity of 10.

**6ES7193-6BP20-0DA0**  
**6ES7193-6BP20-2DA0**

#### BU15-P16+A0+2D

BU type A0; BaseUnit (light) with 16 push-in terminals to the module; for starting a new potential group (max. 10 A)

- Pack of 1 unit
- Pack of 10 units; to order a pack, please order this article number with an order quantity of 10.

**6ES7193-6BP00-0DA0**  
**6ES7193-6BP00-2DA0**

#### 2BU15-P16+A0+2DB

Double BaseUnit for holding 2 I/O modules; BU type A0; BaseUnit (light/dark) with 16 push-in terminals to the module; for starting a new potential group (max. 10 A)

- Pack of 1 unit

**6ES7193-6BP60-0DA0**

#### BU15-P16+A10+2B

BU type A0; BaseUnit (dark) with 16 push-in terminals (1 ... 16) to the module and an additional 10 internally jumpered AUX terminals (1 A to 10 A); for continuing the potential group

- Pack of 1 unit
- Pack of 10 units; to order a pack, please order this article number with an order quantity of 10.

### Overview

With the BaseUnits, the ET 200SP offers a rugged and service-friendly design with permanent wiring:

- No tools needed for one-handed wiring using push-in terminals
- Outstanding access due to arrangement of measuring tap, spring NC contacts and cable entry in columns, while at the same time reducing the space required by 64%
- Fault-proof color coding of the spring NC contacts for better orientation in the terminal panel
- Replacement of I/O modules during operation without affecting the wiring

- Operation with module gaps (missing I/O module)
- Automatic coding of the I/O modules prevents destruction of the electronics if a module is accidentally inserted in the wrong slot during replacement
- High immunity to electromagnetic interference due to
  - self-assembling shielded backplane bus
  - multi-layer conductor plate with shield levels for interference-free signal transmission from the terminal to the I/O module
  - system-integrated, space-saving shield connection for quick installation
- Self-assembling potential groups without external wiring or jumpers
- Replaceable terminal box
- Side-by-side latching of the BUs for high mechanical load capacity
- Optional module-specific color identification of the terminals according to the color code CC
- Actuation of the spring NC contacts with a standard screwdriver, with a blade width up to 3.5 mm

#### Note:

SIPLUS extreme products are based on SIMATIC standard products. The contents listed here were taken from the respective standard products. SIPLUS extreme-specific information was added.

**Overview**

SIMATIC BusAdapter BA 2xFC for direct laying of the PROFINET cable via FastConnect connection

ET 200SP BusAdapter BA-Send for expansion of an ET 200SP station with ET 200AL modules

SIMATIC BusAdapter BA LC/RJ45 for use as a system-integrated media converter from copper (RJ45) to glass fiber (LC)

For SIMATIC ET 200SP, two types of BusAdapter (BA) are available for selection:

- ET 200SP BusAdapter "BA-Send"  
for expansion of an ET 200SP station with up to 16 modules from the ET 200AL I/O series with IP67 protection via an ET connection
- SIMATIC BusAdapter  
for the free selection of the connection system (pluggable or direct connection) and physical PROFINET connection (copper, POF, HCS or glass fiber) to devices with a SIMATIC BusAdapter interface.  
One further advantage of the SIMATIC BusAdapter: only the adapter needs to be replaced for subsequent conversion to the rugged FastConnect technology or a fiber-optic connection, or to repair defective RJ45 sockets.

**SIPLUS BusAdapters****Overview**

ET 200SP BusAdapter (RJ45)

BA 2xFC BusAdapter

Some interface modules of the SIPLUS ET 200SP have a universal PROFINET interface for BusAdapters. With the appropriate bus adapter, the type of connection can be adapted to the requirements of the respective application:

- For standard applications with a moderate mechanical and EMC load, the BA 2xRJ45 BusAdapter is used. It offers two sockets for standard RJ45 plugs.
- For machines and systems in which higher mechanical and/or EMC loads act on the devices, the BA 2xFC BusAdapter is recommended. In this case, the bus cables are connected directly by means of FastConnect terminals – similar to the PROFIBUS connector, proven in millions of applications. The technology is extremely quick to assemble and achieves 5 times better vibration resistance and also 5 times greater resistance to electromagnetic interference, when compared to RJ45 plug connectors.
- BusAdapters with connections for fiber-optic cables can be used to cover high potential differences between two stations and/or high EMC loads.

Another advantage of the BusAdapters: In order to repair defective RJ45 sockets or for subsequent conversion to the rugged FastConnect technology or a fiber-optic connection, only the adapter needs to be replaced.

The following interface modules offer a PROFINET connection via BusAdapter:

- SIPLUS IM 155-6PN Standard
- SIPLUS IM 155-6PN High Feature

**Note**

SIPLUS extreme products are based on SIMATIC standard products. The contents listed here were taken from the respective standard products. SIPLUS extreme-specific information was added.

• Military testing according to MIL-I-46058C, Amendment 7	Yes; Discoloration of coating possible during service life	Yes; Discoloration of coating possible during service life	Yes; Discoloration of coating possible during service life	Yes; Discoloration of coating possible during service life
• Qualification and Performance of Electrical Insulating Compound for Printed Board Assemblies according to IPC-CC-830A	Yes; Conformal coating, Class A	Yes; Conformal coating, Class A	Yes; Conformal coating, Class A	Yes; Conformal coating, Class A

### Overview Labeling strips

The head-end stations and I/O modules can optionally be equipped with labeling strips (13 x 31 mm) for system-specific marking. The labeling strips can be inscribed mechanically. Labeling strips are available in two versions in the colors light gray and yellow:

- 500 strips on the roll, for printing on thermal transfer printers. Core diameter 40 mm, external diameter 70 mm, width 62 mm
- 10 DIN A4 sheets with 100 strips each, 180 g/sm card, perforated, for printing using a laser printer direct from TIA Portal or via print templates

### Overview Equipment labeling plates

Optionally, one equipment labeling plate each can be plugged onto head-end stations, BusAdapters, BaseUnits, and I/O modules. Equipment labeling plates are supplied in packs of 10 sheets with 16 labels each. The labels can be printed with thermal-transfer card printers or plotters, or stickers can be attached to them. Advantages compared to labels that are attached directly:

- The inscription on the front is not covered
- Simple label replacement when replacing a module
- No parallax errors when marking the BaseUnits on the mounting plate

The size of the labels is 14.8 x 10.5 mm (W x H)

### Overview BU cover

The ET 200SP system can be operated with any number of slot gaps (BU slot without inserted I/O module). Applications for this include:

- Partial commissioning
- Prewired but unequipped options

To protect against damage, such slot gaps must be covered by a BU cover.

Within the BU cover, an equipment labeling plate for identification of the I/O module planned for this slot can be stored.

Versions:

- For BaseUnits with a width of 15 mm (pack containing 5 BU covers)
- For BaseUnits with a width of 20 mm (pack containing 5 BU covers)

### Overview Shield connection

The shield connection permits the low-cost connection of cable shields. Compared to external shield supports, the system offers the following advantages:

- Quick installation without tools by plugging the shield connection element onto the BaseUnit
- Automatic low-impedance connection to the functional ground (mounting rail)
- Optimized EMC properties by separating the signal lines from the voltage supply lines
- Short unshielded cable lengths
- Requires little space

### Overview Color-coded labels

The I/O modules that are plugged onto the BaseUnits determine the potentials connected at the process terminals. The +/- potentials can optionally be identified using module-specific color-coded labels. The potentials of the AUX and add-on terminals can also be marked using color-coded labels. Advantages of the color-coded labels:

- Quick installation (one label for marking 16 terminals)
- Printed terminal numbers
- Avoidance of wiring errors
- Simple detection of potentials during servicing

### Overview Server module

The server module is included in the scope of delivery of all head-end stations (interface module, CPU, Open Controller). It concludes the setup of an ET 200SP station.

### Overview SIPLUS server module

The SIPLUS server module is included in the scope of supply of all head-end stations (interface module, CPU, Open Controller). It concludes the setup of a SIPLUS ET 200SP station.

### Overview e-coding element

The operation of selected modules requires an electronic coding element that is always included in the scope of delivery of the I/O module. Apart from the mechanical coding function, this contains a re-writable memory for the redundant storage of module-specific configuration data (e.g. F target address for fail-safe modules or parameter data in the case of the IO-Link master). In this way, this data is automatically backed up during a module replacement. This saves the user from having to set addresses manually or back up data when replacing modules.

At present, there are two types of electronic coding element:

- e-coding element (Type H), which can be used in the I/O modules:
  - CM IO-Link master
  - F-CM AS-i Safety
- e-coding element (Type F), which can be used in the I/O modules:
  - F-DI 8x24VDC HF
  - F-DQ 4x24VDC/2A PM HF
  - F-PM-E 24VDC/8A PPM ST

## Overview

SIMATIC ET 200SP HA F IO Redundant Station 2PN

Compact design, flexible connection possibilities and high system availability with redundant PROFINET connections: the SIMATIC ET 200SP HA distributed I/O system is perfectly suited to the requirements of the process industry. The new design allows up to 56 I/O modules per station. An impressively high concentration of up to 32 channels on a module that is only 22.5 mm wide allows for maximum economy in the control cabinet.

Redundant PROFINET connections allow the connection of high-availability controllers via two independent networks, with a choice of copper or fiber-optic cables. The system can be scaled and extended in small steps using a variety of available modules, for example with digital and analog I/Os as well as NAMUR, HART, and other protocols. All 24 V standard signals are connected via an identical terminal block type, which allows a high degree of standardization for the control cabinets.

SIMATIC ET 200SP HA is designed for use in the control cabinet as well as for hazardous areas up to Ex zone 2. The extended temperature range from -40 to +70 °C and the conformal coating of all components allow direct installation in the field.

You also benefit in engineering from seamless integration in SIMATIC PCS 7. The SIMATIC ET 200SP HA in combination with the Advanced Process Library also offers flexible and simple online parameter assignment and selection of up to four HART variables per channel.

**Interface module****Overview**

IM 155-6 PN HA

**IM 155-6 PN HA interface module**

The IM 155-6 PN HA together with the IM carrier module and the BusAdapter forms the interface of the ET 200SP HA. The interface is used for communication between the CPU and the connected ET 200SP HA I/O modules over PROFINET.

**Ordering data****Article No.****Interface module**

**PROFINET IM 155-6 PN interface module**  
Max. 56 I/O modules,  
multi hot swap, no server module

**6DL1155-6AU00-0PM0****Accessories**

**IM cover**  
Slot cover for interface module  
slots, to protect vacant slots  
Width 50 mm, 5 units

**6DL1133-6CV50-0AM0**

#### Technical specifications

Article number	<b>6DL1155-6AU00-0PM0</b> ET 200SP HA, IM155-6 PN
<b>General information</b>	
Product type designation	IM 155-6 PN
<b>Product function</b>	
• I&M data	Yes; I&M0 to I&M3
<b>Engineering with</b>	
• STEP 7 TIA Portal configurable/ integrated from version	V16
• PCS 7 configurable/integrated from version	V9.0
<b>Supply voltage</b>	
Rated value (DC)	24 V
Reverse polarity protection	Yes
Short-circuit protection	Yes
<b>Address area</b>	
<b>Address space per station</b>	
• Address space per station, max.	1 440 byte; 1 440 bytes R1 and S1 without CiR, otherwise 1 000 bytes
<b>Hardware configuration</b>	
Integrated power supply	Yes; 24 V DC
<b>Rack</b>	
• Modules per rack, max.	56; 56 slots for I/O modules + server module (width without IM ≤ 1.3 m)
<b>Time stamping</b>	
Accuracy	1 ms; In compliance with the supplementary conditions described in the Equipment Manual
<b>Interfaces</b>	
Number of PROFINET interfaces	1; 2 ports (switch)
<b>1. Interface</b>	
<b>Interface types</b>	
• Number of ports	2; via BusAdapter
• integrated switch	Yes
• BusAdapter (PROFINET)	Yes; Compatible BusAdapters: BA 2x RJ45, BA 2x FC, BA 2x LC, BA LC/RJ45, BA LC/FC, BA VD
<b>Protocols</b>	
• PROFINET IO Device	Yes
• Open IE communication	Yes
• Media redundancy	Yes; as MRP client

Article number	<b>6DL1155-6AU00-0PM0</b> ET 200SP HA, IM155-6 PN
<b>Interface types</b>	
<b>RJ 45 (Ethernet)</b>	
• Transmission procedure	PROFINET with 100 Mbit/s full duplex (100BASE-TX)
• 100 Mbps	Yes; PROFINET with 100 Mbit/s full duplex (100BASE-TX)
• Autonegotiation	Yes
• Autocrossing	Yes
<b>Redundancy mode</b>	
• PROFINET system redundancy (S2)	Yes; S2, R1
<b>Media redundancy</b>	
- MRP	Yes
<b>Open IE communication</b>	
• TCP/IP	Yes
• SNMP	Yes
• LLDP	Yes
<b>Interrupts/diagnostics/ status information</b>	
Status indicator	Yes
Alarms	Yes
Diagnostics function	Yes
<b>Diagnostics indication LED</b>	
• RUN LED	Yes; green LED
• ERROR LED	Yes; red LED
• MAINT LED	Yes; Yellow LED
• ACT LED	Yes; green LED
• Monitoring of the supply voltage (PWR-LED)	Yes; green PWR LED
• Connection display LINK TX/RX	Yes; 2x green link LEDs on BusAdapter
<b>Ambient conditions</b>	
<b>Ambient temperature during operation</b>	
• horizontal installation, min.	-40 °C
• horizontal installation, max.	70 °C
• vertical installation, min.	-40 °C
• vertical installation, max.	60 °C
<b>Dimensions</b>	
Width	50 mm
Height	138 mm
Depth	89 mm
<b>Weights</b>	
Weight, approx.	192 g; without BusAdapter

## I/O systems

## I/O systems

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200SP HA

### Analog/digital module

#### Overview

The I/O module AI-DI 16/DQ 16x24VDC HART HA is available in the following versions:

- DI 16/DQ 16x24VDC HA in digital-only mode
- AI-DI 16/DQ 16x24VDC HART HA as digital/analog module in mixed mode

Time stamping is available with configuration in mixed mode. High-precision time stamping (SoE: Sequence of Events) with a precision of 1 ms is available with configuration in digital-only mode.

In mixed mode, the 16 inputs can also be set channel by channel as either digital inputs or analog inputs with or without HART. HART is only available in mixed mode and with configuration in a measuring range of 4 to 20 mA.

#### Ordering data

**Overview**

Fail-safe I/O modules permit safety-oriented monitoring and thus, when required, bringing the plant to the defined safe state. The communication and integration into the process control system is enabled with the proven technology SIMATIC Safety Integrated. The fail-safe I/O modules for DI and DO correspond to the size of the standard modules and are certified by the German Technical Inspectorate up to SIL 3 per channel. All fail-safe modules can be set up in redundant design guaranteeing not only fail-safe operation but also highest availability. SIMATIC ET 200SP HA is perfectly adapted for demanding fail-safe and standard applications in the manufacturing and process industries when high availability and PROFINET R1 redundancy are imperative.

## I/O systems

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200SP HA

### Ex I/O modules

#### Overview

The intrinsically safe ET 200SP HA Ex I/O modules extend the SIMATIC ET 200SP HA and SIMATIC ET 200SP distributed I/O systems with the option of integrating devices located in hazardous areas (intrinsically safe sensors, actuators and HART field devices) into the system.

The ET 200SP HA Ex I/O modules with device protection according to intrinsic safety "i" offer channel outputs in Zone 0 or 1, 2-channel HART analog input and output modules and 2/4-channel digital input and output modules with different characteristic curves as well as a power module for intrinsically safe power supply of the modules.

Separate Ex isolators with correspondingly complex wiring and high space requirements are no longer required. The I/O modules can be installed up to ATEX Zone 2 and offer intrinsically safe circuits in Ex ia design for field devices up to Zone 0.

The Ex modules offer channel diagnostics and Configuration in Run and are approved for ambient temperatures from -40 to +70 °C.

#### Technical specifications

Article number	<b>6DL1131-6TD00-0HX1</b> ET 200SP HA, EX-DI 4xNAMUR
<b>General information</b>	
Product type designation	Ex-DI 4xNAMUR
<b>Product function</b>	
• Isochronous mode	No
<b>Engineering with</b>	
• STEP 7 TIA Portal configurable/ integrated from version	STEP 7 V16 or higher with HSP
• STEP 7 configurable/integrated from version	STEP 7 V5.6 SP2 or higher
• PCS 7 configurable/integrated from version	V9.1
<b>Operating mode</b>	
• DI	Yes
• Counter	Yes
• MSI	Yes
<b>Encoder supply</b>	
Number of outputs	4
Short-circuit protection	Yes
<b>Digital inputs</b>	
Number of digital inputs	4; NAMUR
Digital inputs, parameterizable	Yes
Pulse extension	Yes; 0.5 s, 1 s, 2 s
Time stamping	No
Edge evaluation	Yes; Positive edge, negative edge
Signal change flutter	Yes; 2 to 32 signal changes
Flutter observation window	Yes; 0.5 s, 1 s to 100 s in 1-s steps
<b>Input voltage</b>	
• Rated value (DC)	8.2 V
<b>Input current</b>	
<b>for 10 k switched contact</b>	
- for signal *0*	Max. 1.2 mA
- for signal *1*	Min. 2.1 mA
<b>for unswitched contact</b>	
- for signal *0*, max. (permissible quiescent current)	0.5 mA
- for signal *1*	typ. 8 mA
<b>for NAMUR encoders</b>	
- for signal *0*	0.35 to 1.2 mA
- for signal *1*	2.1 ... 6.4 mA
<b>Encoder</b>	
<b>Connectable encoders</b>	
• NAMUR encoder/changeover contact according to EN 60947	Yes
• Single contact / changeover contact unconnected	Yes
• Single contact / changeover contact connected with 10 kΩ	Yes

Article number	<b>6DL1131-6TD00-0HX1</b> ET 200SP HA, EX-DI 4xNAMUR
<b>Interrupts/diagnostics/ status information</b>	
Diagnostics function	Yes
<b>Alarms</b>	
• Diagnostic alarm	Yes
• Maintenance interrupt	Yes
• Hardware interrupt	Yes; channel by channel
<b>Diagnoses</b>	
• Diagnostic information readable	Yes
• Monitoring the supply voltage	Yes
- parameterizable	Yes
• Monitoring of encoder power supply	Yes
• Wire-break	Yes; channel by channel
• Short-circuit	Yes; channel by channel
• Group error	Yes
<b>Diagnostics indication LED</b>	
• MAINT LED	Yes; Yellow LED
• Monitoring of the supply voltage (PWR-LED)	Yes; green PWR LED
• Channel status display	Yes; green LED
• for channel diagnostics	Yes; red LED
• for module diagnostics	Yes; green/red DIAG LED
<b>Integrated Functions</b>	
<b>Measuring functions</b>	
<b>Accuracy</b>	
- Frequency measurement	1 %
<b>Ex(i) characteristics</b>	
<b>maximum values for connecting terminals for gas group IIC</b>	
• U <sub>o</sub> (no-load voltage), max.	9.6 V
• I <sub>o</sub> (short-circuit current), max.	61 mA; applies for up to four circuits connected in parallel
• P <sub>o</sub> (power output), max.	145 mW; applies for up to four circuits connected in parallel
• C <sub>o</sub> (permissible external capacity), max.	3.6 μF; applies for up to four circuits connected in parallel
• L <sub>o</sub> (permissible external inductivity), max.	13 mH; applies for up to four circuits connected in parallel
• U <sub>m</sub> (voltage at non-intrinsically safe connecting terminals), max.	60 V
<b>Potential separation</b>	
<b>Potential separation channels</b>	
• between the channels and backplane bus	Yes
<b>Ambient conditions</b>	
<b>Ambient temperature during operation</b>	
• horizontal installation, min.	-40 °C

## Overview

### Mounting rails

The mounting rail is required for fitting an ET 200SP HA station in the control cabinet. The IM carrier modules for interface modules, the carrier modules for the I/O modules and the server module are attached to the mounting rail.

The mounting rails are available in lengths of 482 mm (for installation in a 19-inch rack) and 1 500 mm (for maximum configuration and vertical installation in a cabinet).

IM single carrier module

IM redundant carrier module

### IM carrier modules for interface modules

Two versions of the IM carrier modules for interface modules are available:

- IM single carrier module for 1 interface module, for single connection to PROFINET
- IM redundant carrier module for 2 interface modules, for redundant connection to PROFINET

The IM carrier modules connect the interface module to the backplane bus. They enable data exchange with the I/O modules.

Carrier module for I/O modules, 8-slot

Carrier module for I/O modules, 2-slot

### Carrier modules for I/O modules

The slots for the I/O modules are created by the connection of these carrier modules to the terminal blocks.

Carrier modules for I/O modules are available in the following versions:

- Carrier module, 2-slot, with 2 slots for I/O modules
- Carrier module, 8-slot, with 8 slots for I/O modules

## I/O systems

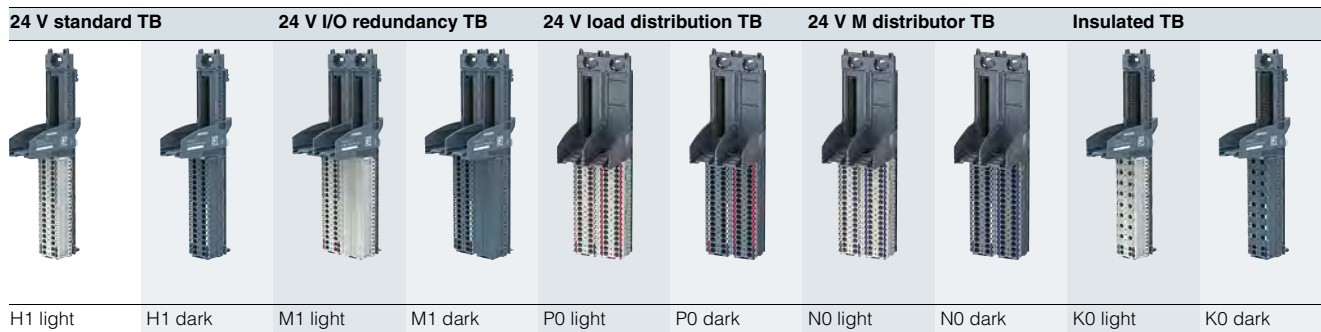

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200SP HA

### Terminal blocks

#### Overview

The slots for the I/O modules are created by connecting carrier modules and terminal blocks. The terminal blocks contain the process terminals for connecting sensors, actuators and other devices.

#### Overview of terminal blocks

Select the terminal block for the slot of an I/O module based on the following dependencies:

- Definition of I/O modules associated with a potential group
- Requirement for design with redundant I/O modules (redundant partner in adjacent slot)
- Requirement for design with potential distributors (e.g. when using 32-channel I/O modules)

The following table illustrates the terminal block / I/O module assignment (x = standard):

Terminal block / I/O module	24 V standard TB (H1)	24 V I/O redundancy TB (M1)	24 V load distribution TB (P0)	24 V M distributor TB (NO)	Insulated TB (K0)
DI 16x24VDC	x	Optional		Optional <sup>1)</sup>	
DI 32x24VDC	Optional		x		
DI 16xNAMUR	x	Optional		Optional <sup>1)</sup>	
DI 8x125VDC					x
DI 8x230VAC					x
DQ 16x24V/0.5A	x	Optional		Optional <sup>1)</sup>	
DQ 32x24V/0.5A	Optional			x	
RQ 4x230/5A CO					x
DI-AI 16x / DQ16x	x	Optional		Optional <sup>1)</sup>	
AI 16xI HART	x	Optional		Optional <sup>1)</sup>	
AI 16xTC 8xRTD	x	Optional			
AQ 8xI HART	x	Optional		Optional <sup>1)</sup>	

<sup>1)</sup> Offers additional ground points for field connection

#### Potential groups/color type of the terminal blocks

Potential groups on ET 200SP HA stations come in both a light and a dark version to help you distinguish them:

- Each light-colored terminal block that is fitted in the station starts a new potential group. The first terminal block fitted (on the first carrier module immediately to the right of the interface module) is therefore light-colored.
- Each dark terminal block forms a contact with the supply voltage of the terminal block to its left, thus extending the potential group.

Note the maximum permissible load current depending on the number of I/O modules:

Number of terminal blocks	Permissible load current in amperes
4	10 A
5	8 A
6	7 A
7	6 A
8	5 A
10	4 A
15	3 A
20	2 A

**Overview**

Extending the SIMATIC ET 200SP HA system with specific additional I/O modules from the SIMATIC ET 200SP system gives you more options and flexibility.

When these I/O modules are used, the following aspects need to be considered:

- Special slot rules apply. The additional I/O modules from the SIMATIC ET 200SP system can only be operated at the end, after the Standard SIMATIC ET 200SP HA I/O modules. Mixed configuration is not permissible.
- Module redundancy is not supported for the additional I/O modules.
- Attention must be paid to the specific properties of the additional I/O modules, such as ambient temperature, painting, insulation protection. These are usually limited compared to the ET 200SP HA I/O modules.

**Analog input module AI Energy Meter Standard, 480 V AC, BU type D0**

- Can be plugged into type D0 BaseUnits (BU) with automatic coding
- LED display for error, operation, power, and status
- Clear labeling on front of module
- Optional labeling accessories
- Optional module-specific color coding of the terminals according to the CC color code

**SIWAREX WP321 weighing controller**

A versatile and flexible weighing module for the seamless integration of a static scale into the SIMATIC automation environment.

The electronic weighing system is integrated in the SIMATIC ET 200SP series and uses all the features of a modern automation system, such as integrated communication, operator control and monitoring, diagnostic systems and configuration tools in the TIA Portal, SIMATIC STEP 7, WinCC flexible and PCS 7.

**Valve terminal AirLINE SP type 8647 for integration in ET 200SP HA**

- For pneumatic control of actuators with ET 200SP HA
- Can be used together with system and IO components of the ET 200SP HA distributed I/O system
- Bürkert Fluid Control Systems product, can only be obtained from Bürkert Fluid Control Systems product partner

**Note:**

Product partners are external companies outside Siemens AG and its associated companies. Information and descriptions of products made by product partners are non-binding, and are the responsibility of the product partners. These products are manufactured independently and under the responsibility of the respective product partner, and are sold and supplied by it under its terms of business and delivery.

Unless compulsory by law, Siemens assumes no liability or warranty for these products or for connection with these products of the product partners.

## I/O systems

### SIMATIC ET 200 systems for the control cabinet

#### SIMATIC ET 200MP

##### Overview

SIMATIC ET 200MP Video

[https://players.brightcove.net/1813624294001/70fecf0f-fbad-4fad-a077-d0e26af4d84c\\_default/index.html?videoId=6147385583001](https://players.brightcove.net/1813624294001/70fecf0f-fbad-4fad-a077-d0e26af4d84c_default/index.html?videoId=6147385583001)

SIMATIC ET 200MP is a modular and scalable I/O system with IP20 degree of protection for universal use, and offers the same system advantages as SIMATIC S7-1500. SIMATIC ET 200MP permits extremely short bus cycle times and very fast response times, even with large quantity structures.

SIMATIC ET 200MP consists of the following components:

- Interface modules for connecting S7-1500 I/O modules to PROFINET; up to 30 modules can be connected to one interface module
- Interface module for connecting S7-1500 I/O modules to PROFIBUS; up to 12 modules can be connected to one interface module

The SIMATIC ET 200MP distributed I/O system is particularly easy to install, wire, and commission.

With its extended ambient conditions, SIMATIC ET 200MP can be used almost anywhere. Many modules can be operated in a temperature range from -30°C to +60°C and at altitudes up to 5,000 m as standard. A wide range of SIPLUS modules is available for requirements beyond this.

Highlights:

- Modular I/O system with IP20 degree of protection for PROFINET or alternatively for PROFIBUS
- Compact dimensions and high channel density
- High degree of user-friendliness due to the following design features:
  - High channel density through 35 mm wide modules with up to 64 digital channels
  - Standardized 40-pin front connector simplifies ordering, logistics, and warehousing
  - Standardized pin assignment per module type simplifies wiring and helps avoid errors
  - Integrated potential bridges simplify wiring and allow flexible subsequent modification of potential groups
  - The cable storage space grows along with the requirements and allows a uniform appearance even with insulated conductors with a large core cross-section and/or thick insulation
  - The prewiring position for the front connector allows convenient wiring during both initial commissioning and when making changes during operation
  - The mounting rail integrated in the S7-1500 DIN rail allows snapping-on of many standard components such as additional terminals, miniature circuit breakers or small relays
  - The 1:1 assignment of channel status and diagnostics LED, terminal and inscription allows fast location and elimination of errors. Assistance is provided by the wiring diagram printed on the inside of the front panels
  - The integrated shielding concept for analog and technology modules allows reliable and rugged operation, in particular with High Speed applications. Installation does not require any tools
  - Particularly space-saving and simple design with slim 25 mm modules and high-density modules; the maximum possible station configuration with power supply (PS), interface module (IM) and 30 I/O modules can be accommodated on a 830 mm-wide S7-1500 mounting rail
- Comprehensive product portfolio comprising digital and analog input or output modules, technology modules, communications modules for IO-Link and point-to-point communication, and F-modules up to SIL3.
  - Integrated technological functions in selected modules, such as counting, pulse width modulation (PWM) or integrated switching cycle counters, make cost-effective and convenient solutions possible.
  - Selected digital output modules enable safety-related load group shutdown in accordance with SILCL 2 via an external safety relay.

## Overview

- Extensive system functions
  - Integrated system diagnostics when operated with S7-1500 and TIA Portal
  - Integrated switching cycle counter for relay modules enables preventive maintenance
  - Consistent use of identification and maintenance data IM0 to IM3 for fast electronic and unambiguous identification of individual modules (Article No., serial number, etc.)
  - Uniform firmware update for the interface module and all I/O modules for subsequent expansion of functions (investment security)
  - Bus cycle time  $\geq 250 \mu\text{s}$  and coupling to the isochronous task permit implementation of applications with high performance requirements with PROFINET
  - Up to 30 I/O modules (PROFINET) or 12 I/O modules (PROFIBUS) within a station save on interface modules and installation time
  - MMC not required with PROFINET; automatic address assignment via LLDP or manually via TIA Portal or PST tool
  - Shared device on up to two (IM 155-5 PN BA and IM 155-5 PN ST) or four (IM 155-5 PN HF) IO Controllers
  - Module shared input/module shared output as system function for all S7-1500 I/O modules
- High plant availability:
  - Increased communication availability by means of Media Redundancy Protocol (MRP, MRPD) on PROFINET as well as operation of the IM 155-5 PN HF on an S7-1500 R/H using S2 redundancy; in addition, the IM 155-5 PN HF High Feature interface module can be operated on an S7-400H. Configuration is carried out with STEP 7 V5.5 SP3 and a GSDML file. The IM 155-5 PN HF also supports operation on an S7-400H CPU (system redundancy).
  - Increased plant availability due to the active backplane bus for up to 12 I/O modules per station; allows reaction-free pulling and plugging of I/O modules in operation without a CPU STOP; allows holding of reserves (empty slots) for plant expansion at a later time.

## I/O systems

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200MP

Interface modules > IM 155-5 PN

### Overview

- Interface modules for connecting ET 200MP to PROFINET
- These handle data exchange with the PROFINET IO Controller in the PLC
- Integrated 2-port switch for line topology

#### IM 155-5 PN BA

- Max. 12 I/O modules
- Operation of F-modules and PROFIsafe
- Shortest bus cycle time 1 ms
- Media redundancy (MRP)
- Shared device on up to 2 IO controllers
- Omission of SIMATIC Memory Card (SMC); IM replacement without PG using LLDP

#### IM 155-5 PN ST, IM 155-5 PN HF

- Max. 30 I/O modules
- Shortest bus cycle 250  $\mu$ s
- Connecting to the isochronous task of the CPU
- Prioritized fast startup (FSU) with max. 12 I/O modules
- Media Redundancy Protocol (MRP)
- Shared device on up to two IO controllers (when configuring using GSD file; depends on the respective configuration tool)
- Omission of SIMATIC Memory Card (SMC); IM replacement without PG using LLDP
- Operation of F-modules and PROFIsafe
- Submodule-granular shared device with up to two IO controllers
- Configuration control (option handling)
- Module shared input and module shared output (MSI/MSO), i.e. the inputs or outputs of a module can be made available simultaneously to up to two IO controllers

The IM155-5 PN HF interface module has the following additional functions:

- Shared device on up to 4 IO controllers
- Module shared input and module shared output (MSI/MSO) on up to four IO controllers
- Operation on a highly available SIMATIC S7-400H
- Support for the MRPD function (media redundancy with planned duplication)
- S2 redundancy for operation with an S7-1500 R/H
- Operation on the active backplane bus (as of FW V 4.4.1)

## Overview

- Interface module for linking the ET 200MP to PROFINET
- Handles data exchange with the PROFINET I/O controller in the PLC
- Integrated 2-port switch for line topology
- Max. 30 I/O modules
- Shortest bus cycle 250 µs
- Linking to the isochronous task of the CPU
- Prioritized fast startup (FSU) with 500 ms (max. 12 I/O modules)
- Media Redundancy Protocol (MRP)
- Shared device on up to 2 I/O controllers (when configuring using GSD file; depends on the respective configuration tool)
- Omission of SIMATIC Memory Card (SMC); IM replacement without PG using LLDP

**Note:**

SIPLUS extreme products are based on SIMATIC standard products. The contents listed here were taken from the corresponding standard products. SIPLUS extreme-specific information was added.

## Overview

- Interface module for linking the ET 200MP to PROFIBUS
- Handles data exchange with the PROFIBUS master in the PLC
- Max. 12 I/O modules
- Automatic detection of baud rate 9.6 kBd ... 12 MBd
- PROFIBUS addresses 1 ... 125; adjustable using DIP switches
- Identification and maintenance data IM0 ... IM3

## Note:

SIPLUS extreme products are based on SIMATIC standard products. The contents listed here were taken from the respective standard products. SIPLUS extreme-specific information was added.

## I/O systems

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200MP

### I/O modules

#### Overview

I/O modules constitute the interface of SIMATIC ET 200MP to the process:

- Digital and analog modules provide exactly the inputs/outputs required for each task
- Technology modules for SIMATIC S7-1500 and ET 200MP
  - With integrated functions for high-speed counting and position detection
  - With integrated inputs and outputs for tasks at the process level and short response times
- Communications modules for SIMATIC S7-1500 and ET 200MP
  - For data exchange using point-to-point coupling
  - For connecting to PROFIBUS
  - For connecting to Industrial Ethernet
- Connection system for user-friendly, low-overhead wiring of the S7-1500 and ET 200MP modules

You can find additional information under [SIMATIC S7-1500, catalog section 4](#).

**Overview**

Active backplane bus in S7-1500 DIN rail

- Considerably enhances system availability:
  - Reaction-free hot swapping of I/O modules during operation; system remains in RUN mode when replacing one or more I/O modules
  - Reserve capacity (= gaps in system configuration) for later use
- Can also be used exclusively with ET200MP and PROFINET
- Can be inserted in the ET 200MP standard mounting rail, replaces the U connectors
- The comprehensive system functions of ET 200 MP can still all be used
- Can be used with all PROFINET IO controllers by configuring via GSD file and PROFINET

**Ordering data****Article No.****Active backplane bus**

With 12 slots for ET 200MP I/O modules for hot swapping; for insertion in the S7-1500 DIN rail.

Please order the S7-1500 DIN rail and slot covers separately.

- 4 slots
- 8 slots:

## Overview

- Modular I/O system with IP20 degree of protection, particularly suitable for user-specific and complex automation tasks
- Consists of a PROFIBUS DP or PROFINET interface module IM 153, up to 8 or 12 I/O modules of the S7-300 automation system (structure with bus connection or with active bus modules), and a power supply if applicable
- Can be expanded with S7-300 automation system signal, communication and function modules
- Applicable Ex analog input or output modules with HART optimize the ET 200M for use in process engineering
- Can be used in redundant systems (S7-400H, S7-400F/FH)
- Modules can be replaced during operation (hot swapping) with the bus modules active
- Transmission rates up to 12 Mbps
- Ex approval to Cat. 3 for Zone 2 acc. to ATEX 100 a
- Fail-safe digital in/outputs as well as analog inputs for safety-oriented signal processing in accordance with PROFIsafe
- Supports modules with expanded user data, e.g. HART modules with HART minor variables

### Availability

As part of our established product portfolio, the SIMATIC S7-300 / ET 200M system families will generally be available until 2023. Following the product phase-out declaration, products will be available as spare parts for another ten years.

## Technical specifications

### General technical data ET 200M

Cables and connections	Screw and spring-loaded connections in permanent wiring
Degree of protection	IP20
Ambient temperature on vertical wall (preferred mounting position)	
• with horizontal assembly	0 to +60 °C
• with other assembly	0 to +40 °C
Relative humidity	5 to 95% (RH stress level 2 according to IEC 1131-2)
Atmospheric pressure	795 to 1080 hPa
Mechanical stress	
• Vibrations	IEC 68, parts 2 – 6: 10 - 57 Hz (const. amplitude 0.075 mm) 57 - 150 Hz (constant acceleration 1 g)
• Shock	IEC 68, parts 2 – 27 half-sine, 15 g, 11 ms

**I/O systems**

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200M

**Interface modules > IM 153-1/153-2****Overview**

The ET 200M system with various interface modules is available for the distributed use of S7-300 I/O modules. Depending on the application purpose, the best suited IM in terms of costs and functions can be selected:

**IM153-1 Standard**

The IM153-1 is one reasonably priced variant that is excellently suited for most applications in the manufacturing environment. It permits the use of up to 8 S7-300 I/O modules.

**IM153-2 High Feature**

For higher requirements in manufacturing technology, such as the use of F technology or the highest performance in conjunction with clock synchronization, the IM153-2 High Feature is available. This IM is also designed for use with the PCS7 in the field of process-oriented applications. This IM can be redundantly used and supports typical functions as they are required in the control field. These include, for example, clock synchronization or time stamping with an accuracy of up to 1 ms.

## Overview

- For connecting ET 200M to PROFINET IO (via copper line, RJ45) as an IO device
- 2 versions:
  - IM 153-4 PN STANDARD
  - IM 153-4 PN HIGH FEATURE: supports, in contrast to the STANDARD version, the operation of PROFIsafe F and HART modules. The operation of an S7-400H high availability PLC (system redundancy) is also possible.
- Integrated 2-port switch
- 12 modules per station
- Usable I/O capacity: 192 bytes each
- Active bus backplane to hot-swap modules available as an option
- Baud rate 10 Mbps / 100 Mbps (autonegotiation / full duplex)
- I&M functions according to PNO Guideline Order No. 3.502, Version V1.1

## Note:

Micro Memory Card with at least 64 KB required if not all the stations in the network support LLDP (Link Layer Discovery Protocol; proximity detection).

Accommodates bus modules; for hot-swapping function

- Length: 483 mm (19")
- Length: 530 mm
- Length: 620 mm
- Length: 2 000 mm

6ES7195-1GA00-0XA0

6ES7195-1GF30-0XA0

6ES7195-1GG30-0XA0

6ES7195-1GC00-0XA0

## SIMATIC S7-300 mounting rail

Length: 160 mm

6ES7390-1AB60-0AA0

Length: 480 mm (19")

6ES7390-1AE80-0AA0

Length: 530 mm

6ES7390-1AF30-0AA0

Length: 830 mm

6ES7390-1AJ30-0AA0

Length: 2000 mm

6ES7390-1BC00-0AA0

## Power supply connector

For connection of the 24 V DC supply voltage; spare part, 1 pack containing 10 units

Spring-loaded connections

6ES7193-4JB00-0AA0

Screw terminal connections

6ES7193-4JB50-0AA0

## S7 Manual Collection

Electronic manuals on DVD, multi-language: S7-200, TD 200, S7-300, M7-300, C7, S7-400, M7-400, STEP 7, Engineering Tools, Runtime Software, SIMATIC DP (Distributed I/O), SIMATIC HMI (Human Machine Interface), SIMATIC NET (Industrial Communication)

6ES7998-8XC01-8YE0

## S7 Manual Collection update service for 1 year

Scope of delivery: Current DVD "S7 Manual Collection" and the three subsequent updates

6ES7998-8XC01-8YE2

## Industrial Ethernet FC RJ45 plug 180

RJ45 plug connector for Industrial Ethernet with a rugged metal housing and integrated insulation displacement contacts for connecting Industrial Ethernet FC installation cables; with 180° cable outlet

1 unit

6GK1901-1BB10-2AA0

10 units

6GK1901-1BB10-2AB0

50 units

6GK1901-1BB10-2AE0

## Industrial Ethernet FastConnect installation cables

- FastConnect standard cable
- FastConnect trailing cable
- FastConnect marine cable

6XV1840-2AH10

6XV1840-3AH10

6XV1840-4AH10

## Industrial Ethernet FastConnect

Stripping tool

6GK1901-1GA00

<sup>1)</sup> To operate the IM153-4, an MMC is required with at least 64 KB memory. Cards with higher memory capacity may also be used.

Article number	<b>6ES7153-4AA01-0XB0</b> IM153-4 PN IO for 12 Modules S7-300	<b>6ES7153-4BA00-0XB0</b> IM153-4 PN IO HF for 12 Modules S7-300
<b>General information</b>		
Product type designation	IM 153-4 PN ST	IM 153-4 PN HF
<b>Supply voltage</b>		
Rated value (DC)	24 V	24 V
external protection for power supply lines (recommendation)	In a construction with grounded reference potential, a fuse is necessary for redundant interface modules (Recommendation: 2.5 A)	In a construction with grounded reference potential, a fuse is necessary for redundant interface modules (Recommendation: 2.5 A)
<b>Input current</b>		
Current consumption, max.	600 mA; with 24 V DC supply	600 mA; with 24 V DC supply
<b>Output voltage</b>		
Rated value (DC)	5 V	5 V
<b>Output current</b>		
for backplane bus (5 V DC), max.	1.5 A	1.5 A
<b>Power loss</b>		
Power loss, typ.	6 W	6 W
<b>Address area</b>		
<b>Addressing volume</b>		
• Inputs	192 byte	672 byte; Extended HART user data
• Outputs	192 byte	192 byte
<b>Hardware configuration</b>		
Number of modules per DP slave interface, max.	12	12
<b>Protocols</b>		
Bus protocol/transmission protocol	PROFINET IO	PROFINET IO
<b>Protocols (Ethernet)</b>		
• TCP/IP	No	Yes
• SNMP		Yes
• LLDP		Yes
• ping		Yes
• ARP		Yes
<b>PROFINET IO Device Services</b>		
- IRT		Yes
- PROFINET energy		No
- Prioritized startup		Yes
- Shared device		Yes
- Number of IO Controllers with shared device, max.		2
<b>Redundancy mode</b>		
• PROFINET system redundancy (S2)	No	Yes
<b>Media redundancy</b>		
- MRP	Yes	Yes
<b>Interrupts/diagnostics/status information</b>		
<b>Diagnostics indication LED</b>		
• LINK LED	Yes; green LED	Yes; green LED
• RX/TX LED	Yes; Yellow LED	Yes; Yellow LED
• for module diagnostics	Yes	Yes
<b>Potential separation</b>		
Potential separation exists	Yes	Yes; Only direction PROFINET, RWB is not separated

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200M

Interface modules > SIPLUS ET 200M IM 153-1/153-2

**Overview****Note:**

SIPLUS extreme products are based on SIMATIC standard products. The contents listed here were taken from the respective standard products. SIPLUS extreme-specific information was added.

For technical documentation on SIPLUS, see:

<http://www.siemens.com/siplus-extreme>

**Ordering data****Article No.****Article No.****SIPLUS ET 200M IM 153-1**

Slave interface for connecting an ET 200M to PROFIBUS DP for a maximum of 8 S7-300 modules

- Extended temperature range and exposure to environmental substances

**6AG1153-1AA03-2XB0**

**SIPLUS ET 200M IM 153-2 High Feature**

Slave interface for connecting an ET 200M to PROFIBUS DP for a maximum of 12 S7-300 modules; also for use in redundant systems

- Extended temperature range and exposure to environmental substances

**6AG1153-2BA10-7XB0**

**Bus module for SIPLUS ET 200M**

Bus module for accommodating a power supply and an IM 153 module for the hot-swapping function during RUN, incl. bus module cover

- Extended temperature range and exposure to environmental substances

**6AG1195-7HA00-2XA0**

Bus module for accommodating two 40 mm-wide I/O modules for the hot-swapping function

- Extended temperature range and exposure to environmental substances

**6AG1195-7HB00-7XA0**

Bus module for accommodating one 80 mm-wide I/O module for the hot-swapping function

- Extended temperature range and exposure to environmental substances

**6AG1195-7HC00-2XA0**

Bus module for accommodating two IM 153 modules for the hot-swapping function; for setting up redundant systems

- Extended temperature range and exposure to environmental substances

**6AG1195-7HD10-2XA0**

**RS 485 bus connector with 90° cable outlet**

Max. transfer rate 12 Mbps

Extended temperature range and exposure to environmental substances

- Without PG interface
- With PG interface

**6AG1972-0BA12-2XA0**  
**6AG1972-0BB12-2XA0**

## Overview

- Integrated 2-port switch
- 12 modules per station
- Usable I/O quantity structure: 192 bytes each
- Active backplane bus for hot swapping of modules optionally available
- Baud rate 10 Mbps / 100 Mbps (Autonegotiation/Full Duplex)
- I&M functions according to PNO Guideline Order-No. 3.502, Version V1.1

**Notes:**

Micro Memory Card with min. 64 KB required if not all participants in the network support LLDP (Link Layer Discovery Protocol; neighbor detection).

SIPLUS extreme products are based on SIMATIC standard products. The contents listed here were taken from the respective standard products. SIPLUS extreme-specific information was added.

For technical documentation on SIPLUS, see:  
<http://www.siemens.com/siplus-extreme>

- For connection of ET 200M as IO device to PROFINET IO (via copper, RJ45)
- 2 versions:
  - IM 153-4 PN STANDARD
  - IM 153-4 PN HIGH FEATURE: additionally to the STANDARD version, operation of PROFI-safe F and HART modules

<b>Use in stationary industrial systems</b>		
- to biologically active substances according to EN 60721-3-3	Yes; Class 3B2 mold, fungus and dry rot spores (with the exception of fauna); Class 3B3 on request	Yes; Class 3B2 mold, fungus and dry rot spores (with the exception of fauna); Class 3B3 on request
- to chemically active substances according to EN 60721-3-3	Yes; Class 3C4 (RH < 75 %) incl. salt spray acc. to EN 60068-2-52 (severity degree 3); *	Yes; Class 3C4 (RH < 75 %) incl. salt spray acc. to EN 60068-2-52 (severity degree 3); *
- to mechanically active substances according to EN 60721-3-3	Yes; Class 3S4 incl. sand, dust, *	Yes; Class 3S4 incl. sand, dust, *
<b>Use on ships/at sea</b>		
- to biologically active substances according to EN 60721-3-6	Yes; Class 6B2 mold and fungal spores (excluding fauna); Class 6B3 on request	Yes; Class 6B2 mold and fungal spores (excluding fauna); Class 6B3 on request
- to chemically active substances according to EN 60721-3-6	Yes; Class 6C3 (RH < 75 %) incl. salt spray acc. to EN 60068-2-52 (severity degree 3); *	Yes; Class 6C3 (RH < 75 %) incl. salt spray acc. to EN 60068-2-52 (severity degree 3); *
- to mechanically active substances according to EN 60721-3-6	Yes; Class 6S3 incl. sand, dust; *	Yes; Class 6S3 incl. sand, dust; *
<b>Usage in industrial process technology</b>		
- Against chemically active substances acc. to EN 60654-4	Yes; Class 3 (excluding trichlorethylene)	Yes; Class 3 (excluding trichlorethylene)
- Environmental conditions for process, measuring and control systems acc. to ANSI/ISA-71.04	Yes; Level GX group A/B (excluding trichlorethylene; harmful gas concentrations up to the limits of EN 60721-3-3 class 3C4 permissible); level LC3 (salt spray) and level LB3 (oil)	Yes; Level GX group A/B (excluding trichlorethylene; harmful gas concentrations up to the limits of EN 60721-3-3 class 3C4 permissible); level LC3 (salt spray) and level LB3 (oil)
<b>Remark</b>		
- Note regarding classification of environmental conditions acc. to EN 60721, EN 60654-4 and ANSI/ISA-71.04	* The supplied plug covers must remain in place over the unused interfaces during operation!	* The supplied plug covers must remain in place over the unused interfaces during operation!

**Overview digital modules**

- Digital inputs and outputs
- For flexible adaptation of the controller to the respective task
- For connecting digital sensors and actuators

For further information, see SIMATIC S7-300, chapter 5.

**Overview analog modules**

- Analog inputs and outputs
- For solving even complex tasks with analog process signals
- For connecting analog actuators and sensors without additional measuring amplifiers

For further information, see SIMATIC S7-300, chapter 5.

## I/O systems

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200M

I/O modules > Analog modules with HART > Analog input module with HART

### Overview

- Can only be plugged into ET 200M with IM 153-2 and IM 153-2 FO
- 8 AI HART
- Redundancy switching
- Firmware update
- HART minor variables

### Ordering data

#### SM 331 HART analog input module

8 inputs, 0/4 – 20 mA, HART for ET 200M with IM 153-2 interface module

#### Accessories

##### Front connectors

- 20-pin, with screw contacts
  - 1 unit
  - 100 units
- 20-pin, with spring-loaded contacts
  - 1 unit
  - 100 units

##### LK 393 cable guide

Mandatory for operation in hazardous areas

##### SIMATIC DP mounting rail for ET 200M

For mounting of up to 5 bus modules for

- Length: 483 mm (19")
- Length: 530 mm

### Article No.

**Overview F-digital/analog modules**

The fail-safe SIMATIC S7 CPUs and the fail-safe signal modules of SIMATIC ET 200S, ET 200pro, ET 200eco and ET 200M have been specially developed for distributed, safety-related applications in production engineering. Thanks to the discreetly modular structure of the fail-safe I/Os, safety technology only has to be applied where actually required. The new system replaces conventional electromechanical components, such as:

- Freely programmable, safe linking of sensors to actuators
- Selective safe shutdown of actuators
- Mixed configuration of F-modules and standard modules in a station
- Single-bus concept; fail-safe signals and standard signals are transferred over a single bus medium (PROFIBUS DP, PROFINET)

**Totally Integrated Automation (TIA)**

Safety technology (Safety Integrated) is a component of Totally Integrated Automation which provides total integration of safety automation and standard automation (SIMATIC S7).

Whereas standard automation (classical PLCs) and safety automation (electromechanics) are still separate today, these two worlds are growing together into a uniform, integrated overall system.

Siemens can therefore present itself as a complete supplier for automation technology in which safety engineering is part of standard automation and system-wide integration exists.

For further information, see SIMATIC S7-300, chapter 5.

**Overview Ex modules**

- Input/output modules for applications in chemical plants with explosion hazards
- For connecting sensors and actuators from zones 1 and 2 of plants with explosion hazards
- Associated electrical equipment Ex [ib] [ibD] IIC
- For separating the non-intrinsically-safe electrical circuits of the automation system and the intrinsically-safe electrical circuits of the process

For further information, see SIMATIC S7-300, chapter 5.

## I/O systems

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200M

I/O modules > Special modules, Communication, Power supplies

### Overview special modules

The special modules provide the user with functions for diagnostics, as well as commissioning.

For further information, see SIMATIC S7-300, chapter 5.

### Overview power supplies

- Load current supplies for S7-300/ET 200M
- For converting the line voltage to the required operating voltage (24 V DC)
- Output current 2 A, 5 A or 10 A

For further information, see SIMATIC S7-300, chapter 5.

### Overview communication

- Communication boards for data exchange using point-to-point coupling
- Communication board for the connection of identification systems

For further information, see SIMATIC S7-300, chapter 5.

## Overview

The ET 200iSP is a modular, intrinsically-safe I/O system with IP30 degree of protection which can be operated in gas and dust atmospheres at ambient temperatures from -20 to +70 °C. It is optimized for use with SIMATIC PCS 7 and SIMATIC S7, but can also be integrated in other systems such as SIMATIC S5 per GSD file.

In accordance with ATEX directive 2014/34/EU, the ET 200iSP remote I/O stations can be installed directly in Ex Zones 1, 2, 21 or 22 as well as in non-hazardous areas. The intrinsically-safe sensors, actuators and HART field devices can also be located in zone 0 or 20 if necessary.

The modular design of the ET 200iSP makes it possible to optimally adapt the remote I/O stations to the respective automation task through individual configuration and flexible expansion. To increase plant availability, the pressure-encapsulated power supply and the intrinsically-safe PROFIBUS DP connection (RS 485-IS) of the stations can also be of redundant design.

The modern architecture with hardwiring and automatic slot coding supports pre-wiring without the electronic modules, simple and reliable hot swapping of individual modules without a fire certificate as well as configuration in run (CiR).

In addition to analog and digital I/O modules for the automation of technological functions of the process (Basic Process Control), the range of electronic modules also includes fail-safe I/O modules for implementing safety applications. The various types of electronic module can be arranged mixed within a station. Comprehensive diagnostic options facilitate commissioning and troubleshooting.

SIMATIC ET 200iSP

### Power supply unit

#### Overview

An ET 200iSP power supply unit consists of a TM-PS terminal module (A or B) and a PS power supply module which is plugged onto this. Terminal modules and power supply modules can be ordered separately.

The power supply modules are suitable for both individual operation (standard) and redundant operation. Depending on the operating mode, they must be combined with the terminal modules as follows:

- Standard: 1 × PS on TM-PS-A UC
- Redundancy: 1 × PS on TM-PS-A UC (left) plus 1 × PS on TM-PS-B UC (right)

Power supply modules are available for supplies of 24 V DC and 120/230 V AC.

The operating state of the power supply modules is indicated by two LEDs on the IM 152 interface module (one for each module).

## I/O systems

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200iSP

### Interface module

#### Overview

The IM 152 interface module connects the ET 200iSP to the PROFIBUS DP with intrinsically-safe RS 485-iS transmission technology with transmission rates of up to 1.5 Mbps. A redundant connection is also possible. In this case the ET 200iSP is connected via two interface modules to two redundant PROFIBUS DP segments of a fault-tolerant automation system.

The IM 152 is plugged onto a special terminal module (to be ordered separately). The following terminal modules are available:

- TM-IM/IM terminal module for two interface modules (for redundant PROFIBUS DP connection)
- TM-IM/EM60 terminal module for one interface module and one watchdog, reserve or electronic module (except 2 DQ relay)
  - with blue screw-type or spring-loaded terminals for hazardous environments
  - with black screw-type terminals for non-hazardous environments

#### Tasks of the IM 152 interface module

- Connection of ET 200iSP to the intrinsically-safe PROFIBUS DP
- Autonomous communication with the host automation system
- Preparation of data for the fitted electronic modules
- Saving of parameters of the electronic modules
- Time stamping of digital process signals with an accuracy of 20 ms

The maximum address space of the interface module is 244 bytes for inputs, and 244 bytes for outputs.

## I/O systems

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200iSP

### Digital electronic modules

#### Overview

#### Digital input modules

- 8-channel digital input module DI NAMUR EEx i, for evaluation of NAMUR sensors, connected and non-connected contacts, as well as for use as counter or frequency meter  
Parameterizable connections:
  - NAMUR sensor on/off
  - NAMUR changeover contact
  - Single contact connected (mechanical NO contact)
  - Changeover contact connected (mechanical changeover contact)
  - Single contact non-connected (mechanical NO contact with single contact)
  - Changeover contact non-connected (mechanical changeover contact)
  - Counting function: optional use of 2 channels for recording counter pulses or for frequency measurement
  - Short-circuit and wire break monitoring

#### Digital output modules

- 4-channel digital output modules DO EEx i, 23.1 V DC/20 mA, 17.4 V DC/27 mA, 17.4 V DC/40 mA or 25.5 V DC/22 mA, with external actuator switch-off via High or Low signal (H/L switch-off)
  - Load-free switching of outputs via external intrinsically-safe signal
  - Power boosting through parallel connection of two outputs for one actuator with 4 DO 17.4 V DC/27 mA or 4 DO 17.4 V DC/40 mA
  - Short-circuit and wire break monitoring
- 2-channel digital output module DO Relay EEx e, e.g. for switching solenoid valves, DC contactors or signaling lamps
  - Can be plugged onto TM-RM/RM terminal module
  - Output current up to 2 A with 60 V UC for each of the two relay outputs
  - Installation up to Ex zone 1
  - Intrinsically-safe and non-intrinsically-safe signals can be mixed in a station

#### Extra functions

##### Actuator shutdown function of the 4 DO EEx i modules

The 4 DO EEx i modules are equipped with a shutdown function. This permits implementation of an external switch-off independent of the automation system (controller).

As soon as the intrinsically-safe switch-off signal (High or Low) is present at the actuator switch-off input of the electronics module, its outputs are deactivated.

You can also combine several DO modules into a switch-off group. The intrinsically-safe power supply for the switch-off device is either via the watchdog module or a separate intrinsically-safe source.

#### Ordering data

#### Article No.

##### Digital input modules

##### Digital input modules EEx i

##### 8 DI NAMUR

For evaluation of NAMUR sensors, connected/non-connected contacts, as well as for recording counter pulses or measuring frequencies

- 8 × NAMUR (NAMUR sensor on/off, NAMUR changeover contact) or connected/non-connected inputs (single/changeover contact)
- 2 channels optionally usable as counters (max. 5 kHz) or frequency meters (1 Hz ... 5 kHz)
- Time tagging 20 ms, rising or falling edge
- Wire break monitoring
- Short-circuit monitoring
- Sensor power supply monitoring
- Flutter monitoring

**6ES7131-7RF00-0AB0**

#### Article No.

##### Digital output modules

##### Digital output modules EEx i with H-switch-off

(external actuator switch-off via H-signal); for switching of solenoid valves, DC relays, signal lamps, actuators

##### 4 DO DC 23.1 V/20 mA

- 4 channels with 20 mA each
- Short-circuit monitoring
- Wire break monitoring
- Configurable connection of substitute value in the event of CPU failure
- Load-free switching of outputs via external intrinsically-safe signal

**6ES7132-7RD01-0AB0**

##### 4 DO DC 17.4 V/27 mA

- 4 channels with 27 mA each or 2 outputs connected in parallel with 54 mA each
- Short-circuit monitoring
- Wire break monitoring
- Configurable connection of substitute value in the event of CPU failure
- Load-free switching of outputs via external intrinsically-safe signal

## Overview

## Analog input modules

- 4-channel analog input module AI 2 WIRE HART EEx i for current measurement in the range 4 to 20 mA, suitable for connection of 2-wire transmitters (with/without HART functionality)
  - Resolution 12 bit + sign
  - Max. load of transmitter 750  $\Omega$
  - Short-circuit and wire break monitoring
- 4-channel analog input module AI 4 WIRE HART EEx i for current measurement in the range 0/4 to 20 mA, suitable for connection of 4-wire transmitters (with/without HART functionality)
  - Resolution 12 bit + sign
  - Max. load of transmitter 750  $\Omega$
  - Wire break monitoring

- 4-channel analog input module AI RTD EEx i for resistance measurement and for temperature measurement by Pt100/Ni100 resistance thermometer
  - Resolution 15 bit + sign
  - 2, 3, or 4-wire connection possible
  - Resistance measurements 600  $\Omega$  absolute and 1 000  $\Omega$  absolute
  - Wire break monitoring
- 4-channel analog input module AI TC EEx i for thermoelectric EMF measurements and for temperature measurement by thermocouple, type B, E, N, J, K, L, S, R, T, U
  - Resolution 15 bit + sign
  - Internal temperature compensation possible using TC sensor module (included in scope of delivery of module)
  - External temperature compensation by means of a temperature value acquired at an analog module of the same ET 200iSP station
  - Wire break monitoring

## Analog output modules

- 4-channel analog output module AO I HART EEx i for output of current signals in the range 0/4 to 20 mA to field devices (with/without HART functionality)
  - Resolution 14 bit
  - Parameterizable substitute value in case of CPU failure
  - Short-circuit and wire break monitoring

## Extra functions

## Temperature compensation

A TC sensor module for internal temperature compensation is provided with the 4 AI TC module, and is fitted on the corresponding terminals of the associated terminal module.

External temperature compensation is possible via a Pt100 on a 4 AI RTD module.

## Analog input modules

## Analog input modules EEx i

## 4 AI 2 WIRE HART

For measuring currents with 2-wire transmitters with/without HART functionality

- 4 x 4 ... 20 mA, HART, 2-wire transmitter
- Transmitter load: max. 750  $\Omega$
- Resolution 12 bit + sign
- Short-circuit monitoring
- Wire break monitoring

6ES7134-7TD00-0AB0

## 4 AI 4 WIRE HART

For measuring currents with 4-wire transmitters with/without HART functionality

- 4 x 0/4 ... 20 mA, HART, 4-wire transmitter
- Transmitter load: max. 750  $\Omega$
- Resolution 12 bit + sign
- Wire break monitoring

6ES7134-7TD50-0AB0

## 4 AI RTD

For measuring resistances as well as for temperature measurements with resistance thermometers

- 4 x RTD, resistance thermometer Pt100/Ni100
- 2, 3, 4-wire
- Resolution 15 bit + sign
- Short-circuit monitoring
- Wire break monitoring

6ES7134-7SD51-0AB0

## 4 AI TC

For thermoelectric EMF measurements as well as for temperature measurements with thermocouples

- 4 x TC (thermocouples)
- Type B [PtRh-PtRh]
- Type N [NiCrSi-NiSi]
- Type E [NiCr-CuNi]
- Type R [PtRh-Pt]
- Type S [PtPh-Pt]
- Type J [Fe-CuNi]
- Type L [Fe-CuNi]
- Type T [Cu-CuNi]
- Type K [NiCr-Ni]
- Type U [Cu-CuNi]
- Resolution 15 bit + sign
- Internal compensation of reference junction temperature possible using TC sensor module (included in scope of supply of module)
- External temperature compensation via Pt100, connected to RTD module of same ET 200iSP station
- Wire break monitoring

6ES7134-7SD00-0AB0

## I/O systems

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200iSP

### Safety-related electronic modules

#### Overview

The electronic modules of the SIMATIC ET 200iSP distributed I/O-system equipped with safety functions can be used together with the safety-related automation systems (controllers) for the implementation of safety applications. The input modules record the process signals, evaluate them, and prepare them for additional processing by the automation system. The output modules convert the safety-related signals output by the automation systems so that they are suitable for controlling the connected actuators.

#### F digital input modules

- 8 F-DI Ex NAMUR
  - Safety-related digital input module for evaluating the signals from IEC 60947-5-6/NAMUR sensors and connected/non-connected mechanical contacts in hazardous and non-hazardous areas
  - SIL3/Cat.3/PLe with 8 inputs (1-channel/1oo1 evaluation) or 4 inputs (2-channel/1oo2 evaluation)
  - 8 short-circuit-proof sensor supplies (8 V DC) for 1 channel each
  - Inputs and sensor supplies electrically isolated from power bus and backplane bus
  - Diagnostics evaluation (deactivated for non-connected mechanical contacts)
  - Internal diagnostics buffer
  - Programmable diagnostics interrupt
  - Supports time stamping
  - Channel-selective passivation
  - Firmware update using HW Config possible
  - Exclusively for safety mode
  - LED displays for safety mode, group errors and channel status/fault

#### F digital output modules

- 4 F-DO Ex DC 17.4 V/40 mA
  - Safety-related digital output module for controlling actuators in hazardous and non-hazardous areas, e.g. solenoid valves, DC current relays or indicator lamps
  - SIL3/Cat.3/PLe with 4 outputs, switching to P/P potential
  - Electrical isolation from power bus and backplane bus
  - Rated load voltage 17.4 V DC
  - Max. output current 40 mA
  - Performance enhancement through parallel connection of two digital outputs for one actuator
  - Short-circuit, overload and wire-break monitoring
  - Configurable diagnostics
  - Internal diagnostics buffer
  - Programmable diagnostics interrupt
  - Channel-selective passivation
  - Firmware update using HW Config possible
  - Exclusively for safety mode
  - LED displays for safety mode, group errors and channel status/fault

#### F analog input modules

- 4 F-AI Ex HART (0 ... 20 mA or 4 ... 20 mA)
  - Safety-related digital input module for evaluating the signals from current sensors in hazardous and non-hazardous areas, e.g. 2-wire transmitters and HART field devices
  - SIL3/Cat.3/PLe with 4 inputs of one module (1-channel/1oo1 evaluation) or 4 inputs of two modules (2-channel/1oo2 evaluation)
  - Measuring ranges: 0 ... 20 mA or 4 ... 20 mA
  - Resolution 15 bit + sign
  - HART communication in measuring range 4 ... 20 mA
  - 4 short-circuit-proof sensor supplies (min. 12 V DC; max. 26 V DC) for 1 channel each
  - Inputs and sensor supplies electrically isolated from backplane bus
  - Configurable diagnostics
  - Programmable diagnostics interrupt
  - Internal diagnostics buffer
  - Firmware update using HW Config possible
  - Exclusively for safety mode
  - LED displays for safety mode, group errors, channel faults and HART status per channel

## I/O systems

SIMATIC ET 200 systems for the control cabinet  
SIMATIC ET 200iSP

### Watchdog module

#### Overview

The watchdog module has two fundamental functions:

- Monitoring of the ET 200iSP remote I/O station for hardware failures (hardware lifebeat); external, applicative failure monitoring is also possible via an I/O address area of the module
- Intrinsically-safe power supply for external actuator switch-off

The watchdog module must be plugged onto a terminal module (order separately). The following terminal modules are suitable for this:

- TM-IM/EM60 terminal modules for one interface module and one watchdog, reserve or electronics module (for versions, see Interface module section)
- TM-EM/EM60 terminal modules with two slots for watchdog module, reserve module or electronics modules (except 2 DO relay):
  - with blue screw-type or spring-loaded terminals for hazardous environments
  - with black screw-type terminals for non-hazardous environments

The first slot directly next to the interface module is provided for the watchdog module.

#### Ordering data

## Overview

**Tasks of the RS 485-iS coupler**

- Conversion of the electrical PROFIBUS DP RS 485 transmission technology into the intrinsically-safe RS 485-iS transmission technology with a transmission rate of 1.5 Mbps
- Required to connect intrinsically-safe PROFIBUS DP stations, e.g. ET 200iSP or devices from other vendors with Ex i DP connection
- Acts as a safety barrier
- Additional use as a repeater in the hazardous area
- Passive bus station (no configuration necessary)
- Certified according to ATEX 100a

Ambient operating temperatures: • Surface casing -40...+70 °C • I/O device -40 ... +xx °C <sup>5)6)</sup>	
<b>Icotek cable entry</b> in plastic, gray HN-24 frame	<b>3</b>
Ambient operating temperatures: • Surface casing -40...+70 °C • I/O device -40 ... +xx °C <sup>5)6)</sup>	

- 1) The supplied certificate is only valid for the empty enclosure.  
 2) The included certificate is valid for the supplied enclosure including the installed components.  
 3) Number of cable entries/signals depends on enclosure dimensions  
 4) Installing these components reduces the degree of protection for the enclosure to IP65  
 5) Maximum temperature depends on installed components.  
 6) Minus temperatures down to -40 °C when heater installed.  
 This takes up 2 slots for ET 200iSP modules.

**Note:**

Depending on the cables used, other types and sizes of cable entries can be fitted (on request).

## I/O systems

### SIMATIC ET 200 systems without control cabinet

#### SIMATIC ET 200pro

#### Overview

SIMATIC ET 200pro video

[https://players.brightcove.net/1813624294001/70fecf0f-fbad-4fad-a077-d0e26af4d84c\\_default/index.html?videoId=6187716010001](https://players.brightcove.net/1813624294001/70fecf0f-fbad-4fad-a077-d0e26af4d84c_default/index.html?videoId=6187716010001)

- SIMATIC ET 200pro distributed I/O system with IP65/67 degree of protection for cabinet-free use at the machine
- Small, multifunctional complete solution: Digital inputs/outputs, fail-safe modules, motor starters up to 5.5 kW, etc.
- Communication over PROFIBUS or PROFINET
- Mixed arrangement of fail-safe and standard modules in the same station
- Freely selectable connection technique: direct, ECOFAST or M12 7/8"
- Power module for easy implementation of load groups
- Module replacement during operation (hot swapping)
- Easy installation as well as permanent wiring
- Transmission rate for PROFIBUS DP up to 12 Mbps
- Extensive diagnostics: module-specific or channel-specific
- Intelligent motor starters for starting and protection of motors and loads up to 5.5 kW
  - Versions: direct and reversing starters - Standard and High Feature
- Safety motor starters
- Fail-safe modules with safety-related signal processing according to PROFIsafe
- Frequency converters
- RFID communications modules
- Pneumatic interface modules
- IO-Link master

#### Technical specifications

General technical specifications	
Electronic modules	<ul style="list-style-type: none"> <li>• Digital inputs/outputs</li> <li>• Analog inputs</li> <li>• Analog outputs</li> </ul>
Connections	M12 and M8 round connector with standard assignment for actuator/sensor
Transmission rate, max.	12 Mbps (PROFIBUS DP), 100 Mbps (PROFINET IO)
Supply voltage	24 V DC
Current consumption of ET 200pro (internal and sensor supply, non-switched voltage), up to 55 °C, max.	≤ 5 A
Load current for ET 200pro per incoming supply (IM, PM, switched voltage), up to 55 °C, max.	10 A
For overall configuration with looping through (multiple ET 200pros), up to 55 °C, max.	16 A (with terminal module, directly)
Degree of protection	IP65/66/IP67 for interface, digital and analog modules
Material	Thermoplastic (reinforced with glass fiber)
Ambient conditions	
Temperature	From -25 °C/0 °C to +55 °C
Relative humidity	From 5 to 100%
Air pressure	From 795 to 1080 hPa
Mechanical stress	
• Vibration	Vibration test according to IEC 60068, Part 2-6 (sinusoidal) <ul style="list-style-type: none"> <li>• Constant acceleration 5 g, occasionally 10 g for interface, digital and analog modules</li> <li>• 2 g motor starters</li> </ul>
• Shock	Shock test according to IEC 680068 Part 2-27, half-sine, 30 g, 18 ms duration for interface, digital and analog modules <ul style="list-style-type: none"> <li>• 15 g, 11 ms duration for motor starters</li> </ul>
Approvals	UL, CSA or cULus

## Overview

Interface module for processing the communication between ET 200pro and a higher-level controller over PROFINET IO.

## Ordering data

**IM 154-3 PN High Feature interface module**

For communication between ET 200pro and higher-level controllers via PROFINET IO; supports PROFI-safe.

Connection module 6ES7194-4AK00-0AA0 must be ordered separately.

**IM 154-4 PN High Feature interface module**

For communication between ET 200pro and higher-level controllers via PROFINET IO; supports PROFI-safe.

Order terminal module 6ES7194-4A .00-0AA0 separately.

**Accessories****Connection modules for IM 154-3 PN High Feature**

- **Connection module CM IM PN M12, 7/8" S** for connecting PROFINET PN and 24 V power supply to PROFINET interface modules, 2 x M12 and 2 x 7/8"

**Connection modules for IM 154-4 PN High Feature**

- **Connection module CM IM PN M12, 7/8"** for connecting PROFINET PN and 24 V power supply to PROFINET interface modules, 2 x M12 and 2 x 7/8"
- **Connection module CM IM PN 2xRJ45** for connecting PROFINET PN and 24 V power supply to PROFINET interface modules, 2 x RJ45 and 2 x push-pull power connector
- **Connection module CM IM PN 2xSCRJ FO** for connecting PROFINET PN and 24 V power supply to PROFINET interface modules, 2 x SCRJ FO and 2 x push-pull power connector

## Overview

- Expansion modules with digital inputs/outputs for connection of actuators/sensors
- With scalable diagnostics
  - Standard modules with module-specific diagnostics
  - High Feature module with channel-specific diagnostics and parameterizable input delay or hardware interrupts
- Double or single assignment can be implemented for each M12 in the case of the 8 DI and 8 DO module by selecting CM IO 4 x M12 or CM IO 8 x M12
- IO connection modules are available in metal and plastic versions

<b>General information</b>			
<b>Product function</b>			
• Isochronous mode	No	No	No
<b>Supply voltage</b>			
Rated value (DC)	24 V	24 V	24 V
Reverse polarity protection	Yes; Against destruction; encoder power supply outputs applied with reversed polarity	Yes; against destruction; load increasing	Yes; Against destruction; encoder power supply outputs applied with reversed polarity
<b>Input current</b>			
from supply voltage 1L+, max.	20 mA	40 mA	30 mA
from backplane bus 3.3 V DC, max.	20 mA	20 mA	20 mA
<b>Encoder supply</b>			
Number of outputs	8	8	8
Short-circuit protection	Yes; per module, electronic	Yes; per channel, electronic	Yes; per module, electronic
<b>Output current</b>			
• up to 55 °C, max.	1 A	1 A	1 A
<b>Digital inputs</b>			
Number of digital inputs	8	8	16
Input characteristic curve in accordance with IEC 61131, type 1	Yes	No	Yes
Input characteristic curve in accordance with IEC 61131, type 2	No	Yes	
<b>Number of simultaneously controllable inputs</b>			
<b>all mounting positions</b>			
- up to 55 °C, max.	8	8	16
<b>Input voltage</b>			
• Rated value (DC)	24 V	24 V	24 V
• for signal "0"	-3 to +5V	-3 to +5V	-3 to +5V
• for signal "1"	13 to 30V	+11 to +30V	+11 to +30V
<b>Input current</b>			
• for signal "1", typ.	7 mA	7 mA	4 mA
<b>Input delay (for rated value of input voltage) for standard inputs</b>			
- parameterizable	No	Yes	No
<b>Cable length</b>			
• unshielded, max.	30 m	30 m	30 m
<b>Encoder</b>			
<b>Connectable encoders</b>			
• 2-wire sensor	Yes	Yes	Yes
- permissible quiescent current (2-wire sensor), max.	1.5 mA	1.5 mA	1.5 mA
<b>Interrupts/diagnostics/status information</b>			
Diagnostics function	Yes	Yes; channel by channel, parameterizable	Yes

<b>Alarms</b>			
• Diagnostic alarm	Yes	Yes	Yes
• Hardware interrupt		Yes	
<b>Diagnoses</b>			
• Diagnostic information readable	Yes	Yes	Yes
• Wire-break		Yes; Monitoring, I < 0.3 mA; per channel	
• Short-circuit	Yes; Sensor supply to M; module by module	Yes; channel by channel	Yes; Sensor supply to M; module by module
<b>Diagnostics indication LED</b>			
• Group error SF (red)	Yes	Yes	Yes
• Status indicator digital input (green)	Yes; Per channel	Yes; Per channel	Yes; Per channel
<b>Potential separation</b>			
between backplane bus and all other circuit components	Yes	Yes	Yes
<b>Potential separation digital inputs</b>			
• between the channels	No	No	No
• between the channels and backplane bus	Yes	Yes	Yes
<b>Dimensions</b>			
Width	45 mm	45 mm	45 mm
Height	130 mm	130 mm	130 mm
Depth	35 mm	35 mm; without terminal module	35 mm
<b>Weights</b>			
Weight, approx.	140 g	140 g	140 g
Article number	<b>6ES7142-4BD00-0AA0</b> ET 200pro, EM 4DO 24V DC/2.0A	<b>6ES7142-4BD00-0AB0</b> ET 200pro, EM 4DO 24VDC/2.0A HF	<b>6ES7142-4BF00-0AA0</b> ET 200pro, EM 8DO DC24V/0.5A
<b>Supply voltage</b>			
<b>Load voltage 2L+</b>			
• Rated value (DC)	24 V	24 V	24 V
• Short-circuit protection	Yes; per channel, electronic	Yes; per channel, electronic	Yes; per channel, electronic
• Reverse polarity protection	Yes; against destruction; load increasing	Yes; against destruction; load increasing	Yes; against destruction; load increasing
<b>Input current</b>			
from load voltage 2L+ (without load), max.	20 mA	40 mA	30 mA
from backplane bus 3.3 V DC, max.	20 mA	30 mA	30 mA
<b>Digital outputs</b>			
Number of digital outputs	4	4	8
Short-circuit protection	Yes	Yes	Yes
Controlling a digital input	Yes	Yes	Yes; Isolation between 1L+ and 2L+ is no longer provided, as 1M and 2M are jumpered
<b>Switching capacity of the outputs</b>			
• on lamp load, max.	10 W	10 W	5 W
<b>Load resistance range</b>			
• lower limit	12 Ω	12 Ω	48 Ω
• upper limit	4 kΩ	4 kΩ	4 kΩ
<b>Output current</b>			
• for signal "1" rated value	2 A	2 A	0.5 A
• for signal "0" residual current, max.	0.5 mA	0.5 mA	0.5 mA
<b>Parallel switching of two outputs</b>			
• for uprating	No	No	No
• for redundant control of a load	Yes	Yes	Yes
<b>Switching frequency</b>			
• with resistive load, max.	100 Hz	100 Hz	100 Hz
• with inductive load, max.	0.5 Hz	0.5 Hz	0.5 Hz
• on lamp load, max.	1 Hz	1 Hz	1 Hz
<b>Total current of the outputs (per group)</b>			
<b>all mounting positions</b>			
- up to 55 °C, max.	4 A	4 A	4 A

### Overview

- Expansion modules with analog inputs and outputs for connecting sensors/actuators
- With diagnostics functionality, limit values and substitute values

### Ordering data

Ordering data	Article No.	Ordering data	Article No.
<b>4AI U analog input module</b> High Feature, $\pm 10$ V; $\pm 5$ V; 0 to 10 V; 1 to 5 V, channel-specific diagnostics, including bus module. Connection module must be ordered separately	6ES7144-4FF01-0AB0	<b>4AO U analog output module</b> High Feature, $\pm 10$ V; 0 to 10 V; 1 to 5 V, channel-specific diagnostics, including bus module. Connection module must be ordered separately	6ES7145-4FF00-0AB0
<b>4AI I analog input module</b> High Feature, $\pm 20$ mA; 0 to 20 mA; 4 to 20 mA, channel-specific diagnostics, including bus module. Connection module must be ordered separately	6ES7144-4GF01-0AB0	<b>4AO I analog output module</b> High Feature, $\pm 20$ mA; 0 to 20 mA; 4 to 20 mA, channel-specific diagnostics, including bus module. Connection module must be ordered separately	6ES7145-4GF00-0AB0
<b>4AI RTD analog input module</b> High Feature; resistances: 150, 300, 600 and 3000 Ohm; resistance thermometer: Pt100, 200, 500, 1000, Ni100, 120, 200, 500 and 1000; channel-specific diagnostics, incl. bus module. Connection module must be ordered separately	6ES7144-4JF00-0AB0	<b>Accessories</b>	
<b>Analog input module 4AI TC</b> High Feature; thermocouples: Type B, E, J, K, L, N, R, S, T; voltage measurement $\pm 80$ mV; channel diagnostics, including bus module. Connection module must be ordered separately	6ES7144-4PF00-0AB0	<b>CM IO 4 x M12 connection module</b> 4 M12 sockets for connecting digital or analog sensors or actuators to ET 200pro	6ES7194-4CA00-0AA0
		<b>M12 compensation connectors</b> With integral Pt100 for reference point compensation when connecting thermocouples	6ES7194-4AB00-0AA0
		<b>Module identification labels</b> For color coding of the CM IOs in the colors of white, red, blue and green; pack with 100 units each	6ES7194-4HA00-0AA0
		<b>M12 sealing cap</b> For protection of unused M12 connections with ET 200pro	3RX9802-0AA00

Article number	<b>6ES7144-4FF01-0AB0</b> ET 200pro, EM 4AI-U HF	<b>6ES7144-4GF01-0AB0</b> ET 200pro, EM 4AI-I HF	<b>6ES7144-4JF00-0AB0</b> ET 200pro, EM 4 AI-RTD HF	<b>6ES7144-4PF00-0AB0</b> ET 200pro, EM 4 AI-TC HF
<b>Supply voltage</b>				
Rated value (DC)	24 V	24 V	24 V	24 V
Reverse polarity protection	Yes; against destruction	Yes; against destruction	Yes; against destruction	Yes; against destruction
<b>Input current</b>				
from supply voltage 1L+, max.	40 mA; Typical	40 mA; Typical	27 mA; Typical	34 mA; Typical
from backplane bus 3.3 V DC, max.	12 mA; Typical	12 mA; Typical	10 mA; Typical	20 mA; Typical
<b>Encoder supply</b>				
Number of outputs	4	4		
Short-circuit protection	Yes; per module, electronic to frame	Yes; per module, electronic to frame		
<b>Output current</b>				
• up to 55 °C, max.	1 A	1 A		
<b>Analog inputs</b>				
Number of analog inputs	4	4	4	4
permissible input voltage for voltage input (destruction limit), max.	35 V			20 V
permissible input current for current input (destruction limit), max.		40 mA		
Constant measurement current for resistance-type transmitter, typ.			1.25 mA; 1.25 / 0.5 mA depending on measuring range	
Cycle time (all channels) max.	5 ms	10 ms	83 ms; 83 ms at 50 Hz; 69 ms at 60 Hz	Number of active channels per module x basic conversion time
Technical unit for temperature measurement adjustable			Yes; Degrees Celsius/degrees Fahrenheit	Yes; °C/°F/K
<b>Input ranges (rated values), voltages</b>				
• 0 to +10 V	Yes			
• 1 V to 5 V	Yes			
• -10 V to +10 V	Yes			
• -5 V to +5 V	Yes			
• -80 mV to +80 mV				Yes
<b>Input ranges (rated values), currents</b>				
• 0 to 20 mA		Yes		
• -20 mA to +20 mA		Yes		
• 4 mA to 20 mA		Yes		
<b>Input ranges (rated values), thermocouples</b>				
• Type B				Yes
• Type E				Yes
• Type J				Yes
• Type K				Yes
• Type L				Yes
• Type N				Yes
• Type R				Yes
• Type S				Yes
• Type T				Yes
<b>Input ranges (rated values), resistance thermometer</b>				
• Cu 10			No	
• Ni 100			Yes	
• Ni 1000			Yes	
• Ni 120			Yes	
• Ni 200			Yes	
• Ni 500			Yes	
• Pt 100			Yes	
• Pt 1000			Yes	
• Pt 200			Yes	
• Pt 500			Yes	

**Technical specifications**

Article number	<b>6ES7144-4FF01-0AB0</b> ET 200pro, EM 4AI-U HF	<b>6ES7144-4GF01-0AB0</b> ET 200pro, EM 4AI-I HF	<b>6ES7144-4JF00-0AB0</b> ET 200pro, EM 4 AI-RTD HF	<b>6ES7144-4PF00-0AB0</b> ET 200pro, EM 4 AI-TC HF
<b>Input ranges (rated values), resistors</b>				
• 0 to 150 ohms			Yes	
• 0 to 300 ohms			Yes	
• 0 to 600 ohms			Yes	
• 0 to 3000 ohms			Yes	
<b>Thermocouple (TC)</b>				
<b>Temperature compensation</b>				
- internal temperature compensation				Yes
- external temperature compensation with compensations socket				Yes
<b>Characteristic linearization</b>				
• parameterizable			Yes	
- for resistance thermometer			Ptxxx, Nixxx	
<b>Cable length</b>				
• shielded, max.	30 m	30 m	30 m	30 m
<b>Analog value generation for the inputs</b>				
Measurement principle	integrating	integrating	integrating	integrating
<b>Integration and conversion time/resolution per channel</b>				
• Resolution with overrange (bit including sign), max.	15 bit; 15 bit + sign at ±10 V, at ±5 V; 15 bit at 0 V to 10 V, at 1 V to 5 V	15 bit; 15 bit + sign at ±10 V, at ±5 V; 15 bit at 0 V to 10 V, at 1 V to 5 V	15 bit; at 150, 300, 600 and 3 000 ohms; otherwise 15 bits + sign	15 bit; + sign
• Integration time (ms)	0,3 / 16,7 / 20 / 60	0,3 / 16,7 / 20 / 60		
• Interference voltage suppression for interference frequency f1 in Hz	16,67 / 50 / 60 / 3 600	16,67 / 50 / 60 / 3 600		
• Conversion time (per channel)	1.1 ms	1.1 ms	20.625 ms; 20.625 ms at 50 Hz; 17.25 ms at 60 Hz	4.7/19/22/102 ms
<b>Smoothing of measured values</b>				
• parameterizable	Yes	Yes	Yes	Yes
<b>Encoder</b>				
<b>Connection of signal encoders</b>				
• for voltage measurement	Yes			Yes
• for current measurement as 2-wire transducer		Yes		
• for current measurement as 4-wire transducer		Yes		
• for resistance measurement with two-wire connection			Yes; Line resistances are also measured	
• for resistance measurement with three-wire connection			Yes	
• for resistance measurement with four-wire connection			Yes	
<b>Errors/accuracies</b>				
Linearity error (relative to input range), (+/-)	0.0075 %	0.0075 %	0.05 %	0.01 %
Temperature error (relative to input range), (+/-)	0.00075 %/K	0.00075 %/K	0.002 %/K	0.0004 %/K; Positive temperature
Crosstalk between the inputs, min.	-70 dB	-70 dB	-50 dB	-90 dB; max.
Repeat accuracy in steady state at 25 °C (relative to input range), (+/-)	0.004 %	0.004 %	0.015 %	0.01 %
<b>Operational error limit in overall temperature range</b>				
• Voltage, relative to input range, (+/-)	0.1 %			0.12 %; Positive temperature
• Current, relative to input range, (+/-)		0.1 %		
• Resistance thermometer, relative to input range, (+/-)			0.175 %

## I/O systems

SIMATIC ET 200 systems without control cabinet

SIMATIC ET 200pro

I/O modules > Fail-safe expansion modules > Fail-safe digital expansion modules

### Overview

Fail-safe digital inputs/outputs with IP65/66/67 degree of protection for application on the machine level without control cabinet.

#### Fail-safe digital inputs

- For fail-safe reading of sensor information (1 or 2 channels)
- Provide integral discrepancy evaluation for 2-out-of-2 signals
- Internal sensor supplies (incl. test function) available

#### Fail-safe digital outputs

- Fail-safe 2-channel activation (switching to P/M potential) of actuators
- Actuators can be driven by up to 2 A

All modules are certified up to SIL 3 (IEC 61508) and feature detailed diagnostics.

The modules support PROFIsafe in both PROFIBUS and PROFINET configurations. They can be used with IM151-7 F-CPU, CPU31xF-2 DP, CPU31xF-2 PN/DP and CPU416F-2.

#### Fail-safe digital input module 8/16 F-DI PROFIsafe

6ES7148-4FA00-0AB0

24 V DC, including bus module.  
Connection module must be ordered separately

#### Fail-safe digital input/output module 4/8 F-DI, 4 F-DO 2 A

6ES7148-4FC00-0AB0

24 V DC, including bus module.  
Connection module must be ordered separately

#### Fail-safe electronic module F-Switch PROFIsafe

6ES7148-4FS00-0AB0

Three fail-safe switching to PP potential outputs for safe switching of the rear panel busbar (2L+, F0, F1);  
two fail-safe digital inputs, 45 mm; usable up to SIL3 (IEC 61508)

#### Accessories

##### Connection module

6ES7194-4DA00-0AA0

For the fail-safe electronic module F-Switch PROFIsafe

##### Connection module

6ES7194-4DC00-0AA0

For the fail-safe electronic module 4/8 F-DI/4 F-DO, 24 V DC/2 A

##### Connection module

6ES7194-4DD00-0AA0

For the fail-safe electronic module 8/16 F-DI, 24 V DC

#### PROFIBUS DP interface module IM154-2

6ES7154-2AA01-0AB0

Including termination module

#### PROFINET interface module IM154-4 PN

6ES7154-4AB10-0AB0

Including termination module

#### M12 sealing cap

3RX9802-0AA00

For protection of unused M12 connections with ET 200pro

## Overview

The SIMATIC RF170C is a communications module for connecting the SIMATIC identification systems to the ET 200pro distributed I/O system. The readers of all RFID systems as well as the MV400 optical readers and MV300 optical handheld readers can be operated on the RF170C. In addition, the RF170C provides a universal RS232/RS422 interface for connecting devices using the Freeprot protocol.

Thanks to the high degree of protection and ruggedness, ET 200pro is particularly suitable for machine-level use. The modular structure with PROFIBUS and PROFINET connection systems allows it to be used in all applications. The uniform plug-in connection system ensures rapid commissioning.

## Overview

**Power supply for ET200pro:**

- 3-phase, 24 V DC/8 A

The SIMATIC ET200pro PS power supply unit with IP67 degree of protection is used as the electronics/encoder supply and load voltage supply of the new SIMATIC ET 200pro distributed I/O system for use close to the machine without a cabinet. With a second connector for looping the input voltage.

**Product highlights**

- 3-phase, 24 V DC/8 A
- Wide-range input, input voltage 340 ... 550 V
- Up to 88% efficiency
- With signaling contact for "24 V OK" and "Overtemperature"
- Status indicator on the device by means of LED (green = "24 V OK")
- Temperature range from -25 °C to +55 °C

## Ordering data

**SIMATIC ET 200pro PS**

Stabilized power supply in distributed I/O system design, permitting the loop-through of energy to further modules; with degree of protection IP67; Input: 3 AC 400-480 V Output: 24 V DC/8 A

**Accessories****Power connector**

For connecting to the distributed I/O system

- For X1 (6 mm<sup>2</sup>)
- For X2 (4 mm<sup>2</sup>)

other information	Specifications at rated input voltage and ambient temperature +25 °C (unless otherwise specified)

**Overview****ET 200pro motor starters in I/O system ET 200pro**

SIMATIC ET 200pro is the modular I/O system with high degree of protection IP65/66/67 for local, cabinet-free use. The ET 200pro motor starters with the high degree of protection IP65 are an integral part of ET 200pro.

ET 200pro motor starter: Isolator module, Standard starter and High Feature starter mounted on a wide module rack

**ET 200pro motor starters** (see pages 10/404 and 10/405)

- Only two variants up to 5.5 kW
- All settings can be parameterized by bus
- Comprehensive diagnostic signals
- Support for PROFlenergy
- Overload can be acknowledged by remote reset
- Current unbalance monitoring
- Stall protection
- EMERGENCY START function on overload
- Current value transmission by bus
- Current limit monitoring
- Full support of acyclic services
- Direct-on-line or reversing starters
- Power bus connection can be plugged in using Han Q4/2 plug-in connectors
- Motor feeder with Han Q8/0 connector
- Conductor cross-section up to 6 x 4 mm<sup>2</sup>
- 25 A per segment (power looped through using jumper plug)
- In the Standard and High Feature versions (with 4 DI on-board)
- Electromechanical switching and electronic switching
- Electronic starter for direct activation or with integrated soft starter function
- Supplied with 400 V AC brake contact as an option
- Temperature sensor can be connected (Thermoclick or PTC type A)
- Provision of the motor current in PROFlenergy format to higher-level systems, motor current shutdown in dead times using PROFlenergy

**More information**

Homepage, see [www.siemens.com/ET200pro](http://www.siemens.com/ET200pro)

Industry Mall, see [www.siemens.com/product?ET200pro](http://www.siemens.com/product?ET200pro)

Further components in the ET 200pro distributed I/O system

- Interface modules, Zentralbaugruppen, Peripheriemodule, ET 200pro PS see from page 10/366
- SIMATIC ET 200pro FC-2 frequency converter see page 10/416

**ET 200pro isolator modules** (see page 10/406)

The isolator module with switch disconnecter function is used for safe disconnection of the 400 V operational voltage during repair work in the plant and provides an integrated group fusing function (i.e. additional group short-circuit protection for all subsequently supplied motor starters).

Depending on the power distribution concept, all stations can be equipped with an isolator module as an option.

**Safety applications**

Safety Solution local (see page 10/409)

With the Safety local modules

- Safety local isolator module and
- 400 V disconnecting module with an appropriate connection, safety level PL e (according to ISO 13849-1) can be reached.

Safety Solution PROFIsafe (see page 10/410)

With the Safety PROFIsafe modules

- F-Switch and
- 400 V disconnecting module with an appropriate connection, safety levels SIL 3 (according to IEC 62061) and PL e (according to ISO 13849-1) can also be reached.

**Functionality**

With the ET 200pro motor starters, any three-phase loads can be protected and switched.

The ET 200pro motor starters are available with mechanical and also electronic contacts.

The ET 200pro electromechanical starters are offered as direct-on-line starters (DSe) and reversing starters (RSe) as **Standard** and **High Feature** versions. There are device versions with or without control for externally fed brakes with 400 V AC.

Compared with the Standard motor starters, the **High Feature, mechanical** motor starter also has:

- Four digital inputs
- Advanced parameterization options

The ET 200pro electronic starters are offered as direct-on-line starters (sDSSSte/sDSte) and reversing starters (sRSSSte/sRSte) in the High Feature version.

Compared with the High Feature mechanical motor starters, the **High Feature, electronic** motor starter also has:

- Soft starting and smooth ramp-down function
- Deactivated soft start function as an electronic starter for applications with a high switching frequency
- Advanced parameterization options

## I/O systems

SIMATIC ET 200 systems without control cabinet  
SIMATIC ET 200pro

### ET 200pro motor starters > General data

As a result of the protection concept with solid-state overload evaluation and the use of SIRIUS switching devices, size S00, additional advantages are realized on the Standard and High Feature motor starters – advantages that soon make themselves positively felt particularly in manufacturing processes with high plant stoppage costs:

- Configuration is made easier by the fine modular structure with ET 200pro. When using ET 200pro motor starters, the parts list per load feeder is reduced to two main items: the bus module and the motor starter. This makes the ET 200pro ideal for modular machine concepts or solutions for conveying systems and in machine-tool building.
- Expansions are easily possible through the subsequent adding of modules. The innovative plug-in technology also does away with the wiring needed up to now. Through the hot swapping function (disconnection and connection during operation) a motor starter can be replaced within seconds if necessary, without having to shut down the ET 200pro station and with it the process in the plant. The motor starters are therefore recommendable in particular for applications with special demands on availability. Storage costs are also optimized by the low level of variance (two units up to 5.5 kW).
- With four locally acting inputs available on the High Feature motor starter it is possible to realize autonomous special functions that work independently of the bus and the higher level control system, e.g. as a quick stop on gate valve controls or limit position disconnectors. In parallel with this, the states of these inputs are signaled to the control system.

## I/O systems

SIMATIC ET 200 systems without control cabinet

SIMATIC ET 200pro

ET 200pro motor starters > General data

### Benefits

ET 200pro motor starters provide the following advantages:

- High flexibility thanks to a modular and compact design
- Little variance among all motor starter versions (two units up to 5.5 kW)
- Extensive parameterization using STEP 7 HW Config
- Increase of plant availability through fast replacement of units (easy mounting and plug-in technology)
- Extensive diagnostics and information for preventive maintenance
- Parameterizable inputs for on-site control functions (High Feature)
- Cabinet-free design thanks to high degree of protection IP65

### Application

The SIMATIC ET 200pro motor starters are ideal for the use of several spatially concentrated distributed drive solutions in which several motors, or digital or analog sensors and actuators are addressed from a distributed station. They are perfectly suited for protecting and switching any AC loads.

#### **Application areas**

The SIMATIC ET 200pro motor starters are suitable for numerous sectors of industry, e.g. machinery and plant engineering or conveying applications.

#### ***Use of ET 200pro motor starters in conjunction with IE3/IE4 motors***

##### Note:

For the use of ET 200pro motor starters in conjunction with highly energy-efficient IE3/IE4 motors, please observe the information on dimensioning and configuring, [see Application Manual](#).

<sup>1)</sup> Only functions when used together with the backplane bus module and the wide module rack. The backplane bus module and the wide module rack must be ordered separately (see "Accessories for ET 200pro motor starters", page 10/415).

<sup>2)</sup> The solid-state motor starters can be used not only as solid-state motor starters with a high level of switching frequency but also as fully fledged soft starters for soft starting and stopping. The changeover from motor starter to soft starter takes place through reparameterization in HW Config. Depending on the setting, this results in the following current ranges:

- Parameterization as solid-state motor starter: 0.15 to 2 A and 1.5 to 9 A (4 kW)
- Parameterization as soft starter: 0.15 to 2 A and 1.5 to 12 A (5.5 kW).

## I/O systems

SIMATIC ET 200 systems without control cabinet  
SIMATIC ET 200pro

ET 200pro motor starters > ET 200pro isolator modules **IE3/IE4 ready**

### Overview

The isolator module with integrated group fusing function (i.e. additional group short-circuit protection for all subsequently supplied motor starters) and switch disconnecter function is used to safely disconnect the 400 V operating voltage during repair work in the plant.

Depending on the power distribution concept, all stations can be equipped with an isolator module as an option.

The following properties apply to the isolator module:

- Increase of plant availability through fast replacement of units (easy mounting and plug-in technology)
- Cabinet-free design thanks to high degree of protection IP65

The isolator module is available in addition in a safety version (see "Safety local isolator module" on page 10/407).

#### ET 200pro isolator modules, mechanical

3RK1304-0HS00-6AA0

#### Isolator modules<sup>1)</sup>

Rated operational current 25 A

3RK1304-0HS00-6AA0

<sup>1)</sup> Only functions when used together with the related 110 mm backplane bus module and the wide module rack. The backplane bus module and the wide module rack must be ordered separately (see page 10/415).

**Overview****Safety Solution local**

With the Safety local modules

- Safety local isolator module and
  - 400 V disconnecting module
- with an appropriate connection, safety level PL e (according to ISO 13849-1) can be reached.

ET 200pro motor starter (Safety Solution local): Safety local isolator module, disconnecting module, Standard starter and High Feature starter mounted on a wide module rack

**Safety local isolator module**

The Safety local isolator module is a repair switch with integrated safety evaluation functions that can be parameterized using DIP switches.

It is used for

- Connection of a 1- or 2-channel EMERGENCY STOP circuit up to PL e (protective door or EMERGENCY STOP pushbuttons) and parameterizable start behavior
- For controlling the 400 V disconnecting module by means of a safety rail signal

**400 V disconnecting module**

The 400 V disconnecting module enables the safe disconnection of an operational voltage of 400 V up to PL e. For operation in a Safety Solution local application, it functions only in combination with the Safety local isolator module.

For operation in a Safety PROFIsafe application it functions only in combination with the F-Switch.

**Functionality**Safety local isolator module

The Safety local isolator module features the same functions as a standard isolator module with an additional local safety function.

The Safety local isolator module contains a 3TK2841 module and is equipped with M12 terminals for the connection of external safety components.

Terminals 1 and 2 can be used to connect either 1-channel or 2-channel EMERGENCY STOP circuits or protective door circuits (IN 1, IN 2).

For monitored starts, an external START switch can be connected to terminal 3.

The required safety functions can be set using two slide switches located under the left M12 opening.

In the event of an EMERGENCY STOP, the Safety local isolator module trips the downstream 400 V disconnecting module. This safely separates the 400 V circuit up to PL e.

In combination with the 400 V disconnecting module, the Safety local isolator module can be used for safety applications up to PL e.

400 V disconnecting module

The 400 V disconnecting module can be used together with the Safety local isolator module for local safety applications and together with the F-Switch for PROFIsafe safety applications.

It contains two contactors connected in series for safety-related disconnection of the main circuit.

The auxiliary circuit supply of the device is over a safety power rail in the backplane bus module.

The 400 V disconnecting module can be used in conjunction with the Safety local isolator module or with the F-Switch for safety applications up to PL e.

- 2) Only in combination with the special backplane bus module for the Safety Local isolator module (see "Accessories for ET 200pro motor starters", page 10/415).
- 3) The 400 V disconnecting module functions only when used together with the Safety local isolator module or with the F-Switch.
- 4) The 400 V disconnecting module functions only when used together with the backplane bus module and the wide module rack. The backplane bus module and the wide module rack must be ordered separately (see "Accessories for ET 200pro motor starters", page 10/415).

**I/O systems**

SIMATIC ET 200 systems without control cabinet  
SIMATIC ET 200pro

ET 200pro Safety motor starters Solutions local/PROFIsafe > Safety modules PROFIsafe **IE3/IE4 ready**

**Overview****Safety Solution PROFIsafe**

With the Safety PROFIsafe modules

- F-Switch and
- 400 V disconnecting module

With an appropriate connection, safety levels SIL 3 (according to IEC 62061) and PL e (according to ISO 13849-1) can be reached.

**F-Switch PROFIsafe**

Fail-safe digital inputs/outputs in degrees of protection IP65 to IP67 for near-machine, cabinet-free use.

Fail-safe digital inputs

- For the fail-safe reading in of sensor information (1-/2-channel)
- Including integrated discrepancy evaluation for 2V2 signals
- Internal sensor supplies (incl. testing) available

Fail-safe digital outputs

- Three fail-safe switching to PP potential outputs for safe switching of the backplane busbars

The F-Switch is certified up to SIL 3/PL e and has detailed diagnostics.

It supports PROFIsafe in PROFIBUS configurations as well as in PROFINET configurations.

Note:

Safety characteristics, see <https://support.industry.siemens.com/cs/ww/en/view/109739348>

Functionality

The PROFIsafe F-Switch is a fail-safe solid-state module for PROFIsafe safety applications. It has two fail-safe inputs and outputs for safe switching of the 24 V supply over backplane busbars. In combination with the 400 V disconnecting module, fail-safe disconnection of ET 200pro motor starters is possible in PROFIsafe applications up to SIL 3/PL e.

**400 V disconnecting module**

## I/O systems

SIMATIC ET 200 systems without control cabinet  
SIMATIC ET 200pro

### Accessories for ET 200pro motor starters

#### Power bus

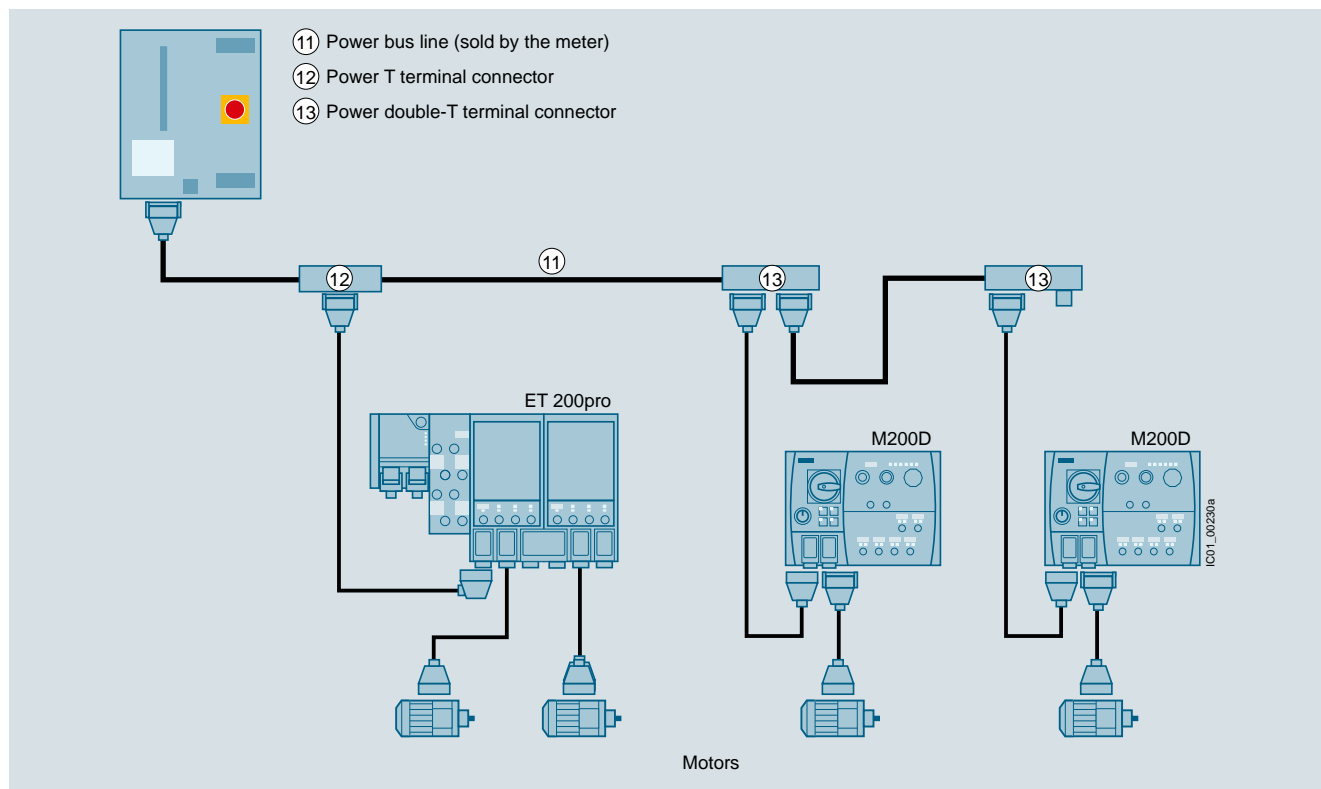

The power supply to the field devices (ET 200pro motor starters, M200D motor starters) is provided via the power bus, in which the power T terminal connectors or power double-T terminal connectors are connected by power bus cables.

#### Feeders

From the terminal connectors, spur lines with Han Q4/2 plugs lead to the field devices, from which the motors are supplied with power via motor connection cables.

#### Interruption-free thanks to power terminal connectors

In finger-safe connection technology the power T terminal connectors and power double-T terminal connectors connect the components of a feeder to the power bus. They ensure interruption-free operation, i.e. the power bus is not interrupted when the components are plugged in.

Power supply to the motors via the power bus with power T and double-T terminal connectors linked by power bus cables, spur lines to the field devices (motor starters), and power loop-through connections to the motors via motor connection cables

#### Motor control via PROFIBUS

The interface modules (IM) for PROFIBUS can be combined with three different connection modules for connecting PROFIBUS DP and the power supply:

- Direct connection with cable bushings
- ECOFAST connection with hybrid fieldbus cables (with two copper cores for data transmission with PROFIBUS DP, and four copper cores for the power supply), and ECOFAST connectors (HanBrid)<sup>1)</sup>
- M12, 7/8" connection
  - with M12 connecting cable and M12 plugs for data transmission with PROFIBUS DP
  - with 7/8" connecting cable and 7/8" plugs for the power supply<sup>2)</sup>

For the connection modules with the associated accessories, see "Accessories ET 200pro interface modules", page 10/367.

#### Motor control via PROFINET

For the connection modules with the associated accessories, see "Accessories for ET 200pro interface modules", page 10/371 onwards.

<sup>1)</sup> Hybrid fieldbus connections with HanBrid sockets designed as cabinet bushings transmit data and energy from the control cabinet (IP20) to the field (IP65). They are the interface for jointly routing PROFIBUS DP and the auxiliary voltages into the hybrid fieldbus cable (see <https://mall.industry.siemens.com/mall/en/WW/Catalog/Products/10314206?tree=CatalogTree>).

<sup>2)</sup> On the control cabinet bushings with two M12 sockets for the PROFIBUS M12 connecting cables (see <https://mall.industry.siemens.com/mall/en/WW/Catalog/Products/10314206?tree=CatalogTree>), the 24 V supply of the motor starters is implemented via separate 7/8" connecting cables.

## I/O systems

SIMATIC ET 200 systems without control cabinet  
SIMATIC ET 200pro

### SIMATIC ET 200pro FC-2 frequency converter

#### Overview

SIMATIC ET 200pro FC-2 frequency converter

The SIMATIC ET 200pro FC-2 frequency converter has the design of a SIMATIC ET 200pro module. It supplements the SIMATIC ET 200pro system range with distributed, speed-controlled drives. It is suitable for the open-loop and closed-loop control of asynchronous (induction) motors in a wide range of industrial applications. It is predestined for conveyor technology applications using drives networked via PROFIBUS and PROFINET, in particular in distributed designs without control cabinet with high degree of protection (IP65), when combining several drives. The modular, service-friendly concept is ideally suited to manufacturing processes with high plant standstill costs.

#### Reasons for using distributed drive systems:

- Modular drive solutions – therefore standardized mechatronic elements that can be individually tested
- A control cabinet is not required, resulting in a smaller space requirement and lower cooling requirements
- Long motor cables between converter and motor are not required
  - Less power losses
  - Reduced noise radiation
  - Reduced costs for shielded cables
  - No additional filters
- Distributed configurations offer considerable benefits for conveyor systems with their extensive coverage (e.g. in the automotive and logistics industries)

#### Siemens family of distributed drives

Siemens offers an innovative portfolio of frequency converters to optimally implement distributed drive solutions. The strengths of the individual members of the drive family permit simple adaptation to the widest range of application demands:

- Identical connection systems
- Standard commissioning and engineering tools for the family of distributed drives:
  - SINAMICS G110M frequency converters
  - SINAMICS G110D frequency converters
  - SINAMICS G115D frequency converters
  - SINAMICS G120D frequency converters
  - SIMATIC ET 200pro FC-2 frequency converters
  - SIRIUS M200D motor starters

#### Safety Integrated

The distributed SIMATIC ET 200pro FC-2 frequency converters are already equipped with the integrated STO (Safe Torque Off) safety function, certified in accordance with IEC 61508 SIL 2 as well as EN ISO 13849-1 PL d and Category 3. It can be activated locally via the F-RSM or by means of PROFIsafe.

#### STARTER commissioning tool

The STARTER commissioning tool (V4.4 and higher) plus the corresponding SINAMICS Support Package (SSP) supports the commissioning and maintenance of SIMATIC ET 200pro FC-2 frequency converters.

The operator guidance combined with comprehensive, user-friendly functions for the relevant drive solution allow you to commission the device quickly and easily.

#### Engineering Framework STEP 7 Classic (V5.5 and higher)

Hardware Support Packages (HSP) are available to integrate SIMATIC ET 200pro FC-2 in STEP7 Classic.

#### Engineering Framework TIA Portal (as from V13 SP1)

TIA Portal is a powerful engineering framework providing full access to the whole digitized automation.

Hardware Support Packages (HSP) are available to integrate SIMATIC ET 200pro FC-2 in TIA Portal.

Degree of protection	IP65				
Operating temperature	0 ... 55 °C (32 ... 131 °F)				
Mounting position	Vertical wall mounting (vertical alignment of the cooling fins)				
Dimensions (W x H x D)	155 mm x 246 mm x 248 mm (6.10 in x 9.69 in x 9.76 in)				
Weight, approx.	4 kg (8.8 lb)				
Standards					
Certificates of suitability	UL508C, cUL, CE, Low Voltage Directive 2014/35/EU, EMC Directive 2014/30/EU				

## Overview

Motor Starter ES for parameterization, monitoring, diagnostics and testing of motor starters

## More information

Industry Mall see [www.siemens.com/product?3ZS1](http://www.siemens.com/product?3ZS1)

Technical specifications and system requirements, see <https://support.industry.siemens.com/cs/ww/en/ps/16713/td>

Motor Starter ES is used for the startup, parameterization, diagnostics, documentation and preventive maintenance of SIMATIC ET 200S, ET 200pro, ECOFAST and M200D motor starters.

Interfacing is performed

- Via the local interface on the device
- With PROFIBUS DP-V1-capable motor starters from any point in PROFIBUS (applies to ET 200S DP V1/ET 200pro/ECOFAST/M200D)
- With PROFINET-capable motor starters from any point in PROFINET (applies to ET 200S DP V1/ET 200pro/M200D).

Using Motor Starter ES, the communication-capable motor starters are easily parameterized during startup, monitored during normal operation and successfully diagnosed for service purposes. Preventative maintenance is supported by a function for reading out diverse statistical data (e.g. operating hours, operating cycles, cut-off currents, etc.). The user is supported during these procedures with comprehensive Help functions and plain text displays.

Motor Starter ES can either be used as a stand-alone program or it can be integrated into STEP 7 via an Object Manager.

**Efficient engineering with three program versions**

The Motor Starter ES software program is available in three versions which differ in their user-friendliness, scope of functions and price.

Motor Starter ES	Basic	Standard	Premium
ET 200S High Feature PROFIBUS IM	✓	✓	✓
ET 200S High Feature PROFINET IM	✓	✓	✓

✓ Function available

-- Function not available

<sup>1)</sup> Only for STEP 7 V5.x

**Additional functions**Standard-compliant printouts

The software tool greatly simplifies machine documentation. It enables parameterization printouts according to EN ISO 7200. The elements to be printed are easy to select and group as required.

Easy creation of typicals

Typicals can be created for devices and applications with only minimum differences in their parameters. These typicals contain all the parameters which are needed for the parameterization. In addition it is possible to specify which of these parameters are fixed and which can be adapted, e.g. by the startup engineer.

Teleservice via MPI

The Motor Starter ES Premium version supports the use of MPI Teleservice (comprising the Teleservice software and various Teleservice adapters) for remote diagnostics of the devices. This facilitates diagnostics and maintenance, and it shortens response times for service purposes.

## I/O systems

SIMATIC ET 200 systems without control cabinet  
SIMATIC ET 200pro

### ET 200pro software > Motor Starter ES

#### Benefits

- Fast, error-free configuration and startup of motor starters even without extensive previous knowledge
- Transparent setting of the device functions and their parameters – online and offline
- Effective diagnostics functions on the soft starter and display of the most important measured values
- Trace function (oscilloscope function) for recording measured values and events (included in the Motor Starter ES Standard and Premium software version for M200D PROFIBUS and PROFINET).

### SIMATIC ET 200 systems without control cabinet

#### SIMATIC ET 200AL

##### Overview

SIMATIC ET 200AL video

[https://players.brightcove.net/1813624294001/70fecf0f-fbad-4fad-a077-d0e26af4d84c\\_default/index.html?videoId=6141316253001](https://players.brightcove.net/1813624294001/70fecf0f-fbad-4fad-a077-d0e26af4d84c_default/index.html?videoId=6141316253001)

##### Highlights

- Compact dimensions
- Low weight
- Safety-oriented collective shutdown of the outputs
- High degree of user-friendliness due to the following design features:
  - Flexible mounting in all positions possible due to screw fastening through the front or side
  - Direct installation on even surfaces or aluminum mounting rails
  - Labels for the identification of channels, modules and slots
  - Integrated cable tie opening
  - Clear and CAx-compliant interface designations
  - Uniform coloring of the system interfaces and system cables
  - 1:1 assignment of channel status LED, I/O socket and label
  - Pin assignment on the side
- I/O module portfolio comprising digital and analog modules, digital fail-safe module, IO-Link communications module and IO-Link I/O modules
- Ambient temperature range from -30 °C/-25 °C to +55 °C
- Extensive system functions
  - All interface and I/O modules support firmware update
  - Configuration control (option handling) via user software
  - System support of PROFlenergy for power saving purposes
  - Consistent use of identification and maintenance data IM0 to IM3/4 (electronic rating plate) for fast electronic and unambiguous identification of individual modules (Article No., serial number, etc.).

- Modular, distributed I/O system with compact I/O modules in IP65/67.
- Especially easy and flexible installation, even in extremely confined spaces.
- Easy wiring
- Easy commissioning
- SIMATIC ET 200AL consists of the following components:
  - Interface module for communication with IO Controllers on PROFINET.
  - Interface module for communication with all masters on the PROFIBUS.
  - BusAdapter for connection to the ET 200SP I/O system.
  - Various I/O modules, 30 mm and 45 mm wide.
  - IO-Link I/O modules for connection to IO-Link master
- Maximum configuration of an ET 200AL station:
  - Up to 32 I/O modules with PROFINET or PROFIBUS in any combination
  - Up to 16 I/O modules at the ET 200SP in any combination
- Connection of the modules via an internal backplane bus established using bus cables (ET connection).

## Overview

- Interface module for connecting ET 200AL to PROFIBUS
- As DPV1 slave it handles the data exchange with the PROFIBUS master in the PLC
- Max. 32 I/O modules can be connected
- Max. data volume of 244 bytes, for input and output data respectively
- Automatic detection of baud rate 9.6 kBd ... 12 MBd
- PROFIBUS addresses 1 ... 99; can be set by means of rotary switch
- Identification and maintenance data IM0 ... IM3
- Firmware update
- Configuration management (option handling)

Article number	<b>6ES7157-1AA00-0AB0</b> ET 200AL, IM 157-1 DP
<b>General information</b>	
Product type designation	IM 157-1 DP
<b>Product function</b>	
• I&M data	Yes; I&M0 to I&M3
<b>Engineering with</b>	
• STEP 7 TIA Portal configurable/ integrated from version	STEP 7 V13 SP1 or higher
• STEP 7 configurable/integrated from version	From V5.5 SP4 Hotfix 3
• PROFIBUS from GSD version/ GSD revision	GSD as of Revision 5
<b>Supply voltage</b>	
<b>Load voltage 1L+</b>	
• Rated value (DC)	24 V
• Reverse polarity protection	Yes; against destruction
<b>Input current</b>	
Current consumption (rated value)	50 mA
from load voltage 1L+ (unswitched voltage)	4 A; Maximum value
from load voltage 2L+, max.	4 A; Maximum value
<b>Address area</b>	
<b>Address space per station</b>	
• Address space per station, max.	244 byte
<b>Interfaces</b>	
Number of PROFIBUS interfaces	1
<b>1. Interface</b>	
Interface type	PROFIBUS DP
<b>Interface types</b>	
• RS 485	Yes
• M12 port	Yes; 2x M12 B-coded
<b>Protocols</b>	
• PROFIBUS DP slave	Yes
<b>Interface types</b>	
<b>RS 485</b>	
• Transmission rate, max.	12 Mbit/s
<b>PROFIBUS DP</b>	
<b>Services</b>	
- SYNC capability	Yes
- FREEZE capability	Yes
- Direct data exchange (slave-to-slave communication)	Yes
- DPV0	Yes
- DPV1	Yes

Article number	<b>6ES7157-1AA00-0AB0</b> ET 200AL, IM 157-1 DP
<b>Interrupts/diagnostics/ status information</b>	
Diagnostics function	Yes
<b>Alarms</b>	
• Diagnostic alarm	Yes
<b>Diagnostics indication LED</b>	
• RUN LED	Yes; green LED
• ERROR LED	Yes; red LED
• MAINT LED	Yes; Yellow LED
• Connection display DP	Yes; green LED
<b>Potential separation</b>	
between the load voltages	Yes
between PROFIBUS DP and all other circuit components	Yes
<b>Standards, approvals, certificates</b>	
Suitable for safety-related tripping of standard modules	Yes; From FS01
<b>Highest safety class achievable for safety-related tripping of standard modules</b>	
• Performance level according to ISO 13849-1	PL d
• Category according to ISO 13849-1	Cat. 3
• SILCL according to IEC 62061	SILCL 2
<b>Ambient conditions</b>	
<b>Ambient temperature during operation</b>	
• min.	-30 °C
• max.	55 °C
<b>Connection method</b>	
Design of electrical connection for supply voltage	M8, 4-pole
<b>ET-Connection</b>	
• ET-Connection	M8, 4-pin, shielded
<b>Dimensions</b>	
Width	45 mm
Height	159 mm
Depth	46 mm
<b>Weights</b>	
Weight, approx.	211 g

## Overview

- Interface module for connecting ET 200AL to PROFINET
- Handles data exchange with the PROFINET I/O controller in the PLC
- Max. 32 I/O modules can be connected
- Max. data volume of 1430 bytes, for input and output data respectively
- Shortest bus cycle 250 µs
- Automatic power-up by means of topology recognition
- Autocrossover
- Shared device on up to 4 IO controllers
- Support for the MRP (media redundancy protocol) and MRPD (media redundancy with planned duplication) functions
- Identification and maintenance data IM0 ... IM4
- Firmware update
- Configuration management (option handling)
- PROFlenergy

### Overview

- 30 and 45 mm wide modules with parameters and diagnostic functions
- 8-channel digital input module with M8 or M12 connection
- 16-channel digital input module with M12 connection
- 8-channel digital input/output module with M8 or M12 connection
- 16-channel digital input / output module with M12 connection
- 8-channel digital output module 2A with M12 connection

<b>Load voltage 2L+</b>			
• Rated value (DC)	24 V	24 V	24 V
• Reverse polarity protection	Yes; against destruction; load increasing	Yes; against destruction; load increasing	Yes; Against destruction; encoder power supply outputs applied with reversed polarity, loads pick up
<b>Input current</b>			
Current consumption (rated value)	40 mA; without load	40 mA; without load	75 mA; without load
from load voltage 1L+ (unswitched voltage)	4 A; Maximum value	4 A; Maximum value	4 A; Maximum value
from load voltage 2L+, max.	4 A; Maximum value	4 A; Maximum value	4 A; Maximum value
<b>Encoder supply</b>			
Number of outputs	4	4	8
<b>24 V encoder supply</b>			
• Short-circuit protection	Yes; per module, electronic	Yes; per module, electronic	Yes; Per load voltage, electronic
• Output current, max.	0.7 A; Total current of all encoders	0.7 A; Total current of all encoders	1.4 A; Total current of all encoders, max. 0.7 A per load voltage
<b>Digital inputs</b>			
Number of digital inputs	4; Parameterizable as DIQ	4; Parameterizable as DIQ	16; Parameterizable as DIQ
Input characteristic curve in accordance with IEC 61131, type 3	Yes	Yes	Yes
<b>Number of simultaneously controllable inputs</b>			
<b>all mounting positions</b>			
- up to 55 °C, max.	4	4	16
<b>Digital input functions, parameterizable</b>			
• Freely usable digital input			Yes
• Counter			Yes
<b>Input voltage</b>			
• Rated value (DC)	24 V	24 V	24 V
• for signal "0"	-3 to +5V	-3 to +5V	-3 to +5V
• for signal "1"	+11 to +30V	+11 to +30V	+11 to +30V
<b>Input current</b>			
• for signal "1", typ.	3.2 mA	3.2 mA	3 mA
<b>Input delay (for rated value of input voltage)</b>			
<b>for standard inputs</b>			
- parameterizable			Yes
<b>for technological functions</b>			
- parameterizable			Yes
<b>Digital outputs</b>			
Number of digital outputs	8; 4 DQ fixed, 4 DIQ parameterizable	8; 4 DQ fixed, 4 DIQ parameterizable	16; Parameterizable as DIQ
• in groups of	4; 2 load groups for 4 outputs each	4; 2 load groups for 4 outputs each	8; 2 load groups for 8 outputs each
Short-circuit protection	Yes; per channel, electronic	Yes; per channel, electronic	Yes; per channel, electronic
Limitation of inductive shutdown voltage to			L+ (-53 V)
<b>Digital output functions, parameterizable</b>			
• Switching tripped by comparison values			Yes
• Freely usable digital output			Yes
<b>Switching capacity of the outputs</b>			
• on lamp load, max.	5 W	5 W	5 W
<b>Load resistance range</b>			
• lower limit	48 Ω	48 Ω	48 Ω
• upper limit	4 kΩ	4 kΩ	4 kΩ
<b>Output voltage</b>			
• for signal "1", min.	L+ (-0.8 V)	L+ (-0.8 V)	L+ (-0.8 V)
<b>Output current</b>			
• for signal "1" rated value	0.5 A	0.5 A	0.5 A
• for signal "0" residual current, max.	0.5 mA	0.5 mA	0.5 mA

<b>Load voltage 1L+</b>	
• Rated value (DC)	24 V
• Reverse polarity protection	Yes; Against destruction; actuator power supply outputs applied with reversed polarity
<b>Input current</b>	
Current consumption (rated value) from load voltage 1L+ (unswitched voltage)	110 mA; without load 4 A; Maximum value
from load voltage 2L+, max.	4 A; Maximum value
<b>Actuator supply</b>	
Number of outputs	4
Short-circuit protection	Yes; per module, electronic
<b>Output current</b>	
• Rated value	Total current 1 A up to 45 °C; 0.5 A up to 55 °C

Article number	<b>6ES7145-5ND00-0BA0</b> ET 200AL, AQ 4xU/I, 4xM12
<b>Analog outputs</b>	
Number of analog outputs	4
Voltage output, short-circuit protection	Yes
Voltage output, short-circuit current, max.	24 mA
Current output, no-load voltage, max.	15 V
Cycle time (all channels) max.	1 ms
<b>Output ranges, voltage</b>	
• 0 to 10 V	Yes; 15 bit
• 1 V to 5 V	Yes; 14 bit
• -10 V to +10 V	Yes; 16 bit incl. sign
<b>Output ranges, current</b>	
• 0 to 20 mA	Yes; 15 bit
• -20 mA to +20 mA	Yes; 16 bit incl. sign
• 4 mA to 20 mA	Yes; 14 bit
<b>Connection of actuators</b>	
• for voltage output two-wire connection	Yes
• for voltage output four-wire connection	Yes
• for current output two-wire connection	Yes
• for current output four-wire connection	Yes

#### Technical specifications

Article number	<b>6ES7145-5ND00-0BA0</b> ET 200AL, AQ 4xU/I, 4xM12
<b>Load impedance (in rated range of output)</b>	
• with voltage outputs, min.	1 kΩ
• with voltage outputs, capacitive load, max.	1 μF
• with current outputs, max.	500 Ω
• with current outputs, inductive load, max.	1 mH
<b>Cable length</b>	
• shielded, max.	30 m
<b>Analog value generation for the outputs</b>	
<b>Integration and conversion time/ resolution per channel</b>	
• Resolution with overrange (bit including sign), max.	16 bit
<b>Settling time</b>	
• for resistive load	1 ms
• for capacitive load	1 ms
• for inductive load	1 ms
<b>Errors/accuracies</b>	
Output ripple (relative to output range, bandwidth 0 to 50 kHz), (+/-)	0.02 %
Linearity error (relative to output range), (+/-)	0.1 %
Temperature error (relative to output range), (+/-)	0.005 %/K
Crosstalk between the outputs, max.	-70 dB
Repeat accuracy in steady state at 25 °C (relative to output range), (+/-)	0.03 %
<b>Operational error limit in overall temperature range</b>	
• Voltage, relative to output range, (+/-)	0.25 % from 55 °C to -25 °C and 0.35 % to -30 °C
• Current, relative to output range, (+/-)	0.25 %
<b>Basic error limit (operational limit at 25 °C)</b>	
• Voltage, relative to output range, (+/-)	0.15 %
• Current, relative to output range, (+/-)	0.15 %

Article number	<b>6ES7145-5ND00-0BA0</b> ET 200AL, AQ 4xU/I, 4xM12
<b>Interrupts/diagnostics/ status information</b>	
Substitute values connectable	Yes; channel by channel, parameterizable
<b>Alarms</b>	
• Diagnostic alarm	Yes; Parameterizable
<b>Diagnoses</b>	
• Wire-break	Yes; channel-by-channel, only for output type "current"
• Short-circuit	Yes; Actuator supply module by module; channel by channel for output type "voltage"
<b>Diagnostics indication LED</b>	
• Channel status display	Yes; green LED
• for module diagnostics	Yes; green/red LED
<b>Potential separation</b>	
between the load voltages	Yes
<b>Potential separation channels</b>	
• between the channels	No
• between the channels and backplane bus	Yes
• between the channels and the power supply of the electronics	No
<b>Ambient conditions</b>	
<b>Ambient temperature during operation</b>	
• min.	-30 °C
• max.	55 °C
<b>Connection method</b>	
Design of electrical connection for the inputs and outputs	M12, 5-pole
Design of electrical connection for supply voltage	M8, 4-pole
<b>ET-Connection</b>	
• ET-Connection	M8, 4-pin, shielded
<b>Dimensions</b>	
Width	30 mm
Height	159 mm

Weight, approx.	175 g

## I/O systems

SIMATIC ET 200 systems without control cabinet  
SIMATIC ET 200AL

### I/O modules > Fail-safe I/O modules

#### Overview

The ET 200AL fail-safe I/O module expands the ET 200AL PN system family. It is incorporated seamlessly into the Safety Integrated concept of SIMATIC. It also supports safety-related communication via PROFIsafe. The functional safety is certified in accordance with IEC 61508. It is designed for safety-related use up to SIL 3 according to IEC 62061 and PL e according to ISO 13849.

The following fail-safe I/O module with 4x digital inputs and 2x digital outputs with 45 mm width is available:

- F-DI 4+F-DQ 2x24VDC/2A, 4xM12 PROFIsafe

### Technical specifications

Article number	<b>6ES7146-5FF00-0BA0</b> ET 200AL, F-DI 4+F-DQ 2x24VDC/2A, 4xM12
<b>General information</b>	
Product type designation	F-DI 4+F-DQ 2x24VDC/2A, 4xM12
<b>Engineering with</b>	
• STEP 7 TIA Portal configurable/ integrated from version	STEP 7 V17 or higher
<b>Operating mode</b>	
• DI	Yes
• DQ	Yes
<b>Supply voltage</b>	
<b>Load voltage 1L+</b>	
• Rated value (DC)	24 V
• Reverse polarity protection	Yes; against destruction
<b>Load voltage 2L+</b>	
• Rated value (DC)	24 V
• Reverse polarity protection	Yes; against destruction; outputs applied with reversed polarity for loads connected between M-switch and 2L+ will conduct
<b>Input current</b>	
Current consumption (rated value)	55 mA (1L+) / 40 mA (2L+); without load
from load voltage 1L+ (unswitched voltage)	4 A; Maximum value
from load voltage 2L+, max.	4 A; Maximum value
<b>Encoder supply</b>	
Number of outputs	2
<b>24 V encoder supply</b>	
• Short-circuit protection	Yes; per load voltage, electronic (response threshold 0.7 A to 1.7 A)
• Output current, max.	1 A; total current of all encoders, max. 0.5 A per load voltage; maximum of 2.0 V drop
<b>Digital inputs</b>	
Number of digital inputs	4
<b>Number of simultaneously controllable inputs</b>	
<b>all mounting positions</b>	
- up to 55 °C, max.	4
<b>Input voltage</b>	
• Rated value (DC)	24 V
• for signal "0"	-30 to +5 V
• for signal "1"	+15 to +30 V
<b>Input current</b>	
• for signal "1", typ.	4.85 mA
<b>Input delay (for rated value of input voltage)</b>	
<b>for standard inputs</b>	
- parameterizable	Yes
<b>Digital outputs</b>	
Number of digital outputs	2
• in groups of	2
Short-circuit protection	Yes; per channel, electronic
Overload protection	Yes
Limitation of inductive shutdown voltage to	P-switch: -26 V DC referenced to 2M, M-switch: +48 V DC referenced to 2M

Article number	<b>6ES7146-5FF00-0BA0</b> ET 200AL, F-DI 4+F-DQ 2x24VDC/2A, 4xM12
<b>Switching capacity of the outputs</b>	
• on lamp load, max.	10 W
<b>Load resistance range</b>	
• lower limit	12 Ω
• upper limit	2 kΩ
<b>Output voltage</b>	
• for signal "1", min.	L+ (-2.0 V), P-switch is L+ (-1.5 V), M-switch is 0.5 V
<b>Output current</b>	
• for signal "1" rated value	2 A
• for signal "0" residual current, max.	0.5 mA
<b>Switching frequency</b>	
• with resistive load, max.	30 Hz
• with inductive load, max.	0.1 Hz
• on lamp load, max.	10 Hz
<b>Total current of the outputs</b>	
• Current per group, max.	4 A
<b>Cable length</b>	
• unshielded, max.	30 m
<b>Encoder</b>	
<b>Connectable encoders</b>	
• 2-wire sensor	No
- permissible quiescent current (2-wire sensor), max.	0.5 mA
<b>Interrupts/diagnostics/ status information</b>	
Substitute values connectable	No
<b>Alarms</b>	
• Diagnostic alarm	Yes; Parameterizable
<b>Diagnoses</b>	
• Monitoring the supply voltage	Yes
• Wire-break	Yes; outputs when off
• Short-circuit	Yes; inputs, outputs, encoder supply
<b>Diagnostics indication LED</b>	
• Channel status display	Yes; green LED
• for module diagnostics	Yes; green/red LED
• For load voltage monitoring	Yes; green LED
<b>Potential separation</b>	
between the load voltages	Yes
<b>Potential separation channels</b>	
• between the channels, in groups of	4 DI channels are isolated from 2 DQ channels
• between the channels and backplane bus	Yes
• between the channels and the power supply of the electronics	DI channels are non-isolated from supply voltage 1L+ and DQ channels are isolated from the supply voltage 1L+

### Overview

The IO-Link communication standard enables and standardizes communication between machine and plant PLCs, on the one hand, and sensors, actuators and other field devices, on the other hand.

The IO-Link I/O modules enable the simple connection of binary standard sensors and actuators, whereby the signals and energy supply are transferred via IO-Link (IO-Link master).

The IO-Link I/O modules can be connected to any IO-Link masters and, in this way, fieldbus-independent and distributed I/O units can be formed. The universal usage of the IO-Link DIQ I/O modules enables additional flexibility here.

With the ET 200AL IO-Link I/O modules, a comprehensive portfolio of digital input, output and input/output modules with the design and system features of the ET 200AL is available.

### Overview

- Pre-assembled cables in various designs and lengths:
  - For connecting the interface modules and I/O modules via the internal backplane bus (ET connection).
  - For power supply.

### Ordering data

#### Bus cable for backplane bus (ET connection)

4-pin, shielded

Pre-assembled at both ends, 2 M8 connectors

## I/O systems

### SIMATIC ET 200 systems without control cabinet

#### SIMATIC ET 200eco PN

#### Overview

SIMATIC ET 200eco PN video

[https://players.brightcove.net/1813624294001/70fecf0f-fbad-4fad-a077-d0e26af4d84c\\_default/index.html?videoId=6187715895001](https://players.brightcove.net/1813624294001/70fecf0f-fbad-4fad-a077-d0e26af4d84c_default/index.html?videoId=6187715895001)

- PROFINET connection: 2 x M12 D-coded and automatic PROFINET address assignment
- Data transmission rate 100 Mbps
- LLDP neighborhood discovery for topological configuration
- Fast startup (boot-up within approx. 0.5 seconds)
- Channel-specific diagnostics, identification and maintenance data IM0 ... IM3
- Firmware update
- Ambient temperature range -40 °C to 60 °C
- Versions of the I/O devices with M12 L-coded power connectors:
  - DI 8
  - DI 16
  - DQ 8 (0.5 A)
  - DQ 8 (2 A)
  - DIQ 16 (0.5A/2A)
  - 8 IO-Link + DI 4
- Versions of the I/O devices with M12 A-coded power connectors:
  - 8 DI
  - 16 DI
  - 8 DQ (2 A)
  - 8 DQ (1.3 A)
  - 8 DQ (0.5 A)
  - 16 DQ (1.3 A)
  - 8 DI/DQ (1.3 A)
  - 8 F-DI/3 F-DO (2 A)
  - 8 AI (U, I, TC, RTD)
  - 8 AI (TC, RTD)
  - 4 AO (U, I)
  - 4 IO-Link
  - 4 IO-Link + 8 DI + 4 DQ (1.3 A)

- Compact block I/O for processing digital, fail-safe digital, analog and IO-Link signals for connecting to the PROFINET bus system
- Cabinet-free installation in IP65/67 degree of protection with M12 connection system
- Extremely rugged and resistant metal enclosure
- Housing type of the I/O devices with 2x M12 L-coded power connectors
  - 45 mm x 200 mm x 48 mm (W x H x D) with 8 x M12 for digital signals and IO-Link
- Housing type of the I/O devices with 2x M12 A-coded power connectors
  - 30 mm x 200 mm x 37 mm (W x H x D) with 4 x M12 for digital signals and IO-Link
  - 60 mm x 175 mm x 37 mm (W x H x D) with 8 x M12 for digital and fail-safe digital signals as well as IO-Link
  - 60 mm x 175 mm x 37 mm (W x H x D) with 4 x M12 or 8 x M12 for analog signals

**Overview**

- Digital I/O devices with 2x M12 L-coded power connectors and 45 mm width
  - 8 digital input signals with 8xM12 connection
  - 16 digital input signals with 8xM12 connection
  - 8 digital output signals 8-channel digital output module 0.5A with 8xM12 connection
  - 8 digital output signals 2A with 8xM12 connection
  - 16 digital input/output signals 0.5A/2A with 8xM12 connection

- Digital I/O devices with 2x M12 A-coded power connectors and 60 mm width
  - 8 digital input signals with 8xM12 connection
  - 16 digital input signals with 8xM12 connection
  - 8 digital output signals 1.3 A with 8xM12 connection
  - 8 digital output signals 2 A with 8xM12 connection
  - 16 digital output signals 1.3 A with 8xM12 connection
  - 8 digital input/output signals 1.3 A with 8xM12 connection

- Digital I/O devices with 2x M12 A-coded power connectors and 30 mm width
  - 8 digital input signals with 4xM12 connection
  - 8 digital output signals 0.5 A with 4xM12 connection
  - 8 digital output signals 1.3 A with 4xM12 connection

<b>General information</b>		
<b>Product function</b>		
• Isochronous mode	Yes	Yes
• Prioritized startup	Yes	Yes
<b>Engineering with</b>		
• STEP 7 TIA Portal configurable/ integrated from version	STEP 7 V16 or higher with HSP 0299	STEP 7 V16 or higher with HSP 0299
• PROFINET from GSD version/ GSD revision	GSDML V2.3.x	GSDML V2.3.x
<b>Operating mode</b>		
• DI	Yes	Yes
• Counter	No	No
• MSI	Yes	Yes
<b>Supply voltage</b>		
<b>Load voltage 1L+</b>		
• Rated value (DC)	24 V	24 V
• Reverse polarity protection	Yes; Against destruction; encoder power supply outputs applied with reversed polarity	Yes; Against destruction; encoder power supply outputs applied with reversed polarity
<b>Input current</b>		
Current consumption (rated value) from load voltage 1L+ (unswitched voltage)	85 mA; without load 12 A; Maximum value	90 mA; without load 12 A; Maximum value
from load voltage 2L+, max.	12 A; Maximum value	12 A; Maximum value
<b>Encoder supply</b>		
<b>24 V encoder supply</b>		
• Short-circuit protection	Yes; per channel, electronic	Yes; Group-by-group for 2 channels, electronic
• Output current, max.	100 mA; per output	100 mA; per output
<b>Digital inputs</b>		
Number of digital inputs	8	16
Digital inputs, parameterizable	Yes	Yes
Source/sink input	P-reading	P-reading
Input characteristic curve in accordance with IEC 61131, type 3	Yes	Yes
<b>Number of simultaneously controllable inputs</b>		
<b>all mounting positions</b>		
- up to 60 °C, max.	8	16
<b>Input voltage</b>		
• Rated value (DC)	24 V	24 V
• for signal "0"	-30 to +5 V	-30 to +5 V
• for signal "1"	+11 to +30V	+11 to +30V
<b>Input current</b>		
• for signal "1", typ.	2.4 mA	2.4 mA
<b>Input delay (for rated value of input voltage) for standard inputs</b>		
- parameterizable	Yes; 0.05 / 0.1 / 0.4 / 0.8 / 1.6 / 3.2 / 12.8 / 20 ms	Yes; 0.05 / 0.1 / 0.4 / 0.8 / 1.6 / 3.2 / 12.8 / 20 ms
<b>Cable length</b>		
• unshielded, max.	30 m	30 m
<b>Encoder</b>		
<b>Connectable encoders</b>		
• 2-wire sensor	Yes	Yes
- permissible quiescent current (2-wire sensor), max.	1.5 mA	1.5 mA
<b>Interfaces</b>		
Number of PROFINET interfaces	1	1
<b>1. Interface</b>		
Interface type	PROFINET with 100 Mbit/s full duplex (100BASE-TX)	PROFINET with 100 Mbit/s full duplex (100BASE-TX)
<b>Interface types</b>		
• M12 port	Yes; 2x M12, 4-pin, D-coded	Yes; 2x M12, 4-pin, D-coded
• Number of ports	2	2
• integrated switch	Yes	Yes

**ET 200eco PN analog output modules**

- 4 AQ U/I; 4 x M12, degree of protection IP67

6ES7145-6HD00-0AB0

**Accessories**

- PD voltage distributor, 24 V DC; 1 X 7/8", 4 X M12
- Terminal block for ET 200eco PN, 10 A insulation displacement terminals
- Spare fuses for terminal block, 10 units
- Mounting rail 0.5 m
- Profile screw for mounting rail, 50 units
- Sealing cap M12 for IP67 modules, 12 mm external diameter, without O-ring, 10 units
- Sealing cap M12 for IP67 modules, 15 mm external diameter, with O-ring, 10 units
- Labels 10 mm x 7 mm Ti-grey, for I/O devices with 2x M12 A-coded power connectors; 5 frames with 40 labels each

## I/O systems

SIMATIC ET 200 systems without control cabinet  
SIMATIC ET 200eco PN

I/O devices > Fail-safe I/O device

### Overview

The ET 200eco PN fail-safe I/O device expands the ET 200eco PN system family. It is incorporated seamlessly into the Safety Integrated concept like with ET 200MP / ET 200SP and ET200pro. It also supports safety-related communication via PROFINET. The functional safety is certified in accordance with IEC 61508. It is designed for safety-related use up to SIL 3 according to IEC 62061 and PL e according to ISO 13849.

The following fail-safe I/O device with 2x M12 A-coded power connectors and 60 mm width is available:

- F-DI 8x24V /F-DQ 3x24V 2A with 8xM12 connection

### Ordering data

#### ET 200eco PN fail-safe digital input/output modules

- 8 F-DI 24 V DC/  
3 F-DQ 24 V DC/2 A;  
PROFINET, certified up to SIL 3  
(IEC 61508), PL e (ISO 13849);  
4 x M12/3 x M12,  
degree of protection IP65/67

#### Accessories

- PD voltage distributor, 24 V DC;  
1 X 7/8", 4 X M12
- Terminal block for ET 200eco PN,  
10 A insulation displacement  
terminals
- Spare fuses for terminal block,  
10 units
- DIN rail 0.5 m
- Profile screw for DIN rail, 50 units
- Sealing cap M12 for  
IP67 modules, 12 mm external  
diameter, without O-ring, 10 units
- Sealing cap M12 for  
IP67 modules, 15 mm external  
diameter, with O-ring, 10 units
- Labels 10 mm x 7 mm yellow, for  
I/O devices with 2x M12 A-coded  
power connectors; 17 frames with  
48 labels each

**Overview**

IO-Link master with 2x M12 L-coded power connectors and 45 mm width

- IO-Link communications modules for connecting up to 8 IO-Link devices
- IO-Link master with 4x Class A port and 4x Class B port as well as additional 4 digital inputs
- The IO-Link specifications V1.0 and V1.1 are supported

IO-Link master with 2x M12 A-coded power connectors and 60 mm width

- IO-Link communications modules for connecting up to 4 IO-Link devices
- IO-Link master with 4x Class A port and additional 8 digital inputs and 4 digital outputs
- The IO-Link specification V1.0 is supported

IO-Link master with 2x M12 A-coded power connectors and 30 mm width

- IO-Link communications modules for connecting up to 4 IO-Link devices
- IO-Link master with 4x Class B port
- The IO-Link specifications V1.0 and V1.1 are supported

**I/O systems**SIMATIC ET 200 systems without control cabinet  
SIMATIC ET 200eco PN**I/O devices > IO-Link master****Ordering data****ET 200eco PN IO-Link master**

- 4 IO-L + 8 DI + 4 DO, 24 V DC/1.3 A; 8 x M12, degree of protection IP67, enclosure width 60 mm; for connecting up to 4 IO-Link devices according to IO-Link specification V1.0 and Class A port as well as 8 digital inputs and 4 digital outputs
- 4 IO-L; 4 x M12, degree of protection IP67, enclosure width 30 mm; for connecting up to 4 IO-Link devices according to IO-Link specification V1.0 and V1.1 and Class B port
- 8 IO-L + 4 DI 24 V DC; 8 x M12, degree of protection IP67, enclosure width 45 mm; for connecting up to 8 IO-Link devices according to IO-Link specification V1.0 and V1.1, 4x Class A port and 4 x Class B port, as well as 4 additional digital inputs

**Accessories**

- PD voltage distributor, 24 V DC; 1 X 7/8", 4 X M12
- Terminal block for ET 200eco PN, 10 A insulation displacement terminals
- Spare fuses for terminal block, 10 units
- Mounting rail 0.5 m
- Profile screw for mounting rail, 50 units
- Sealing cap M12 for IP67 modules, 12 mm external diameter, without O-ring, 10 units
- Sealing cap M12 for IP67 modules, 15 mm external diameter, with O-ring, 10 units
- Labels 10 mm x 5 mm RAL9016, for I/O devices with 2x M12 L-coded power connectors; 5 frames with 40 labels each
- Labels 10 mm x 7 mm Ti-grey, for I/O devices with 2x M12 A-coded power connectors; 5 frames with 40 labels each

**PROFINET M12 connection plug, for user assembly**

Connector for PROFINET, 4-core, shielded

IE M12 plug PRO connector

- 1 unit
- 8 units

IE FC M12 plug PRO connector, for user assembly

- 1 unit
- 8 units

**M12 connection plug for 24 V DC load current supply**

Connection socket for 24 V DC incoming supply; 4-pin, A-coded, 3 units

Connector for loop-through of 24 V DC; 4-pole, A-coded, 3 units

<b>General information</b>			
<b>Product function</b>			
• Prioritized startup			Yes
<b>Engineering with</b>			
• STEP 7 TIA Portal configurable/ integrated from version			STEP 7 V16 or higher with HSP 0326
• PROFINET from GSD version/ GSD revision			GSDML V2.3.x
<b>Supply voltage</b>			
Rated value (DC)	24 V	24 V	
Reverse polarity protection	Yes	Yes	
<b>Load voltage 1L+</b>			
• Rated value (DC)			24 V
• Reverse polarity protection			Yes; Against destruction; encoder power supply outputs applied with reversed polarity
<b>Load voltage 2L+</b>			
• Rated value (DC)	24 V	24 V	24 V
• Reverse polarity protection	Yes	Yes; against destruction; load increas- ing	Yes; against destruction
<b>Input current</b>			
Current consumption (rated value)			70 mA; without load
Current consumption, typ.	200 mA	100 mA	
from supply voltage 1L+, max.	4 A	4 A	
from load voltage 1L+ (unswitched voltage)			12 A; Maximum value
from load voltage 2L+, max.	4 A	4 A	12 A; Maximum value
<b>Encoder supply</b>			
Number of outputs	6	4	8
<b>24 V encoder supply</b>			
• Short-circuit protection	Yes	Yes; per channel, electronic	Yes; per channel, electronic
• Output current, max.	200 mA; 100 mA per output to X5-X6	500 mA; Per channel	0.5 A; Per channel
<b>Hardware configuration</b>			
<b>Submodules</b>			
• Number of configurable submodules, max.			9
<b>Digital inputs</b>			
Number of digital inputs	8		4
Source/sink input			P-reading
Input characteristic curve in accordance with IEC 61131, type 3	Yes		Yes
<b>Number of simultaneously controllable inputs</b>			
<b>all mounting positions</b> - up to 60 °C, max.	8		4
<b>Input voltage</b>			
• Type of input voltage			DC
• Rated value (DC)	24 V		24 V
• for signal "0"	-3 to +5V		-3 to +5V
• for signal "1"	+11 to +30V		+11 to +30V
<b>Input current</b>			
• for signal "0", max. (permissible quiescent current)	1.5 mA		
• for signal "1", typ.	7 mA		2.5 mA
<b>Cable length</b>			
• unshielded, max.	30 m		30 m
<b>Digital outputs</b>			
Number of digital outputs	4		
Short-circuit protection	Yes; Electronic		
Limitation of inductive shutdown voltage to	Typ. (L1+, L2+) -47 V		
Controlling a digital input	Yes

SIPLUS HCS family

### **SIPLUS HCS heating control systems: Industrial heating processes – maximum precision and efficiency**

In manufacturing processes where temperature plays a crucial role, deviations of just a few degrees can cause enormous quality problems. To avoid this and to minimize rejection rates, high-precision and reliable, individual control of the electrical heating elements is essential.

Nearly all industrially manufactured products undergo heat treatment. Even small deviations in the heating process can result in enormous negative effects on product quality.

To increase the quality and quantity of a heat-treated product, it is important to be able to focus the energy required with the highest level of spatial and temporal precision. The SIPLUS HCS ensures utmost precision in the control of electric heating elements such as infrared heaters.

Two heating control systems are available:

- HCS4200 – The flexible choice
- HCS4300 – The powerful solution

The SIPLUS HCS family of heating control systems saves time, costs and resources when it comes to configuring, commissioning, operation and maintenance.

This is achieved by:

- Simple integration into existing automation systems such as SIMATIC and SIMOTION
- Lower wiring costs and user-friendly engineering
- Intelligent diagnostics options for swift fault detection
- Service-friendly design thanks to ready-to-use function and data blocks
- Reduced volume in the control cabinet with space savings of up to 50%

For more information, see <http://www.siemens.com/hcs>

## I/O systems

IO systems for heating elements  
with integrated power outputs - modular design

### SIPLUS HCS4200 heating control system

#### Overview

HCS4200 family

The SIPLUS HCS4200 heating control system controls and switches heat emitters and other resistive loads in industrial environments in a range of voltages: 45 V AC, 70 V AC, 110 V AC, 230 V AC, 277 V AC, 400 V AC, and 480 V AC.

Communication takes place over PROFINET or PROFIBUS and, in combination with SIMATIC S7, SIMOTION or an industrial PC, forms a high-performance, state-of-the-art automation system. The modular, compact and space-saving distributed I/O system can be individually adapted to suit the application.

## Overview

The Power Output Modules (POMs) are an essential component of the SIPLUS HCS4200 heating control system. Up to 24 Power Output Modules can be operated on one Central Interface Module (CIM), split over 2 racks.

There are 4 Power Output Module versions:

- POM4220 Lowend
- POM4220 Midrange phase control
- POM4220 Highend
- POM4220 Flexible

Ordering data	Article No.	Ordering data	Article No.

**Overview**

HCS4300 2POM

The SIPLUS HCS4300 heating control system controls heating elements and other resistive loads in 230 V/277 V and 400 V/480 V voltage supply systems in industrial environments.

Communication takes place via PROFINET or PROFIBUS and can be used together with SIMATIC S7, for example, to form a highly modern and powerful automation system.

## I/O systems

IO systems for heating elements  
with integrated power outputs - modular design

### SIPLUS HCS4300 heating control system > Central interface module (CIM)

#### Overview

The Central Interface Module (CIM) is the intelligent processor module of the SIPLUS HCS4300 heating control system.

#### Ordering data

##### SIPLUS HCS4300 CIM4310

Central Interface Module with PROFINET communication

#### Article No.

**6BK1943-1AA00-0AA0**

Central Interface Module with PROFIBUS communication

**6BK1943-1BA00-0AA0**

#### Accessories

##### SIPLUS HCS4300 EM4315

Expansion module for SIPLUS HCS4300, extends the configuration with 8 Power Output Modules

**6BK1943-1AA50-0AA0**

#### Article No.

##### SIPLUS HCS4000 I/O module temperature

For recording temperatures using temperature sensors, thermocouples and pyrometers

**6BK1900-0AA00-0AA0**

##### SIPLUS HCS4000 I/O module DI/DO

With 8 digital outputs and 8 configurable inputs/outputs

**6BK1900-0BA00-0AA0**

##### SIPLUS HCS4000 I/O module U/I

For current and voltage measurement (line voltage compensation)

**6BK1900-0CA00-0AA0**

## I/O systems

IO systems for heating elements  
with integrated power outputs - modular design

### SIPLUS HCS4300 heating control system > Power Output Module (POM)

#### Design

- Module (encapsulated) in a metal enclosure.
- There are 6 versions:
  - POM4320 busbar mounting (IEC):  
a current of up to 16 A can be used per output
  - POM4320 busbar mounting (UL):  
a current of up to 15 A can be used per output
  - POM4320 rear panel mounting (IEC):  
a current of up to 16 A can be used per output
  - POM4320 rear panel mounting (UL):  
a current of up to 15 A can be used per output
  - POM4320 Highend busbar mounting:  
a current of up to 60 A can be used per output
  - POM4320 Highend rear panel mounting:  
a current of up to 60 A can be used per output
- Heat dissipation by fan fitted to top of module.
- Internal serial interface.
- Three diagnostics LEDs for displaying module faults.
- POM4320: 9 diagnostics LEDs for displaying output errors.
- POM4320 Highend: 6 diagnostics LEDs for displaying output errors.

#### SIPLUS diagnostic repeater for PROFIBUS

#### Technical specifications

Article number	<b>6AG1972-0AB01-4XA0</b>
Based on	<b>6ES7972-0AB01-0XA0</b> SIPLUS Diagnose-Repeater fuer Profibus
<b>Ambient conditions</b>	
<b>Ambient temperature during operation</b>	
• min.	0 °C; = Tmin (incl. condensation/frost)
• max.	60 °C; = Tmax
<b>Ambient temperature during storage/transportation</b>	
• min.	-40 °C
• max.	70 °C
<b>Altitude during operation relating to sea level</b>	
• Installation altitude above sea level, max.	5 000 m
• Ambient air temperature-barometric pressure-altitude	Tmin ... Tmax at 1 140 hPa ... 795 hPa (-1 000 m ... +2 000 m) // Tmin ... (Tmax - 10 K) at 795 hPa ... 658 hPa (+2 000 m ... +3 500 m) // Tmin ... (Tmax -20 K) at 658 hPa ... 540 hPa (+3 500 m ... +5 000 m)
<b>Relative humidity</b>	
• With condensation, tested in accordance with IEC 60068-2-38, max.	100 %; RH incl. condensation/frost (no commissioning under condensation conditions)
<b>Resistance</b>	
<b>Use in stationary industrial systems</b>	
- to biologically active substances according to EN 60721-3-3	Yes; Class 3B2 mold, fungus and dry rot spores (with the exception of fauna); Class 3B3 on request
- to chemically active substances according to EN 60721-3-3	Yes; Class 3C4 (RH < 75 %) incl. salt spray acc. to EN 60068-2-52 (severity degree 3); *
- to mechanically active substances according to EN 60721-3-3	Yes; Class 3S4 incl. sand, dust, *
<b>Use on ships/at sea</b>	
- to biologically active substances according to EN 60721-3-6	Yes; Class 6B2 mold and fungal spores (excluding fauna); Class 6B3 on request
- to chemically active substances according to EN 60721-3-6	Yes; Class 6C3 (RH < 75 %) incl. salt spray acc. to EN 60068-2-52 (severity degree 3); *
- to mechanically active substances according to EN 60721-3-6	Yes; Class 6S3 incl. sand, dust; *

Article number	<b>6AG1972-0AB01-4XA0</b>
Based on	<b>6ES7972-0AB01-0XA0</b> SIPLUS Diagnose-Repeater fuer Profibus
<b>Usage in industrial process technology</b>	
- Against chemically active substances acc. to EN 60654-4	Yes; Class 3 (excluding trichlorethylene)
- Environmental conditions for process, measuring and control systems acc. to ANSI/ISA-71.04	Yes; Level GX group A/B (excluding trichlorethylene; harmful gas concentrations up to the limits of EN 60721-3-3 class 3C4 permissible); level LC3 (salt spray) and level LB3 (oil)
<b>Remark</b>	
- Note regarding classification of environmental conditions acc. to EN 60721, EN 60654-4 and ANSI/ISA-71.04	* The supplied plug covers must remain in place over the unused interfaces during operation!
<b>Conformal coating</b>	
• Coatings for printed circuit board assemblies acc. to EN 61086	Yes; Class 2 for high reliability
• Protection against fouling acc. to EN 60664-3	Yes; Type 1 protection
• Military testing according to MIL-I-46058C, Amendment 7	Yes; Discoloration of coating possible during service life
• Qualification and Performance of Electrical Insulating Compound for Printed Board Assemblies according to IPC-CC-830A	Yes; Conformal coating, Class A

## Overview

- Easy connection of field devices to PROFIBUS
- Integrated low-power management
- Different ASICs for the different functional requirements and application areas

## Overview

Innovative and well-proven

As a dedicated PI member, Siemens has been actively advancing the development of PROFINET from the beginning. Siemens technology components benefit from the accumulated know-how. They have been field-proven in countless products, provide maximum performance capability and can be scaled to exact requirements.

And that is not all. Siemens Competence Centers offer advice for choosing the right technology component for the device, training opportunities and support throughout the development process, up to and including successful certification.

ERTEC 200P-2 – Your path to the fastest PROFINET

The ERTEC 200P-2 (Enhanced Real-Time Controller) sets new standards for communication.

Designed for cycle times as low as 125  $\mu$ s, the performance upgrade for PROFINET has been integrated in the ERTEC 200P-2. With its 250 MHz ARM9 CPU and integrated IRT (isochronous real-time) switch, field devices with demanding performance requirements can be implemented. The reduced chip size simplifies integration into compact field devices. The CPU also allows integration of a user's own applications, which makes an external host CPU unnecessary depending on the application.

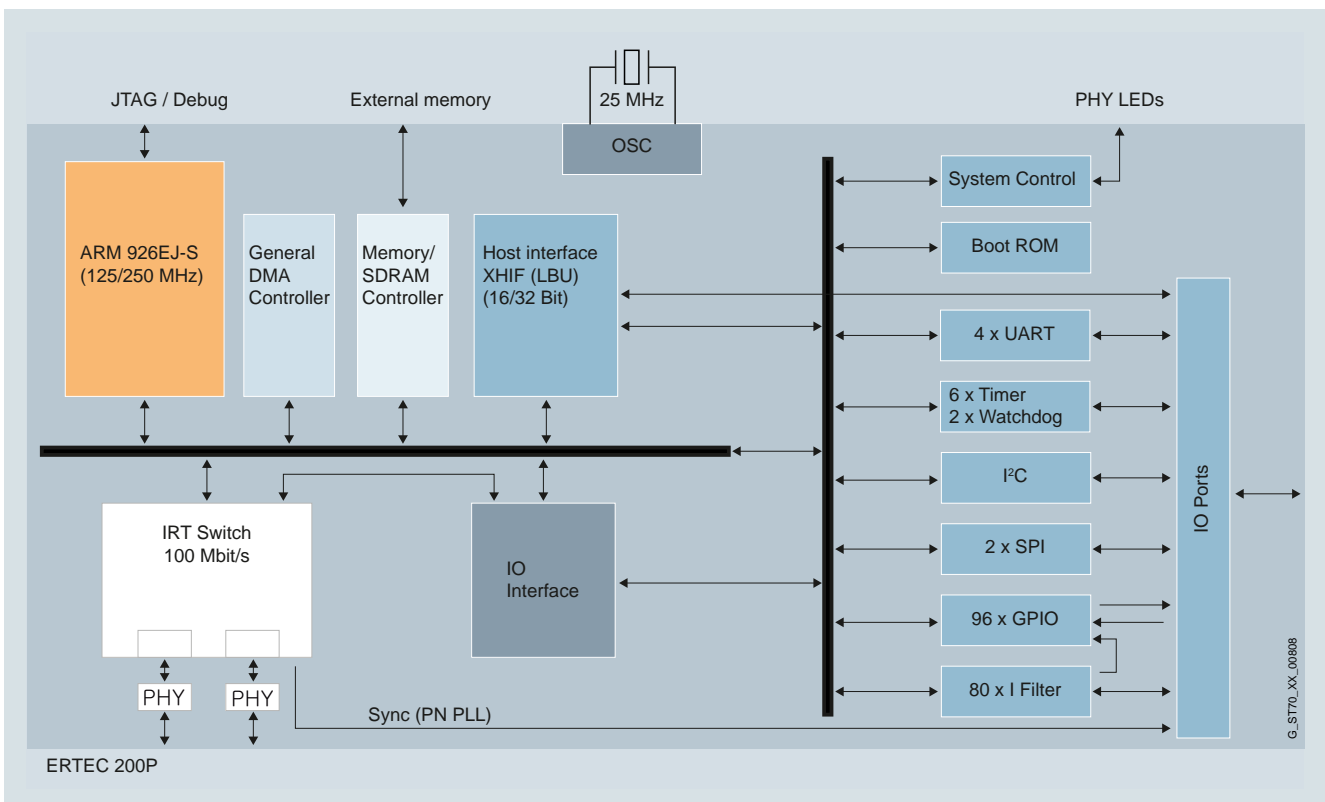

Development kit for ERTEC 200P-2

The development kit includes an evaluation board with sample applications so that commissioning can be completed in minimum time. The PROFINET stack is delivered as source code and includes the eCos open source real-time operating system and all development tools, analysis programs and documentation. Field devices with RT (real-time) and IRT (isochronous real-time) can be implemented with the ERTEC ASICs. The integrated switch allows the construction of field devices with two ports.

## Functions:

- Isochronous mode
- Shared device for 4 controllers
- S2 system redundancy
- PROFINET performance upgrade with a minimum cycle time of 125  $\mu$ s.
- MRP/MRPD
- Regular, no-cost updates
- Current technology certificate

Enclosure size	17x17 mm
Ball pitch	0.8 mm

## Overview

With the development packages for PROFINET, compact or modular PROFINET field devices can be developed quickly and with little effort. Depending on the application, different development packages are available.

The development packages for the ASICs of the ERTEC family (Enhanced Real-Time Ethernet Controller) are suitable for the development of field devices with an integrated IRT switch (Isochronous Real-Time). The demand for real-time capability, linear topology capability, and for IT integration is therefore met perfectly.

With the help of the development package for standard Ethernet controllers, PROFINET devices can be developed on the basis of a standard Ethernet controller. Devices with RT (Real-Time) can be implemented in the field device without special hardware.

The PROFIsafe starter kit permits the implementation of fail-safe devices. In so doing, the PROFIsafe stack applicatively builds on the PROFINET stack.

### PROFINET components

#### PROFINET drivers

##### Overview

###### PROFINET driver for controllers

Reasonably priced components are a major competitive advantage, especially in series machine building. Here, users often develop in-house control software. For reasons of performance, flexibility and cost, the individual application is then implemented on standard PCs. The PROFINET driver supports this in-house development and requires no special hardware thanks to its conventional Ethernet interface.

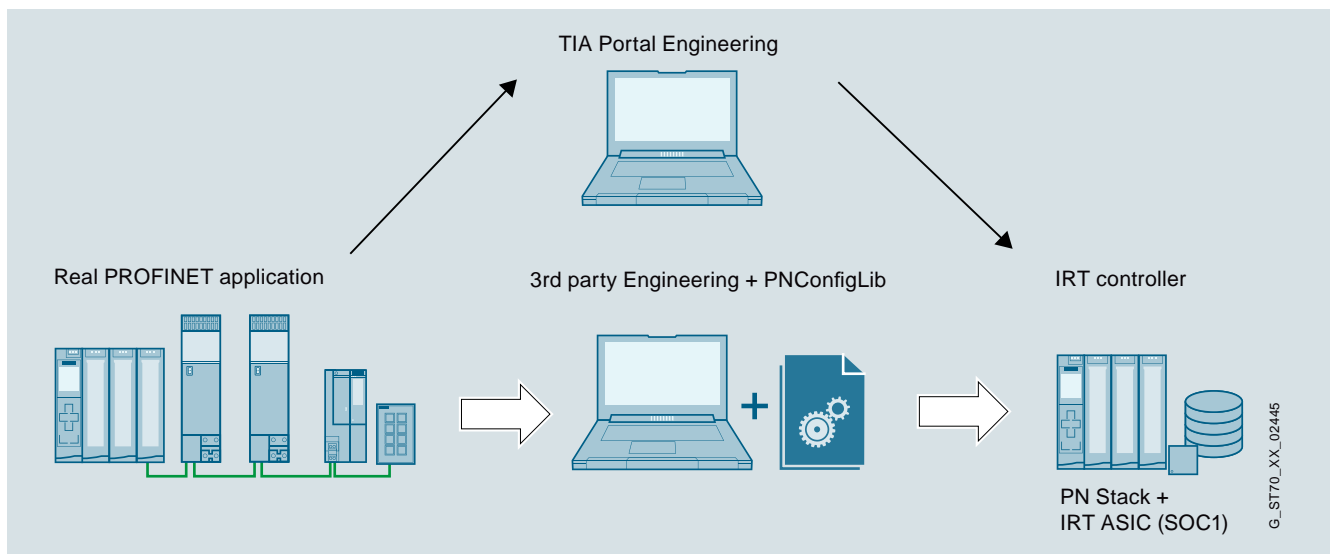

Because the PROFINET driver is delivered as source code, proprietary solutions can be ported into various operating systems and hardware platforms.

As a result, the PROFINET driver can also be optimally used in embedded systems for in-house controller solutions. Design and configuration is easy and takes place via an open XML interface without the need for engineering tools. The well-proven PROFINET stack from SIMATIC forms the centerpiece.

The PROFINET driver is suitable for both simple applications, such as individual PROFINET lines, as well as for complex machines. It supports PROFINET RT for cycle times starting from 1 ms via a standard Ethernet interface. Alternatively, PROFINET IRT can also be used for cycle times starting from 500 µs, in connection with the CP1625 controller development kit.

###### PROFINET ConfigLib

PROFINET networks must be planned. This can be carried out for the PROFINET driver using the TIA Portal. A license is not required. ConfigLib is a standalone API for generating PROFINET hardware configurations. It can be used to create RT and IRT projects, whereby ConfigLib takes over the planning algorithm.

PNConfigLib – Efficient creation of hardware configurations without the TIA Portal

###### CP1625 Controller Development Kit

Siemens SOC1 gives you the hardware support required to build an IRT controller. The CP1625 Controller Development Kit is suitable for both standalone and host modes.

- Stand-alone mode: PN stack and application run on the CP1625
- Host mode: Application runs on the PC or, for example, ARM. The stack runs on the CP1625

Depth	43 mm
<b>Weights</b>	
Weight, approx.	95 g

### Overview

- Automatic detection of transmission rates
- Transmission rates from 9.6 kbps to 12 Mbps are possible, incl. 45.45 kbps
- 24 V DC voltage display
- Indication of segment 1 and 2 bus activity
- The separation of segment 1 and segment 2 by means of switches is possible
- Separation of the right segment with an inserted terminating resistor
- Decoupling of segment 1 and segment 2 in the case of static interference

#### Designed for Industry

- For increasing the expansion
- Galvanic isolation of segments
- Commissioning support
  - Switches for separation of segments
  - Bus activity display
  - Segment separation in the case of an incorrectly inserted terminating resistor

In this context, please also note the diagnostics repeater that provides extensive diagnostics functions for physical line diagnostics in addition to the normal repeater functionality. This is described in "Distributed I/O / diagnostics / diagnostics repeater for PROFIBUS DP".

## I/O systems

### Network transitions

#### PN/PN couplers

##### Overview

- Fast deterministic data exchange between CPUs with PROFINET controller, even beyond network boundaries
- Configuration with two PROFINET devices completely independent of the communication technology

Data transmission between two S7-1500 IO controllers beyond a PROFINET limit

- Very simple configuration of the data exchange via virtual IO modules or alternatively via data records for larger amounts of data
- Simultaneous data transfer to up to 3 CPUs on own network side and/or up to 4 CPUs on opposite network side
- Easy to integrate into any PROFINET network with 2 ports per network side
- Fieldbus connection via a SIMATIC BusAdapter; this allows free selection of the connection system (RJ45, FC cable direct connection) and connection hardware (copper, POF, PCF, glass fiber). FO-to-copper media conversion can also be realized economically and without external converters.
- Firmware update
- Support for Ethernet services (ping, arp, SNMP, MIP-2, LLDP)
- Comprehensive diagnostics via LED displays and interrupts
- Extensive compatibility with the PN/PN coupler up to firmware version V3.0

##### Additional functions

- Quantity structures
  - Cyclic transmission: Up to 1 440 bytes each for input and output data
  - Data record transfer: Up to 4 096 bytes per slot. Buffering of up to eight data records per slot
  - Maximum 16 input/output areas for data exchange
  - Max. 254 bytes of input and 253 bytes of output data per module
- Exchange of fail-safe data between two F-CPU's via F-SendDP and F\_ReceiveDP
- Shared device with up to four IO controllers per network side
- Module-internal shared input / shared output (MSI/MSO)
- Device replacement without programming device
  - With topological configuration via proximity detection (LLDP)
  - Without topological configuration via redundant storage of the station name in the BusAdapter. A separate removable memory card is not required.
- Reset button for restoring the factory settings
- Redundant power supply
- Galvanic isolation between the two PROFINET IO subnets
- Media redundancy (MRP and MRPD)
- I&M data

• Installation altitude above sea level, max.	5 000 m; restrictions for installation altitudes > 2 000 m, see section "Climatic and mechanical environmental conditions"
<b>Mechanics/material</b>	
Strain relief	Yes; Optional, for RJ45 and FC BusAdapter only
<b>Dimensions</b>	
Width	100 mm; Minimized with good handling
Height	117 mm
Depth	74 mm; with mounting rail
<b>Weights</b>	
Weight, approx.	200 g; without BusAdapter

**Overview**

The Power Line Booster system is a communication system for general data transmission on conductive media. It enables Ethernet-based communication links between stationary system controls and mobile plant units. The transmission media can be sliding contact systems (graphite/copper on copper) such as in electric monorail conveyors or flexible cables such as the ones used in crane systems as well as slip ring transmitters. The Power Line Booster is designed for operation in industrial environments and supports the use of the proven SIMATIC PROFINET automation components on mobile plant units.

Power Line Booster

### Communications modules

#### Overview

SIMATIC PLB BM LV M/S

- SIMATIC PLB BM LV M/S basic module; for accommodating
  - the Power Line Booster modem module,
  - the empty module and
  - the BusAdapter module RJ-45 ET 200SP BA 2xRJ45 or BusAdapter FastConnect ET 200SP BA 2xFC

SIMATIC PLB EM

- SIMATIC PLB EM empty module; to cover the module bay and the DIP switches of the PLB BM

SIMATIC PLB MM

- SIMATIC PLB MM modem module; modulates or demodulates the Ethernet data frames into a form that is suitable for the "Powerline" transmission medium (e.g. sliding contact lines).

to cover the module bay and the DIP switches of the PLB BM

**Overview**

- SIMATIC PLB TC termination module; to terminate both ends of the communication cable of a segment
- SIMATIC PLB connection cable; the connection cables in a powerline system have a strong impact on the signal attenuation and cause poles in the frequency range used. This is why the selection of cables also has an effect on the maximum configuration limit. The PLB connection cable, with a length of 8 m, is optimized for PLB use. The following are available:
  - Connection cable without plug, length 8 m
  - Connection cable with plug at one end, length 8 m
  - Connection cable with 2 plugs

**PN/CAN LINK****Overview**

- For data exchange between PROFINET and CAN Bus 2.0A/B or CANopen Manager or Slave (according to CiA 301 & 302)
- CANopen features:
  - Node / lifeguarding
  - Heartbeat
  - SYNC (producer / consumer)
- Integrated in TIA via HSP, TIA Portal V14 or higher
- PROFINET switch and 9-pin D-sub plug integrated for CAN
- Up to 126 CAN nodes
- 512 receiver/transmitter PDOs
- Electrical isolation between the two networks
- Diagnostic interrupts
- Supported controllers: S7-1200, S7-1500, ET 200SP, Open Controller
- Optionally with function block SIMATIC ECC CHAdeMO: Realization of digital communication as basis for conductible DC charging of electric vehicles in line with the CHAdeMO standard

### Network transitions

#### PN/J1939 LINK

##### Overview

- For data exchange between PROFINET and SAE J1939 networks
- J1939 functions:
  - Broadcast Announce Message (BAM)
  - Connection Mode Data Transfer (CMDT)
  - PDU 1 & 2
- Integrated into Totally Integrated Automation via gsdml file in TIA Portal. No separate software required
- Integrated PROFINET switch with 9-pin Sub-D socket for J1939
- Up to 253 logical nodes
- Up to 30 addressable ECUs
- Galvanic isolation between the two networks
- Diagnostic interrupts
- Controllers supported: S7-1200, S7-1500, ET 200SP, Open Controller

## Network transitions

**PN/BACnet LINK****Overview**

- Gateway between PROFINET and BACnet/IP networks according to EN ISO16484-5 and Addendum ANSI/ASHRAE Standard 135-2012.
- Integrated in Totally Integrated Automation via HSP, TIA Portal V14 or higher
- Integrated PROFINET switch and RJ45 socket for BACnet
- 1 000 BACnet objects/object references
- 1 000 subscribe services
- BACnet features:
  - Client & Server
  - Device profile: B-GW
  - Change of value / cyclic and acyclic data exchange
  - Scan of BACnet/IP network
- Supported BACnet object types:
  - Device
  - Binary input
  - Binary output
  - Analog input
  - Analog output
- Supported BACnet services:
  - DS-COV-A/B
  - DM-DDB-A/B
  - DM-DOB-B
  - DS-RP-A/B
  - DS-WP-A/P
  - GW-EO-B
- Galvanic isolation between the two networks
- Diagnostic interrupts
- Controllers supported: S7-1200, S7-1500, ET 200SP, Open Controller

Network transition of PROFINET to BACnet/IP networks, device profile B-GW, IP20

**Technical specifications**

Article number	<b>6BK1621-0AA00-0AA0</b> SIMATIC PN/BACnet LINK
<b>General information</b>	
Product type designation	PN/BACnet Link
<b>Product function</b>	
• I&M data	Yes
• Isochronous mode	No
<b>Engineering with</b>	
• STEP 7 TIA Portal configurable/ integrated from version	V14 SP1
<b>Installation type/mounting</b>	
Mounting	DIN rail, wall mounting, portrait mounting
Mounting position	any
Recommended mounting position	Horizontal
<b>Supply voltage</b>	
Type of supply voltage	24 V DC
Rated value (DC)	24 V
Reverse polarity protection	Yes
Oversvoltage protection	Yes
Short-circuit protection	Yes
<b>Mains buffering</b>	
• Mains/voltage failure stored energy time	10 ms
<b>Input current</b>	
Current consumption (rated value)	0.11 A
Current consumption, max.	0.13 A
<b>Power loss</b>	
Power loss, typ.	2.7 W
<b>Interfaces</b>	
<b>Supports protocol for PROFINET IO</b>	
• automatic detection of transmission rate	No
• Transmission rate, max.	100 Mbit/s
• Number of RJ45 ports	2
• Number of FC (FastConnect) connections	2
<b>PROFINET functions</b>	
• Assignment of the IP address, supported	Yes
• Assignment of the device name, supported	Yes
<b>BACnet</b>	
• BACnet device profile	B-GW
• Supported character sets	ISO 10646 (UTF-8)
• Network Security	No
• Number of BACnet objects/object references	1 000
• Number of subscription services	1 000
<b>1. Interface</b>	
Interface type	BACnet/IP
Isolated	Yes; 1 500 V AC or 2 250 V DC

## Network transitions

**PN/M-Bus LINK****Overview**

- For data exchange between PROFINET and M-Bus networks
- M-Bus functions:
  - M-Bus master
  - Primary address
  - Secondary address
  - Read-only access to M-Bus slaves
  - Short-circuit detection
- Integrated into Totally Integrated Automation via gsdml file in TIA Portal. No separate software required
- Integrated PROFINET switch with 3-pin screw terminal for M-Bus
- Up to 40 slaves (loads/units)
- Diagnostic interrupts
- Controllers supported: S7-1200, S7-1500, ET 200SP, Open Controller

**Ordering data****Article No.****SIMATIC PN/M-Bus LINK****6BK1622-0AA00-0AA0**

**Technical specifications**

<b>DP/DP transceiver</b>	
PROFIBUS transmission rate	max. 12 Mbit/s
Interfaces	• PROFIBUS DP
Supply voltage	24 V DC
Current consumption typ.	150 mA
Mounting	Upright (DIP switches above)
Perm. environmental conditions	
• Operating temperature	
- horizontal mounting	0°C ... +60°C
- all other mounting positions	0°C ... +40°C
• Transport/storage temperature	-40 °C ... +70 °C
• Relative humidity	10-95 % at +25 °C
Design	
• Dimensions (W x H x D) in mm	40 x 127 x 117
• Weight	approx. 250 g
Degree of protection	IP20

## Overview

**Smart Field Distributor – SIMATIC Compact Field Unit**

Digitalization is an important catalyst for the process industry. When developing SIMATIC PCS 7 V9.0 the emphasis was placed on a forward-looking approach encompassing potential digitalization down to the field level.

The system solution was therefore expanded with special high-performance and compact hardware products that support PROFINET – the world's leading Industrial Ethernet standard – and create more freedom for plant layout and operation. With the SIMATIC Compact Field Unit (CFU), we are re-interpreting the conventional approach to field device connection. You benefit from more flexibility and easier handling, coupled with maximum availability. This allows you to efficiently transfer your familiar system concept to the digital world.

**Today's challenges for field device connection:**

- High overhead for device integration and replacement
- Complicated, error-prone wiring and routing over multiple levels, making the hardware FAT very complex
- Extremely long copper cables and numerous terminal points in the field
- Multiple individual control cabinets
- Large numbers of different components and protocols necessitate costly spare parts inventories and training sessions
- High planning and documentation costs

## I/O systems

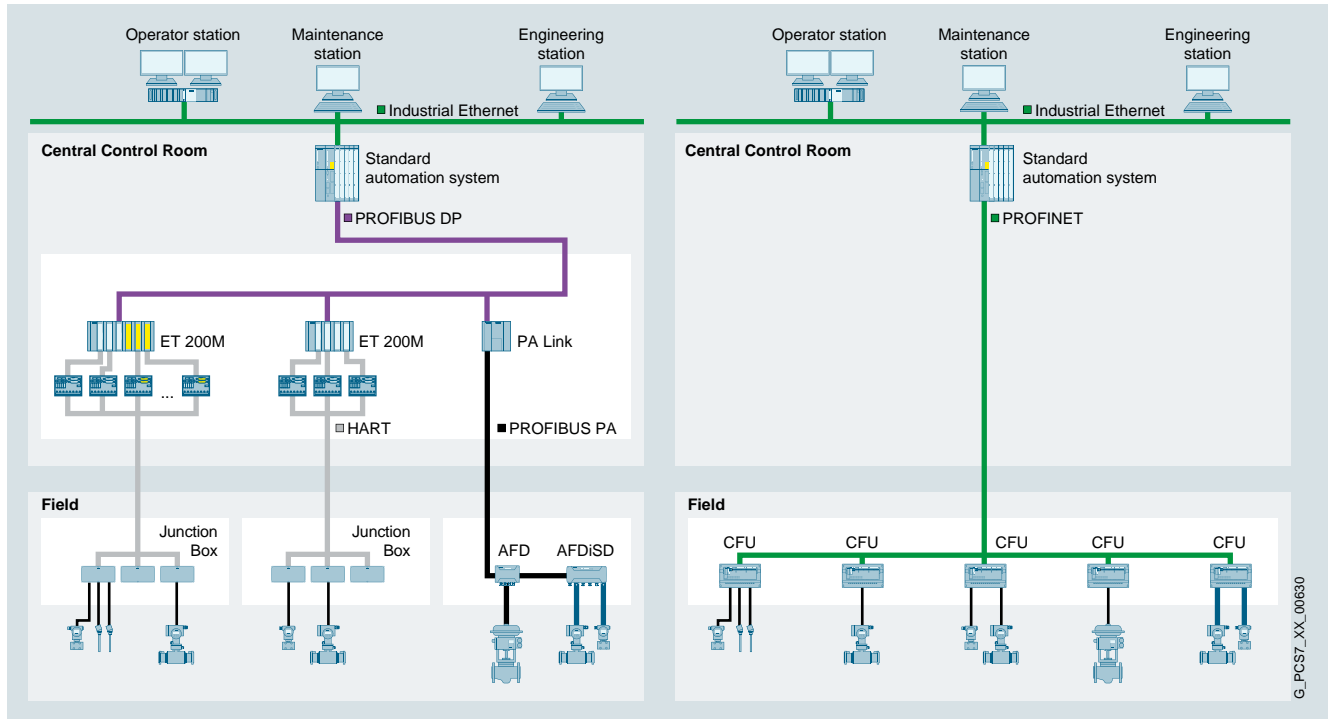

### Network transitions

#### SIMATIC CFU

##### Overview

##### *SIMATIC CFU – The answer to these challenges*

##### Mode of operation

Field device connection with previous technology (left) and with SIMATIC CFU (right)

The SIMATIC Compact Field Unit (CFU) is a real game-changer in field device connection and offers you entirely new prospects regarding simplicity and flexibility. The compact field distributor is installed at the process level and is connected via PROFINET directly to the process control system to form the foundation for digitalization in the field. Utilization of digital fieldbus communication considerably simplifies device interfacing compared to conventional 4 ... 20 mA engineering.

##### Greater flexibility thanks to consistent decentralization

Distributed installation of the SIMATIC CFU means that classic control cabinets are no longer required and you can make considerable savings in cabling and the number of terminal points, as well as reducing planning and documentation overheads. The high granularity (16 I/O per SIMATIC CFU) enables flexible assignment to the higher-level controllers.

## Overview

SIMATIC CFU here with BusAdapter, PROFINET bus cable and push-in terminals

### **SIMATIC CFU PA Edition**

#### Plug-and-produce simplicity

Digitalization requires a digital infrastructure facilitating integrated digital communication right down to the sensors and actuators. You can use the established and proven PROFIBUS PA standard to achieve this. It is integrated into the PA Edition of the SIMATIC CFU, thus combining ruggedness and easy handling with all the advantages of the PROFINET standard based on Industrial Ethernet. Connected devices are automatically addressed. The device is integrated via standardized communication profiles.

This innovative new implementation of the PROFIBUS PA concept makes it possible to combine the simplicity of a point-to-point wiring system with the scalability of digital PROFIBUS PA fieldbus communication. As with digital field devices, it is not necessary to know prior to connection whether the discrete field device is a sensor or actuator – This can be easily configured afterwards via software.

#### Combination of digital fieldbus and discrete I/Os

- 8 × digital fieldbus (PROFIBUS PA)
- 8 × digital inputs/outputs, freely configurable (1 × counter functionality / frequency measurement)

#### Easy to use

- Automatic addressing of PROFIBUS PA field devices
- System-supported detection and integration of PROFIBUS PA field devices into the process control system
  - Utilization of standardized PA profiles
  - Commissioning, device replacement and maintenance wizards
- Implementation of diagnostic messages according to NAMUR NE 107
- Installation on a 35 mm DIN rail

#### Aluminum field housing

SIMATIC CFU aluminum field housing, open

SIMATIC CFU aluminum field housing, closed

The die-cast aluminum housing is suitable for use in zone 2/22 hazardous areas. The following are included in the housing scope of delivery:

- 22 × M20 plastic cable glands (incl. blanking plugs)
- 35 mm DIN rail
- Rail for strain relief and shield support

The housing has a display window for LED diagnostics.

## Overview

### SIMATIC CFU DIQ Edition

Individual, customer-specific solutions and flexible system/plant extensions are requirements that are becoming increasingly important in the process industry due to digitalization. SIMATIC CFU DIQ Edition with 16 freely configurable digital IO channels offers a solution for the growing demands of distributed I/O.

SIMATIC CFU also has expansion functions for optional configuration. Two additional operating modes can be activated for selected digital inputs. "Counter" operating mode and "Frequency measurement" operating mode with a cut-off frequency of 1 kHz.

Actuator disconnection can be set for the digital outputs. The actuator disconnection of the SIMATIC CFU uses a monitoring channel (DI channel) to quickly set all digital outputs to a low digital level.

- 16 × digital inputs/outputs, freely configurable (2 × counter functionality / frequency measurement)

### Aluminum field housing

SIMATIC CFU aluminum field housing, open

SIMATIC CFU aluminum field housing, closed

The die-cast aluminum housing is suitable for use in zone 2/22 hazardous areas. The following are included in the housing scope of delivery:

- 22 × M20 plastic cable glands (incl. blanking plugs)
- 35 mm DIN rail
- Rail for strain relief and shield support

The housing has a display window for LED diagnostics.

**Technical specifications**

Article number	<b>6ES7655-5PX31-1AX0</b> SIMATIC CFU DIQ with Alu housing	<b>6ES7655-5PX31-1XX0</b> SIMATIC CFU DIQ
<b>General information</b>		
Product type designation		Compact Field Unit
Number of channels		16
<b>Product function</b>		
<ul style="list-style-type: none"> <li>I&amp;M data</li> <li>Isochronous mode</li> <li>The user can configure digital channels as input/output as required</li> <li>Digital channels can be parameterized</li> </ul>		Yes; I&M0 to I&M4 No Yes Yes
<b>Engineering with</b>		
<ul style="list-style-type: none"> <li>STEP 7 configurable/integrated from version</li> <li>PCS 7 configurable/integrated from version</li> <li>PROFINET from GSD version/ GSD revision</li> </ul>		V5.6 HF2 and higher V9.0 SP2 and higher GSDML V2.3
<b>Operating mode</b>		
<ul style="list-style-type: none"> <li>Counter</li> </ul>		Yes
<b>Installation type/mounting</b>		
Mounting		on 35 mm DIN rail, 2 spacing units wide
Mounting position	Horizontal, vertical	Horizontal, vertical
Recommended mounting position	horizontal set up	
<b>Supply voltage</b>		
Type of supply voltage		24 V DC
Rated value (DC)		24 V
Reverse polarity protection		Yes
Short-circuit protection		Yes
Redundant power supply		Yes
<b>Mains buffering</b>		
<ul style="list-style-type: none"> <li>Mains/voltage failure stored energy time</li> </ul>		5 ms; For communication
<b>Input current</b>		
Current consumption (rated value)		5.12 A
Current consumption, max.		5.13 A
Inrush current, max.		4.8 A
$I^2t$		0.073 A <sup>2</sup> ·s
<b>Encoder supply</b>		
Number of outputs		16
Output voltage, min.		18.2 V
Short-circuit protection		Yes; Electronic
<b>Output current</b>		
<ul style="list-style-type: none"> <li>up to 60 °C, max.</li> <li>up to 70 °C, max.</li> </ul>		5 A 4 A
<b>Power loss</b>		
Power loss, typ.		2.88 W; Depending on the type of BusAdapter used (typ. RJ45)
<b>Address area</b>		
<b>Address space per station</b>		
<ul style="list-style-type: none"> <li>Address space per station, max.</li> </ul>		1 440 byte; Dependent on configuration

**Technical specifications**

<b>Digital inputs</b>		
Number of digital inputs		16
Source/sink input		Yes; P-reading
Input characteristic curve in accordance with IEC 61131, type 1		Yes
Input characteristic curve in accordance with IEC 61131, type 2		No
Input characteristic curve in accordance with IEC 61131, type 3		Yes
Pulse extension		No
<b>Number of simultaneously controllable inputs</b>		
<b>horizontal installation</b>		
- up to 60 °C, max.		16; Total current must be observed, see DQ
- up to 70 °C, max.		16; Total current must be observed, see DQ
<b>vertical installation</b>		
- up to 60 °C, max.		16; Total current must be observed, see DQ
<b>Digital input functions, parameterizable</b>		
• Counter		Yes
- Number, max.		2
- Counting frequency, max.		1 kHz
- Counting width		32 bit
- Counting direction up/down		Yes; Up
<b>Input voltage</b>		
• Rated value (DC)		24 V
• for signal *0*		-30 to +5 V
• for signal *1*		+11 to +30V
<b>Input current</b>		
• for signal *1*, typ.		2.5 mA; Typical
<b>Input delay (for rated value of input voltage) for standard inputs</b>		
- parameterizable		No
- at *0* to *1*, max.		3.2 ms; for counter function 0,1 ms
- at *1* to *0*, max.		3.2 ms; for counter function 0,1 ms
<b>Cable length</b>		
• shielded, max.		1 000 m
• unshielded, max.		600 m
<b>Digital outputs</b>		
Type of digital output		Transistor
Number of digital outputs		16
Current-sinking		No
Current-sourcing		Yes
Short-circuit protection		Yes
• Response threshold, typ.		0.7 to 1.3 A
Limitation of inductive shutdown voltage to		Typ. L+ (-50 V)
Controlling a digital input		Yes
<b>Switching capacity of the outputs</b>		
• on lamp load, max.		5 W
<b>Load resistance range</b>		
• lower limit		48 Ω
• upper limit		12 kΩ
<b>Output voltage</b>		
• Type of output voltage		DC
• for signal *1*, min.		Ue minus 1 V
<b>Output current</b>		
• for signal *1* rated value		0.5 A
• for signal *0* residual current, max.		0.1 mA

### BusAdapter

#### Overview

BusAdapter BA 2xRJ45, 2xFC and 2xLC

#### BusAdapter

A BusAdapter as a separate component allows a free choice of SIMATIC CFU connection to PROFINET:

- BA 2xRJ45:  
2 electrical connections for bus cables with standard RJ45 connectors
- BA 2xFC:  
2 electrical connections for direct connection of FastConnect bus cable
- BA 2xLC:  
2 optical ports for fiber-optic cables
- BA 1xLC, 1xRJ45:  
Combination bus adapter comprising 1 optical connection and one electrical connection standard RJ45
- BA 1xLC, 1xFC:  
Combination bus adapter 1 optical connection and 1 electrical connection for direct connection of FastConnect bus cable
- BA 2xRJ45 VD:  
2 electrical connections for Ethernet communication via 2, 4 or 8-wire copper cables and distances up to 500 m

#### Ordering data

##### BusAdapter

**BusAdapter BA 2xRJ45**  
2 x RJ45 connections  
for PROFINET  
(standard Ethernet socket)

**BusAdapter BA 2xFC**  
2 x FastConnect (FC) connections  
for PROFINET

**BusAdapter BA 2xLC**  
2 x glass fiber-optic connections

### FM 458-1 DP application module

#### Introduction

#### Overview

#### **SIMATIC FM 458-1 DP integrated in SIMATIC S7-400**

- Designed for high-performance and user-configurable closed-loop control tasks in the SIMATIC S7-400.
- Can be adapted to individual requirements as required, such as: Controlling, computing, closed-loop control as well as motion control. Can therefore be used flexibly for a wide variety of applications.
- Extensive library with approx. 300 function blocks: E.g. simple functions such as AND, ADD and OR through to complex GMC (General Motion Control) blocks as virtual master or gear functions.
- User-friendly graphical configuration with the SIMATIC engineering tool CFC (Continuous Function Chart) and the D7-SYS add-on software package: Optimum code generation by the compiler, therefore SCL is not required.
- PROFIBUS DP interface onboard.

SIMATIC FM 458-1 DP is based on more than 15 years experience with high-performance control systems and combines this know-how with the advantages of SIMATIC – the leading automation system for decades. In contrast to other function modules with static structures/functions, the FM 458-1 DP application module can be configured flexibly and adapted to individual requirements.

### Overview

- Basic module for computing, closed-loop control and open-loop control tasks
- PROFIBUS DP interface for connection of distributed I/O and drives
- Modular design with expansion modules for I/O and communication

Number of analog outputs	8; 4 outputs 16 bit; 4 outputs 12 bit
Voltage output, short-circuit protection	Yes; relative to frame
Voltage output, short-circuit current, max.	16 bit: 27 mA; 12 bit: 100 mA
<b>Output ranges, voltage</b>	
• -10 V to +10 V	Yes
<b>Analog value generation for the inputs</b>	
<b>Integration and conversion time/resolution per channel</b>	
• Resolution with overrange (bit including sign), max.	12 bit
• Conversion time (per channel)	45 $\mu$ s
<b>Analog value generation for the outputs</b>	
<b>Integration and conversion time/resolution per channel</b>	
• Resolution with overrange (bit including sign), max.	4 AO: 16 bit, 4 AO: 12 bit
• Conversion time (per channel)	4 AO (16 bit): 2 $\mu$ s; 4 AO (12 bit): 4 $\mu$ s
<b>Encoder</b>	
Number of connectable encoders, max.	12; 8 incremental encoders (synchronizable), 4 absolute encoders
<b>Connectable encoders</b>	
• Incremental encoder (symmetrical)	Yes
• Incremental encoder (asymmetrical)	Yes
• Absolute encoder (SSI)	Yes; Single or multturn encoder with SSI (synchronous serial) or EnDat interface

Article number	<b>6DD1607-0CA1</b> EXM 438-1 I/O Expansion
<b>Encoder signals, incremental encoder (symmetrical)</b>	
• Trace mark signals	1) for tracks A and B (90° out of phase), poss. with zero pulse N; 2) for separate forward and backward track
• Input voltage	With 0 signal: -5 to 0 V; with 1 signal: +3 to +5 V; permissible input voltage range: differential voltage -5 to +5 V; max. input current: 15 mA (important: not limited on module side!)
<b>Encoder signals, incremental encoder (asymmetrical)</b>	
• Trace mark signals	Track A and B (phase-shifted by 90 degrees), possibly with zero pulse N
• Input voltage	with 0 signal: -30 to +4 V (at 15 mA load); with 1 signal: +8 to 30 V (at 15 mA load); permissible input voltage range: differential voltage -30 to +30 V
<b>Encoder signals, absolute encoder (SSI)</b>	
• Input signal	5 V acc. to RS 422
• Data signal	Dual-, Gray-, Gray-Excess-Code
• Clock frequency, max.	2 MHz; 100 kHz to 2 MHz (depending on cable length)
<b>Errors/accuracies</b>	
Linearity error (relative to output range), (+/-)	( $\pm 1$ LSB )
<b>Potential separation</b>	
<b>Potential separation digital inputs</b>	
• Potential separation digital inputs	No
<b>Potential separation digital outputs</b>	
• Potential separation digital outputs	No
<b>Potential separation analog inputs</b>	
• Potential separation analog inputs	No
<b>Potential separation analog outputs</b>	
• Potential separation analog outputs	No
<b>Weights</b>	
Weight, approx.	1 kg

#### Overview

- Optional plug-in expansion module for the FM 458-1 DP basic module
- For high-speed communication over up to 2 SIMOLINK interfaces
- For coupling several FM 458-1 DP application modules in synchronism with the sampling time

## SIMATIC control systems

### FM 458-1 DP application module

#### D7-SYS

##### Overview

- Optional package for STEP 7 V5.6 for configuring closed-loop control and automation tasks with SIMATIC TDC, FM 458-1 DP and T400
- Extensive block library
- Generation of user libraries in ANSI C with D7-FB-GEN function block generator

##### Licensing

- D7-SYS is delivered with a floating license. The floating license allows installation of the software on any number of computers. This means one user per license can use the software independently of the computer used or from a specific workstation. The number of existing licenses determines the number of computers on which the software can be used simultaneously.
- An upgrade to version 9.0 is available for users of the previous 8.x version.
- A separate Software Update Service can be purchased for D7-SYS.
- As of version 8.1, the D7-FB-GEN block generator that was previously sold separately is included in the D7-SYS scope of delivery.

You can find more information on the Software Update Service, license types, online software delivery and handling your SW licenses with the Automation License Manager:

<http://www.siemens.com/simatic-licenses>

##### Accessories

##### Overview

- Interface modules and interface cables for the FM 458-1 DP application modules

##### Note:

For information on interface cables SC 62, SC 63, SC 64 and interface modules SB10, SB61, SB71, SU12 and SU13, see SIMATIC TDC multiprocessor control system, accessories, page 11/17.

### Introduction

SIMATIC TDC (Technology and Drives Control) is a digital automation system featuring very high computing power and the ability to process very large programs. An extensive library with approx. 300 ready-made function blocks is available for fast engineering.

### Overview UR6021 rack

- UR6021 rack as the base component for SIMATIC TDC
- Integrated system power supply and system fan
- With high-performance 64-bit backplane bus for high-speed data exchange between the inserted modules
- Requirement for operating the CPU555

### SIMATIC TDC multiprocessor control system

#### CP51M1 communications module, CP53M0 coupling module

##### Overview CP51M1 communications module

The CP51M1 communications module is an Industrial Ethernet interface module for the SIMATIC TDC automation system.

##### Overview CP53M0 coupling module

The CP53M0 coupling module allows coupling of a SIMATIC TDC system to a SIMADYN D system for fast data exchange, e.g. when expanding existing SIMADYN D systems.

##### Ordering data

##### Article No.

CP51M1 communications module	6DD1661-0AE1
------------------------------	--------------

##### Technical specifications

Please refer to the up-to-date technical specifications in the user documentation provided at the time of delivery

Required space / width	1 slot
Weight	
Connection for Industrial Ethernet	RJ45
Protocols	TCP/IP and/or UDP
Message frame lengths	also larger than 2 KB
Modes of transfer	Refresh, Handshake, Multiple and Select
Autosensing	for 10 Mbit or 100 Mbit network
Default router	adjustable

##### Ordering data

### Technical specifications

#### Power supply

Voltage / Power supply (at 25°C)	+5 V typically 1.0 A +3.3 V typically 0.05 A +12 V typically 0.3 A -12 V typically 0.3 A
----------------------------------	---

Typical power loss	12.5 W
--------------------	--------

Required space / width	1 slot
------------------------	--------

Weight	0.7 kg
--------	--------

#### Analog outputs

Number	8
--------	---

Version	Output with associated ground
---------	-------------------------------

Galvanic isolation	No
--------------------	----

Output voltage range	-10 V to +10 V
----------------------	----------------

Output current	±10 mA
----------------	--------

Resolution	12 bit
------------	--------

Typical conversion time per channel	4 µs
-------------------------------------	------

#### Accuracy:

• Max. differential linearity error	± 1 LSB (monotony guaranteed)
• Max. amplification error	± 0.3 %
• Max. offset error	± 24 LSB

Slew rate	Approx. 3.5 V/µs
-----------	------------------

#### Voltage output:

• Short-circuit protection to ground	yes
• Short-circuit current	Approximately 100 mA

#### Analog inputs

Number	8
--------	---

Version	Differential inputs
---------	---------------------

Galvanic isolation	No
--------------------	----

Input voltage range	-10 V to +10V
---------------------	---------------

Resolution	12 bit
------------	--------

Max. conversion time per channel	Approx. 20 µs
----------------------------------	---------------

#### Accuracy:

• Max. differential linearity error	± 1 LSB (no missing code)
• Max. amplification error	± 0.3 %
• Max. offset error	± 5 LSB

Input resistance	20 kΩ
------------------	-------

Input filter	34 kHz
--------------	--------

Reverse polarity protection	Yes, as differential inputs are used
-----------------------------	--------------------------------------

#### Integrating analog inputs (V/f)

Number	4
--------	---

Version	Differential inputs
---------	---------------------

Galvanic isolation	No
--------------------	----

Input voltage range	-10 V to +10 V
---------------------	----------------

Resolution	Depending on the integration time, e.g. 15 bits for a 4 ms integration time.
------------	--

Max. integration time per channel	Configurable
-----------------------------------	--------------

#### Accuracy:

• Max. amplification error	0.05 %
• Max. integral linearity error	1 %
• Max. offset error	± 2 LSB (software adjustment)

Input resistance	470 kΩ
------------------	--------

Input filter	2 kHz
--------------	-------

Reverse polarity protection	Yes, as differential inputs are used
-----------------------------	--------------------------------------

## SIMATIC TDC multiprocessor control system

**SM500 I/O module****Technical specifications****Digital outputs**

Number	16
Galvanic isolation	Only through optional interface modules
External power supply:	
• Nominal voltage	24 V
• Permissible range	20 to 30
• Short-term	35 V for max. 0.5 s
• Max. current consumption, without load	40mA
Output voltage range:	
• With 0 signal, max.	3 V
• With 1 signal, min.	ext. supply voltage -2.5 V
Output current:	
• With 0 signal, min.	- 20 µA
• With 1 signal	
- Rated value	50 mA
- Permissible range, max.	100 mA
Delay time	100µs
Max. switching frequency of the outputs under resistive load	6 kHz
Short-circuit protection to	
• Mass	yes
• Ext. power supply	No
Max. short-circuit current	250 mA
Total current of outputs (up to 60°C)	16 x 50mA
Limiting of inductive cut-off voltage.	External power supply +1 V

**Digital inputs**

Number	16
Electrical isolation	Only through optional interface modules
Input voltage:	
• Nominal voltage	24 V
• For 0-signal	-1 V to +6 V
• For 1-signal	+13.5 V to +33 V
Input current:	
• With 0 signal	0 mA
• With 1 signal	3 mA
Delay time	100 µs

**Incremental encoder**

Number	4
Connectable types	Incremental encoders with 90 degree track phase offset
Version	Differential inputs, switchable between 15 V (HTL) and 5 V (TTL) encoder signals
Track signals	Tracks A, B with or without zero pulse
Min. phase difference of the track signals	200 ns
Max. pulse frequency (track frequency)	1 MHz

Input voltage:	
• 15 V encoder	
- Permissible range	- 30 V to + 30 V
- With 0 signal	- 30 V to + 4 V
- With 1 signal	+ 8 V to +30 V
• 5 V encoder	
- Permissible range	- 7 V to + 7 V
- With 0 signal	- 7 V to - 0.7 V
- With 1 signal	+1.5 V to + 7 V

Input current	
• With 15 V encoder (typical, absolute)	5.0 mA
• With 5 V encoder (typical, absolute)	1.5 mA

Monitoring output	Not available
-------------------	---------------

Monitoring input	Specification as for digital input
------------------	------------------------------------

Interrupt reset output	
• Short-circuit protection against ground	yes
- Ext. power supply	No
- Max. short-circuit current	20 mA

Alarm input:	
• Input voltage (permissible range)	0 V to 5 V
- 0 signal, max.	< 0.5 V
- 1 signal, min.	> 2.0 V
• Input current	
- 0 signal	- 2.8 mA
- 1 signal	1.6 mA

**Sensor supply voltage**

Number	1
Electrical isolation	No
Typical output voltage	13.5 V
Max. output current	150 mA, short-circuit-proof against ground, short-circuit current approx. 250 mA

**Absolute encoder inputs**

Number	4
Version	Differential inputs, RS485 signal level
Connectable types	Single or multturn encoder
Protocols	SSI, EnDat
Data formats	Gray code, binary
Data direction	
• Unidirectional	SSI
• Bi-directional	EnDat
Data bits	SSI: 13+Parity, 25+Parity EnDat: variable
Max. pulse frequency	2 MHz, depending on cable length
Input voltage	
• Permissible range	RS485 signal level

## SIMATIC control systems

### SIMATIC TDC multiprocessor control system

#### GlobalDataMemory

#### Overview

#### GlobalDataMemory

Data can be exchanged between all of the CPU modules in the system, over all of the networked subracks, using the memory in the GlobalDataMemory (GDM). Up to 44 subracks can be coupled in synchronism through the central memory. This means that a maximum of 836 CPU modules can be used.

### Overview SB10 interface module

May deviate from figure.

The interface module is used to connect 8 digital inputs or outputs.

### Overview SB70 interface module

The interface module is used to connect 8 digital outputs with conversion of the 24 V DC voltage on the module side to a max. of 120 V DC/AC on the plant side using relays.

### Overview SB60 interface module

Interface module for connecting 8 digital inputs with 120 V DC/AC to 24 V DC conversion.

### Overview SB71 interface module

The interface module is used to connect 8 digital outputs with conversion of the module-side 24 V DC to system-side max. 24/48 V DC by means of transistors.

### Overview SB61 interface module

It is used to connect 8 digital inputs with conversion from 24/48 V DC to 24 V DC.

### Overview SC62 interface cable

Cable for connecting the SIMATIC TDC SM500 I/O module or SIMATIC S7-400 EXM 438-1 expansion module with up to five SB10, SB60, SB70, SB61 SB71 and/or SU12 interface modules.

## SIMATIC control systems

### SIMATIC TDC multiprocessor control system

#### Accessories

##### Overview SC63 interface cable

Cable for connecting the SIMATIC TDC SM500 I/O module or SIMATIC S7-400 EXM 438-1 expansion module with an SU13 interface module.

##### Overview SC67 service cable

Service cable for the SIMATIC TDC CPU551 processor module and a local configuration / service PC.

##### Overview SC64 interface cable

May deviate from figure

Interface cable for FM 458-1 DP basic module and SB10, SB60, SB61 and SU12 interface modules.

##### Overview SU12 interface module

The interface module is used to connect 10 signals; there is no electronic conversion.

##### Overview SC66 interface cable

Interface cable for the SIMATIC TDC CPU551 processor module and the SB10, SB60, SB61 and SU12 interface modules

##### Overview SU13 interface module

This interface module can be used to connect 50 signals; there is no electronic conversion.

## Software for SIMATIC Controllers

### Introduction

#### Information on software licensing, Software Update Service

##### Overview Licensing

###### **Software types**

Siemens Digital Industry offers various types of software license.

For more information, see catalog section 17, page 17/14.

##### Overview Software Update Service

- Service for automatic dispatch of all new software versions during contract lifetime
- Reduced logistics effort thanks to automatic contract extension
- Reduced costs as updates are provided free of charge

###### **Ordering**

- The Software Update Service is ordered in the same way as any other product. The corresponding order number is given in the ordering information of the software product in question.
- You must own the current version of the software.
- One Software Update Service is ordered for each software license installed.
- The Software Update Service runs for 1 year from date of order.
- It is extended automatically by a further year in each case, as long as it is not canceled 3 months before it expires.
- An annual lump sum is invoiced per license.

##### Application

SIMATIC Software is continuously enhanced and improved. The **Software Update Service** (previously: software maintenance service) is the easiest way to regularly take advantage of these improvements. It ensures automatic delivery of all new software versions that are released after ordering the Software Update Service so that your software is always up to date.

The Software Update Service

- Saves time and effort:  
Once it is ordered, the Software Update Service is automatically renewed every year.
- Lowers costs:  
The service pays for itself after the first update as it costs less than an individually ordered update.
- Makes budgeting easier:  
Software expenditures can be accounted for early in the budgeting process and they are easier to write off.

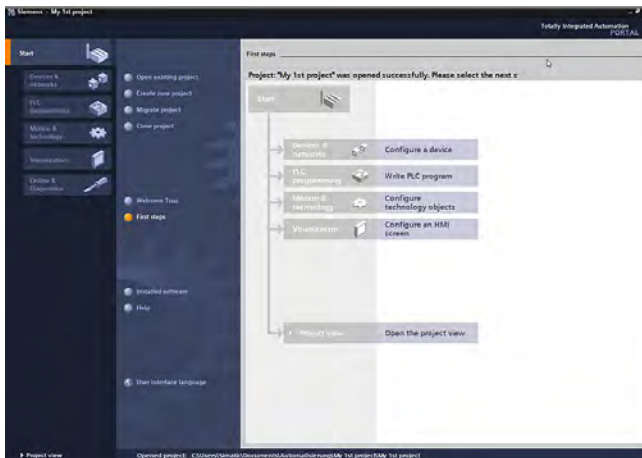

##### Design

###### **Scope of supply**

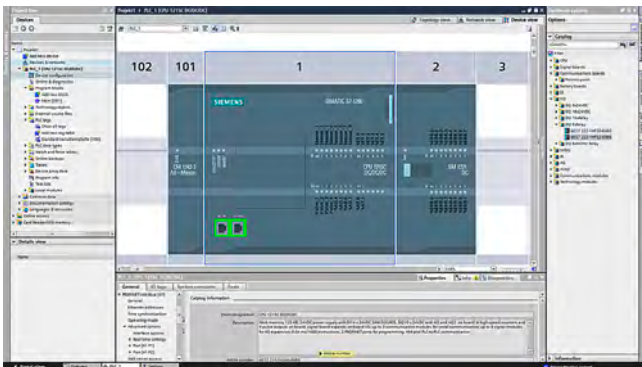

- All new software versions that are released after ordering the Software Update Service (usually several deliveries per year)
- CD-ROM SIMATIC Customer Support Knowledge Base with FAQs, tips & tricks and downloads (several times per year).

## Overview

STEP 7 Basic V17 (TIA Portal), portal view

STEP 7 Basic V17 (TIA Portal), device view: Configuring and parameterizing in realistic photo-quality representation

**Intuitive, efficient and future-oriented - the engineering software for programming SIMATIC Controllers**

SIMATIC STEP 7 Basic V17 is the engineering system for the SIMATIC S7-1200.

STEP 7 Basic V17 is based on the Totally Integrated Automation Portal (TIA Portal) central engineering framework which offers users a uniform, efficient and intuitive solution to all automation tasks.

**New with V17**

- New programming language Cause Effect Matrix (CEM) for efficient and fast programming in a connection matrix
- Download and upload of the folder structure for program blocks, PLC data types and PLC tags to the PLC
- Extended functions for the cross-references (freeze the display, show access to higher-level structures, improved display of PLC tags with overlapping input or output addresses)
- Extended functions for TIA Portal Openness
- Improved performance and support of new CPUs in PLCSIM
- Offline/offline comparison of the hardware configuration up to the parameter level
- Innovated type instance and versioning concept for blocks in TIA Portal libraries
- Extended functions of TIA Portal user management: Introduction of engineering function rights, anonymous users without password, locking of open projects, ...

**Licensing**

- STEP 7 Basic V17 is supplied with a floating license. The floating license allows the software to be used on any number of computers. This means one user per license can use the software independently of the computer used and without being tied to a specific workstation. The number of licenses acquired determines the number of computers on which the software can be used simultaneously.
- Existing STEP 7 Basic licenses of versions V11-V16 can be upgraded to V17. This requires an upgrade license.
- A STEP 7 Basic V17 license can be upgraded to a STEP 7 Professional V17 license with a PowerPack.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager here:

#### Software Update Service

For a period of 12 months and for a fixed price, the customer is automatically provided with all upgrades and Service Packs for each installed software package. The contract is automatically extended by a further year unless canceled at least 12 weeks prior to expiration. Requires the current software version

#### Software Update Service (Standard Edition)<sup>2)</sup>

The delivery is implemented according to the number of ordered SUS products (e.g. 10 upgrade packages with 10 DVDs, 10 USB flash drives, etc.)

- STEP 7 Basic

6ES7822-0AA00-0YLO

#### Software Update Service (Compact Edition)<sup>2)</sup>

The delivery items are combined. For several contracts, only 1 package with 1 data storage medium set, 1 USB flash drive with the corresponding number of licenses and the corresponding number of CoLs will be supplied.

Delivery items to be combined must be ordered as one item.

- STEP 7 Basic

### Technical specifications

STEP 7 Basic V17 (TIA Portal)	
Type of license	Floating license
Software class	A
Current version	V17
Target system	SIMATIC S7-1200
Operating systems	Windows 10 (64-bit) <ul style="list-style-type: none"> <li>• Windows 10 Home Version 1909, 2004, 20H2</li> <li>• Windows 10 Professional Version 1909, 2004, 20H2</li> <li>• Windows 10 Enterprise Version 1909, 2004, 20H2</li> <li>• Windows 10 IoT Enterprise 2016 LTSB</li> <li>• Windows 10 IoT Enterprise 2019 LTSC</li> </ul> Windows Server (64-bit) <ul style="list-style-type: none"> <li>• Windows Server 2016 Standard (full installation)</li> <li>• Windows Server 2019 Standard (full installation)</li> </ul>
Recommended PC hardware	
Computer	SIMATIC Field PG M6 Advanced or higher (or comparable PC)
Processor	Intel Core i5-8400H (up to 4.2 GHz)
RAM	16 GB or more (min. 8 GB, 32 GB for large projects)
Hard disk	SSD with at least 50 GB storage space available
Network	1 Gbit (for multi-user)
Screen	15.6" full HD display (1920 x 1080 or higher)

### Compatibility with other SIMATIC products

STEP 7 V17 can be installed on a PC in parallel with other versions of STEP 7 V13 SSP2 to V16 and STEP 7 V5.6 or higher.

As of TIA Portal project version V13 SP1, projects can be directly upgraded to V17. Upgrading of projects from previous project versions (V11 ... V13) is carried out on the basis of the TIA Portal products (e.g. STEP 7) used in the project in version V13 SP1 or V13 SP2 (latest update recommended).

### Important note

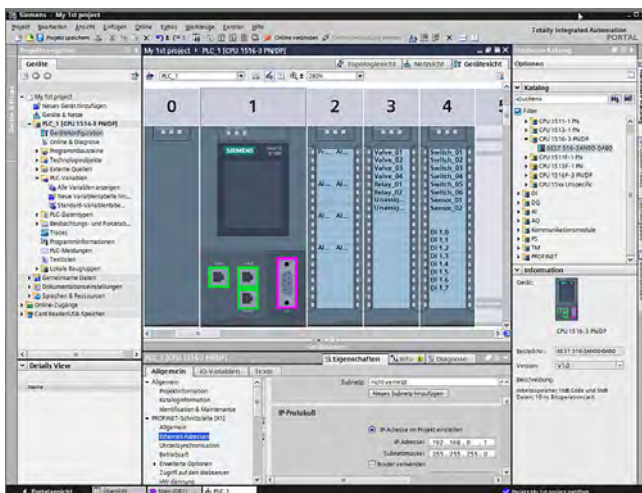

TIA Portal project versions V13 SP1.. V16 are upgraded with TIA Portal V17 to the project version V17. If you need to edit a TIA Portal project version V13 SP1.. V16, we recommend an additional installation of the corresponding software to TIA Portal V17. The license purchased for V17 is also valid for all older TIA Portal versions.

Program code and hardware configuration from STEP 7 V5.4 SP5 can be migrated directly to a TIA Portal V17 project with STEP 7 V17.

## Overview

STEP 7 Professional V17 (TIA Portal), portal view

STEP 7 Professional V17 (TIA Portal), device view: Configuring and parameterizing in realistic photo-quality representation

### Intuitive, efficient and future-oriented - the engineering software for programming the SIMATIC Controllers

SIMATIC STEP 7 Professional V17 is the engineering system for the SIMATIC S7-1200, S7-1500, S7-300, S7-400 Controllers, WinAC and Software Controllers.

STEP 7 V17 is based on the Totally Integrated Automation Portal (TIA Portal) central engineering framework which offers users a uniform, efficient and intuitive solution to all automation tasks.

#### New with V17

- New programming language Cause Effect Matrix (CEM) for efficient and fast programming in a connection matrix
- Download and upload of the folder structure for program blocks, PLC data types and PLC tags to the PLC
- Extended functions for the cross-references (freeze the display, show access to higher-level structures, improved display of PLC tags with overlapping input or output addresses)
- Extended functions for TIA Portal Openness
- Improved performance and support of new CPUs in PLCSIM
- Offline/offline comparison of the hardware configuration up to the parameter level
- Innovated type instance and versioning concept for blocks in TIA Portal libraries
- Extended functions of TIA Portal user management: Introduction of engineering function rights, anonymous users without password, locking of open projects, ...

#### Licenses

- STEP 7 Professional V17 is supplied with a STEP 7 Professional V17 floating license. The floating license allows the software to be used on any number of computers. This means one user per license can use the software independently of the computer used and without being tied to a specific workstation. The number of licenses acquired determines the number of computers on which the software can be used simultaneously.
- Existing STEP 7 Professional licenses of versions V11-V16 can be upgraded to V17. This requires an upgrade license.
- The user receives a combo license when upgrading from STEP 7 V5.x. The combo license enables engineering to be performed both on the STEP 7 V 5.x and the STEP 7 V17 platform.
- The STEP 7 Basic V17 license can be upgraded to a STEP 7 Professional V17 license with a PowerPack.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager here:

<p><b>Software Update Service (Compact Edition)<sup>2)</sup></b></p> <p>The delivery items are combined. For several contracts, only 1 package with 1 data storage medium set, 1 USB flash drive with the corresponding number of licenses and the corresponding number of CoLs will be supplied. Delivery items to be combined must be ordered as one item.</p> <ul style="list-style-type: none"> <li>• STEP 7 Professional in the TIA Portal</li> <li>• STEP 7 Professional and STEP 7 Professional in the TIA Portal</li> </ul>	<p><b>6ES7822-1AA00-0YM5</b> <b>6ES7810-5CC00-0YM2</b></p>													
<p><b>Software Update Service (Download)<sup>2)</sup></b></p> <p>Upgrades and Service Packs are available for downloading. Consignee email address required for delivery</p> <ul style="list-style-type: none"> <li>• STEP 7 Professional V1x</li> <li>• STEP 7 Professional and STEP 7 Professional in the TIA Portal</li> </ul>	<p><b>6ES7822-1AE00-0YY0</b> <b>6ES7810-5CC04-0YY2</b></p>	<p><b>Compatibility with other SIMATIC products</b></p> <p>STEP 7 V17 can be installed on a PC in parallel with other versions of STEP 7 V13 SP2 to V16 and STEP 7 V5.6 or higher.</p> <p>As of TIA Portal project version V13 SP1, projects can be directly upgraded to V17. Upgrading of projects from previous project versions (V11 ... V13) is carried out on the basis of the TIA Portal products (e.g. STEP 7) used in the project in version V13 SP1 or V13 SP2 (latest update recommended).</p> <p><u>Important note</u></p> <p>TIA Portal project versions V13 SP1.. V16 are upgraded with TIA Portal V17 to the project version V17. If you need to edit a TIA Portal project version V13 SP1.. V16, we recommend an additional installation of the corresponding software to TIA Portal V17. The license purchased for V17 is also valid for all older TIA Portal versions.</p> <p>Program code and hardware configuration from STEP 7 V5.4 SP5 can be migrated directly to a TIA Portal V17 project with STEP 7 V17.</p>												

<sup>2)</sup> For more information on the Software Update Service, see page 12/2.

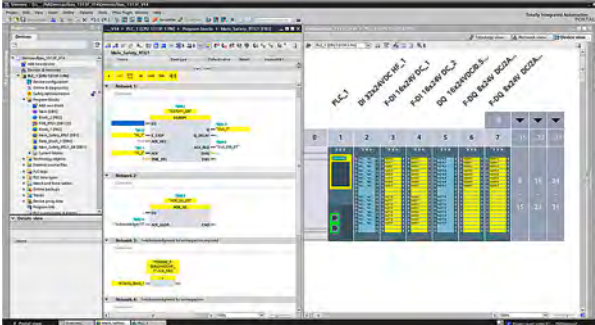

# Software for SIMATIC Controllers

TIA Portal

PLC programming

## STEP 7 (TIA Portal) options > STEP 7 Safety (TIA Portal)

### Overview

STEP 7 Safety Advanced, configuration and programming

- For creating safety-related programs on the STEP 7 user interface
- For seamless and easy to use integration of safety-related functions into the standard automation
- All the required configuration and programming tools are integrated into the STEP 7 user interface and utilize a common project structure
- STEP 7 Safety Basic option package for parameter assignment and programming of the fail-safe S7-1200 Basic Controller
- STEP 7 Safety Advanced option package for all fail-safe TIA SIMATIC controller classes (S7-1200, S7-1500, S7-1500 Software Controller, S7-300, S7-400, WinAC)

### Licensing

- The engineering software can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license).
- STEP 7 Safety Basic is a subset of STEP 7 Safety Advanced for programming the fail-safe S7-1200 F Basic Controller.
- Powerpacks can be used to upgrade an existing STEP 7 Safety Basic license.
- Combo licenses allow you to choose between programming with the predecessor product S7 Distributed Safety and STEP 7 Safety Advanced.
- An upgrade to a combo license is offered for the latest version of S7 Distributed Safety.
- Software Update Service (SUS) contracts can be concluded for both STEP 7 Safety Basic and STEP 7 Safety Advanced.

You can find more information on the Software Update Service, license types, online software delivery and handling your SW licenses with the Automation License Manager here:

<http://www.siemens.com/simatic-licenses>

### Ordering data

### Article No.

#### STEP 7 Safety Advanced V17

##### Task:

Engineering tool for configuring and programming fail-safe user programs for SIMATIC S7-1200 FC, S7-1500F, S7-1500F Software Controller, S7-300F, S7-400F, WinAC RTX F, ET 200SP F Controller and the fail-safe ET 200SP, ET 200MP, ET 200S, ET 200M, ET 200iSP, ET 200pro and ET 200eco I/O

##### Requirement:

STEP 7 Professional V17

##### Note:

As of TIA Portal V16, the SIMATIC STEP 7 Safety software is an integral component of the SIMATIC STEP 7 product setup.

The functionality of SIMATIC STEP 7 Safety is activated by means of the license key supplied in each case.

Floating license for 1 user;  
license key on USB flash drive

**6ES7833-1FA17-0YA5**

Floating license for 1 user,  
license key for download<sup>2)</sup>;  
Email address required for delivery

**6ES7833-1FA17-0YH5**

##### Software Update Service (Standard Edition)<sup>1)</sup>

**6ES7833-1FC00-0YX2**

The delivery is implemented according to the number of ordered SUS products (e.g. 10 upgrade packages with 10 DVDs, 10 USB flash drives, etc.). Requires the current software version.

#### STEP 7 Safety Advanced V17 Combo

Delivery includes STEP 7 Safety Advanced V17 and S7 Distributed Safety V5.4 SP5 Update 2

Floating combo license for 1 user;  
software and documentation on DVD; license key on USB flash drive

**6ES7833-1FC17-0YA5**

Floating combo license for 1 user;  
software, documentation and license key for download<sup>2)</sup>;  
Email address required for delivery

**6ES7833-1FC17-0YH5**

##### Software Update Service

##### Software Update Service (Compact Edition)<sup>1)</sup>

**6ES7833-1FC00-0YM2**

The delivery items are combined. For several contracts, only 1 package with 1 data storage medium set, 1 USB flash drive with the corresponding number of licenses and the corresponding number of CoLs will be supplied. The deliveries that are to be grouped together must be ordered as a single item. Requires the current software version.

Minimum order quantity: 3 units

##### Software Update Service (Download)<sup>1)</sup>

**6ES7833-1FC00-0YY0**

Requires the current software version.

Email address required for delivery

<sup>1)</sup> For more information on the Software Update Service, see page 12/2.

<sup>2)</sup> For up-to-date information and download availability, see: <http://www.siemens.com/tia-online-software-delivery>

## Software for SIMATIC Controllers

TIA Portal

PLC programming

### STEP 7 (TIA Portal) options > S7-PLCSIM Advanced

#### Overview

With SIMATIC S7-PLCSIM Advanced, virtual controllers can be used for simulation of S7-1500 and ET 200SP Controllers and for extensive function simulation.

The virtual controllers can also be tested and validated in conjunction with a plant/machine. An extensive API is available for interfacing plant/machine simulations.

#### New with V4.0

- The control code for the following SIMATIC PLCs can now be loaded directly and simulated with S7-PLCSIM Advanced:
  - SIMATIC S7-1500 H/R CPUs
  - SIMATIC ET 200pro CPUs
  - SIMATIC Drive Controller S7-1504 D TF and S7-1507 D TF
  - SIMATIC S7-1518 T/TF
  - SIMATIC S7-SIPLUS CPUs (equivalents of the supported standard CPU types)
- Expansion of communication capabilities similar to hardware CPU S7-1500 with firmware version V2.9:
  - Support of up to 128 UDP multicast connections
  - DHCP and DNS support
- Secure communication...
  - Via Secure Open User Communication (secure TCP communication) as of STEP 7 V17
  - Via OPC UA Server as of STEP 7 V17
  - Via HTTPS connections to the web server as of STEP 7 V17
- TCP/IP communication with NpCap:
  - The WinPcab TCP/IP driver has been replaced by the current NpCap version, which is now automatically included in installation via the setup.

#### Licensing

- The engineering software can be installed on multiple computers. The number of licenses acquired determines the number of computers on which the software can be used simultaneously (floating license). For each license, the use of two simultaneously started S7-PLCSIM Advanced instances is permitted.
- An upgrade to version 4.0 is available for users of the previous 1.0/2.x/3.0 versions.
- It is also possible to procure the software as an annual subscription.
- It is possible to conclude Software Update Service (SUS) contracts.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager here:

<http://www.siemens.com/simatic-licenses>

Email address required for delivery

##### Software Subscription Service

SIMATIC S7-PLCSIM Advanced Subscription Download, single license, software, documentation and license key for download <sup>1)</sup>

**6ES7823-1FE00-0YN5**

Email address required for delivery

##### Software Update Service<sup>2)</sup>

For a period of 12 months and for a fixed price, the customer is automatically provided with all upgrades and Service Packs for each installed software package. The contract is automatically extended by a further year unless canceled at least 12 weeks prior to expiration. Requires the current software version.

Software Update Service: Upgrades and Service Packs are provided in the form of DVDs, USB flash drives etc.

**6ES7823-1FA00-0YL5**

Software Update Service (Download)<sup>1)</sup>

Upgrades and Service Packs are available for downloading.

**6ES7823-1FE00-0YL5**

Email address required for delivery

<sup>1)</sup> For up-to-date information and download availability, see: <http://www.siemens.com/tia-online-software-delivery>

<sup>2)</sup> For more information on the Software Update Service, see page 12/2.

**Technical specifications****Minimum requirements for use**

Hardware / software	Requirements
Processor	<ul style="list-style-type: none"> <li>• One logical Intel Core™ i7 6th generation core for each started instance</li> <li>• At least one additional core for the operating system</li> <li>• At least one additional core for additional active applications</li> </ul>
RAM	<ul style="list-style-type: none"> <li>• 1 GB for each started instance</li> <li>• At least 4 GB for the Windows operating system</li> <li>• Additional RAM work memory according to the requirements of the remaining active applications</li> </ul>
Free hard disk space	5 GB
Operating systems (64-bit version)	<ul style="list-style-type: none"> <li>• Windows 10 Home Version 1909</li> <li>• Windows 10 Home Version 2004</li> <li>• Windows 10 Home Version 2009/20H2</li> <li>• Windows 10 Professional Version 1909</li> <li>• Windows 10 Professional Version 2004</li> <li>• Windows 10 Professional Version 2009/20H2</li> <li>• Windows 10 Enterprise Version 1909</li> <li>• Windows 10 Enterprise Version 2004</li> <li>• Windows 10 Enterprise Version 2009/20H2</li> <li>• Windows 10 Enterprise 2016 LTSC</li> <li>• Windows 10 Enterprise 2019 LTSC</li> <li>• Windows Server 2016 Standard (full installation)</li> <li>• Windows Server 2019 Standard (full installation)</li> </ul>
Screen resolution	min. 1024 x 768

Compatibility with other products

- S7-PLCSIM Advanced V4.0 and S7-PLCSIM V17 can be installed and operated on the same PC or the same virtual machine. Communication between the two applications cannot be simulated.
- Compatible with TIA Portal projects from versions V14 to V17
- Support of the CPU firmware versions V1.8 to V2.9

## Software for SIMATIC Controllers

TIA Portal

PLC programming

### STEP 7 (TIA Portal) options > ODK 1500S

#### Overview

- For developing dynamically loadable function libraries for the S7-1500 Software Controllers and S7-1500 Advanced Controllers CPU 1518 MFP and PLCSIM Advanced:
  - Implementation of function libraries for the SIMATIC S7-1500 Software Controller that are executed under Windows with the high-level languages C/C++, C# and VB
  - Implementation of function libraries for the PLCSIM Advanced that are executed under Windows with the high-level languages C/C++
  - Implementation of function libraries that are executed in real-time in the context of the user program of the CPU with the high-level language C++
  - Implementation of applications for the C++ runtime of the CPU 1518 MFP
- "Eclipse" development environment for real-time function libraries in the CPU user program and applications for the C++ runtime in the scope of delivery.
- Development of library functions under Windows with MS Visual Studio (optional)
- Easy introduction to development by using basic projects via templates
- Automatic creation of function blocks for calling the library functions
- Simple integration of the function blocks into STEP 7 by importing.
- Simple use of the library functions in the PLC without specific high-level language know-how.

#### Licensing

- ODK 1500S is supplied with a floating license. The floating license allows installation of the software on any number of computers. The number of licenses acquired determines the number of computers on which the software can be used simultaneously.
- An upgrade to version 2.5 is offered for users of the previous versions 1.0 and 2.0.
- The integrated development environment Eclipse, required for developing real-time libraries, is included in the scope of supply of ODK 1500S as well as templates for Visual Studio.
- SIMATIC ODK 1500S is available as a standalone product or in a bundle with SIMATIC Target 1500S™ for Simulink®.

You can find more information on the Software Update Service, license types, online software delivery and handling your SW licenses with the Automation License Manager here:

6ES7806-2CD03-0YK0

#### Technical specifications

##### System requirements

The SIMATIC ODK 1500S can be used on PC platforms with the following requirements:

- Operating systems Windows 7/8.1/10
- Min. 3 GB hard disk memory
- Min. 4 GB work memory
- Mouse, keyboard, monitor

## Overview

SIMATIC Target™ is an add-on for the Simulink® software from The MathWorks. This makes it possible to also use model-based design with MATLAB® and Simulink for SIMATIC S7-1500 Controllers and SIMATIC Industrial Edge. For this purpose, executable code for all ODK-compatible S7-1500 Controllers (S7-1500 Software Controllers, ET 200SP Open Controllers, CPU 1518 ODK/MFP and PLCSIM Advanced as of V3.0) or the LiveTwin Edge app is generated directly from Simulink via SIMATIC Target.

### New with V5.0

- Code generation also for the LiveTwin Edge app. This means there is free choice as to whether the Simulink model should run in real time on an S7-1500 Controller or via LiveTwin on any SIMATIC Edge device. This is also why SIMATIC Target 1500S has been renamed SIMATIC Target.
- Support of the Embedded Coder® for code generation. The generated code can be optimized further with this.
- Support of Custom Storage Class for code generation.
- Simplified integration of the generated code in the S7-1500 user program.
- The S functions for the link between Simulink and PLCSIM Advanced are now supplied directly as Simulink library with SIMATIC Target.

### Licensing

- The engineering software can be installed on multiple computers. The number of licenses acquired determines the number of computers on which the software can be used simultaneously (floating license).
- SIMATIC Target™ for Simulink® V5.0 is available as a standalone product or in a bundle with the SIMATIC S7-1500 Software Controller Open Development Kit.
- An upgrade to latest versions is available for previous versions

## Technical specifications

### Requirements at the MATLAB end

MATLAB 2019b (64-bit) or more recent version

- MATLAB 9.7
- MATLAB Coder 4.3
- Simulink 10.0
- Simulink Coder 9.2

### Requirements at the SIMATIC end

SIMATIC ODK 1500S V2.0/V2.5

Must be installed together with target 1500S, MATLAB and Simulink on the same PC

STEP 7 Professional as of V15.1

For configuration of the S7-1500 CPUs, not essentially on the same PC as the target 1500S

Supported CPUs

- CPU 1507S(F) with firmware V2.0 or higher
- CPU 1515SP PC (F) with firmware V2.0 or higher
- CPU 1518 (F) ODK/MFP
- S7-PLCSIM Advanced as of V3.0

## Software for SIMATIC Controllers

TIA Portal

PLC programming

### STEP 7 (TIA Portal) options > SIMATIC Safe Kinematics

#### Overview

SIMATIC Safe Kinematics V2.0 enables safe monitoring of the movement in multidimensional space by pre-defined kinematics with up to 12 interpolating axes. The following monitoring functions are available:

- **Safe Speed Monitor:**  
Safe speed monitoring can be used to monitor the Cartesian speed of individual points in the kinematics, e.g. at the tool center point or at joints.
- **Safe Zone Monitor:**  
Safe zone monitoring is used to monitor the position of the kinematics in the Cartesian space, e.g. to limit the traversing range of the kinematics or to monitor areas that can be entered by operating personnel.
- **Safe Orientation Monitor:**  
Safe orientation monitoring enables monitoring of the orientation of the flange on user-defined serial kinematics, e.g. a workpiece may only be machined if the tool is perpendicular to the floor.

The following kinematics are supported:

- Cartesian portal
- Roller picker (vertical and horizontal)
- Delta pickers
- SCARA
- Articulated arm
- User-defined serial kinematics

SIMATIC Safe Kinematics V2.0 is an option package of the TIA Portal and is retro-installed as setup in the TIA Portal V16 as of Update 1.

The product contains a fail-safe block library that can be integrated in the STEP 7 Safety Advanced programming environment and can be connected on the input and output side.

SIMATIC Safe Kinematics V2.0 runs on the following PLCs:

- CPU 1517F-3 PN/DP with firmware version 2.8.x
- CPU 1518F-4 PN/DP with firmware version 2.8.x
- CPU 1517TF-3 PN/DP with firmware version 2.8.x
- CPU 1515SP PC2 TF with CPU 1505SP TF with firmware version 20.8.x

#### System requirements

- SIMATIC STEP 7 Professional (TIA Portal) V16 as of Update 1
- STEP 7 Safety Advanced V16

SIMATIC Safe Kinematics requires as a subordinate drive system SINAMICS S120 with CU320-2 as of firmware V5.1 with Safety Integrated Advanced Functions.

#### Licensing

- The software is supplied with a Single Runtime License. A license is required for each F-CPU on which SIMATIC Safe Kinematics runs.
- The software can only be ordered via Online Software Delivery (OSD). The download contains one license certificate and the TIA Portal installation setup for SIMATIC Safe Kinematics.
- The following additional licenses are required to use SIMATIC Safe Kinematics:
  - SIMATIC STEP 7 Professional (TIA Portal) V16
  - STEP 7 Safety Advanced V16
  - SINAMICS Safety Integrated Advanced Functions (for each monitored axis of the kinematics)

#### Ordering data

#### Article No.

##### SIMATIC Safe Kinematics V2.0

TIA Portal option package for safe monitoring of the movement of pre-defined kinematics with up to 12 interpolating axes in multidimensional space.

##### Requirement:

SIMATIC STEP 7 Professional (TIA Portal) V16 as of Update 1  
STEP 7 Safety Advanced V16

##### Runs on:

CPU 1517F-3 PN/DP with firmware version 2.8.x  
CPU 1518F-4 PN/DP with firmware version 2.8.x  
CPU 1517TF-3 PN/DP with firmware version 2.8.x  
CPU 1515SP PC2 TF with CPU 1505SP TF with firmware version 20.8.x

Single Runtime License Download<sup>1)</sup>; contains license certificate and installation setup for SIMATIC Safe Kinematics block library; Email address required for delivery

**6ES7823-0FE01-1AA0**

<sup>1)</sup> For up-to-date information and download availability, see: <http://www.siemens.com/tia-online-software-delivery>

## Overview

With SIMATIC Kinematics Operate, kinematics can be configured, programmed and operated with up to 6 positioning axes with synchronous point-to-point control (sPTP). The Plug & Play solution comprises a convenient user interface for programming, diagnostics and operation of the kinematics via HMI.

The SIMATIC Kinematics Operate V1.0 software solution consists of a TIA Portal project and an HMI project for TIA Portal as of V15.0.

SIMATIC Kinematics Operate V1.0 contains the following HMI configuration functions:

- Configuration of kinematics and additional axes; 6 axes are available in total for multi-axis positioning with sPTP. The axes not used in the multi-axis group can be created as independent single axes.
- Axis configuration; the dynamic parameters, the axis limits and the homing of the different axes can be configured.
- Tag and I/O configuration; Bool and Real tags can be created. Logical step enabling conditions consisting of multiple inputs and tags can be combined into one Boolean tag. Digital inputs and outputs can be configured via the I/O address.
- Points table; By means of input or teaching of axis positions, path points can be defined that can be used for programming the kinematics.
- Zone configuration; multiple restricted zones can be created in the workspace as protection zones. These are checked cyclically against both the target coordinates and the current axis values. A violation leads to a stop response of the axes

The program editor offers the following functions:

- Synchronous point-to-point commands; all axes are traversed synchronously with multi-axis positioning. The destination is specified either using the points table or by direct input with optional blending.
- Single axis commands; the additional axes can be homed, positioned, torque-limited or speed-controlled.
- Wait functions; Step enabling conditions, based on a digital input, a Bool tag or a wait time, can be programmed.
- Calculate tags and assign values; digital outputs can be set via an input mask. In addition, floating point tags can be calculated, incremented or assigned absolute values.
- Program control structures; labels, branches, loops and parallel sequences allow flexible program design.

SIMATIC Kinematics Operate can be run on SIMATIC S7-1500 CPU S7-1511T-1 PN. Alternatively, SIMATIC S7-1500 CPU S7-1512C-1 PN or a faster CPU can be used. Please refer to the operating instructions for details on scalability and the configuration limits.

### System requirements

- SIMATIC STEP 7 Professional (TIA Portal) as of V15
- SIMATIC WinCC Advanced ES as of V15

### Licensing

- SIMATIC Kinematics Operate is available as Runtime option for TIA Portal. A license is required for each CPU on which SIMATIC Kinematics Operate runs.
- The product can only be ordered via Online Software Delivery (OSD). The download contains the license certificate. The software is downloaded via the Siemens Industry Online Support Portal.
- The following additional licenses are required to use SIMATIC Safe Kinematics:
  - SIMATIC STEP 7 Professional (TIA Portal) as of V15
  - SIMATIC WinCC Advanced ES as of V15

### Ordering data

# Software for SIMATIC Controllers

TIA Portal

PLC programming

## STEP 7 (TIA Portal) options > PID Professional (TIA Portal)

### Overview

- PID Professional combines the two option packages Modular PID Control and Standard PID Control in TIA Portal.
- Permits the simple integration of continuous PID controllers, pulse controllers and step controllers in the application program
- Can be used for simple to complex closed-loop control tasks in SIMATIC S7-300 (CPU 313 or higher), S7-400, and WinAC.
- The engineering software for PID Professional is already included in the STEP 7 package in V13 or higher.
- Tuning functionality by means of PID Self-Tuner (part of STEP 7 as of V11 SP1).
- Reduces engineering costs thanks to time-saving parameterization and optimization of the controller

### Licensing

- The engineering software can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license).
- The engineering software requires STEP 7 Professional. The software is part of the STEP 7 Professional DVD and/or the program download. A license key is required for activation.
- During runtime, each CPU requires its own runtime license.
- Upgrades to PID Professional (engineering license or single runtime license) are offered for Standard PID Control/Modular PID Control from V11 onwards.

You can find more information on the Software Update Service, license types, online software delivery and handling your SW licenses with the Automation License Manager here:

<http://www.siemens.com/simatic-licenses>

#### PID Professional for TIA Portal

##### Task:

Function blocks and editors for PID controllers

##### Requirement:

STEP 7 V13 or higher

##### Delivery package:

Licenses on USB flash drive/downloadable

Floating license for the engineering and single license for runtime

**6ES7860-1XA02-0XA5**

Single license (Certificate of License) for runtime; per CPU (all versions)

**6ES7860-1XA01-0XB0**

Floating license for the engineering; download (email address required for delivery)<sup>1)</sup>

**6ES7860-1XA01-0XH5**

Upgrade from Standard PID Control or Modular PID Control V5.1 to PID Professional for TIA Portal; floating license for the engineering; download (email address required for delivery)<sup>1)</sup>

**6ES7860-1XA01-0XK5**

Upgrade from Standard PID Control or Modular PID Control V5.1 to PID Professional for TIA Portal; single license for runtime

**6ES7860-1XA02-0XE5**

<sup>1)</sup> For up-to-date information and download availability, see: <http://www.siemens.com/tia-online-software-delivery>

**Overview**

- Low-priced package for simple, controlled positioning and simple geared synchronous motion
- For use with any standard variable-speed drive, such as frequency converter or servo drive
- For incremental and absolute encoders

**Licensing**

- The engineering software can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license).
- The Engineering Software requires STEP 7 Professional, the software is part of the STEP 7 Professional DVD and/or the program download. A license key is required for activation.
- During runtime, each CPU requires its own runtime license.

You can find more information on the Software Update Service, license types, online software delivery and handling your SW licenses with the Automation License Manager here:

<http://www.siemens.com/simatic-licenses>

**Ordering data****Article No.****Easy Motion Control for TIA Portal**

Requirement: STEP 7 from V12 SP1; software included in STEP 7 V13

Floating license and single license (Runtime)

**6ES7864-2XA02-0XA5**

Type of delivery: CoL for the configuration software, USB flash drive with a license key for the configuration software, CoL for a runtime license; without software or documentation

Floating license download by email, valid for V11 or higher (email address required for delivery<sup>1)</sup>); without software or documentation

**6ES7864-2XA01-0XH5**

**Easy Motion Control Runtime License**

Type of delivery: CoL for one runtime single license (valid for Easy Motion Control V2.x and V11 or higher), without software or documentation

**6ES7864-0AF01-0YX0**

<sup>1)</sup> For up-to-date information and download availability, see: <http://www.siemens.com/tia-online-software-delivery>

**Technical specifications****Supported hardware:**

Easy Motion Control is runnable on the following CPUs:

- S7-300.
- S7-400.
- WinAC.
- ET 200S.
- ET 200pro.

Supported modules for the measuring of actual values:

- CPU 314C (FW version 2.0 of the CPU or higher).
- ET 200S 1 Count 5V/500 kHz.
- ET 200S 1 Count 24V/100kHz.
- ET 200S 1SSI.
- SM 338.
- FM 350-1, FM 450-1.
- SIMODRIVE Sensor with PROFIBUS DP.
- IM 174.
- Other modules for measuring actual values (using free driver).

Supported modules for setpoint output:

- ET 200S 2AO U.
- SM 332.
- SM 432.
- IM 174.
- Other modules for setpoint output (using free driver).

Supported drives using PROFIBUS DP:

- Micromaster 4.
- SINAMICS G120.
- SINAMICS S120.

**Storage space requirements**

## Software for SIMATIC Controllers

TIA Portal

PLC programming

### STEP 7 (TIA Portal) options > OPC UA S7-1200/S7-1500

#### Overview

The vendor- and platform-independent OPC Unified Architecture (UA) is the communication standard for Industry 4.0 and is the standard mechanism for accessing SIMATIC S7-1500 and S7-1200 data from non-Siemens devices.

#### New with V17 and S7-1200 (firmware V4.5)

- OPC UA Server on S7-1200 CPUs with following functionality:
  - Methods for consistent data transfer
  - Structured data types and arrays
  - Additional diagnostic buffer entries for OPC UA Server and OPC UA diagnostics in the TIA Portal

#### New with V17 and S7-1500 (firmware V2.9)

- PC UA Server:
  - Alarms & Conditions on Standard SIMATIC Interface
- Global Discovery Service (GDS) support for certificate management
- Supports further PLC data types for mapping to OPC UA:
  - Localized Text and Byte strings
- Automatic creation of OPC UA instances in the server interface for data types of an OPC UA reference namespace to an FB or UDT
- Improvement of modeling for server interface or companion specifications
- OPC UA Client:
  - New blocks for easy handling

#### Licensing

An OPC UA Server or OPC UA Client is available on the target systems (CPUs) and is activated using runtime licenses.

Runtime licenses are offered in three levels for different target systems:

Target system	OPC UA S7-1200 Basic	OPC UA S7-1500 Small	OPC UA S7-1500 Medium	OPC UA S7-1500 Large
S7-1200 CPUs	Yes	No	No	No
ET 200SP CPU 1510SP/1512SP/1515SP (Open Controller)	No	Yes	Yes	Yes
S7-1500 CPU 1511/1513 CPU 1504D Drive Controller				
ET 200pro CPU 1516pro S7-1500 CPU 1515/1516 Software Controller 1507S	No	No	Yes	Yes
S7-1500 CPU 1517/1518/1508S CPU 1507D Drive Controller	No	No	No	Yes

The runtime license includes the certificate for OPC UA (Server and Client) and can be run on the respective target systems including F, C and T/TF as from firmware V2.0 (Client V2.6).

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager here:

<http://www.siemens.com/simatic-licenses>

##### SIMATIC OPC UA S7-1200 Basic

Single runtime license; can run on all S7-1200 CPUs (incl. F) from firmware V4.4

License certificate for OPC UA server (data access)

**6ES7823-0BA00-2BA0**

Download incl. license certificate for OPC UA server (data access) <sup>1)</sup>

**6ES7823-0BE00-2BA0**

Email address required for delivery

##### SIMATIC OPC UA S7-1500 Small

Single runtime license; can run on ET 200SP CPU 1510SP/1512SP/1515SP (Open Controller), S7-1500 CPU 1511/1513, CPU 1504D Drive Controller

License certificate for OPC UA server (data access and OPC UA client)

**6ES7823-0BA00-1BA0**

Download incl. license certificate for OPC UA server (data access and OPC UA client) <sup>1)</sup>

**6ES7823-0BE00-1BA0**

Email address required for delivery

##### SIMATIC OPC UA S7-1500 Medium

Single runtime license; can run on ET 200pro CPU 1516pro, ET 200SP CPU 1510SP/1512SP/1515SP (Open Controller), S7-1500 CPU 1511/1513/1515/1516, Software Controller 1507S, CPU 1504D Drive Controller

License certificate for OPC UA server (data access and OPC UA client)

**6ES7823-0BA00-1CA0**

Download incl. license certificate for OPC UA server (data access and OPC UA client) <sup>1)</sup>

**6ES7823-0BE00-1CA0**

Email address required for delivery

##### SIMATIC OPC UA S7-1500 Large

Single runtime license; can run on ET 200pro CPU 1516pro, ET 200SP CPU 1510SP/1512SP/1515SP (Open Controller), S7-1500 CPU 1511/1513/1515/1516/1517/1518, Software Controller 1507S, 1508S, CPU 1504D, CPU 1507D Drive Controller

License certificate for OPC UA server (data access and OPC UA client)

**6ES7823-0BA00-1DA0**

Download incl. license certificate for OPC UA server (data access and OPC UA client) <sup>1)</sup>

**6ES7823-0BE00-1DA0**

Email address required for delivery

<sup>1)</sup> For up-to-date information and download availability, see: <http://www.siemens.com/tia-online-software-delivery>

#### Technical specifications

##### Can be used for

SIMATIC OPC UA S7-1200	For all S7-1200 CPUs from firmware V4.4
SIMATIC OPC UA S7-1500	For all S7-1500 CPUs and ET 200SP CPUs with firmware V2.0 or higher (incl. S/F/T versions) and PLCSIM Advanced

## Overview

TIA Portal Multiuser Engineering allows several users to work on the same project simultaneously. This results in a significant reduction in configuration times, and projects can be commissioned faster.

The basic principle:

The project administration is handled by an autonomous server application. This can be installed independent of a TIA Portal.

### New with V17

- Multiuser sessions can be stored on network drives and local sessions can also be saved as TIA Portal archive (single project).
- All user IDs are now saved during check-in.
- Export/import of projects is possible directly from the administration tool.
- Openness functions can be used in a Multiuser session. This allows the use of existing Openness applications within Multiuser Engineering.
- TIA Portal V17 provides new Multiuser Openness APIs for integrating Multiuser workflows into dedicated automation workflows.
- Combining Openness functions and the new Multiuser Openness APIs enables efficient, automated Multiuser operations via own applications or in TIA Portal add-ins.
- With V17, the asynchronous commissioning mode supports the loading of PLCs with activated access protection and of program changes to the F-program component.

### Licensing

- The software can be installed on multiple computers. The number of licenses acquired determines the number of computers on which the software can be used simultaneously (floating license).
- The software is part of the STEP 7/WinCC (TIA Portal) DVD and/or of the program download; a license key is required for activation.
- An upgrade to version V17 is available for users of the previous V14...V16 versions.
- It is possible to conclude Software Update Service (SUS) contracts.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager here:

<http://www.siemens.com/simatic-licenses>

## Software for SIMATIC Controllers

TIA Portal

TIA Portal options

### TIA Portal Test Suite

#### Overview

- Software to support quality assurance of automation programs in the TIA Portal
- Contains tools for checking the programming style and for creating test routines for software modules:
  - Styleguide Checker:
    - to ensure a unified programming style, rule sets with programming guidelines in the TIA Portal project can be defined as well as their compliance regularly checked.
  - Application test:
    - to check the correct processing of individual logic blocks or entire S7-1500 applications, test routines with function tests can be created in a TIA Portal project and subsequently executed and validated with help of SIMATIC S7-PLCSIM Advanced V3.0.

#### New with V17

- For inclusion in continuous integration workflows, the following functions can be run via an Openness API:
  - XML/ASCII file export and import for rule sets and test cases
  - Export and import from libraries (copy templates)
  - Running of styleguide checker and application test
  - Test results are provided as .NET objects in the Openness application and can thus be exported with a user-defined export format.
- Application test now also supports ET 200pro, S7-1500 R/H and SIMATIC Drive Controller (requires SIMATIC S7-PLCSIM Advanced V4.0 installation)
- New instruction "Assert.InRange (variable, lowerBound, upperBound)" for integer and real tags

#### Licensing

- The software can be installed on multiple computers. The number of licenses acquired determines the number of computers on which the software can be used simultaneously (floating license).
- The application tests created with the Test Suite can only be executed in conjunction with SIMATIC S7-PLCSIM Advanced V3.0 including Update 1 or higher. An additional SIMATIC S7-PLCSIM Advanced V3.0 license is, however, not necessary for this.
- There is also the option of completing a Software Update Service.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager here:

#### Technical specifications

Can be used with:

- TIA Portal V17
- Teamcenter V11, V12 and V13

**Overview****SIMATIC Visualization Architect**Challenge:

- To standardize the user interfaces of the visualizations throughout the plant
- Significant reduction of the engineering costs for generating the visualizations
- To make the in-house work standard usable

Solution:

- Automatic generation and creation of the visualizations, based on the program code of the PLC and corresponding visualization objects within the framework of system-wide library concepts.

**Licensing**

- The software can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license).
- An upgrade to the subsequent version is offered for users of previous versions.
- A rental license is available for temporary use
- A trial license is available for testing purposes
- It is possible to conclude Software Update Service (SUS) contracts

Supported WinCC versions	SIMATIC WinCC V17 Unified, Professional, Advanced, Comfort, Basic

## Software for SIMATIC Controllers

TIA Portal

TIA Portal options

### SIMATIC ProDiag

#### Overview

The TIA Portal option ProDiag makes it possible to monitor a machine or plant and to intervene in the event of a fault. The monitoring messages which can be generated for the various faults provide specific information on the monitoring mode, location and cause of the fault. Information on troubleshooting can be provided in addition. Plant operators can then not only recognize faults, they can also identify any potential danger in advance and take appropriate countermeasures.

#### Licensing

- The runtime license for controllers includes 250 supervisions or an unlimited number of supervisions per CPU. From FW 2.0 onwards, the software can run on S7-1500/ET 200SP CPUs regardless of the TIA Portal version.
- For the visualization of the messages, the controls are licensed according to the HMI runtime platforms.

You can find more information on the Software Update Service, license types, online software delivery and handling your software licenses with the Automation License Manager here:

<http://www.siemens.com/simatic-licenses>

#### Ordering data

#### Article No.

##### SIMATIC ProDiag S7-1500 for 250 monitoring functions

For SIMATIC S7-1500 CPUs and ET 200SP CPUs with FW 2.0 and higher. Independent of the TIA Portal version.

Package with data storage medium

**6ES7823-0AA00-1AA0**

Download incl. license key <sup>1)</sup>

**6ES7823-0AE00-1AA0**

E-mail address required for delivery

##### SIMATIC ProDiag S7-1500 for all planned monitoring tasks on a CPU

For SIMATIC S7-1500 CPUs and ET 200SP CPUs with FW 2.0 and higher. Independent of the TIA Portal version.

Package with data storage medium

**6ES7823-0AA00-1DA0**

Download incl. license key <sup>1)</sup>

**6ES7823-0AE00-1DA0**

E-mail address required for delivery

##### SIMATIC ProDiag for SIMATIC Comfort / Mobile Panels

Controls for SIMATIC WinCC as of V14.

Package with data storage medium

**6AV2107-0UP00-0BB0**

Download incl. license key <sup>1)</sup>

**6AV2107-0UP00-0BH0**

E-mail address required for delivery

##### SIMATIC ProDiag for WinCC Runtime Advanced

Controls for SIMATIC WinCC as of V14.

Package with data storage medium

**6AV2107-0UA00-0BB0**

Download incl. license key <sup>1)</sup>

**6AV2107-0UA00-0BH0**

E-mail address required for delivery

##### SIMATIC ProDiag for WinCC Runtime Professional

Controls for SIMATIC WinCC as of V14

Package with data storage medium

**6AV2107-0UB00-0BB0**

Download incl. license key <sup>1)</sup>

**6AV2107-0UB00-0BH0**

E-mail address required for delivery

#### Technical specifications

##### Can be used for

SIMATIC ProDiag S7-1500

For all S7-1500 CPUs and ET 200SP CPUs with FW V2.0 and higher

## Overview

The SIMATIC Modular Application Creator enables the automated generation of TIA Portal projects based on pre-defined software modules. Especially with complex machine configurations, such as a multi-belt control, a printing machine or other applications with many axes, this is very efficient compared to manually creating and parameterizing the associated automation project directly in the TIA Portal.

The software modules provide a technological view of the application and can be used in the TIA Portal without programming knowledge. They are stored in a separate repository, independent of the tool, which needs to be connected to the tool.

### Licensing

- The SIMATIC Modular Application Creator and the existing modules are available as a free download via the Siemens Industry Online Support.
- A corresponding license is required for each CPU into which a module is generated.

## Ordering data

## Article No.

### SIMATIC Modular Application Creator

For automated generation of TIA Portal projects with use of pre-configured software modules

For download at  
<https://support.industry.siemens.com/cs/ww/en/view/109762852>

### SIMATIC Modular Application Creator Equipment Module

Pre-configured software modules for use with the SIMATIC Modular Application Creator

For download at  
<https://support.industry.siemens.com/cs/ww/en/view/109762849>

### SIMATIC Modular Application Creator licenses

For the generation of executable TIA Portal projects with integrated Modular Application Creator software modules; a license must be purchased for each CPU on which the project is to run:

For standard modules without use of technological objects (e.g. OMAC or Weihenstephan)

- Single Basic License, Certificate of License
- Single Basic License, Certificate of License for download<sup>1)</sup>  
Email address required for delivery

**6ES7823-0MA00-1BA0**

**6ES7823-0ME00-1BA0**

For modules with use of technological objects (e.g. Intelligent Belt)

- Single Advanced License, Certificate of License
- Single Advanced License, Certificate of License for download<sup>1)</sup>  
Email address required for delivery

**6ES7823-0MA00-1DA0**

**6ES7823-0ME00-1DA0**

<sup>1)</sup> For up-to-date information and download availability, see:  
<http://www.siemens.com/tia-online-software-delivery>

## Technical specifications

The SIMATIC Modular Application Creator can be used for:

- TIA Portal and StartDrive as of V16.0, with activated Openness interface and
- All SIMATIC S7-1500 CPUs as of FW version 4.8.

## Software for SIMATIC Controllers

TIA Portal

TIA Portal options

### Central user management (UMC)

#### Overview

The User Management Component (UMC) provides the possibility of central user management. Through the connection to the TIA Portal, users and user groups can be defined and managed across projects. Connection to a Microsoft Active Directory is also possible.

#### Licensing

- Central user management (UMC) is supplied with the TIA Portal.
- The license model depends on the number of user accounts per UMC domain.
- Up to ten user accounts can be used without a license.
- For additional user accounts, 365-day rental licenses are available to accumulate the required number of centrally managed users.

#### Ordering data

##### Central user management (UMC)

Software component to implement central user management, included in the scope of supply of the respective products (e.g. TIA Portal).

The license model depends on the number of user accounts per UMC domain. Use of max. 10 user accounts possible without a license.

6 languages: en, de, fr, es, it, zh; executable under Windows 7 (64-bit), Windows 10 (64-bit), Windows Server 2012R2 (64-bit), Windows Server 2016/2019 (64-bit)

- Rental license 365 days with license certificate for 100 user accounts
- Rental license 365 days with license certificate for 4 000 user accounts

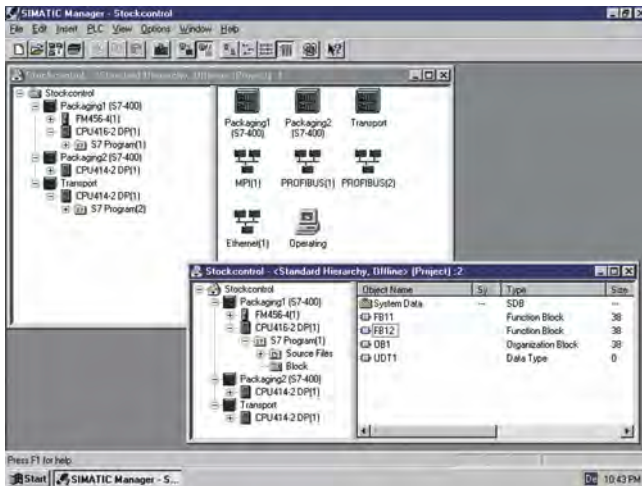

#### Article No.

**6ES7823-1UE30-0YA0**

**6ES7823-1UE10-0YA0**

## Overview

- Basic software STEP 7:  
The standard tool for the SIMATIC S7, SIMATIC C7 and SIMATIC WinAC automation systems.
- For fully utilizing the performance capability of the systems.
- With user-friendly functions for all phases of an automation project:
  - Configuration and parameter assignment of the hardware
  - Specifying the communication
  - Programming
  - Testing, commissioning and service
  - Documentation, archiving
  - Operating, diagnostic functions

## Note

The STEP 7 (TIA Portal) engineering software is required to program the new generation of S7-1200, S7-1500 and ET 200SP CPU PLCs as well as the S7-1500 Software Controller; it can also be used for programming the S7-300, S7-400 and SIMATIC WinAC.

Siemens offers a combo license for both platforms which enables you to work using both STEP 7 (TIA Portal) as well as traditional engineering software. See "STEP 7 Professional" for more information.

## Licensing

- STEP 7 V5.7 can be installed on multiple computers.  
The number of licenses acquired determines the number of computers on which the software can be used simultaneously (floating license).
- A 50 h rental license is available for limited use.
- An upgrade to version V5.7 is offered for users of the previous V5.3...5.6 versions.
- A 5.6 license is also valid for the version V5.7.
- A trial license is available for testing purposes.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager here:

<http://www.siemens.com/simatic-licenses>

for delivery

**6ES7810-4CE12-0YE5**

STEP 7 V5.7 Trial License;  
On DVD, operational for 21 days

**6ES7810-4CC12-0YA7**

## STEP 7 Version 5.7 Japanese

Target system:  
SIMATIC S7-300/400, SIMATIC C7,  
SIMATIC WinAC

Requirement:  
Windows 10 Professional/  
Enterprise, Windows Server 2016,  
Windows Server 2019

Type of delivery:  
English, Japanese; incl. license key  
on USB flash drive, with electronic  
documentation

Floating license Japanese on DVD

**6ES7810-4CC12-0JA5**

Upgrade floating license Japanese  
V5.3...V5.6 to V5.7; on DVD

**6ES7810-4CC12-0JE5**

## STEP 7 Version 5.7 Chinese

Target system:  
SIMATIC S7-300/400, SIMATIC C7

Requirement:  
Windows 10 Professional/  
Enterprise, Windows Server 2016,  
Windows Server 2019

Type of delivery:  
English, Chinese; incl. license key  
on USB flash drive, with electronic  
documentation

Floating license Chinese on DVD

**6ES7810-4CC12-0KA5**

Upgrade floating license Chinese  
V5.3...V5.6 to V5.7; on DVD

**6ES7810-4CC12-0KE5**

## Overview

STEP 7 Professional supports all IEC languages.

In addition to the languages familiar from STEP 7:

- LAD
- FBD
- STL

the following are also available:

- "Sequential function chart"
- "Structured text"

An offline simulation of user programs created with these languages is included. STEP 7 Professional thus replaces the combination of the individual packages STEP 7, S7-GRAPH, S7-SCL and S7-PLCSIM.

A PowerPack (conversion package) is available for customers who use STEP 7 already and wish to change. A valid STEP 7 license is required for purchasing the PowerPack. A separate update service can be purchased for STEP 7 Professional.

## Note

The STEP 7 (TIA Portal) engineering software is required to program the new generation of S7-1200, S7-1500 and ET 200SP CPU PLCs as well as the S7-1500 Software Controller; it can also be used for programming the S7-300, S7-400 and SIMATIC WinAC.

Siemens offers a combo license for both platforms which enables you to work using both STEP 7 (TIA Portal) as well as traditional engineering software. See "Licensing" for more information.

## Licensing

- New installations of STEP 7 Professional 2021 are only available as combo licenses together with STEP 7 Professional V17 (TIA Portal). The software can be installed on multiple computers. The number of licenses acquired determines the number of computers on which the software can be used simultaneously (floating license). A 50 h rental license is available for limited use.
- An upgrade to V17/2021 Combo is available for users of the previous STEP 7 Professional 2006...2010 versions.
- The license of the version V16/2017 Combo can also be used for STEP 7 V5.7.
- PowerPack and upgrade enable migration from STEP 7 V5.7 to STEP 7 Professional V17/2021 Combo.
- A trial license is available for testing purposes.
- It is possible to conclude Software Update Service (SUS) contracts.

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager here:

## Software for SIMATIC Controllers

STEP 7 V5.x

Basic software and editors

### S7-SCL

#### Overview

- PASCAL-type high-level language
- Optimized for programming PLCs
- With PLCopen Base Level certificate
- For use in SIMATIC S7-300 (recommended for CPU 314 and CPU 312C), S7-400, C7 and WinAC

#### Licensing

- S7-SCL is an integral part of the STEP 7 Professional software package or is available as a stand-alone software product.
- S7-SCL V5.7 is delivered with a floating license. The floating license allows installation of the software on any number of computers. This means one user per license can use the software independently of the computer used and without being tied to a specific workstation. The number of licenses acquired determines the number of computers on which the software can be used simultaneously.
- An upgrade to version 5.7 is available for users of the previous versions as of V5.3.
- A separate update service can be purchased for S7-SCL.
- A trial license valid for 21 days is available for download from Industry Online Support:  
<https://support.industry.siemens.com/cs/ww/en/view/109795037>

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager here:

##### SIMATIC Manual Collection

**6ES7998-8XC01-8YE0**

Electronic manuals on DVD, multi-language:

LOGO!, SIMADYN, SIMATIC bus components, SIMATIC C7, SIMATIC Distributed I/O, SIMATIC HMI, SIMATIC sensors, SIMATIC NET, SIMATIC PC-based Automation, SIMATIC PCS 7, SIMATIC PG/PC, SIMATIC S7, SIMATIC software, SIMATIC TDC

##### SIMATIC Manual Collection update service for 1 year

**6ES7998-8XC01-8YE2**

Current Manual Collection DVD and the three subsequent updates

<sup>1)</sup> For more information on the Software Update Service, see page 12/2.

## Technical specifications

Engineering Tool	S7-SCL
Current version	V5.3
Software class	7
<b>Application areas</b>	
Can be used for	Text-based high-level language programming of simple and complex calculations, CASE, loop, jump, and comparison functions
Marketing message	Programming of algorithms and calculations made easy!
Advantages	<ul style="list-style-type: none"> <li>• Clear and easy-to-read programs</li> <li>• Functional, module-based programming</li> <li>• CASE instruction replaces a large number of jump and comparison functions</li> <li>• Easily understood by PLC programmers, as the programming philosophy of LAD/FBD/STL is retained</li> <li>• Easy switchover to PLC programming for PC programmers</li> <li>• Exchangeability (porting) of subroutines in accordance with IEC 61131-3</li> <li>• Less time required for engineering compared to LAD/FBD/STL: Up to 20% for simple programs; at least 50% for demanding program structures</li> </ul>
Sectors	<ul style="list-style-type: none"> <li>• Labeling machines</li> <li>• Chemical plants (e.g. oxygen extraction, evaluation of measured values)</li> <li>• Rubber and plastics machines</li> <li>• Woodworking machines</li> <li>• Storage and logistics systems</li> <li>• Paper and printing machinery</li> <li>• Punching and cutting machines</li> <li>• Water industry</li> <li>• Coilers</li> </ul>
<b>Target systems</b>	
Can be used in	S7-300 (CPU 313 or higher and CPU 312C or higher recommended) S7-400 C7 (C7-626 or higher recommended) WinAC
<b>System requirements</b>	
Operating system	Windows 10 Windows Server 2016/2019
Required hard drive memory in the programming device/PC approx.	50 MB

Engineering Tool	S7-SCL
<b>Properties</b>	
Monitoring tags	Yes
Controlling tags	Yes
Single-step processing	Yes
Integration in CFC	Yes
<b>Program runtimes</b>	
with S7-300 (typical)	Similar to LAD/FBD/STL
with S7-400 (typical)	Similar to LAD/FBD/STL
<b>Diagnostics</b>	
Integration of diagnostic data in ProAgent	-
Integration of diagnostic data in ProTool/Pro	-
Integration of diagnostic data in WinCC	-
<b>Supported standards</b>	
IEC 61131-3	PLCopen certification <ul style="list-style-type: none"> <li>• Base level ST available</li> <li>• Reusability Level ST available</li> </ul>
<b>Available versions/licenses</b>	
Floating license	CD-ROM with <ul style="list-style-type: none"> <li>• Tool</li> <li>• Electronic manual</li> <li>• Getting Started guide</li> <li>• Examples</li> </ul> License on USB flash drive Certificate of License Product information

# Software for SIMATIC Controllers

STEP 7 V5.x

Basic software and editors

## S7-GRAPH

### Overview

- For configuring and programming sequential processes using sequencers
- Standardized representation to EN 1131-3
- Clearly comprehensible program thanks to structuring of the process into separate steps
- With extensive diagnostic functions, integrated in the SIMATIC diagnostic concept
- With PLCopen Base Level certificate
- For use in SIMATIC S7-300 (recommended for CPU 315 and CPU 312C or higher), S7-400 C7 and WinAC

### Licensing

- S7 GRAPH is an integral part of the STEP 7 Professional software package or is available as a stand-alone software product.
- S7-Graph V5.7 is supplied with a floating license. The floating license allows installation of the software on any number of computers. This means one user per license can use the software independently of the computer used and without being tied to a specific workstation. The number of licenses acquired determines the number of computers on which the software can be used simultaneously.
- An upgrade to version 5.7 is available for users of previous versions as of V5.3.
- A separate update service can be purchased for S7-GRAPH.
- A trial license valid for 21 days is available for download from Industry Online Support: <https://support.industry.siemens.com/cs/ww/en/view/109795038>

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager here:

## S7-PLCSIM

### Overview

- For functional testing of the generated SIMATIC S7 user blocks on a programming device or PC, independent of the availability of the target hardware
- Shifts the detection and correction of programming errors to an early stage of development
- Enables an accelerated and cost-effective initial commissioning and enhances the program quality
- Can be used for LAD, FBD, STL, S7-GRAPH, S7-HiGraph, S7-SCL, CFC, S7-PDIAG, WinCC (local installation)

### Licensing

- S7-PLCSIM is an integral part of the STEP 7 Professional software package or is available as a stand-alone software product
- S7-PLCSIM V5.4 is delivered with a floating license. The floating license allows installation of the software on any number of computers. This means one user per license can use the software independently of the computer used and without being tied to a specific workstation. The number of licenses acquired determines the number of computers on which the software can be used simultaneously.
- An upgrade to version 5.4 is offered for users of the previous versions.
- A separate update service can be purchased for S7-PLCSIM.
- A trial license valid for 14 days is available for download from Industry Online Support:  
<https://support.industry.siemens.com/cs/ww/en/view/109750064>

You can find more information on the Software Update Service, license types, Online Software Delivery and handling your SW licenses with the Automation License Manager here:

### Technical specifications

Engineering Tool	S7-PLCSIM
Type of license	Floating license
Software class	A
Current version	V5.4
Target system (recommended)	SIMATIC S7-300 SIMATIC S7-400 SIMATIC C7
Operating system	Windows XP Professional Windows 7 Professional Windows 7 Ultimate
Required software packages	STEP 7 V5.4 with SP4 or SP5 or STEP 7 > V5.5
Disk space required in programming device/PC	5 MB

## Overview

- For the generation of automation programs by drawing a technology chart
- With extensive libraries of ready-made software blocks to which user-created blocks can be added
- Minimized outlay and reduced error susceptibility due to the interconnection of ready-made blocks
- Optimized integration in the world of automation, for example, through guaranteed compatibility with all STEP 7 tools
- Can be used for SIMATIC S7-300 (recommended for CPU 316 or CPU 314C or higher), SIMATIC S7-400, SIMATIC WinAC and D7-SYS

### Licensing

- SIMATIC CFC V9.0 is supplied with a floating license. The floating license allows installation of the software on any number of computers. This means one user per license can use the software independently of the computer used or from a specific workstation. The number of existing licenses determines the number of computers on which the software can be used simultaneously.
- An upgrade to version 9.0 is available for users of the previous 8.x versions.
- For SIMATIC CFC, the Software Update Service is available with the Standard, Compact and Download types of delivery.

You can find more information on the Software Update Service, license types, online software delivery and handling your SW licenses with the Automation License Manager:

<http://www.siemens.com/simatic-licenses>

D7-SYS	Yes

#### Overview

- For creating safety-related automation applications with SIMATIC S7 in LAD or FBD (STEP 7 required)
- Implementation of safety functions by simply connecting function blocks
- With prefabricated block library
- Custom block creation possible
- Optimal embedding in the automation world thanks to total integration in the STEP 7 tools
- Scope of supply:
  - Distributed Safety Editor
  - Code generator
  - Debugger
  - Standard block libraries

#### Licensing

- SIMATIC S7 Distributed Safety is delivered with a floating license. The floating license allows installation of the software on any number of computers. This means one user per license can use the software independently of the computer used or from a specific workstation. The number of existing licenses determines the number of computers on which the software can be used simultaneously.
- An upgrade to version 5.4 is offered for users of the previous versions 5.x.
- A trial license valid for 14 days is available for download from Industry Online Support:  
<https://support.industry.siemens.com/cs/document/109749360>

## Software for SIMATIC Controllers

STEP 7 V5.x

Options for programming and design

### Safety Integrated for Process Automation

#### Overview

The process industry frequently features complex technological sequences with high safety demands, and faults and failures in the process automation could have fatal consequences for personnel, machines, plants and the environment. The safety technology used must reliably detect dangerous states in the process and also its own internal errors, and automatically set the plant/application to a safe state.

Safety Integrated for Process Automation is the comprehensive range of products and services from Siemens for safe, fault-tolerant applications in the process industry. This is characterized by:

- Safety-oriented F/FH automation systems of the S7-400 series (see "Automation Systems" section)
- Safe communication with the PROFIsafe profile via PROFIBUS (see section "Industrial Communication, PROFIBUS") or PROFINET (see section "Industrial Communication, PROFINET")
- Safe transmitters (SITRANS P DS III) on the PROFIBUS PA with PROFIsafe (see Catalog FI 01, Field devices for process automation)
- ET 200SP HA, ET 200iSP, ET 200M, ET 200S and ET 200pro distributed I/O systems with safety-oriented F-I/O modules/submodules (see "Process I/O" section)
- Safe process instruments/devices for connection to ET 200 distributed I/O systems (see Catalog FI 01, Field Instruments for Process Automation)
- SIMATIC Safety Integrated software for implementation and operation of safety applications, with additional components for the Engineering System and the operator stations: SIMATIC S7 F-systems, SIMATIC S7 Safety Matrix
- Special applications, for example, Partial Stroke Test
- Safety lifecycle management with support by highly qualified solution partners: services for all phases in the lifecycle of a safety instrumented system (analysis, implementation, and operation)

#### Design

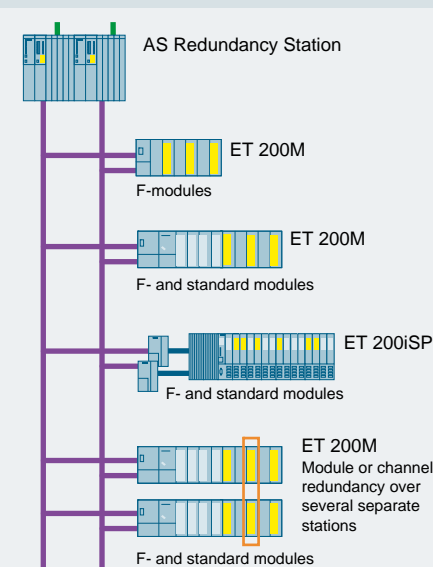

##### Single-channel, non-redundant configuration

Distributed I/O and direct fieldbus interfacing

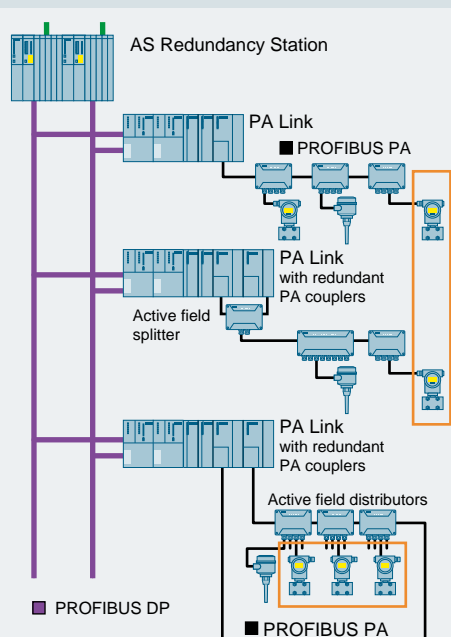

##### Redundant, high-availability and fault-tolerant configuration

Distributed I/O

Direct fieldbus interfacing

Safety-related design versions with PROFIBUS

G\_PCS7\_XX\_00130

## Design

The PROFIsafe profile allows safety-related communication between the automation system (controller) and the process I/O via either PROFIBUS or PROFINET. The decision for choosing either PROFINET IO or the PROFIBUS DP/PA fieldbuses has a significant influence on the architecture of the safety-related system.

### Safety-related design versions with PROFIBUS

In the case of a safety-related system with PROFIBUS communication integrated into SIMATIC PCS 7, a distinction is made across all architecture levels between two design versions:

- Single-channel, non-redundant design
- Redundant, fault-tolerant design

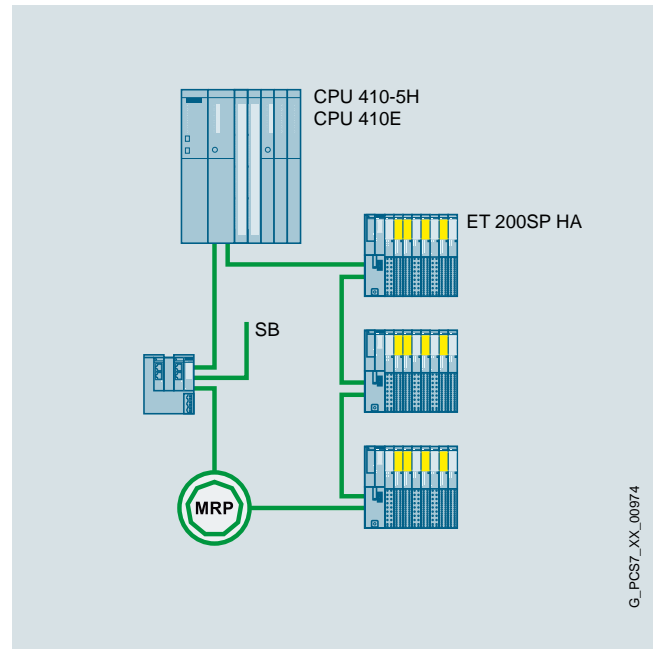

Both design versions are extremely variable, and offer a large scope for different customer requirements. Standard automation (basic process control) and safety-related functions can be combined flexibly, not only in the area of distributed I/O. Even at the controller level, they can be combined in one system or separated. In addition, there are numerous possibilities arising from the use of flexible modular redundancy.

At the individual architectural levels (controller, fieldbus, I/O), you have the configuration alternatives shown in the figure in line with the I/O used (ET 200SP HA, ET 200iSP, ET 200M and ET 200pro remote I/O stations or PROFIBUS PA devices with PA profile 3.0 or higher).

### Safety-related design versions with PROFINET

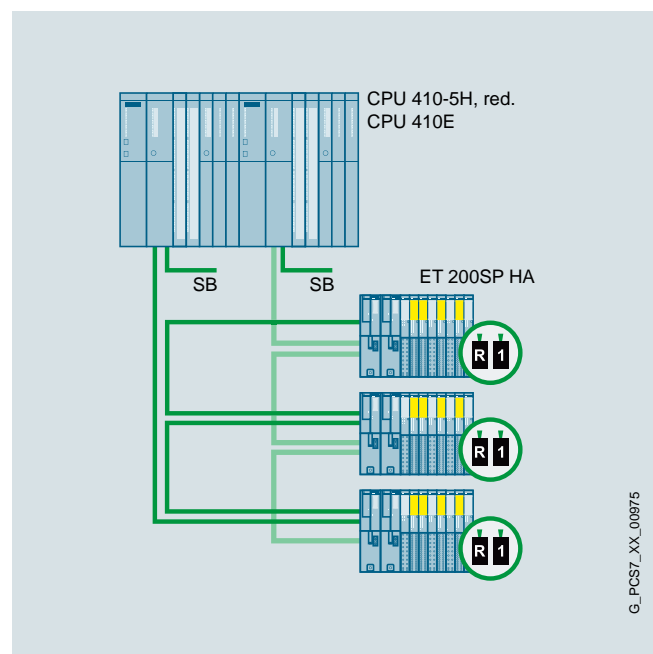

Safety-related AS single stations (F systems) and AS redundancy stations (FH systems) from the S7-400 range can be networked simply and effectively with ET 200M remote I/O stations via PROFINET IO. For this purpose, the PN/IE interface integrated in the CPU and the corresponding PROFINET interface module in the remote I/O stations (e.g. IM 155-6 PN HA for ET 200SP HA) are available on the automation system side.

The availability of the I/O devices on an AS Single Station (F-system) can be increased by a ring topology with media redundancy. If the transmission link in the ring is interrupted at one point, for example, due to a break in the ring cable or the failure of a station, the redundancy manager then immediately activates the alternative communication path.

Safety-related PROFINET IO communication with media redundancy

The maximum availability with minimum error handling times is achieved by the AS Redundancy Station (FH system) in conjunction with the redundant PROFINET configuration R1. From the CPUs of the H system onwards, the R1 devices are connected via two separate line structures. In order to increase availability, we recommend reverse cabling (as shown in the blueprint). In contrast to the single-sided I/O device connection to only one CPU, failure of a CPU in this case does not automatically lead to failure of the connected I/O devices.

Safety-related PROFINET IO communication with system redundancy

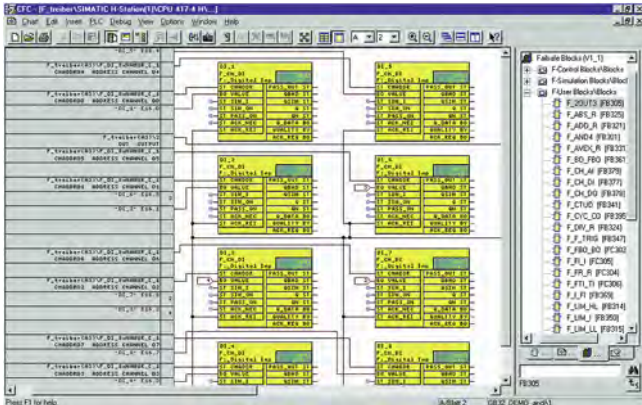

# Software for SIMATIC Controllers

STEP 7 V5.x

Options for programming and design

Safety Integrated for Process Automation > SIMATIC S7 F Systems

## Overview

The SIMATIC S7 F Systems engineering tool for configuration of safety-related SIMATIC PCS 7 automation systems and safety-related F-modules from the ET 200 range is integrated in the SIMATIC Manager. SIMATIC S7 F Systems are based on pre-configured and German Technical Inspectorate certified blocks. The following functions are then available:

- Parameterization of CPU and F signal modules
- Creation of safety-related applications in the CFC

## Information on ordering and delivery

Installation software for the SIMATIC S7 F Systems is provided in the form of a software media package. Software media packages and product-specific software licenses are separate packages. They are not merged into a single delivery unit when supplied in package form.

The number of delivered software media packages can be determined by the number of ordered items. You can find additional information under "Delivery form package" in the "Software Media and Logistics", "PCS 7 Software Packages" section of the ST PCS 7 Catalog.

## Software for SIMATIC Controllers

STEP 7 V5.x

Options for programming and design

### Safety Integrated for Process Automation > SIMATIC S7 Safety Matrix

#### Overview

Process image of an operator station with the SIMATIC S7 Safety Matrix Viewer displayed

The SIMATIC S7 Safety Matrix, which can be used in addition to the CFC, is an innovative safety lifecycle tool from Siemens that can be used not only for user-friendly configuration of safety applications, but also for their operation and service. The tool, which is based on the proven principle of a cause & effect matrix, is ideally suited to processes where defined states require specific safety reactions.

The SIMATIC S7 Safety Matrix means that programming of the safety logic is not only significantly simpler and more convenient, but also much faster than conventional processes. During the risk analysis of a plant, the configuration engineer can assign precisely defined reactions (effects) to events (causes) which may occur during a process.

#### Information on ordering and delivery

Installation software for the SIMATIC S7 Safety Matrix is provided in the form of a software media package. Software media packages and product-specific software licenses are separate packages, which are not merged into a single delivery unit for a goods delivery.

The number of delivered software media packages can be determined by the number of ordered items. You can find more information under "Goods delivery" in the section "Software Media and Logistics", subsection "PCS 7 Software Packages" in the ST PCS 7 Catalog.

##### SIMATIC S7 Safety Matrix

Runs with the following operating systems (see SIMATIC S7 Safety Matrix V6.3 Readme for the latest information):

- On engineering station under:
  - MS Windows 7 SP1 (64-bit) (Ultimate, Enterprise, Professional)
  - MS Windows 10 Enterprise 2015 LTSC
  - MS Windows 10 Enterprise 2019 LTSC
  - MS Windows Server 2008 R2 SP1
  - MS Windows Server 2012 R2 Standard
  - MS Windows Server 2016 Standard
  - MS Windows Server 2019 Standard
- On operator station (for Safety Matrix Viewer) under:
  - MS Windows 7 Ultimate SP1 (32-bit)
  - MS Windows 7 SP1 (64-bit) (Ultimate, Enterprise, Professional)
  - MS Windows 10 Enterprise 2015 LTSC
  - MS Windows 10 Enterprise 2019 LTSC
  - MS Windows Server 2008 R2 SP1
  - MS Windows Server 2012 R2 Standard
  - MS Windows Server 2016 Standard
  - MS Windows Server 2019 Standard

##### SIMATIC S7 Safety Matrix Tool V6.3

Creation, configuration, compilation and loading of the SIMATIC S7 Safety Matrix as well as operator control and monitoring in a SIMATIC PCS 7 environment

2 languages (German, English), software class A, floating license for 1 user

Without SIMATIC PCS 7 Software Media Package

- Goods delivery  
License key on USB flash drive and Certificate of License, bundled with 1 × SIMATIC S7 Safety Matrix Software Media Package per order item
- Online delivery  
License key download and online Certificate of License, combined with SIMATIC S7 Safety Matrix Software Media Package (software download and online Certificate of License)  
Note: Email address required; installation software also available separately as SIMATIC S7 Safety Matrix Software Media Package.

## Software for SIMATIC Controllers

STEP 7 V5.x

Options for programming and design

### Software redundancy

#### Overview

- Software package for assembling fault-tolerant control systems based on software
- Designed for control systems with single-channel distributed I/O
- For use in applications with low demands on changeover speed, such as the control of hydroelectric power plants, cooling circuits, traffic flows, level control, measured data acquisition
- Inexpensive thanks to the use of standard S7-300 and S7-400 components
- I/O linking with PROFIBUS DP in redundant configuration
- Optional control via WinCC operator station

#### Ordering data

#### Article No.

##### Program package software redundancy V1.2

###### Task:

Configuring a redundant control.

###### Target system:

SIMATIC S7-300, S7-400

###### Requirement:

STEP 7 V5.2, NCM S7 for PROFIBUS

###### Delivery package:

incl. electronic documentation (English, German, French, Spanish, Italian), 4 application examples and faceplate for WinCC on CD-ROM

Single license (for 2 CPUs)

**6ES7862-0AC01-0YA0**

Single license, without software and documentation

**6ES7862-0AC01-0YA1**

##### SIMATIC Manual Collection

**6ES7998-8XC01-8YE0**

Electronic manuals on DVD, multilingual:  
 LOGO!, SIMADYN,  
 SIMATIC bus components,  
 SIMATIC C7, SIMATIC distributed I/O, SIMATIC HMI,  
 SIMATIC Sensors, SIMATIC NET,  
 SIMATIC PC-based Automation,  
 SIMATIC PCS 7, SIMATIC PG/PC,  
 SIMATIC S7, SIMATIC software,  
 SIMATIC TDC

##### SIMATIC Manual Collection update service for 1 year

**6ES7998-8XC01-8YE2**

Current "Manual Collection" DVD and the three subsequent updates

#### Technical specifications

##### Technical specifications

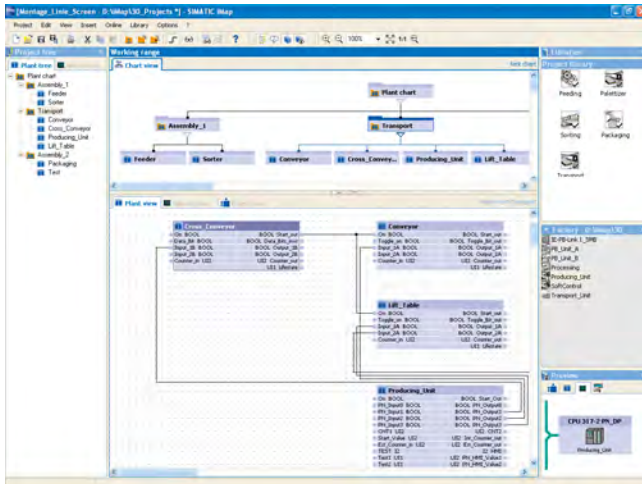

###### Hardware requirements

CPU	S7-300: CPU 313C-2 DP, 314C-2 DP, 315-2 DP, 316-2 DP, 318-2 DP S7-400: all CPUs
Redundancy link of the CPUs	MPI, PROFIBUS, Industrial Ethernet; existing connections can also be used.
Suitable modules for ET 200M	IM 153-2; all DI/O, AI/O for ET 200M; FM 350-1 counter module CP 341

###### Software requirements

Configuring/programming	STEP 7 V4.0
Communication configuration for redundant PROFIBUS DP	NCM S7 for PROFIBUS

## Overview

- Component-based software tool for configuring the communication in distributed automation solutions
- For easy graphical configuration of the communication between subsystems and machine-to-machine communication in the production line
- Based on the PROFINET standard
- Open for PROFINET devices from various manufacturers on Industrial Ethernet
- Runs under Windows XP Professional and Windows 7 Ultimate/Professional

### Licensing

- The engineering software can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license).
- An upgrade to version 3.0 is available for users of previous versions.

You can find more information on the Software Update Service, license types, online software delivery and handling your SW licenses with the Automation License Manager here:

<https://www.siemens.com/simatic-licenses>

## Ordering data

### SIMATIC iMap V3.0

#### Target system:

CPU 31x-2 PN/DP, CPU 319-3 PN/DP, SIMATIC WinAC PN, SIMATIC NET IE/PB Link, SIMATIC NET CP 343-1, SIMATIC NET CP 343-1 Advanced, SIMATIC NET CP 443-1 Advanced, distributed I/O devices with own CPU, PROFINET CBA OPC server, devices on Industrial Ethernet based on the PROFINET CBA standard, SIMATIC OPs, SIMATIC ProTool/Pro

#### Requirements:

Windows XP Prof. with Service Pack 2 or higher or Windows 7 Ultimate/Professional; on PG or PC with Pentium processor, min. 1 GHz; STEP 7 V5.3 Service Pack 3 or higher, PN OPC Server V6.3 or higher

#### Type of delivery:

German, English, with electronic documentation

Floating license

Upgrade to V3.0, floating license

# Software for SIMATIC Controllers

STEP 7 V5.x

Options for programming and design

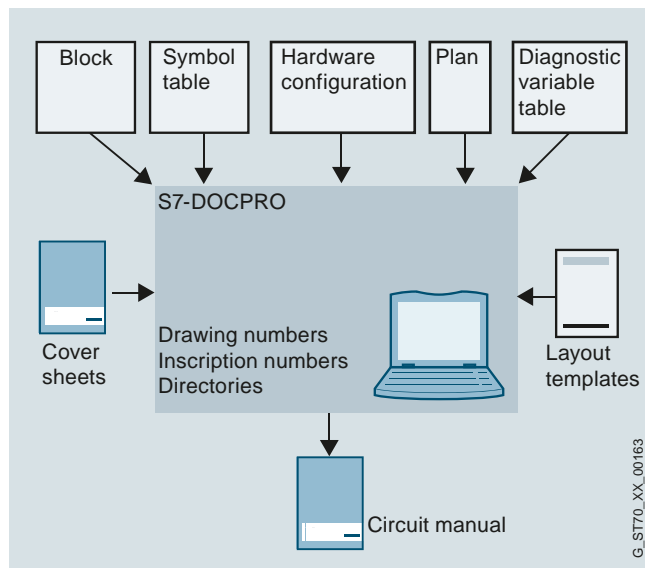

## SIMATIC iMap

### Technical specifications

Engineering tool	SIMATIC iMap
Current version	V3.0
Software class	A
<b>Application areas</b>	
Keyword	SIMATIC iMap is an engineering tool for configuring communication between automation and field devices in distributed automation solutions.
Marketing message	"Time and cost savings in modular machine and plant construction with Component Based Automation." "Modularization and machine-to-machine communication along the production line."
Advantages	<ul style="list-style-type: none"> <li>• Open component-based engineering tool to the PROFINET standard.</li> <li>• Simple communication between intelligent automation and field devices on PROFIBUS DP and on Ethernet.</li> <li>• Graphical configuration of communication on PROFIBUS DP and on Ethernet</li> <li>• Extremely high reusability of software components (technology modules)</li> <li>• Graphical structuring of the plant using "chart-in-chart" function</li> <li>• Convenient navigation through the project tree</li> <li>• Easy creation and structuring of technology libraries</li> <li>• PROFIBUS and Ethernet in the overview of the network view</li> <li>• Fast start-up thanks to downloading and testing directly on Ethernet (also of PROFIBUS slaves)</li> <li>• Online display of values of the technology modules on the interfaces and in the variable table</li> <li>• Diagnosis of communication in the diagnostics window</li> <li>• Automotive industry (especially in assembly, conveyor systems and in the paint shop)</li> <li>• Complex food and packaging machines</li> <li>• Conveyor systems based on PROFIBUS DP</li> <li>• Production lines with several interlinked machines</li> </ul>
Sectors	

Engineering tool	SIMATIC iMap
<b>Target systems</b>	
	<ul style="list-style-type: none"> <li>• SIMATIC S7 CPU 31x-2 PN/DP and SIMATIC S7 CPU 319-3 PN/DP (with integrated PROFINET interface. This can be used as a proxy function for the devices of a complete PROFIBUS segment, one line only)</li> <li>• SIMATIC WinAC PN (can be used as a proxy function for the devices of a complete PROFIBUS segment, one line only)</li> <li>• SIMATIC NET IE/PB Link (can be used as a proxy function for the devices of a complete PROFIBUS segment)</li> <li>• SIMATIC NET CP 343-1 and CP 343-1 Advanced (for connecting SIMATIC S7-300 to Ethernet), CP443-1 Advanced (for connecting SIMATIC S7-400 to Ethernet)</li> <li>• Distributed I/O stations with separate CPU (all intelligent field devices on PROFIBUS such as SIMATIC CPU 313C-2DP, CPU 314C-2DP, CPU 315-2DP, CPU 316-2DP, ET 200 IM 151 CPU, ET 200S BM 147 CPU),</li> <li>• PROFINET CBA OPC Server (for access from PC applications to data in PROFINET devices)</li> <li>• Devices on Industrial Ethernet based on the PROFINET CBA standard</li> <li>• SIMATIC OPs (within the components)</li> <li>• SIMATIC ProTool/Pro, WinCC or any other visualization system with OPC client function</li> </ul>
<b>System requirements</b>	
Operating system	Windows XP Prof. with Service Pack 2 or Windows 7 Ultimate/Professional; PC administration rights are required for installation
PG/PC hardware	Pentium processor, 1 GHz or higher
Recommended expansion of main memory in PG/PC	Work memory: 512 MB or more
Hard disk space required in PG/PC	Approx. 200 MB
Software required	<ul style="list-style-type: none"> <li>• STEP 7 V5.3 Service Pack 3 or higher</li> <li>• PN OPC-Server V6.3 or higher</li> </ul> The following software must be installed before iMap (included in the iMap package): <ul style="list-style-type: none"> <li>• MS Internet Explorer V6.0 Service Pack 1 and higher</li> <li>• Adobe Acrobat Reader V5.0</li> </ul>
<b>Type of delivery</b>	
Languages	English, German, French, Italian and Spanish
Single License (SL)	Yes
Upgrade License (UL)	Yes, from V2.0 to V3.0
Paper manuals	Electronically on CD
<b>Authorization/licenses</b>	
Authorization	Yes
Single License (SL)	Yes
Upgrade License (UL)	Yes
Software Update Service	Yes
Unlock Copy License	No

#### Overview

- For creating and managing plant documentation
- Permits structuring of project data, preparation in the form of wiring manuals, and uniform printouts
- For use in SIMATIC S7-300, S7-400 and C7

#### Licensing

- SIMATIC S7 DOCPRO is supplied with a floating license. The floating license allows the software to be installed on any number of computers. This means one user can use the software on any computer, or from one specific workstation per license. The number of licenses acquired determines the number of computers on which the software can be used simultaneously.
- A separate S7-DOCPRO update service is available for ordering.
- An upgrade to version 5.4 is available for users of previous versions.

You can find more information on the Software Update Service, license types, online software delivery and handling your SW licenses with the Automation License Manager here: <http://www.siemens.com/simatic-licenses>

#### Ordering data

#### Article No.

##### DOCPRO, Version 5.4

**Task:**  
Creation of circuit manuals for plant documentation management

**Target system:**  
SIMATIC S7-300, SIMATIC S7-400, SIMATIC C7

**Requirement:**  
from STEP 7 V5.4

**Delivery package:**  
on CD; German, English, French, Spanish, Italian; incl. authorization diskette, with electronic documentation

Floating license

**6ES7803-0CC03-0YA5**

Software Update Service (requires current software version)<sup>1)</sup>

**6ES7803-0CA01-0YX2**

Floating license upgrade to V5.4

**6ES7803-0CC03-0YE5**

##### SIMATIC Manual Collection

**6ES7998-8XC01-8YE0**

Electronic manuals on DVD, multilingual:  
LOGO!, SIMADYN, SIMATIC bus components, SIMATIC C7, SIMATIC distributed I/O, SIMATIC HMI, SIMATIC Sensors, SIMATIC NET, SIMATIC PC-based Automation, SIMATIC PCS 7, SIMATIC PG/PC, SIMATIC S7, SIMATIC software, SIMATIC TDC

##### SIMATIC Manual Collection update service for 1 year

**6ES7998-8XC01-8YE2**

Current "Manual Collection" DVD and the three subsequent updates

<sup>1)</sup> For more information on the software update service, see page 12/2.

#### Technical specifications

Engineering Tool	DOCPRO
Type of license	Floating license
Software class	A
Current version	V5.4
Target system (recommended)	SIMATIC S7-300/400 SIMATIC C7
Operating system	Windows XP Professional Windows 7 Ultimate/Professional from DOCPRO V5.4 SP1
Required software packages	STEP 7, V5.4 and higher; for operation under Windows 7 STEP 7, V5.5 and higher
Disk space required in PG/PC	5 MB

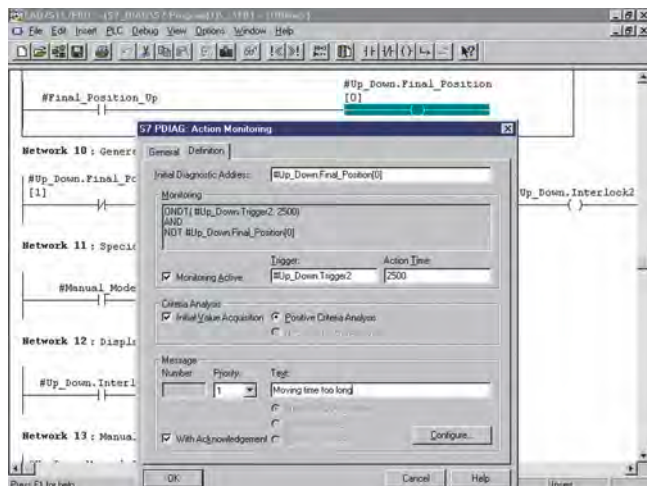

# Software for SIMATIC Controllers

STEP 7 V5.x

Options for diagnostics and service

## S7-PDIAG

### Overview

- For configuration of process diagnostics with SIMATIC S7
- Increases the availability of machines and production plants and provides supports with fault analysis and elimination on-site
- For use on the SIMATIC S7-300, S7-400

#### Licensing

- S7-PDIAG V5.7 is supplied with a floating license. The floating license allows installation of the software on any number of computers. This means one user per license can use the software independently of the computer used and without being tied to a certain workplace. The number of licenses acquired determines the number of computers on which the software can be used simultaneously.
- An upgrade to version 5.7 is offered for users of the previous versions.

You can find more information on the Software Update Service, license types, online software delivery and handling your SW licenses with the Automation License Manager here:

<http://www.siemens.com/simatic-licenses>

# Software for SIMATIC Controllers

STEP 7 V5.x

Options for technology and drive systems

[Loadable function blocks](#) > [Standard PID Control](#)

## Overview

- For integrating continuous PID controllers, pulse controllers and step controllers in the application program
- Reduces engineering costs thanks to time-saving parameterization and optimization of the controller
- For use in SIMATIC S7-300 (CPU 313 or higher), S7-400 and WinAC

### Licensing

- The Standard PID Control consists of a parameterization tool (engineering software) and function blocks (runtime software).
- The engineering software can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license).
- Function blocks may be copied as often as required onto any programming devices/PCs. However, one license is always required per CPU on which they are used.

You can find more information on the Software Update Service, license types, online software delivery and handling your SW licenses with the Automation License Manager here:

<http://www.siemens.com/simatic-licenses>

## Software for SIMATIC Controllers

STEP 7 V5.x

Options for technology and drive systems

Loadable function blocks &gt; Modular PID Control

### Overview

- For creating complex closed-loop control structures
- Preferred for implementation in closed-loop control equipment in mid-range and high-end applications and in process engineering
- For use in SIMATIC S7-300 (CPU 313 or higher), S7-400 and WinAC

#### Licensing

- The Modular PID Control consists of a parameterization tool (engineering software) and function blocks (runtime software).
- The engineering software can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license).
- Function blocks may be copied as often as required onto any programming devices/PCs. However, one license is always required per CPU on which they are used.

You can find more information on the Software Update Service, license types, online software delivery and handling your SW licenses with the Automation License Manager here:

<http://www.siemens.com/simatic-licenses>

1) With 5 control loops

Standard FBs in general	
Required libraries	Modular PID Control FBs
Licensing forms	Simple license and 1 runtime license; 1 runtime license
Software class	A
Current version	V5.1 SP3
Required software packages	STEP 7 V5.6 or higher
Main memory configuration in PG/PC	16 MB
Disk space required in PG/PC	1.85 MB

#### Overview

- PID Self-Tuner: For expanding existing PID controllers to create self-tuning PI or PID controllers.
- Optimization of PI or PID controllers with 3-step action (HEATING – OFF – COOLING)
- Convenient online initial setting and online adaptation during operation
- Ideally applicable to temperature controllers, but also suitable for level and flow controllers
- Can be used with SIMATIC S7-300 (CPU 313 or higher), SIMATIC S7-400 and WinAC; in combination with PID Control (integrated in STEP 7), Standard PID Control, Modular PID Control, FM 355, FM 455 as well as with any PID algorithm

#### Licensing

- The PID Self-Tuner complements the Standard PID Control or Modular PID Control software packages.
- Function blocks may be copied as often as required onto any programming devices/PCs. However, one license is always required for each CPU on which they are used.

You can find more information on the Software Update Service, license types, online software delivery and handling your SW licenses with the Automation License Manager here:

## Software for SIMATIC Controllers

STEP 7 V5.x

Options for technology and drive systems

### S7-Technology

#### Overview

- Option package for creating motion control applications for CPU 31xT and CPU 317TF
- Optimal embedding in the automation world thanks to total integration in the STEP 7 tools
- Programming in the standard SIMATIC programming languages LAD, FBD and STL
- Additional Engineering Tools such as S7-SCL or S7-GRAPH can be used

#### Licensing

- The engineering software can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license).

You can find more information on the Software Update Service, license types, online software delivery and handling your SW licenses with the Automation License Manager here:

<http://www.siemens.com/simatic-licenses>

##### S7 Technology V4.2

###### Task:

Option package for configuring and programming technology tasks with SIMATIC S7 CPU 31xT and SIMATIC S7 CPU 317TF

###### Requirement:

STEP 7 V5.6 and higher

###### Type of delivery:

on DVD

Incl. documentation for CPU 31xT, CPU 317TF (included on DVD)

###### Floating license

Floating license for 1 user, license key download without software or documentation<sup>1)</sup>; Email address required for delivery

**6ES7864-1CC42-0YA5**

**6ES7864-1CC42-0XH5**

<sup>1)</sup> For up-to-date information and download availability, see: <http://www.siemens.com/tia-online-software-delivery>

### Overview

- Low-priced package for simple, controlled positioning and simple geared synchronous motion
- For use with any standard variable-speed drive, such as frequency converter or servo drive
- For incremental and absolute encoders

#### Licensing

- The engineering interface for STEP 7 up to V5.5 is included in Easy Motion Control V2.1 and can be installed without license.
- The function blocks of Easy Motion Control require one runtime license for each CPU onto which they are loaded. Easy Motion Control V2.1 includes a runtime single license; other licenses can be ordered separately.

You can find more information on the Software Update Service, license types, online software delivery and handling your SW licenses with the Automation License Manager here:

<http://www.siemens.com/simatic-licenses>

#### Note of product versions

Easy Motion Control is an option for STEP 7 V5.x or STEP 7 Professional 2010/17 for controllers of the SIMATIC S7-300/S7-400 series and WinAC. When using STEP 7 (TIA Portal) to program these controllers, you require the optional package Easy Motion Control (TIA Portal)

#### Ordering data

#### Article No.

##### Easy Motion Control V2.1

6ES7864-0AC01-0YX0

##### Requirement:

STEP 7 V5.3 SP2 up to V5.5

##### Type of delivery:

Software and documentation in 2 languages (English, German) on CD and CoL for one runtime single license

##### Easy Motion Control Runtime License

6ES7864-0AF01-0YX0

##### Type of delivery:

CoL for one runtime single license (valid for Easy Motion Control V2.x and V11 or higher), without software or documentation

### Technical specifications

#### Supported hardware:

Easy Motion Control is runnable on the following CPUs:

- S7-300.
- S7-400.
- WinAC.
- ET 200S.
- ET 200pro.

Supported modules for the measuring of actual values:

- CPU 314C (FW version 2.0 of the CPU or higher).
- ET 200S 1 Count 5V/500 kHz.
- ET 200S 1 Count 24V/100kHz.
- ET 200S 1SSI.
- SM 338.
- FM 350-1, FM 450-1.
- SIMODRIVE Sensor with PROFIBUS DP.
- IM 174.
- Other modules for measuring actual values (using free driver).

Supported modules for setpoint output:

- ET 200S 2AO U.
- SM 332.
- SM 432.
- IM 174.
- Other modules for setpoint output (using free driver).

Supported drives using PROFIBUS DP:

- Micromaster 4.
- SINAMICS G120.
- SINAMICS S120.

# Software for SIMATIC Controllers

## STEP 7 V5.x

### Options for technology and drive systems

#### D7-SYS

#### Overview

- Optional package for STEP 7 V5.6 for configuring closed-loop control and automation tasks with SIMATIC TDC, FM 458-1 DP and T400
- Extensive block library
- Generation of user libraries in ANSI C with D7-FB-GEN function block generator

#### Licensing

- D7-SYS is delivered with a floating license. The floating license allows installation of the software on any number of computers. This means one user per license can use the software independently of the computer used or from a specific workstation. The number of existing licenses determines the number of computers on which the software can be used simultaneously.
- An upgrade to version 9.0 is available for users of the previous 8.x version.
- A separate update service can be purchased for D7-SYS.
- As of version 8.1, the D7-FB-GEN block generator that was previously sold separately is included in the D7-SYS scope of delivery.

You can find more information on the Software Update Service, license types, online software delivery and handling your SW licenses with the Automation License Manager:

## Overview

Drive ES is the engineering system used to integrate the communication, configuration and data management functions of Siemens drive technology into the SIMATIC automation world easily, efficiently and cost-effectively.

The following software packages are available for selection:

- Drive ES Basic Maintenance
- Drive ES PCS 7

Drive ES (**Drive Engineering Software**) fully integrates drives from Siemens into the world of Totally Integrated Automation.

## Ordering data

## Article No.

## Article No.

**Drive ES Basic Maintenance V5.6 SPx <sup>1)</sup>**

Configuration software for the integration of drives into TIA (Totally Integrated Automation)

Requirement:

STEP 7 V5.4 SP4 or higher

Type of delivery:

DVD-ROM

Languages:

en, de, fr, it, es

with electronic documentation

- Floating license, 1 user

**6SW1700-5JA00-6AA0**

**Drive ES PCS 7 V8.2 SPx <sup>1)</sup>**

Block library for PCS 7 for the integration of drives in Classic Style (as predecessor)

Requirement:

PCS 7 V8.2 and higher

Type of delivery:

CD-ROM

Languages:

en, de, fr, it, es

With electronic documentation

- Single-user license incl. 1 runtime license
- Runtime license (without data storage medium)
- Update service for single-user license
- Upgrade from V6.x/V7.x/V8.x to V8.2 SPx <sup>1)</sup>

## Software for SIMATIC Controllers

Software for common tasks

For network planning/commissioning

### SINETPLAN 2.0 network planning

#### Overview

SINETPLAN topology view

The SINETPLAN Siemens Network Planner

- supports planners of automation systems based on PROFINET and
- facilitates the professional and proactive simulation of a plant/system network.

#### Licenses

- The engineering software can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license).

You can find more information on the Software Update Service, license types, online software delivery and handling your software licenses with the Automation License Manager here:

<http://www.siemens.com/simatic-licenses>

#### Ordering data

#### Article No.

##### Siemens Network Planner SINETPLAN V2.0

Software for simulating PROFINET networks; 3 languages en/de/zh, executable under Windows 7 and Windows 10 (64-bit each)

- Floating license; software and documentation on DVD, license key on USB flash drive
- Floating license; software download incl. license key<sup>1)</sup>  
Email address required for delivery

**6ES7853-0AA01-0YA5**

**6ES7853-0AE01-0YA5**

##### Siemens Network Planner SINETPLAN Upgrade V2.0

Software for simulating PROFINET networks; upgrade from V1.x to V2.0; 3 languages en/de/zh, executable under Windows 7 and Windows 10 (64-bit each)

- Floating license; software and documentation on DVD, license key on USB flash drive
- Floating license; software download incl. license key<sup>1)</sup>  
Email address required for delivery

**6ES7853-0AA01-0YE5**

**6ES7853-0AE01-0YE5**

<sup>1)</sup> For up-to-date information and download availability, see: <https://support.industry.siemens.com/cs/ww/en/view/109763136>

#### Technical specifications

SINETPLAN V2.0 can be used on the following operating systems (64-bit each):

- Microsoft Windows 7 Professional SP1
- Microsoft Windows 7 Enterprise SP1
- Microsoft Windows 7 Ultimate SP1
- Microsoft Windows 10 Home Version 1809
- Microsoft Windows 10 Pro Version 1809
- Microsoft Windows 10 Enterprise Version 1809

### Overview

PRONETA Professional

### Asset management and diagnostics with PRONETA Professional

With PRONETA Professional, the network can be scanned automatically at regular intervals and the real plant configuration can thereby be documented transparently. This allows for new opportunities and for better planning of maintenance and servicing which, in turn, optimizes plant operation. This prevents undesired situations, such as a missing, compatible spare part, during maintenance and service. This increases production availability.

In addition, with PROFlenergy diagnostics, device statuses can be recognized or the mode can be changed. The measured values can also be displayed for devices with the PROFlenergy metering function. Furthermore, the data record wizard provides the option of sending PROFINET data records to PROFINET devices via acyclic communication.

#### Licenses

- The software can be installed on one computer (single license).

You can find more information on the Software Update Service, license types, online software delivery and handling your SW licenses with the Automation License Manager here:

<https://www.siemens.com/simatic-licenses>

### Ordering data

#### PRONETA Professional V1.1

Software for asset management with API, PROFlenergy diagnostics, data record wizard; 2 languages en/de, can be run under Windows 7 (32-bit and 64-bit) and Windows 10 (64-bit)

Single license; software, documentation and license for download

Single license upgrade from V1.0 to V1.1; software, documentation and license for download

### Article No.

**6ES7853-2BE01-0YA0**

**6ES7853-2BE01-0YE0**

### Technical specifications

PRONETA Professional V1.1 can be used on the following operating systems:

- Microsoft Windows 7 (32-bit and 64-bit)
  - Microsoft Windows 7 Professional SP1
  - Microsoft Windows 7 Enterprise SP1
  - Microsoft Windows 7 Ultimate SP1
- Microsoft Windows 10 (64-bit):
  - Microsoft Windows 10 Home version 1809
  - Microsoft Windows 10 Pro version 1809
  - Microsoft Windows 10 Enterprise version 1809

## Software for SIMATIC Controllers

Software for common tasks

For maintenance

### SIMATIC Automation Tool

#### Overview

- To support commissioning and service activities independent of the engineering framework
- For configuration, operation, maintenance and documentation of automation networks
- Rapid overview of the status of the SIMATIC automation system
- Time savings thanks to parallel operations (license required)
- Optimum upgrade support for the devices used and their versions through the display of article numbers, firmware versions and HW versions
- Simple traceability of performed operations and resulting changes in the system through the optional, automatic storage of event log entries in a file
- Automated processes for optimum API-based workflows (license required)

Supported products:

- SIMATIC ET 200
  - ET 200AL IM
  - ET 200AL SM and IO-Link
  - ET 200eco
  - ET 200M IM
  - ET 200MP IM
  - ET 200S IM
  - ET 200pro IM
  - ET 200pro IO-Link and RFID
  - ET 200SP CPU
  - ET 200SP IM and server modules
  - ET 200SP SM, AS-i, CM, CP, TM, IO-Link, motor starters
- SIMATIC S7-1200
  - S7-1200 CPU
  - S7-1200 SM and CM
- SIMATIC S7-1500
  - S7-1500 CPU
  - S7-1500 SM and other modules
- SIMATIC HMI
  - HMI Basic 2nd Generation
  - HMI Comfort
  - HMI Mobile
- SITOP power supplies
- RFID and MOBY
- SCALANCE

#### Licenses

- The software can be installed on multiple computers. The number of existing licenses determines the number of computers on which the software can be used simultaneously (floating license).
- The following license types are provided:
  - 21-day trial license (without license key); download as registered customer from <https://support.industry.siemens.com/cs/ww/en/view/98161300>
  - SIMATIC Automation Tool – basic scope of functions
  - SIMATIC Automation Tool Advanced – extended scope of functions, including:
    - Scheduler for planning device operations at a specific time and with selectable frequency
    - Card browser for working with files and folders on SIMATIC Memory Cards in CPUs
    - Extended options for handling SIMATIC Automation Tool projects - Archiving of SAT projects and associated file data
    - Support of devices downstream from a NAT router
    - Possibility to insert multiple devices in one operation
    - Support of CPUs connected via a CM (communications module) or CP (communications processor)
    - Firmware installation in 2 sequences - Option to download the firmware update files to devices and activate the new firmware at a later time.
- SIMATIC Automation Tool Advanced PowerPack V3/V4 upgrade to Advanced V4 - License key upgrade for activating the extended V4 functions based on an available V3/V4 license key.

You can find more information on the Software Update Service, license types, online software delivery and handling your SW licenses with the Automation License Manager here:

Software for common tasks  
For maintenance

### SIMATIC PDM

#### Overview

Configuration options with SIMATIC PDM

SIMATIC PDM (Process Device Manager) is a universal, vendor-independent tool for the configuration, parameter assignment, commissioning, diagnostics and servicing of intelligent field devices (sensors and actuators) and field components (remote I/Os, multiplexers, control-room devices, compact controllers), which in the following sections will be referred to simply as devices.

With *one* software product, SIMATIC PDM enables users to work with over 4 000 devices and device variants from Siemens and over 200 other manufacturers worldwide on a *single* homogeneous user interface.

The user interface satisfies the requirements of the VDI/VDE GMA 2187 and IEC 65/349/CD directives. Parameters and functions for all supported devices are displayed in a consistent and uniform fashion independent of their communications interface. Even complex devices with several hundred parameters can be represented clearly and processed quickly. Using SIMATIC PDM it is very easy to navigate in highly complex stations such as remote I/Os and even connected field devices.

From the viewpoint of device integration, SIMATIC PDM is the most powerful open process device manager on the global market. Devices not previously supported can be integrated in SIMATIC PDM by importing their device description packages (either EDD or FDI). This provides security for your investment and saves you investment costs, training expenses and follow-up costs.

SIMATIC PDM supports the operative system management in particular through:

- Uniform representation and operation of devices
- Uniform representation of diagnostics information
- Indicators for preventive maintenance and servicing
- Detection of changes in the project and device
- Increasing the operational reliability
- Reducing the investment, operating and maintenance costs
- Quantity options for
  - Transfer of parameters between devices
  - Transfer of parameter sets to the devices
  - Export and import functions
  - Diagnostics update

SIMATIC PDM can be used extremely flexibly and tailored to a specific task for field device service:

- Single-point station for point-to-point connection to field devices
- Local service and parameter assignment station with connection to fieldbus segments
- Central service and parameter assignment station with connection to plant bus
- Central HART service and parameter assignment station for HART multiplexers and WirelessHART field devices
- Integrated into the stand-alone SIMATIC PDM Maintenance Station
- Integrated into the SIMATIC PCS 7 process control system

G\_PCS7\_XX\_00386

## Overview

Maintenance personnel can assign field device parameters at mobile and stationary workstations with SIMATIC PDM. Practically every workstation integrated in the production plant can be used for configuration. Service personnel are thus able to work directly at the location of the field device, while data is stored centrally in the engineering station or maintenance station. This leads to a significant shortening of maintenance and travel times. Additional device-independent system functions support higher-level maintenance stations for creating progress lists for work and servicing.

When a maintenance station is configured in the SIMATIC PCS 7 process control system, SIMATIC PDM is integrated into it and transmits parameter data, diagnostic information and processing information. You can switch directly to the SIMATIC PDM views from the diagnostics faceplates in the maintenance station to perform diagnostics and work on the device in more detail.

A SIMATIC PDM user administration system based on SIMATIC Logon is used to assign various roles with defined function privileges to users. These function privileges refer to SIMATIC PDM system functions, e.g. writing to the device.

For all devices integrated with device description packages, SIMATIC PDM provides a range of information for display and further processing on the maintenance station, for example:

- Device type information (electronic rating plate)
- Detailed diagnostics information (manufacturer information, information on error diagnostics and troubleshooting, further documentation)
- Results of internal condition monitoring functions
- Status information (for example local configuration changes, device test completed)
- Information on changes (Audit Trail report)
- Parameter information

## Software for SIMATIC Controllers

Software for common tasks  
For administration

### Central user management (UMC)

#### Overview

The User Management Component (UMC) provides the possibility of central user management. Through the connection to the TIA Portal, users and user groups can be defined and managed across projects. Connection to a Microsoft Active Directory is also possible.

#### Licensing

- Central user management (UMC) is supplied with the TIA Portal.
- The license model depends on the number of user accounts per UMC domain.
- Up to ten user accounts can be used without a license.
- For additional user accounts, 365-day rental licenses are available to accumulate the required number of centrally managed users.

#### Ordering data

##### Central user management (UMC)

Software component to implement central user management, included in the scope of supply of the respective products (e.g. TIA Portal).

The license model depends on the number of user accounts per UMC domain. Use of max. 10 user accounts possible without a license.

6 languages: en, de, fr, es, it, zh; executable under Windows 7 (64-bit), Windows 10 (64-bit), Windows Server 2012R2 (64-bit), Windows Server 2016/2019 (64-bit)

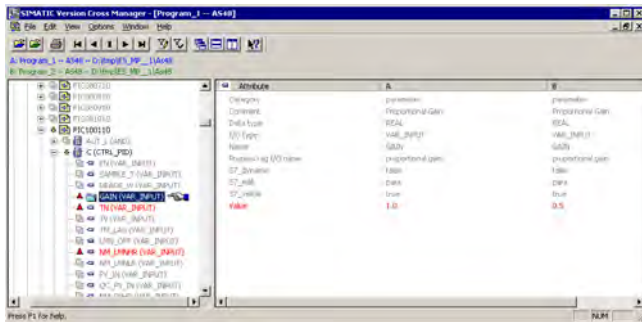

- Rental license 365 days with license certificate for 100 user accounts
- Rental license 365 days with license certificate for 4 000 user accounts

**6ES7823-1UE10-0YA0**

## Overview

The SIMATIC Version Cross Manager is a user-friendly tool for determining the differences between various versions of individual projects or multi-projects by:

- Tracing missing, additional or differing objects by comparing hardware configuration, communication, plant hierarchy, CFC/SFC plans, SFC details, block types, messages, global tags, signals and run sequences
- Graphic display of comparison results in a combination of tree and tabular formats
- Clear hierarchical structuring according to the technological hierarchy of the plant
- Color-coded identification of the differences

Note:

As the function "Control module adjustment" is based on a basic functionality of the Version Cross Manager (VXM), you need a VXM license to use this function. In the absence of a license, a message appears telling you to install Version Cross Manager. This is not actually necessary, all you need to install is a valid VXM license that will enable the relevant functionality on the engineering station.

## Programming devices

### Field PG M6

#### Overview

- The mobile, industry-standard programming device for automation engineers with a powerful, eighth-generation Intel® Core™ i processor (Coffee Lake) and high-speed RAM (DDR4 RAM)
- Elegant, robust enclosure made of light-weight stable injection-molded magnesium with rubber-protected corners and retractable carry-handle
- Can optimally be used both for engineering in the office and for the commissioning, service or maintenance of automation systems
- Industrial notebook with all commonly used interfaces for industrial applications
- Can be used immediately thanks to pre-installed SIMATIC engineering software

#### Ordering data

For using the removable hard disk in the hard disk kit as an external hard disk (only for Field PG M4/M5/M6)		

<sup>1)</sup> The capacity of the battery decreases for technological reasons with each charging/discharging cycle and also as a result of being stored at excessively high or low temperatures. The running time per charge decreases therefore over the course of time. With normal use, the battery can be charged and discharged over a period of six months from when the Field PG is purchased. Loss of capacity is not covered by the warranty. For the battery's operation we grant a warranty of six months. We recommend replacing the battery with an original Siemens battery at the end of these six months if there is a significant drop in performance.

<sup>2)</sup> For more information on the Software Update Service, see Catalog section 12, page 12/2.

## Products for specific requirements

Telecontrol systems for comprehensive applications

### Telecontrol systems for comprehensive applications

#### Overview

Telecontrol systems for controlling and monitoring widely distributed plants usually consist of a supervisory control system (telecontrol center) and one or more outstations connected over large distances for the automation of distributed plant sections.

SIPLUS RIC is a versatile telecontrol system that uses the internationally standardized telecontrol protocols:

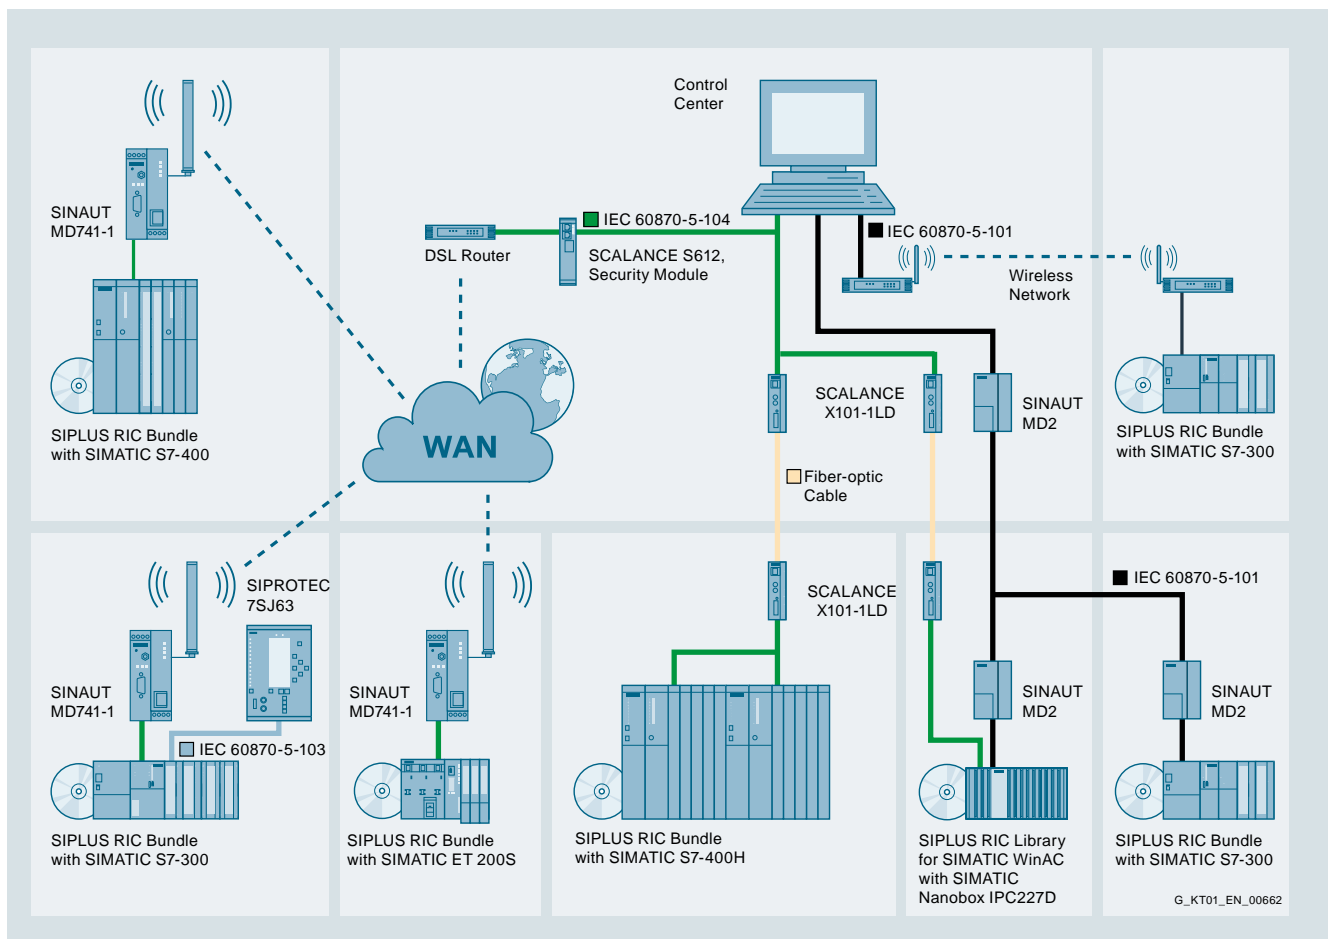

- Serial transmission IEC 60870-5-101
- Ethernet (TCP/IP) IEC 60870-5-104
- Connection of protection devices IEC 60870-5-103

It provides secure communication with reduced data volume for reliable operation in the Wide Area Network (WAN) thanks to event-driven, time-stamped transmission and monitored output of commands.

#### Application

SIPLUS RIC offers maximum functionality and modularity to meet the requirements made upon the monitoring and control of spatially distributed systems, even under extreme environmental conditions.

It is therefore suitable for sectors such as Oil, Gas, Water, Wastewater, Power Generation/Distribution, and Transportation.

**Overview**

IEC 60870-5-101, IEC 60870-5-103 and IEC 60870-5-104 are standardized vendor-independent protocols. With SIPLUS RIC, they can be parameterized with the SIMATIC Manager or TIA Portal V13 SP1 without the need for additional installations.

The protocol IEC 60870-5-101 supports standard WLAN connections via dedicated lines; in the automation system the modems are coupled via RS 232 to the communication modules 1SI, CP 340, CP 341, CP 441, CP 1540 or CP 1541.

The protocol IEC 60870-5-103 permits serial communication with protection devices, e.g. SIPROTEC. Coupling takes place via the 1SI, CP 340, CP 341, CP 441, CM PTP, CP1540 or CP1541 communication modules and RS485 interface with fiber-optic cables.

The IEC 60870-5-104 protocol supports TCP/IP-based WAN connections such as Internet/DSL or GPRS/UMTS/LTE. Either the PN interfaces of the CPUs or the CP 343-1CX10/-1EX30/-1GX30 and CP 1543 communication modules are used as interfaces. Redundancy groups and substitute routes (combinations of serial and Ethernet transmission paths) are both possible and enabled via the interfaces.

The libraries for the IEC 60870-5-101 and -104 protocols are supplied as master and slave including activation for PN-CPU and CP interface. The IEC 60870-5-103 is only provided as master.

SIMATIC Controllers can also communicate with third-party products by means of the IEC protocols.

Information can be forwarded both from lower-level stations and protection devices to the control centers. Automatic updating of the information objects can take place which can then be forwarded with the information object and ASDU address unchanged. These addresses can however also be changed by means of parameter assignment.

## Products for specific requirements

Telecontrol systems for comprehensive applications  
SIPLUS RIC substations for IEC protocol

### SIPLUS RIC libraries for S7-1500 and ET 200SP

#### Overview

If a SIMATIC S7-1500/ET 200SP-based system is to communicate with a Siemens control center, e.g. SIMATIC PCS 7 TeleControl, WinCC TeleControl, WinCC OA, or a control center of a third-party supplier using the IEC 60870-5 telecontrol standard, the IEC 60870-5-101 (serial), -103 (protection) or -104 (TCP/IP) telecontrol protocols can be used in the SIMATIC automation systems.

SIPLUS RIC libraries offer an integrated, scalable system based on SIMATIC S7-1500/ET 200SP functions for the following data volumes:

- 200 data points, for use with CPU 1510SP-1 PN<sup>1)</sup>, CPU 1511-1 PN and CPU 1511C-1 PN
- 800 data points, for use with CPU 1512SP-1 PN and CPU 1512C-1 PN
- 1000 data points, for use with CPU 1513-1 PN
- 2000 data points, for use with CPU 1515-2 PN
- 4000 data points, for use with CPU 1516-3 PN/DP
- 5000 data points, for use with CPU 1517-3 PN/DP and with CPU 1518-4 PN/DP

The work memory for data is used for buffering the message frames. Longer communication failure times can thus be bridged. The SIPLUS RIC software libraries are based on the standard TIA Portal and can be used on various, mutually compatible types of SIMATIC S7 devices, thus saving hardware costs and programming overhead.

The libraries on CD are supplied together with a SIMATIC Memory Card, which can be used on all CPUs. Four versions with different memory sizes are available for selection.

With SIPLUS extreme hardware, telecontrol devices for an extended ambient temperature range (-40 ... +70 °C) and exceptional exposure to media (conformal coating) can be implemented using the telecontrol protocols.

A license certificate with the activation of all telecontrol protocols IEC 60870-5-101 (serial), -103 (protection) or -104 (TCP/IP) is supplied for the SIMATIC Memory Card included in the scope of delivery.

<sup>1)</sup> The CPU 1510SP-1 PN is only suitable for the IEC protocol since memory space is too low for additional functions.

### SIPLUS RIC libraries for SIMATIC ET 200S

#### Overview

If a SIMATIC ET 200S-based system is to communicate with a Siemens control center, e.g. SIMATIC PCS 7 TeleControl, WinCC TeleControl, WinCC OA, or a control center of a third-party supplier using the IEC 60870-5 telecontrol standard, the IEC 60870-5-101 (serial), -103 (protection) or -104 (TCP/IP) telecontrol protocols can be used in the SIMATIC automation systems.

SIPLUS RIC libraries offer an integrated, scalable system based on SIMATIC ET 200S functions, for up to 200 information points.

The non-retain memory can also be used for buffering message frames. Longer communication failure times can thus be bridged. The SIPLUS RIC software libraries are based on the standard SIMATIC Manager or TIA Portal and can be used on various, mutually compatible types of SIMATIC S7 devices – this saves hardware costs and programming overhead.

The libraries on CD are supplied together with a SIMATIC Memory Card, which can be used on all CPUs. Two versions with different memory sizes are available for selection.

With SIPLUS extreme hardware, telecontrol devices for an extended ambient temperature range (-40 ... +70 °C) and exceptional exposure to media (conformal coating) can be implemented using the telecontrol protocols.

A license certificate with the activation of all telecontrol protocols IEC 60870-5-101 (serial), -103 (protection) or -104 (TCP/IP) is supplied for the SIMATIC Memory Card included in the scope of delivery.

#### Note:

The SIPLUS RIC libraries for ET 200S completely replace the previous SIPLUS RIC ET 200S bundles and SIPLUS RIC ET 200S extreme bundles.

Telecontrol systems for comprehensive applications  
SIPLUS RIC substations for IEC protocol

### SIPLUS RIC libraries for S7-400/S7-400H

#### Overview

If a SIMATIC S7-400/S7-400H-based system is to communicate with a Siemens control center, e.g. SIMATIC PCS 7 TeleControl, WinCC TeleControl, WinCC OA, or a control center of a third-party supplier using the IEC 60870-5 telecontrol standard, the IEC 60870-5-101 (serial), -103 (protection) or -104 (TCP/IP) telecontrol protocols can be used in the SIMATIC automation systems.

SIPLUS RIC libraries offer an integrated, scalable system based on SIMATIC S7-400/S7-400H functions for the following data quantities:

- 1 000 information points, for use with CPU 412 or CPU 412H
- 2 000 information points, for use with CPU 414 or CPU 414H
- 5 000 information points, for use with CPU 410H, CPU 416/CPU 416H or CPU 417/CPU 417H

The work memory for data which is limited to 256 MB in the CPU 410H for data blocks generated online is used for buffering the frames. Longer communication failure times can thus be bridged. The SIPLUS RIC software libraries are based on the standard SIMATIC Manager or TIA Portal and can be used on various, mutually compatible types of SIMATIC S7 devices – this saves hardware costs and programming overhead.

The libraries are supplied on a CD and can be used on all CPUs.

With SIPLUS extreme hardware, telecontrol devices for an extended ambient temperature range (-40 ... +70 °C) and exceptional exposure to media (conformal coating) can be implemented using the telecontrol protocols.

A memory card (CPU V5.0 or higher) or a CPU (CPU V4.x or higher and CPU 410H) are licensed. All IEC 60870-5-101 (serial), -103 (protection) or -104 (TCP/IP) telecontrol protocols are activated via the email address [siplus-ric.automation@siemens.com](mailto:siplus-ric.automation@siemens.com).

#### Note:

The SIPLUS RIC libraries for S7-400 completely replace the previous SIPLUS RIC S7-400 bundles, SIPLUS RIC S7-400 extreme bundles, and IEC 60870 libraries for SIMATIC PCS 7.

#### Ordering data

Overview

SIDOOR automatic door control systems

Door control system is the general term for a controller of an access system.

The SIDOOR product family is primarily intended for the operation of sliding doors, whereby these doors can be operated both horizontally and vertically.

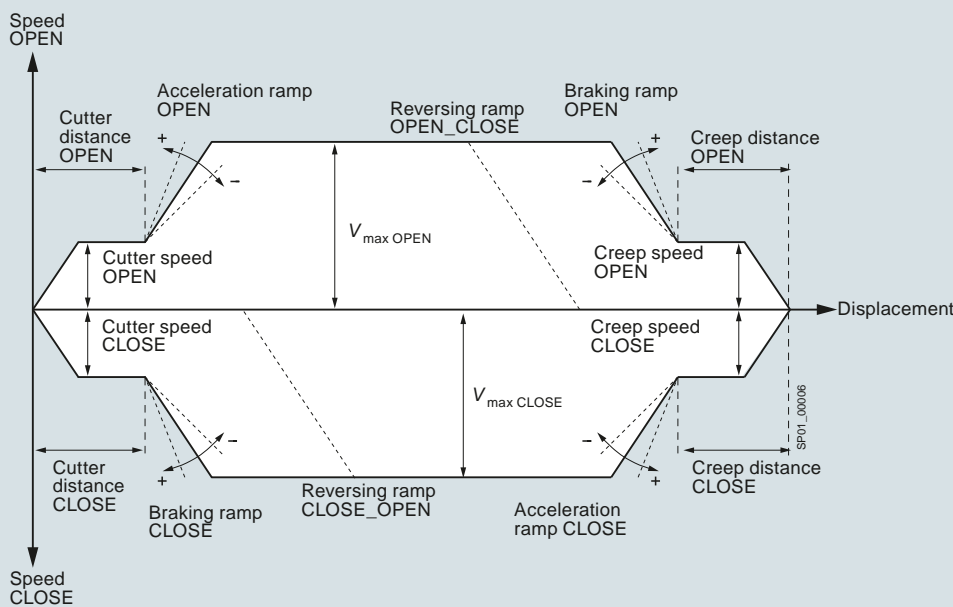

Door control systems are characterized by the fact that there are always two defined states for the open and closed position of the door.

The door is always controlled, regulated and moved between these two positions in accordance with the guidelines of the respective application.

In a defined learn run via "single-button operation", the door system independently determines the values for the door width, the dynamic door weight and the drive direction of the geared motor and stores these data in a non-volatile memory.

The optimum drive characteristics at the door are automatically calculated and are consistently adhered to.

The travel curve transitions are rounded off so that the door movement is smooth and jerk-free.

- Creep speed                      Reduced speed in the vicinity of the OPEN position of the elevator door (creep distance)
- Cutter speed                    Reduced speed in the vicinity of the CLOSED position of the elevator door (cutter distance)
- Creep distance                 Range of door travel in the vicinity of the OPEN position
- Cutter distance                 Range of door travel in the vicinity of the CLOSED position
- $V_{max}$                             Maximum permissible door speed

- Reversing ramp OPEN\_CLOSE    Travel reverses from the OPEN to the CLOSE direction
- Reversing ramp CLOSE\_OPEN    Travel reverses from the CLOSE to the OPEN direction

Note:  
When reversing from the open to the close direction, the door is braked with the reversing ramp OPEN\_CLOSE, and starts the closing movement with the acceleration ramp CLOSE.

Travel curve

## Products for specific requirements

### Automatic door controls

#### for elevators

#### Overview

The elevator door drive is comprised of a controller and the maintenance-free drive unit, geared motor or gearless EC technology direct drive motor.

Control devices are electronic controllers connected to the power supply via an external power supply unit (SIDOOR NT40 or SIDOOR Transformer). They are generally connected to the higher-level controller via digital or fieldbus interfaces, and can be configured via a user interface.

The SIDOOR AT40 and SIDOOR ATE500E control devices can be used to operate horizontally operated cabin and shaft doors as well as vertical doors for lifting or rolling doors at adjustable speeds and accelerations.

Geared motors form the maintenance-free drive unit in the door drive. The geared motors feature DC motors with non-self-locking gearing, and are speed-controlled. The set force and speed limits are not exceeded. The gearless motor (direct drive) is the maintenance-free drive unit of the door drive.

Operation of the named door drives does not require limit switches. The door width and the "OPEN"/"CLOSE" positions are determined automatically.

The power is transmitted by a toothed belt. The toothed belt passes over a deflector pulley and can be fitted with 2 door clutch holders. This enables it to drive both one-sided and centrally-opening doors. The accessories are not included in the scope of supply, see "Additional units" on page 14/24.

#### Design

The product-specific property of the elevator door controllers is based on the fact that the closing weights/closing springs integrated in the shaft doors are also taken into account.

These weights/springs are integrated in the shaft doors so that open doors close automatically if the cabin is not at the relevant floor.

They must also be moved by the elevator door drive in their opening direction and support it in the closing movement.

#### Complete motor mounting

- ① Geared motor
- ② 4 x locking hexagonal safety bolts M5 x 10
- ③ Rubber-metal anti-vibration mount
- ④ 10 x locking hexagonal safety bolts M6 x 16
- ⑤ Mounting bracket for the motor mounting

#### Mounting material for door clutch holder

- ⑥ 2 x locking hexagonal safety bolts M6 x 12
- ⑦ Door clutch holder
- ⑧ Clamping plate

#### Deflector unit and clamping device

- ⑨ Deflector unit
- ⑩ 2 x locking hexagonal safety bolts M6 x 12
- ⑪ Mounting bracket for the deflector unit and tensioning device
- ⑫ Tensioning lug for the deflector unit and tensioning device
- ⑬ Tensioning screw M6 x 30
- ⑭ 10 x locking hexagonal safety bolts M6 x 16
- ⑮ Toothed belt (length 4 m)

Mounting suggestion for door control systems

## Overview

SIDOOR AT40 elevator door drive (relay module version)

SIDOOR AT40 – SIDOOR enables the quick, easy and versatile installation, configuration and operation of a wide range of elevator door systems.

• Version:

- RELAY (including relay and terminal module)
- CAN (including CAN and terminal module), two controllers are available: SIDOOR AT40 CAN and CAN ADV.
  - Certified by CiA (CiA 301 / CiA 417).
  - The door system can be visualized and parameterized by the elevator controller using the "Virtual Terminal" function.
  - With the SIDOOR AT40 CAN ADV controller, parameters for evaluating mechanical wear can be provided at the door. These parameters can be accessed from the CAN-BUS via the elevator controller or other bus nodes and can be evaluated floor-dependently by an external evaluation logic. It includes, e.g. event counters, maximum current values in the slow end distance of the door, traversing times and energy values of the opening and closing cycles, as well as other performance values.
  - The evaluation can affect the maintenance cycles of the elevator system.

- For dynamic door weights up to 600 kg, depending on motor variant
- Automatic door weight detection
- 4 to 8 kg maximum counterweight (depending on motor version)
- Operating temperature -20 to +50 °C
- Flexible motor management (four different motor types), automatic detection
- Opening width 0.3 to 5 m
- Auxiliary power output 24 V DC  $\pm$  15 %; 0.4 A (short-circuit-proof)
- Output stage short-circuit-proof
- Supports power-optimized operation in the elevator cabin
- Vandal-proof
- IP54 degree of protection for 180 to 600 kg motor versions, gear unit IP40 (SIDOOR M5: entirely IP54)
- The current operating states are indicated via a 7-segment display or a terminal module directly in the elevator door drive or externally. The SIDOOR SOFTWARE KIT or the SIDOOR SERVICE TOOL is used for this, see "Additional units".

SIDOOR ATE500E elevator door drive

The SIDOOR ATE500E elevator door drive enables the quick, easy and versatile installation, configuration and operation of EC technology gearless elevator door systems.

- Design:
  - Relay module
  - CAN module
- For dynamic door weights up to 280 kg
- High control performance and optimized drive characteristic transitions
- Automatic door weight detection (single-button commissioning)
- 6 kg maximum counterweight of the coupled floor door
- Operating temperature -25 to +50 °C without restrictions

- Automatic identification of the connected motor
- Opening width 0.3 to 5 m
- Auxiliary voltage output 24 V DC  $\pm$  15%; 0.4 A (short-circuit-proof)
- Output stage short-circuit-proof
- Optimized energy consumption during cabin operation (DCPS)
- Vandal-proof
- IP20 degree of protection
- The current operating states are indicated via a 7-segment display directly in the elevator door drive or externally using the Software Kit or Service Tool, see "Additional units".

**Overview**

The SIDOOR NT40 switched-mode power supply unit is operated with 230 V AC ( $\pm 15\%$ ), 50/60 Hz, to power the elevator door controllers.

It is especially suitable for door systems with high door weights.

On the output side, the power supply unit delivers a voltage of 36 V DC ( $\pm 3\%$ ) SELV at a rated output power of  $< 100$  W.

In order to enable fast acceleration/deceleration of the doors by the controller, the device can briefly ( $< 2$  s) deliver a current of 15 A (corresponds to a short-time power output of 540 W).

Additional units > Software Kit, Service Tool

### Overview Software Kit

#### SIDOOR Software Kit

The scope of delivery of the SDOOR Software Kit includes an installation CD.

The CD includes the following functionalities:

SIDOOR User Software	The component that enables the door control system to be configured, parameters to be assigned, and analyzed.
Siemens HCS12 Firmware Loader	This component is used to update the operating software of the door controller.
SIDOOR USB to UART Bridge Driver	This driver is essential for operation of the USB adapter.

#### Note:

Some firmware updates are offered as free downloads in the Siemens Industry Online Support. For information on the availability and acquisition of more firmware, please contact Technical Support.

#### Ordering data

----------------------------	---------------------------

### Overview Service Tool

The Service Tool can be used to input run commands, change run parameters and read out learned parameters, door states, input/output signals and service data.

The Service Tool is connected to the various controllers by the respective cable.

You do not need to open the cover of the controller to do this.

#### Note:

If the Service Tool is in the "Quick adjustment" or "Total adjustment" menu, the run commands of the controller are blocked via the command inputs.

**6FB1105-0AT01-6ST0**

**Overview**

SIDOOR geared motors are a combination of gear unit, motor and sensor. They are easy to connect to the controller via the interface provided and are automatically detected during commissioning.

The maintenance-free, variable speed drive unit comprises a DC motor with non-self-locking gearing.

The geared motors must be selected according to the mass to be moved. Two different versions are available for each of the SIDOOR M2 to SIDOOR M5 geared motors, with gear output on the left or on the right: The gear outlet direction is defined as left or right when viewing the gear unit from the front.

## Overview

SIDOOR MED280 direct drive

SIDOOR direct drives are a combination of motor and sensor. They are easy to connect to the controller via the interface provided and are automatically detected during commissioning.

The maintenance-free drive unit consists of a gearless, speed-controlled, electronically commutated motor with non-self-locking gearing.

Direct drives are designed for certain masses and can control both drive directions.

- SIDOOR MED280 direct drive for max. 280 kg (6FB1203-0AT12-7DA0)

## Products for specific requirements

Automatic door controls  
for elevators

### Accessories

#### Overview

#### **A range of accessories is available for SIDOOR elevator door drive systems with geared motors:**

This is necessary to ensure low-noise operation of the door leaves by the controller. The geared motors can be optimally integrated into the respective door drive system.

#### Rubber-metal anti-vibration mounts for geared motors

To ensure low-noise door operation, SIDOOR geared motors are integrated in the door system using rubber-metal anti-vibration mounts.

- Rubber-metal anti-vibration mount 6FB1104-0AT02-0AD0 for SIDOOR M2 and SIDOOR M3 geared motors.
- Rubber-metal anti-vibration mount 6FB1104-0AT01-0AD0 for SIDOOR M4 and SIDOOR M5 geared motors.

Rubber-metal anti-vibration mount 6FB1104-0AT02-0AD0

Rubber-metal anti-vibration mount 6FB1104-0AT01-0AD0

#### Mounting brackets

Two different mounting brackets are available with elongated holes:

- Mounting bracket 6FB1104-0AT01-0AS0 for the geared motors for flexible accommodation of the rubber-bonded metal
- Mounting bracket 6FB1104-0AT02-0AS0 for the deflector unit. For setting the toothed belt to the required belt tension.

Mounting bracket 6FB1104-0AT01-0AS0 for mounting the geared motor

Mounting bracket 6FB1104-0AT02-0AS0 for the deflector unit

#### Door clutch holder

The door clutch holder serves to connect the respective door leaf by means of a toothed belt while also functioning as a toothed-belt lock. One door clutch holder per door leaf is required. The toothed-belt lock can accommodate both open ends of the toothed belt.

A door clutch holder is available for each toothed belt width:

- Width 12 mm: 6FB1104-0AT01-0CP0
- Width 14 mm: 6FB1104-0AT02-0CP0

Door clutch holder 6FB1104-0AT01-0CP0 (packaging size = 1 unit)

#### Deflector unit

The deflector unit 6FB1104-0AT03-0AS0 contains an embedded belt pulley which can be mounted on the door system.

The STS toothed belt is redirected via this deflector unit (toothed belt width 12 mm or 14 mm).

Deflector unit 6FB1104-0AT03-0AS0

**Overview**STS toothed belt

The door system is moved between the end positions of the door using the STS toothed belts. Two different toothed belt lengths can be ordered for each toothed belt width.

Toothed belt width 12 mm:

- Length 4 m: 6FB1104-0AT01-0AB0
- Length 45 m: 6FB1104-0AT02-0AB0

Toothed belt width 14 mm:

- Length 4 m: 6FB1104-0AT03-0AB0
- Length 55 m: 6FB1104-0AT04-0AB0

Toothed belt 6FB1104-0AT01-0AB0, length 4 m

Toothed belt 6FB1104-0AT02-0AB0, length 45 m

**A range of accessories is available for SIDOOR elevator door systems with EC technology:**

Motor holder 6FB1104-0AT03-0AD0 for accommodation of the SIDOOR MED280 direct drive.

Mounting bracket:

- For mounting the SIDOOR motor holder 6FB1104-0AT01-0AS0

- With tensioning device for mounting the deflector unit and setting the toothed belt to the required tension (large) 6FB1104-0AT05-0AS4

SIDOOR mounting bracket, large

- With tensioning device for mounting the deflector unit and setting the toothed belt to the required tension (small) 6FB1104-0AT05-0AS5

SIDOOR mounting bracket, small

### Automatic door controls

#### for industrial applications

##### Overview

The door drive system consists of a controller and a maintenance-free drive unit, the geared motors.

Control devices are electronic controllers connected to the power supply via an external power supply unit. They are generally connected to the higher-level controller via digital or fieldbus interfaces, and can be configured via a user interface.

These controllers are available for selection for industrial applications:

- SIDOOR ATD401W, digital I/O, masses of up to 700 kg
- SIDOOR ATD420W, connected to the higher-level controller via PROFIBUS interface, masses of up to 700 kg
- SIDOOR ATD430W, connected to the higher-level controller via PROFINET interface, masses of up to 700 kg

The safe functions – force limitation, energy limitation and end position detection – fulfill the requirements according to EN ISO 13849-1 for Category 2 and Performance Level d. The drives are suitable for power-operated guards according to EN ISO 14120

Geared motors form the maintenance-free drive unit in the door drive. The geared motors are DC motors with non-self-locking gearing, and are speed-controlled. The set force and speed limits are not exceeded.

Operation of the named door drives does not require limit switches. The door width and the "OPEN"/"CLOSE" positions are determined automatically.

The power is transmitted by a toothed belt. The toothed belt passes over a deflector pulley and can be fitted with 2 door clutch holders. This enables it to drive both one-sided and centrally-opening doors. The accessories are not included in the scope of supply, see ["Additional units"](#).

## SIDOOR ATD401W

The SIDOOR ATD401W enables the quick, easy and versatile installation, configuration and operation of a wide range of industrial door drive systems.

- Relay module design
- Masses of up to 700 kg
- Automatic determination of the door weight and friction during the learn run
- Digital inputs, for example for direct connection of a light barrier as type 2 ESPE (electro-sensitive protective equipment) according to EN 61496-1
- 3 relay outputs for position feedback and reversing feedback

- Operating temperature -20 to +50 °C
- Flexible motor management, automatic recognition of the geared motor
- Opening width 0.3 to 5 m
- Auxiliary voltage output 24 V DC  $\pm$  15%; 0.4 A (short-circuit-proof)
- Output stage for the motor control is short-circuit-proof
- Indicates the current operating states on a 7-segment display directly on the controller or using the Software Kit or Service Tool

## Overview

SIDOOR ATD420W

The SIDOOR ATD420W can be used to operate horizontal sliding doors. The drive system has been specially designed for use in a very wide range of machine tools. The communication-capable ATD420W controller offers complete flexibility for integration with a machine tool via PROFIBUS

- Masses of up to 700 kg
- Integrated PROFIBUS interface
- 5 freely parameterizable digital inputs for signal acquisition, of which one input is optionally parameterizable for:
  - Connection of a light barrier as type 2 ESPE (electro-sensitive protective equipment) according to EN 61496-1
  - Connection of a pressure-sensitive edge according to ISO 13856-2
- 2 relay contacts for additional position signals
- Automatic determination of the door weight and friction during the learn run
- Parameter assignment and analysis of the door parameters via PROFIDrive

- Operating temperature -20 to +50 °C
- Flexible motor management, i.e. automatic recognition of the geared motor
- Assisted drive (motor-assisted movement of the door)
- Impulse stop (door stopped automatically by applying light force)
- Impulse drive (automatic door movement after applying light force)
- Opening width 0.3 to 5 m
- Auxiliary power output 24 V DC  $\pm 15\%$  and 0.4 A (short-circuit-proof)
- Output stage for the motor control is short-circuit proof
- Indicates the current operating states on a 7-segment display directly on the controller or using the Software Kit or Service Tool

**Overview**

The power supplies can be used for the various SIDOOR controllers:

SIDOOR Transformer and Transformer UL power supply units:  
For masses of up to 400 kg and moderate performance.

- SIDOOR AT40 and ATE500E elevator door drives
- SIDOOR ATD4xxW machine tool door drives
- SIDOOR ATE53xS platform screen door drives

SIDOOR NT40 switched-mode power supply:  
For masses of up to 600 kg and maximum performance.

- SIDOOR AT40 and ATE500E elevator door drives
- SIDOOR ATD4xxW machine tool door drives

SITOP PSU8200 3-phase stabilized power supply,  
36 V DC/13 A:

For masses of up to 700 kg and maximum performance.

- SIDOOR ATD4xxW machine tool door drives

**Overview Power supply unit**

SIDOOR Transformer

The SIDOOR TRANSFORMER and SIDOOR TRANSFORMER UL are standard power supply units operated with 220-240 V AC, 50/60 Hz, from the SIDOOR product range. They can be used for controllers capable of controlling masses of up to 400 kg.

Further information [see page 14/17](#).

**Overview Switched-mode power supply**

The SIDOOR NT40 switched-mode power supply unit is operated with 230 V AC ( $\pm 15\%$ ), 50/60 Hz, to power the elevator door controllers.

It is especially suitable for door systems with high door weights.

On the output side, the power supply unit delivers a voltage of 36 V DC ( $\pm 3\%$ ) SELV at a rated output power of < 100 W.

In order to enable fast acceleration/deceleration of the doors by the controller, the device can briefly (< 2 s) deliver a current of 15 A (corresponds to a short-time power output of 540 W).

Further information [see page 14/19](#).

## Products for specific requirements

Automatic door controls  
for industrial applications

Power supplies > 3-phase, 36 V DC

### Overview

The 3-phase SITOP PSU8200 are technology power supplies for challenging solutions. The wide-range input allows a connection to almost any electricity supply network worldwide and ensures a high degree of safety even if there are large voltage fluctuations.

To further increase 36 V availability, SITOP power supplies can be combined with redundancy modules.

#### Product highlights

- 3-phase, 36 V DC / 13 A
- Input voltage 320 ... 575 V AC
- Up to 94% efficiency
- cULus, cCSAus, ABS and DNV GL certifications

### Technical specifications

Article number	<b>6EP3446-8SB10-0AY0</b>
Product	SITOP PSU8200
Power supply, type	36 V/13 A
<b>Input</b>	
Input	3-phase AC
Rated voltage value $V_{in}$ rated	400 ... 500 V
Voltage range AC	320 ... 575 V
Wide-range input	Yes
Mains buffering	at $V_{in} = 400$ V
Mains buffering at $I_{out}$ rated, min.	15 ms; at $V_{in} = 400$ V
Rated line frequency 1	50 Hz
Rated line frequency 2	60 Hz
Rated line range	47 ... 63 Hz
input current	
• at rated input voltage 400 V	1.2 A
• at rated input voltage 500 V	1 A
Switch-on current limiting (+25 °C), max.	16 A
$I^2t$ , max.	0.8 A <sup>2</sup> ·s
Built-in incoming fuse	none
Protection in the mains power input (IEC 898)	Required: 3-pole connected miniature circuit breaker 6 ... 16 A characteristic C or circuit breaker 3RV2011-1DA10 (setting 3 A) or 3RV2711-1DD10 (UL 489)
<b>Output</b>	
Output	Controlled, isolated DC voltage
Rated voltage $V_{out}$ DC	36 V
• output voltage at output 1 at DC rated value	36 V
Total tolerance, static $\pm$	3 %
Static mains compensation, approx.	0.1 %
Static load balancing, approx.	0.2 %
Residual ripple peak-peak, max.	100 mV
Spikes peak-peak, max. (bandwidth: 20 MHz)	200 mV
Adjustment range	36 ... 42 V
product function output voltage adjustable	Yes
Output voltage setting	via potentiometer; max. 480 W
Status display	Green LED for 36 V OK
Signaling	Relay contact (NO contact, rating 60 V DC/ 0.3 A) for 36 V OK
On/off behavior	No overshoot of $V_{out}$ (soft start)
Startup delay, max.	2.5 s
voltage increase time of the output voltage maximum	500 ms
Rated current value $I_{out}$ rated	13 A
Current range	0 ... 13 A
• Note	+60 ... +70 °C: Derating 2%/K
supplied active power typical	468 W
short-term overload current	
• at short-circuit during operation typical	39 A
duration of overloading capability for excess current	
• at short-circuit during operation	25 ms
constant overload current	
• on short-circuiting during the start-up typical	14 A

### Technical specifications

Article number	<b>6EP3446-8SB10-0AY0</b>
Product	SITOP PSU8200
Power supply, type	36 V/13 A
Parallel switching for enhanced performance	Yes; switchable characteristic
Numbers of parallel switchable units for enhanced performance	2
<b>Efficiency</b>	
Efficiency at V <sub>out</sub> rated, I <sub>out</sub> rated, approx.	94 %
Power loss at V <sub>out</sub> rated, I <sub>out</sub> rated, approx.	30 W
<b>Closed-loop control</b>	
Dynamic mains compensation (V <sub>in</sub> rated ±15 %), max.	0.1 %
Dynamic load smoothing (I <sub>out</sub> : 50/100/50 %), U <sub>out</sub> ± typ.	1 %
Load step setting time 50 to 100%, typ.	0.2 ms
Load step setting time 100 to 50%, typ.	0.2 ms
Dynamic load smoothing (I <sub>out</sub> : 10/90/10 %), U <sub>out</sub> ± typ.	2 %
Load step setting time 10 to 90%, typ.	0.2 ms
Load step setting time 90 to 10%, typ.	0.2 ms
setting time maximum	10 ms
<b>Protection and monitoring</b>	
Output overvoltage protection	< 48 V
Current limitation, typ.	14 A
property of the output short-circuit proof	Yes
Short-circuit protection	Alternatively, constant current characteristic approx. 14 A or latching shutdown
enduring short circuit current RMS value	
• typical	14 A
overcurrent overload capability in normal operation	overload capability 150 % I <sub>out</sub> rated up to 5 s/min
Overload/short-circuit indicator	LED yellow for "overload", LED red for "latching shutdown"
<b>Safety</b>	
Primary/secondary isolation	Yes
galvanic isolation	Safety extra low output voltage V <sub>out</sub> according to EN 60950-1
Protection class	Class I
leakage current	
• maximum	3.5 mA
• typical	0.9 mA
Degree of protection (EN 60529)	IP20
<b>Approvals</b>	
CE mark	Yes
UL/cUL (CSA) approval	cULus-Listed (UL 508, CSA C22.2 No. 107.1), File E197259; cCSAus (CSA C22.2 No. 60950-1, UL 60950-1)
Explosion protection	IECEX Ex nA nC IIC T4 Gc; ATEX (EX) II 3G Ex nA nC IIC T4 Gc; cCSAus (CSA C22.2 No. 213, ANSI/ISA-12.12.01) Class I, Div. 2, Group ABCD, T4

Additional units > Software Kit, Service Tool

### Overview Software Kit

SIDOOR Software Kit

The scope of delivery of the SIDOOR Software Kit includes an installation CD.

The CD includes the following functionalities:

SIDOOR User Software	The component that enables the door control system to be configured, parameters to be assigned, and analyzed.
Siemens HCS12 Firmware Loader	This component is used to update the operating software of the door controller.
SIDOOR USB to UART Bridge Driver	This driver is essential for operation of the USB adapter.

#### Note:

Some firmware updates are offered as free downloads in the Siemens Industry Online Support. For information on the availability and acquisition of more firmware, please contact Technical Support.

### Ordering data

<b>SIDOOR Software Kit</b>	<b>6FB1105-0AT01-6SW0</b>
----------------------------	---------------------------

### Overview Service Tool

The Service Tool can be used to input run commands, change run parameters and read out learned parameters, door states, input/output signals and service data.

The Service Tool is connected to the various controllers by the respective cable.

You do not need to open the cover of the controller to do this.

#### Note:

If the Service Tool is in the "Quick adjustment" or "Total adjustment" menu, the run commands of the controller are blocked via the command inputs.

**6FB1105-0AT01-6ST0**

## Overview

The SIDOOR geared motor is a combination of a gear unit, motor and incremental encoder matched to the complete system. It is easy to connect to the controller via the interface provided, and is automatically detected during commissioning.

The maintenance-free, variable speed drive unit comprises a DC motor with non-self-locking gearing. All geared motors are available with the output shaft on the left or right. The view is toward the front of the gear unit.

The "mass to be moved" has to be taken into account when selecting the geared motor:

The weight to be moved is calculated from the sum of the mass equivalent of the moment of inertia of the motor rotor, the moved door weight and the moved door mechanism weight. The weight of the door to be moved and the moved weight of the door mechanism depend on the application. You can find additional information in the system manual.

The **output shaft** is appropriately prepared for the mechanical coupling of the door.

- SIDOOR M3, M4 and M5 Basic motors: Output gear with 56 mm effective diameter for the use of a S8M toothed belt (see Accessories).
- Advanced motors: Gearbox output shaft with groove and feather key A 5x5 according to DIN 6885; the output gear design and effective diameter can be freely configured between 28 mm and 122 mm. Advanced motors are recommended, among other things, for a mechanical coupling to the door via gear rack or chain.

### Advanced motors:

## Products for specific requirements

Automatic door controls  
for industrial applications

### Accessories

#### Overview

An extensive range of accessories is available for the door control drives.

This is necessary to ensure low-noise operation of the door leaves by the motor. The geared motors can be optimally integrated into the respective door drive system.

#### Accessories for all controllers for industrial applications

##### Rubber-metal anti-vibration mounts for geared motors

To ensure low-noise door operation, SIDOOR geared motors are integrated in the door system using rubber-metal anti-vibration mounts.

- Rubber-metal anti-vibration mount 6FB1104-0AT02-0AD0 for SIDOOR M3 and SIDOOR MDG3 geared motors
- Rubber-metal anti-vibration mount 6FB1104-0AT01-0AD0 for SIDOOR M4 and MDG4 as well as SIDOOR M5 and MDG5 geared motors

Rubber-metal anti-vibration mount 6FB1104-0AT02-0AD0 for geared motors with masses to be moved of up to 180 kg

Rubber-metal anti-vibration mount 6FB1104-0AT01-0AD0 for geared motors with masses of up to 700 kg

#### Mounting bracket

Two different mounting brackets are available with elongated holes:

- Mounting bracket 6FB1104-0AT01-0AS0 for mounting SIDOOR geared motors, for flexible accommodation of the rubber-bonded metal
- Mounting bracket 6FB1104-0AT02-0AS0 for the deflector unit. For setting the toothed belt to the required belt tension.

Mounting bracket 6FB1104-0AT01-0AS0 for mounting the geared motor

Mounting bracket 6FB1104-0AT02-0AS0 for the deflector unit

#### Mounting rail holder

The standard mounting rail holder 6FB1144-0AT00-3SA0 is available for mounting controllers on the TH 35 standard mounting rail according to IEC 60715.

#### Door clutch holder

The door clutch holder serves to connect the respective door leaf by means of a toothed belt while also functioning as a toothed-belt lock. One door clutch holder per door leaf is required. The toothed-belt lock can accommodate both open ends of the toothed belt.

A door clutch holder is available for each toothed belt width:

- Width 12 mm: 6FB1104-0AT01-0CP0
- Width 14 mm: 6FB1104-0AT02-0CP0

Door clutch holder 6FB1104-0AT01-0CP0 (packaging size = 1 unit)

#### Deflector unit

The deflector unit 6FB1104-0AT03-0AS0 contains an embedded belt pulley which can be mounted on the door system. The STS toothed belt is redirected via this deflector unit.

Deflector unit 6FB1104-0AT03-0AS0

**Overview**STS toothed belt

The door system is moved between the end positions of the door using the STS toothed belts. Two different toothed belt lengths can be ordered for each toothed belt width.

- Toothed belt width 12 mm:
  - Length 4 m: 6FB1104-0AT01-0AB0
  - Length 45 m: 6FB1104-0AT02-0AB0
- Toothed belt width 14 mm:
  - Length 4 m: 6FB1104-0AT03-0AB0
  - Length 55 m: 6FB1104-0AT04-0AB0

Toothed belt 6FB1104-0AT01-0AB0 (width 12 mm, length 4 m)

Toothed belt 6FB1104-0AT02-0AB0 (width 12 mm, length 45 m)

MDG-PULLEY belt pulley

This belt pulley is used for DC geared motors with the S8M toothed belt with an effective diameter of 56 mm.

- for SIDOOR MDG4, MDG5 DC geared motors: 6FB1104-0AT14-0AS1
- for SIDOOR MDG3 DC geared motors: 6FB1104-0AT10-0AS1

SIDOOR MDG-PULLEY 14-S8M-56, 6FB1104-0AT14-0AS1

SIDOOR MDG-PULLEY 10-S8M-56, 6FB1104-0AT10-0AS1

Accessories for machine tool door drives onlySIDOOR MDG-CABLE cable set

This cable set connects the ATD4xxW door controller to the SIDOOR MDG3, MDG 4 and MDG 5 geared motors. Various lengths are available.

- Length 5 m: 6FB1104-0AT05-0CB2
- Length 10 m: 6FB1104-0AT10-0CB2
- Length 15 m: 6FB1104-0AT15-0CB2
- Length 20 m: 6FB1104-0AT20-0CB2

---

**Overview**

The product-specific application/requirement lies in complying with the special railway requirements concerning functional safety.

Interior railway doors have a closing spring which must always bring the door into the "CLOSED" position. This applies to either side, even when a train car is inclined at 10°.

These specific operating states are handled by the door controller.

Automatic door controls  
for railway applications

Control devices > Platform screen door drive

### Overview

SIDOOR ATE530S/531S wiring diagram

The SIDOOR ATE53xS door controller is an “intelligent” door drive which can be used for safety-oriented operation of platform screen doors (PSD) according to individual requirements. Siemens has once again shown just how easy integration can be with the innovative SIDOOR ATE53xS platform screen door drive in conjunction with SIDOOR MED280 or MEG251 motors. The PROFINET module integrated in the SIDOOR ATE53xS enables standardized, certified connection to PROFINET IO systems.

- Use of standard automation components
- Full integration into TIA Portal and STEP 7 thanks to PROFINET connection
- Parameter assignment and monitoring of door control parameters via the PROFINET interface (function blocks available as example applications in SIOS).

- Application example:  
Synchronization of two-panel and independent platform screen doors with SIDOOR ATE530S PROFINET EC door drive and S7-1500 CPU via TIA Portal  
<https://support.industry.siemens.com/cs/ww/en/view/109480495>
- Application example:  
Safety-oriented automation of platform screen doors with SIDOOR ATE530S PROFINET EC door drive and S7-1500 CPU via TIA Portal  
<https://support.industry.siemens.com/cs/ww/en/view/109477186>
- Read-in of two safe signals (two-channel, antivalent)
- High level of system safety thanks to safe torque off (e.g. self-release in the event of a fault)
- Firmware update for all SIDOOR controllers on an entire platform possible centrally via TCP/IP
- SIL 2 according to IEC 62061

## Overview

## SIDOOR ATE530G

The SIDOOR ATE530G drive control is designed for controlling gap fillers between external train doors and the platform edge. The gap filler facilitates easy access for passengers. The innovative SIDOOR ATE530G drive solution enables operation of a gap filler with adjustable speed, acceleration and motor currents.

A project-specific motor is used depending on the application. The SIDOOR ATE530G controller is activated by digital signals from a higher-level door control, and reports information about its current state via digital signals back to the door control.

The following drive functions are supported:

- System start-up after power failure
- "Extend", "Retract" command
- Gap filler is moved by a travel curve profile
- Obstruction detection
- Ice-breaker function  
Icing can be shifted broken by repeated extension and retraction of the gap filler with increased force.
- Reversing at the platform edge

The SIDOOR ATE530G controller fulfills Basic Integrity in accordance with EN 50657:2017

## Overview

SIDOOR ATD400T interior railway door drive

The SIDOOR ATD400T interior railway door drive is an "intelligent" door drive which enables interior and gangway doors to be opened and closed at adjustable speeds and accelerations.

- Relay module design
- For dynamic door weights up to 180 kg
- Automatic door weight detection
- Operating temperature -20 to +70 °C <sup>1)</sup>
- Flexible motor management (two different motor types), automatic detection
- Opening width 0.25 to 4 m
- Door can be operated with and without closing springs (60 to 80 N)
- With two identical door leaves, can be used up to a train inclination of 0 to 10%
- Forces and energies are limited in accordance with EN 14752
- EMC according to EN 50121-3-2
- Fulfills HL3 according to fire protection standard EN 45545-2 (Railway applications – Fire protection on rail vehicles)
- Vandal-proof

<sup>1)</sup> Note:

- Maximum output current at 24 V DC:
  - 0.4 A at ≤ 55 °C ambient temperature during operation
  - 0.1 A from 55 °C to 70 °C ambient temperature during operation, with restrictions at operating temperatures > 55 °C
- Maximum ambient temperature during operation:
  - 55 °C
  - 70 °C with restrictions at operating temperatures > 55 °C
- Restrictions at operating temperatures > 55 °C:
  - Use the 24 V output voltage only for operating the control inputs (max. 0.1 A)
  - Use a sufficiently large (at least 350 x 350 mm), unpainted metal mounting plate
  - The maximum drive parameters are restricted to the default values
  - If temperature class T3 according to EN 50155 is used, the maximum air temperature of 85 °C must not be exceeded near the printed-circuit board

**Overview Software Kit**

SIDOOR Software Kit

The scope of delivery of the SIDOOR Software Kit includes an installation CD.

The CD includes the following functionalities:

SIDOOR User Software	The component that enables the door control system to be configured, parameters to be assigned, and analyzed.
Siemens HCS12 Firmware Loader	This component is used to update the operating software of the door controller.
SIDOOR USB to UART Bridge Driver	This driver is essential for operation of the USB adapter.

Note:

Some firmware updates are offered as free downloads in the Siemens Industry Online Support. For information on the availability and acquisition of more firmware, please contact Technical Support.

----------------------------	---------------------------

**Overview Service Tool**

The Service Tool can be used to input run commands, change run parameters and read out learned parameters, door states, input/output signals and service data.

The Service Tool is connected to the various controllers by the respective cable.

You do not need to open the cover of the controller to do this.

Note:

If the Service Tool is in the "Quick adjustment" or "Total adjustment" menu, the run commands of the controller are blocked via the command inputs.

### Geared motors

#### Overview

SIDOOR motors are speed controlled, taking set force and speed limits into account. The gear outlet direction is defined as left or right when viewing the gear unit from the front. Force transmission is via a toothed belt. The toothed belt passes over a deflector pulley and can be fitted with two door clutch holders. This enables it to drive both single-side and centrally opening doors.

SIDOOR geared motors are available in two technological versions.

- 1. DC technology in version (area of application: interior railway doors)
  - DC geared motor
  - SIDOOR geared motors are a combination of gear unit, motor, and encoder. They are easy to connect to the controller via the interface provided and are automatically detected during commissioning. The variable speed drive unit comprises a speed-controlled DC motor with non-self-locking gearing.
- 2. EC technology in version (area of application: platform screen doors)
  - EC direct drive
  - SIDOOR direct drives are a combination of motor and sensor. They are easy to connect to the controller via the interface provided and are automatically detected during commissioning. The maintenance-free drive unit consists of a gearless, speed-controlled, electronically commutated motor. The EC direct drive can be fitted in various mounting orientations, facilitating reduced inventory management and minimizing assets.
  - EC geared motors
  - EC geared motors are electronically commutated DC motors with non-self-locking gearing and are speed-controlled. They are easy to connect to the controller via the interface provided and are automatically detected during commissioning. Due to the brushless drive technology, EC geared motors are subject to less abrasion compared with DC geared motors and thus have a longer service life. On account of the brushless drive technology, no commutation noises come from this motor, so it generates less noise than the DC geared motors.

#### Motors for interior railway door drives

The following **DC geared motors** are available for interior railway door drives. They should be selected according to the dynamic door weight.

- SIDOOR MDG180 geared motors, compliance with fire protection standard EN 45545-2 (max. door weight 180 kg)
  - SIDOOR MDG180 L EN 45545-2 (pinion left) 6FB1103-0AT16-4MB0
  - SIDOOR MDG180 R EN 45545-2 (pinion right) 6FB1103-0AT15-4MB0
- SIDOOR M3 geared motors (max. door weight 180 kg)
  - SIDOOR M3 L (pinion left) 6FB1103-0AT10-4MB0
  - SIDOOR M3 R (pinion right) 6FB1103-0AT11-4MB0

#### Motors for platform screen door drives

##### EC technology:

- SIDOOR MEG251 geared motors (max. door weight 250 kg)
  - SIDOOR MEG251 L (pinion left), 6FB1203-5AT00-7MP0
  - SIDOOR MEG251 R (pinion right), 6FB1203-5AT01-7MP0

### Direct drives

#### Overview

SIDOOR MED280 direct drive

SIDOOR direct drives are a combination of motor and sensor. They are easy to connect to the controller via the interface provided and are automatically detected during commissioning.

The maintenance-free drive unit consists of a gearless, speed-controlled, electronically commutated motor with non-self-locking gearing.

Direct drives are designed for certain masses and can control both drive directions.

- SIDOOR MED280 direct drive for max. 280 kg (6FB1203-0AT12-7DA0)

#### SIDOOR MED280 direct drive

Motor for door control, for max. dynamic door weights of 280 kg

**6FB1203-0AT12-7DA0**

**Overview**

A comprehensive range of accessories is available for the SIDOOR systems. This is necessary to ensure low-noise operation of the door leaves by the controller.

**Accessories for SIDOOR DC and EC geared motors**Rubber-metal anti-vibration mount

To ensure low-noise door operation, the SIDOOR geared motors are integrated in the door system using rubber-metal anti-vibration mounts.

- Rubber-metal anti-vibration mount 6FB1104-0AT02-0AD0 for SIDOOR M3 and SIDOOR MDG180 DC geared motors (also for EN 45545-2) and SIDOOR MEG251 EC geared motors (door weights up to 250 kg)
- Rubber-metal anti-vibration mount 6FB1104-0AT01-0AD0 for SIDOOR M4 DC geared motors (door weights up to 400 kg)

Rubber-metal anti-vibration mount 6FB1104-0AT02-0AD0

Rubber-metal anti-vibration mount 6FB1104-0AT01-0AD0

Mounting bracket

Two different mounting brackets are available with elongated holes:

- Mounting bracket 6FB1104-0AT01-0AS0 for SIDOOR M3 and SIDOOR MDG180 DC geared motors (also for EN 45545-2) and SIDOOR MEG251 EC geared motors for flexible accommodation of the rubber-bonded metal.
- Mounting bracket 6FB1104-0AT02-0AS0 for the deflector unit, this enables the toothed belt to be set to the required belt tension.

Mounting bracket 6FB1104-0AT01-0AS0 for mounting the geared motor

Mounting bracket 6FB1104-0AT02-0AS0 for the deflector unit

Door clutch holder

The door clutch holder 6FB1104-0AT01-0CP0 serves to connect the respective door leaf by means of a toothed belt while also functioning as a toothed-belt lock. One door clutch holder per door leaf is required. The toothed-belt lock can accommodate both open ends of the toothed belt.

Door clutch holder 6FB1104-0AT01-0CP0 (packaging size = 1 unit)

Deflector unit

The deflector unit 6FB1104-0AT03-0AS0 contains an embedded belt pulley which can be mounted on the door system.

The STS toothed belt is redirected via this deflector unit.

Deflector unit 6FB1104-0AT03-0AS0

STS toothed belt

The door system is moved between the end positions of the door using the STS toothed belt 6FB1104-0AT0.-0AB0. Two different toothed belt lengths are available.

Toothed belt 6FB1104-0AT01-0AB0, length 4 m

Toothed belt 6FB1104-0AT02-0AB0, length 45 m

## Products for specific requirements

Automatic door controls  
for railway applications

### Accessories

#### Overview

#### **Accessories for the SIDOOR MED280 EC direct drive, for the controller for the SIDOOR ATE530S/ATE531S platform screen door drive**

##### Motor holder

- Motor holder 6FB1104-0AT03-0AD0 for accommodation of the SIDOOR MED280 direct drive.

SIDOOR motor holder

##### Mounting bracket

- For mounting the SIDOOR motor holder 6FB1104-0AT01-0AS0. Identical to the mounting bracket 6FB1104-0AT01-0AS0 for DC geared motors.

Mounting bracket for geared motor

- With tensioning device for mounting the deflector unit and setting the toothed belt to the required tension (large) 6FB1104-0AT05-0AS4

SIDOOR mounting bracket, large

- With tensioning device for mounting the deflector unit and setting the toothed belt to the required tension (small) 6FB1104-0AT05-0AS5

SIDOOR mounting bracket, small

##### Door clutch holder

- For attaching both ends of the toothed belt and connecting the respective door panel to the toothed belt, width 20 mm, 6FB1104-0AT05-0AS1

SIDOOR door clutch holder

##### Deflector unit

- For attaching the SIDOOR toothed belt and fixing to the door 6FB1104-0AT07-0AS0

SIDOOR deflector unit

##### STD toothed belt

- As a connection between the door system and the end positions of the door, toothed belt width 20 mm. Length 4 m, 6FB1104-0AT05-0AB0

SIDOOR toothed belt, small

- Toothed belt width 20 mm. Length 45 m 6FB1104-0AT06-0AB1

SIDOOR toothed belt, large

## Products for specific requirements

### Condition monitoring systems

#### Introduction, SIPLUS CMS1200 Condition Monitoring System

##### Overview

SIPLUS CMS family

With the Condition Monitoring System from Siemens you can constantly monitor your machines and plants. Maintenance procedures can be planned better and only performed when they are actually necessary – predictive maintenance.

##### Overview SIPLUS CMS1200 Condition Monitoring System

The SIPLUS CMS1200 Condition Monitoring System is part of SIMATIC S7-1200 and is designed for the early detection of mechanical damage.

It provides the following benefits:

- vRMS machine monitoring in acc. with ISO 10816-3
- aRMS machine monitoring
- Detailed identification of damage with frequency-selective diagnostics
- Raw data recording and export for SIPLUS CMS X-Tools
- Trend recording and analysis
- Signaling of limit violations
- Permanent monitoring to protect the machines
- Effective monitoring of important processes and systems
- Early detection of damage
- Scheduled maintenance instead of spontaneous repair
- Reduction in maintenance costs
- Increase in system availability
- Optimum utilization of the service life of the units

## Products for specific requirements

### Condition monitoring systems

#### SIPLUS CMS1200 Condition Monitoring System

#### SIPLUS CMS1200 SM 1281 Condition Monitoring

### Overview

SIPLUS CMS1200 SM 1281 Condition Monitoring forms part of SIMATIC S7-1200 and is used for the:

- Monitoring of motors, generators, pumps, fans, or other mechanical components
- Recording and analysis of vibrations
- Expansion capability of up to 7 modules

### Ordering data

#### SIPLUS CMS1200 SM 1281 Condition Monitoring

Module for SIMATIC S7-1200 for monitoring vibrations in mechanical components based on characteristic values and frequency-selective analysis functions.

### Article No.

6AT8007-1AA10-0AA0

#### SIPLUS CMS1200 Ready to use Bundle

Consisting of:

- SM1281 Condition Monitoring
- SM1281 Shield clamp set
- S7-1214C-CPU
- S7-1200 Battery Board
- Memory card with TIA project

6AT8007-1AA30-0AA0

#### SIPLUS CMS1200 X-Tools Bundle

Consisting of:

- SM1281 Condition Monitoring
- SM1281 Shield clamp set
- X-Tools Professional V05.00
- X-Tool Analysis library V05.00

6AT8007-1AA31-0AA0

#### Accessories

#### SIPLUS CMS1200 SM 1281 Shield clamp set

For EMC-compliant connection of signal and encoder cables to SIPLUS CMS1200 SM 1281 Condition Monitoring.

6AT8007-1AA20-0AA0

### Article No.

#### SIPLUS CMS VIB-SENSOR

Piezoelectric sensor for connection to SIPLUS CMS1200 SM 1281 Condition Monitoring.

- SIPLUS CMS VIB-Sensor S01, frequency range 0,5 Hz to 15 kHz; measuring range 50G; sensitivity 100 mV/G (+/-10 %); MIL connector on top
- SIPLUS CMS VIB-Sensor S02, frequency range 1 Hz to 15 kHz; measuring range 500G; sensitivity 10 mV/G (+/-10 %); MIL connector on top
- SIPLUS CMS VIB-Sensor S03, frequency range 0,2 Hz to 3 kHz; measuring range 10G; sensitivity 500 mV/G (+/-10 %); MIL connector on top

6AT8002-4AB00

6AT8008-2AA00-0AA0

6AT8008-2AA02-0AA0

#### SIPLUS CABLE-MIL

For connection of VIB-SENSOR S01, S02 and S03 vibration sensor to SIPLUS CMS1200 SM 1281 Condition Monitoring.

- SIPLUS CABLE-MIL-300; length 3 m
- SIPLUS CABLE-MIL-1000; length 10 m
- SIPLUS CABLE-MIL-3000; length 30 m

6AT8002-4AC03

6AT8002-4AC10

6AT8008-2BA12-0AA0

### SIPLUS CMS1200 SM 1281 Condition Monitoring

#### Technical specifications

Article number	<b>6AT8007-1AA10-0AA0</b> SM1281_Condition_Monitoring
<b>General information</b>	
Product type designation	SM1281
Product description	S7-1200 module for the monitoring of vibrations on mechanical components based on parameters and frequency-selective analysis functions
<b>Installation type/mounting</b>	
Mounting type	Rail or wall mounting
Mounting position	Horizontal, vertical
Recommended mounting position	Horizontal
<b>Supply voltage</b>	
Type of supply voltage	DC
Rated value (DC)	24 V
permissible range, lower limit (DC)	20.4 V
permissible range, upper limit (DC)	28.8 V
<b>Input current</b>	
Current consumption, typ.	200 mA
Current consumption, max.	250 mA
from backplane bus 5 V DC, typ.	80 mA
from backplane bus 5 V DC, max.	85 mA
<b>Power loss</b>	
Power loss, typ.	4.8 W
<b>Memory</b>	
Total memory capacity	1 Gbyte
<b>Hardware configuration</b>	
Design of hardware configuration	Modular, up to 7 modules per CPU
<b>Speed input</b>	
Number of speed inputs	1
<b>Input voltage</b>	
• 24 V DC digital	Yes
<b>Sensor input</b>	
Number of IEPE sensor inputs	4
Sampling frequency, max.	46 875 Hz
<b>Interfaces</b>	
Type of data transmission	Export of raw data as WAV file for further analysis (e.g. using CMS X-Tools) can be downloaded via browser/FTP, online data transfer to CMS X-Tools
Ethernet interface	Yes
<b>Protocols</b>	
Bus communication	Yes
<b>Web server</b>	
• HTTP	Yes

Article number	<b>6AT8007-1AA10-0AA0</b> SM1281_Condition_Monitoring
<b>Interrupts/diagnostics/status information</b>	
<b>Alarms</b>	
• Diagnostic alarm	Yes
<b>Diagnostics indication LED</b>	
• for status of the inputs	Yes
• for maintenance	Yes
• Status indicator digital input (green)	No
<b>Integrated Functions</b>	
<b>Monitoring functions</b>	
• Monitoring of the sensor inputs	Yes; Cable break and short-circuit
• Vibration characteristic monitoring via RMS value of the vibration speed	Yes
• Vibration characteristic monitoring via RMS value of the vibration acceleration	Yes
• Vibration characteristic monitoring via diagnostic characteristic value	Yes
• Frequency-selective monitoring via vibration speed spectrum	Yes
• Frequency-selective monitoring via vibration acceleration spectrum	Yes
• Frequency-selective monitoring via envelope curve analysis	Yes
<b>Measuring functions</b>	
• Physical measuring principle	Vibration acceleration
<b>Measuring range</b>	
- Measurement range vibration frequency, min.	0.1 Hz
- Measurement range vibration frequency, max.	10 000 Hz
<b>Standards, approvals, certificates</b>	
Certificate of suitability	CE
<b>Ambient conditions</b>	
<b>Free fall</b>	
• Fall height, max.	0.3 m; five times, in product package
<b>Software</b>	
Browser software required	Web browser Mozilla Firefox (ESR31) or Microsoft Internet Explorer (10/11)
<b>Connection method</b>	
required front connector	Yes
Design of electrical connection	Screw connection
<b>Mechanics/material</b>	
Material of housing	Plastic: polycarbonate, abbreviation: PC- GF 10 FR
<b>Dimensions</b>	
Width	70 mm
Height	112 mm
Depth	75 mm
<b>Weights</b>	
Weight, approx.	260 g

## Overview

### SIPLUS CMS1200 SM 1281 shield clamp set

CMS1200 accessories

SIPLUS CMS1200 SM 1281 shield clamp set,  
 6AT8007-1AA20-0AA0

An additional shield clamp set must be ordered for the EMC-compliant connection of cables to the SIPLUS CMS1200 SM 1281 Condition Monitoring.

The shield clamp set comprises two shield clamps and five terminal clamps. One shield clamp is screwed on above and one below the module. The sensor cable shields are connected to the shield clamps by means of the terminal clamps.

### VIB-SENSOR vibration sensors

VIB-SENSOR S01 vibration sensor

- VIB-SENSOR S01 vibration sensor, 6AT8002-4AB00
- VIB-SENSOR S02 vibration sensor, 6AT8008-2AA00-0AA0
- VIB-SENSOR S03 vibration sensor, 6AT8008-2AA02-0AA0

The VIB-SENSOR vibration sensor with IEPE (integrated electronics piezo-electric) interface can be directly connected to the CMS1200 SM1281 Condition Monitoring module.

The sensor detects vibration accelerations in the frequency range from 0.5 Hz to 15 kHz with a resolution of 100 mV/g.

A threaded screw with an M8 male thread for mounting to the measuring point is included in the scope of delivery. The connecting cable is connected to the vibration sensor via the MIL connector.

### SIPLUS CABLE-MIL connecting cables

SIPLUS CABLE-MIL connecting cables

- SIPLUS CMS CABLE-MIL connecting cables  
 6AT8002-4AC03, 6AT8002-4AC10 and 6AT8008-2BA12-0AA0

The VIB-SENSOR vibration sensor is connected to the SIPLUS CMS1200 SM1281 Condition Monitoring module by means of the SIPLUS CMS CABLE-MIL connecting cable.

This high-quality industrial cable is made of black polyurethane and is pre-assembled on one end with a MIL connector (MIL-C5015). The open cable end of the shielded two-wire cable is connected directly to the screw terminals of the basic unit.

The connecting cable is available in lengths of 3 m, 10 m and 30 m.

### SIMATIC HMI

#### Introduction

#### Overview

#### **SIMATIC HMI operator control and monitoring systems – efficient machine-level operator control and monitoring**

Equipment for monitoring and operator control is needed wherever people have to work with or on machinery and plants performing diverse tasks from cylinder driers to waste compactors. It is not difficult to find the right device for your specific task. The challenge is to find a solution that is future-proof and flexible, that can be integrated into higher-level networks, and that can also meet the ever-increasing demands for transparency and data provision. SIMATIC HMI Panels have proven their value in a variety of different applications in all industrial sectors over many years. The range of the systems in use is just as wide as that of the applications and technologies in the respective plants.

SIMATIC HMI stands for highly efficient machine-level operator control and monitoring and has some unique advantages:

- Efficient engineering  
Visualization can be created more quickly and easily than ever before.
- Innovative design and operation  
Visualization becomes the outstanding feature of the machine.
- Brilliant HMI operator panels  
The right operator panel for every application.
- Backup – with security  
Protection for investments and know-how, secure operation.
- Commissioning in the fast lane  
Lose no time with testing and servicing.
- Openness with PC-based  
For flexible, independent applications

<http://www.siemens.com/hmi>

#### **NEW: SIMATIC WinCC Unified system – unlimited visualization for every application**

SIMATIC WinCC Unified is a totally new visualization system for meeting the challenges of digitalization in machine and plant construction.

State-of-the-art hardware and software technologies make this possible now and in the future. Tried and tested engineering in the TIA Portal, the latest web technology and great reserves of performance for the coming years combined with the freedom to implement your ideas as you imagine them.

<http://www.siemens.com/wincc-unified>

#### **SIMATIC HMI software – a lot more than just visualization software**

With the SIMATIC WinCC (TIA Portal), SIMATIC WinCC and SIMATIC WinCC Open Architecture product families, SIMATIC HMI covers the entire engineering and visualization software spectrum for the human machine interface.

- Almost the entire range of SIMATIC operator panels can be configured with SIMATIC WinCC (TIA Portal), the successor to SIMATIC WinCC flexible.  
The functionality covers both visualization tasks at machine level and SCADA applications on PC-based multi-user systems.
- The current version 7.5 of SIMATIC WinCC is available for extremely complex process visualization tasks and SCADA applications, e.g. taking account of redundant solutions and vertical integration all the way to plant intelligence solutions.
- Ultimately, SIMATIC WinCC Open Architecture addresses applications that require extensive customer-specific adaptations or manage large and/or complex applications, as well as projects that demand special system requirements and functions.

<http://www.siemens.com/hmi-software>

#### **NEW: SIMATIC WinCC Unified visualization software**

SIMATIC WinCC Unified software enables access to open interfaces, modern web technologies and consistent integration in order to implement modern visualization concepts simply and easily in the TIA Portal.

<http://www.siemens.com/wincc-unified-software>

#### **SIMATIC HMI – brilliant and rugged operator panels**

##### Basic HMI – for the entry level

- Key Panels  
Pre-assembled and ready for installation, for conventional operator panels. No configuration required with WinCC!  
<http://www.siemens.com/key-panels>
- Basic Panels  
The entry level series for simple HMI applications.  
<http://www.siemens.com/basic-panels>

##### Advanced HMI Panel-based - for higher requirements

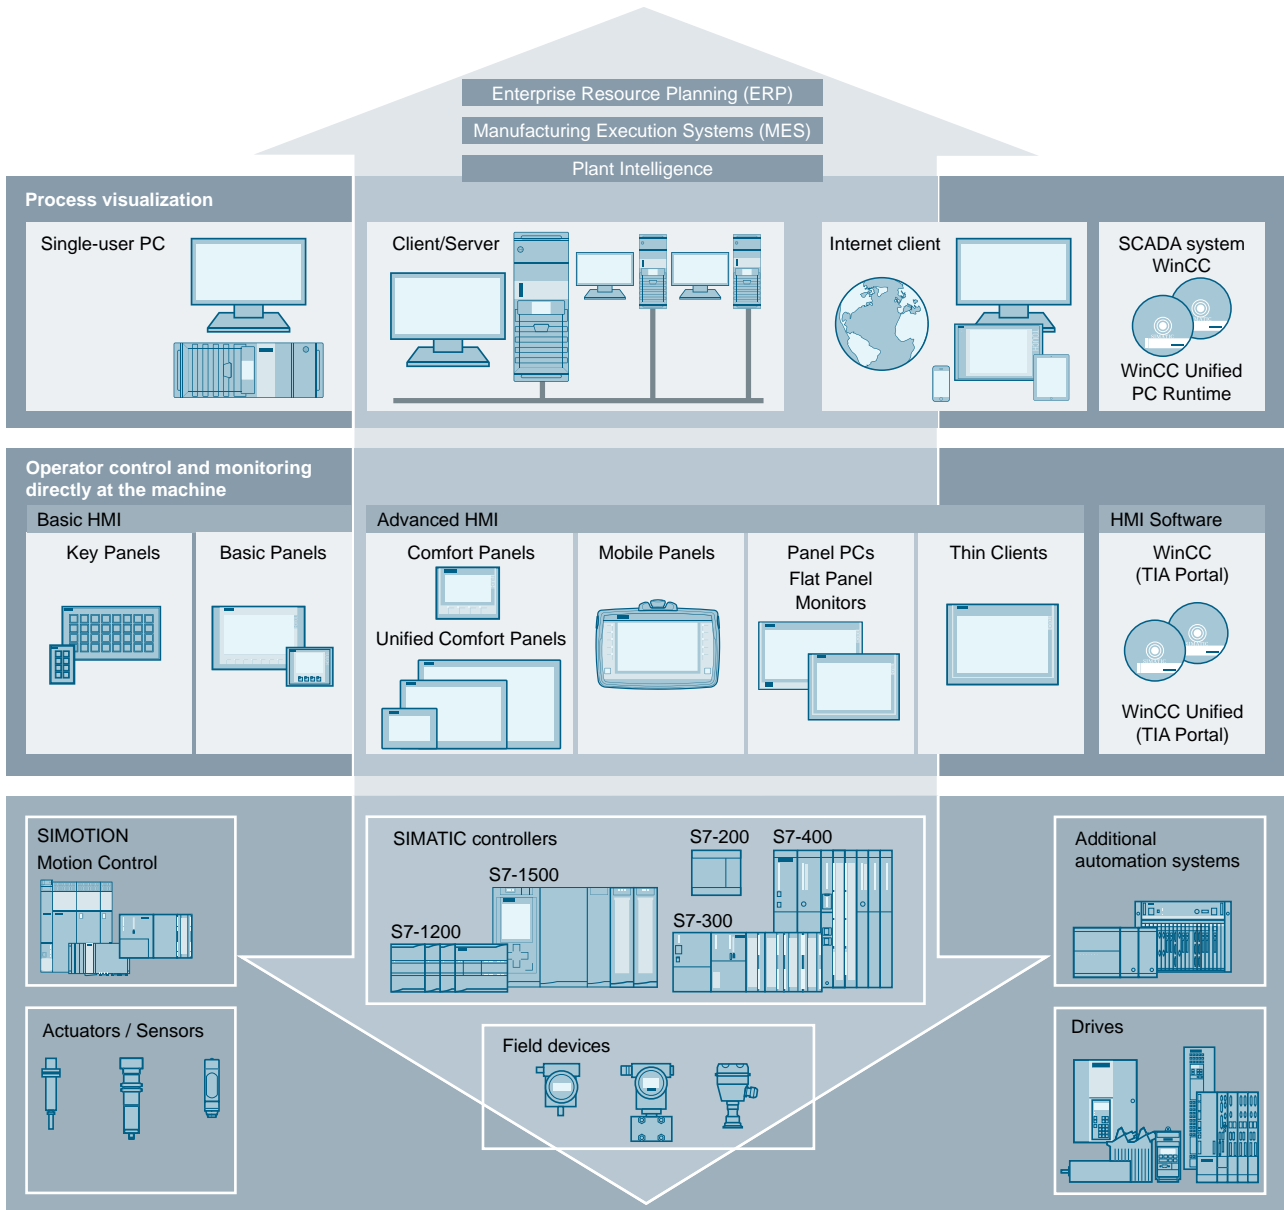

- New: SIMATIC HMI Unified Comfort Panels  
High-end performance and state-of-the-art technology for the future of visualization.  
<http://www.siemens.com/wincc-unified-hardware>
- Comfort Panels  
High-end functionality for demanding indoor and outdoor HMI applications.  
<http://www.siemens.com/comfort-panels>
- Mobile Panels  
Portable operator panels for mobile deployment on site.  
<http://www.siemens.com/mobile-panels>

#### **Individual HMI devices in customized versions**

### PC-based Automation

#### Introduction

#### Overview

G\_ST70\_XX\_00169

#### **SIMATIC PC-based Automation**

<http://www.siemens.com/pc-based>

#### Industrial IoT Gateway - SIMATIC IOT2000

An intelligent gateway which harmonizes communication between the various sources of data before analyzing it and forwarding it to the corresponding recipients. An easy-to-implement solution.

<http://siemens.com/iot2000>

#### Industrial PCs

Our reliable and innovative industrial PCs are the optimal PC hardware platform for PC-based Automation from Siemens.

- Rack PC
- Box PC
- Panel PC
- Tablet PC
- Industrial monitors and thin clients
- Devices for special requirements
  - Fully-enclosed IP65 devices
  - Devices with stainless steel fronts
  - Devices for hazardous areas
- IPC software
- Embedded bundles/software packages

<http://www.siemens.com/simatic-ipc>

#### Software controller

The SIMATIC S7-1500 Software Controller implements a SIMATIC S7-1500 controller on SIMATIC IPC. It is particularly suitable for control solutions in special-purpose machine manufacturing which involve a high-performance implementation of complex control tasks, the integration of PC applications, or the realization of multiple tasks on a single device.

<http://www.siemens.com/software-controller>

#### PC-based controllers

PC-based controllers combine the functions of a PC-based software controller with visualization, PC applications and central I/Os (inputs/outputs) in a single, compact device. The SIMATIC ET 200SP Open Controller is an industrial PC with the design of the ET 200SP I/O system and a pre-installed S7-1500 Software Controller.--

**Overview**

SIMATIC PCS 7

***Distributed Control System SIMATIC PCS 7:  
Room for new perspectives***

In process engineering plants, the process control system is the starting point for optimal value added: All procedures and processes can be operated, monitored and influenced with the process control system.

The more powerful the process control system, the more effectively this potential can be used. For this reason, performance is in the foreground with SIMATIC PCS 7, alongside scalability, flexibility, and integration. Starting with planning and engineering, the process control system offers powerful tools, functions and features for cost-effective and efficient plant operation through all phases of the plant life cycle.

***Performance through integration***

Integration is one of the special strengths of SIMATIC PCS 7. This has many aspects:

- Horizontal integration into TIA
- Vertical integration into hierarchical communication
- Integration of the field level, including drives, switchgear, etc.
- Integrated functions, e.g. for batch process automation, route control, process safety, energy management, telecontrol tasks, etc.

Horizontal integration

A system for integrated automation of the entire process chain, from incoming raw materials to outgoing goods – this is one of the decisive advantages resulting from the seamless integration of SIMATIC PCS 7 into Totally Integrated Automation.

The process control system is mainly responsible for automating the primary processes here, but it can do much more: All auxiliary facilities, as well as the electrical infrastructure in the form of low-voltage or medium-voltage switchgear and the building management system, can also be integrated into the system.

Integration of selected SIMATIC standard components – automation systems, industrial PCs, network components, or distributed process I/O – into the process control system guarantees optimum interaction of individual components, and secures economic benefits such as simple selection, reduced stock keeping, and global support.

Vertical integration

The hierarchical communication of a company encompasses the field level, the control level, and the process level, up to management and enterprise resource planning (ERP). Thanks to standardized interfaces – based on international industry standards as well as internal interfaces – SIMATIC PCS 7 is able to provide process data for analysis, planning, coordination, and optimization of plant sequences or production and business processes – in real time, and at any location in the company.

## Overviews

### SIMATIC PCS 7

#### Introduction

#### Overview

##### Central engineering

SIMATIC PCS 7 convinces with graded functional diversity, consistent operator control philosophy, and uniformly structured engineering and management tools. A central engineering system with a coordinated range of tools for integrated system engineering and configuring of batch automation, safety functions, material transport or telecontrol systems creates value added over the entire life cycle. Reductions in configuring and training costs result in minimization of total cost of ownership (TCO) over the entire plant life cycle.

##### Functional diversity

Depending on the typical process automation or customer-specific requirements, SIMATIC PCS 7 can be functionally expanded for the following, for example:

- Batch process automation (SIMATIC BATCH)
- Functional safety and protection functions (Safety Integrated for Process Automation)
- Route control for material transport (SIMATIC Route Control)
- Telecontrol of remote units (SIMATIC PCS 7 TeleControl)
- Automation of electrical switchgear (SIMATIC PCS 7 PowerControl)

##### **Custom automation**

The unique scalable system architecture makes SIMATIC PCS 7 the ideal basis for cost-effective implementation of individual automation solutions and a cost effective operation of process plants.

SIMATIC PCS 7 users receive sustainable benefits from the modular system platform, based on SIMATIC standard components. Its uniformity enables flexible scaling of hardware and software, as well as perfect interaction, both within the system and beyond system limits. The architecture of the process control system SIMATIC PCS 7 is designed in such a way that the control technology can be used for the project planning according to the customer's requirements, optimally adapted to the dimensions of the plant. The control technology allows retrofit or reconfiguration for capacity expansion or technological changes at any time. If the plant grows, then SIMATIC PCS 7 simply grows along with it – making expensive reserve capacities unnecessary!

Use the opportunities offered by the object-oriented type and instance concept of SIMATIC PCS 7. The technological connections, variant formation and bidirectional comparison of the types with the instances make the control module types (CMT) even more powerful compared to the original function block templates. The technological connections of a Control Module such as parameters, signals or messages can be provided with attributes and used via drag and drop, e.g. on an SFC plan. In turn, options and variants can be used to extend the core function of the CMT with specific modules or functions, which can be activated individually for each instance. This minimizes the number of types required and thus reduces the effort for maintenance and service. For the technological content of the CM types, the future-oriented Advanced Process Library (APL) is included in the standard of SIMATIC PCS 7. Another major advantage resulting from the comprehensive type and instance concept is the seamless integration into other tools like SIMATIC PCS 7 Plant Automation Accelerator or SIMIT.

##### **Flexibility and performance in engineering**

The workflow in the engineering of process plants is and remains a challenge: Numerous participants, many different data formats and multiple interfaces frequently result in transmission errors and system discontinuity and thus in greater time input and costs. Information generally gets lost or needs to be corrected manually when data is exchanged between multiple disciplines.

For the first time, a fully integrated solution is now available for planning and documenting plant projects: the SIMATIC PCS 7 Plant Automation Accelerator. Customers benefit in particular from consistent engineering without system discontinuities between automation planning and the control system.

The object-oriented approach of the SIMATIC PCS 7 Plant Automation Accelerator makes it possible to work on a central data platform, thus ensuring completely integrated planning – from plant engineering through to automation – based on an electronic workflow. This workflow ranges from planning, the preparation of bids – including bills of material – and the automatic generation of control data from the electrical plans of the SIMATIC PCS 7 process control system, through to controlled mass data engineering and direct as-is documentation of the plant.

This modular engineering approach enhances overall project efficiency and minimizes risks. A high level of standardization and simple configuration additionally save engineering time and costs during the implementation phase. Simple synchronization between planning and engineering avoids duplicate input and interface losses and reduces project runtimes.

##### **Flexibility in operation**

Process control also becomes more complex due to the multi-layer nature of automation engineering and the increased merging with information technology. Intuitive and fault-free operation is therefore more important than ever with regard to efficient working and the minimization of downtimes and servicing requirements. Using effective Advanced Process Control (APC) functions and an excellent operator system, SIMATIC PCS 7 supports optimization as well as user-friendly and safe control of the process. Monitoring of product quality and performance indicators additionally allows the process to be operated more economically. At the same time, SIMATIC PCS 7 convinces with high flexibility, plant availability, and investment security.

##### Process control and maintenance

SIMATIC PCS 7's operator system is used to monitor process operation using various views, and permits interventions when necessary. Its architecture is flexible and scalable – from single-user systems up to multi-user systems with a redundant client/server architecture. The operator interface takes account of the current specifications of NAMUR (user association of automation technology in the process industries) and PI (Profibus International) and offers a high level of user-friendliness for simple, intuitive interaction with the plant. Ergonomic symbols, task-oriented faceplates, uniform representation of status information, and optimized alarm functions allow safe process control.

### Overview

The alarm management function integrated in SIMATIC PCS 7 is able to focus on essential alarms and to specifically guide the operator in exceptional circumstances. In this way, it systematically reduces the workload of operating staff.

Preventive and predictive maintenance strategies reduce total cost of ownership. With the SIMATIC PCS 7 Maintenance Station, maintenance personnel always have a watchful eye on critical production equipment such as pumps, valves, distillation columns or motors, and can carry out the relevant maintenance measures in good time before servicing is required – independent of the maintenance plan and without the risk of an unplanned plant standstill.

#### Process optimization

SIMATIC PCS 7 supports process optimization in many different manners, including:

- Control Performance Monitoring
- Advanced Process Control
- Process Historian

The Control Performance Monitoring function monitors and signals the control quality of the closed-loop control block. If the performance declines, the controller can be optimized in good time or specific maintenance measures can be initiated.

The integrated I&C libraries of SIMATIC PCS 7 also provide higher quality closed-loop control functions with which cost-effective Advanced Process Control applications can be implemented: multi-variable control, predictive control, or override control. It is thus possible to effectively improve profitability, product quality, safety, and environmental protection in small and medium-sized plants.

Current and historic process data form the basis of all optimization. Secure and user-friendly real-time data storage and analysis is handled using the Process Historian. The process values, messages, and batch data managed in the database of the Process Historian can be called extremely rapidly. User-specific processing and visualization of this historic data are supported by the information server, which is a reporting system based on the Microsoft Reporting Services.

#### **SIMATIC PCS 7 system and technology components**

With the rugged, high-performance SIMATIC PCS 7 system components from Catalog ST PCS 7, you already have a versatile platform for cost-effective implementation and economical operation of your process control systems. Perfect interplay of these system components makes it possible for you to sustain high-quality production and to establish new products significantly faster on the market.

With SIMATIC PCS 7 technology components from Catalog ST PCS 7 T that can be seamlessly integrated into the process control system, you can expand the functional scope of the system components in a carefully targeted manner for specific automation tasks.

This covers a wide spectrum, for example:

- Telecontrol for monitoring and controlling remote plant units
- Automation technology for electrical low-voltage or medium-voltage switchgear
- Industry-specific automation systems for the cement and mining industries, as well as for laboratory and training facilities
- Graphical objects for task-oriented optimization of process visualization
- Block libraries for technological functions, package unit and panel integration, monitoring and analyzing mechanical assets, as well as for building automation systems (heating, ventilation, air-conditioning – FMCS/HVAC)
- Editors and function blocks for the efficient configuration of small or medium-sized automation systems with simple parameter control and materials management
- Process analytical technology for quality assurance through optimization of development and production processes based on up-to-date measurements, and critical quality and performance attributes
- Simulation system for testing and commissioning of plant-specific application software
- Flexible, high-performance Manufacturing Execution System (MES)
- System expansion for operator systems for the integration of third-party controllers, programmable logic controllers and package units
- Products for migration of the process control systems TELEPERM M, APACS+/QUADLOG or Bailey INFI 90/NET 90 with SIMATIC PCS 7

#### **Additional functionality can be integrated using add-on products**

Modularity, flexibility, scalability, and the openness of SIMATIC PCS 7 offer optimal prerequisites for integrating supplementary components and solutions in the process control system in an applicative manner and thus extend and round off its functionality.

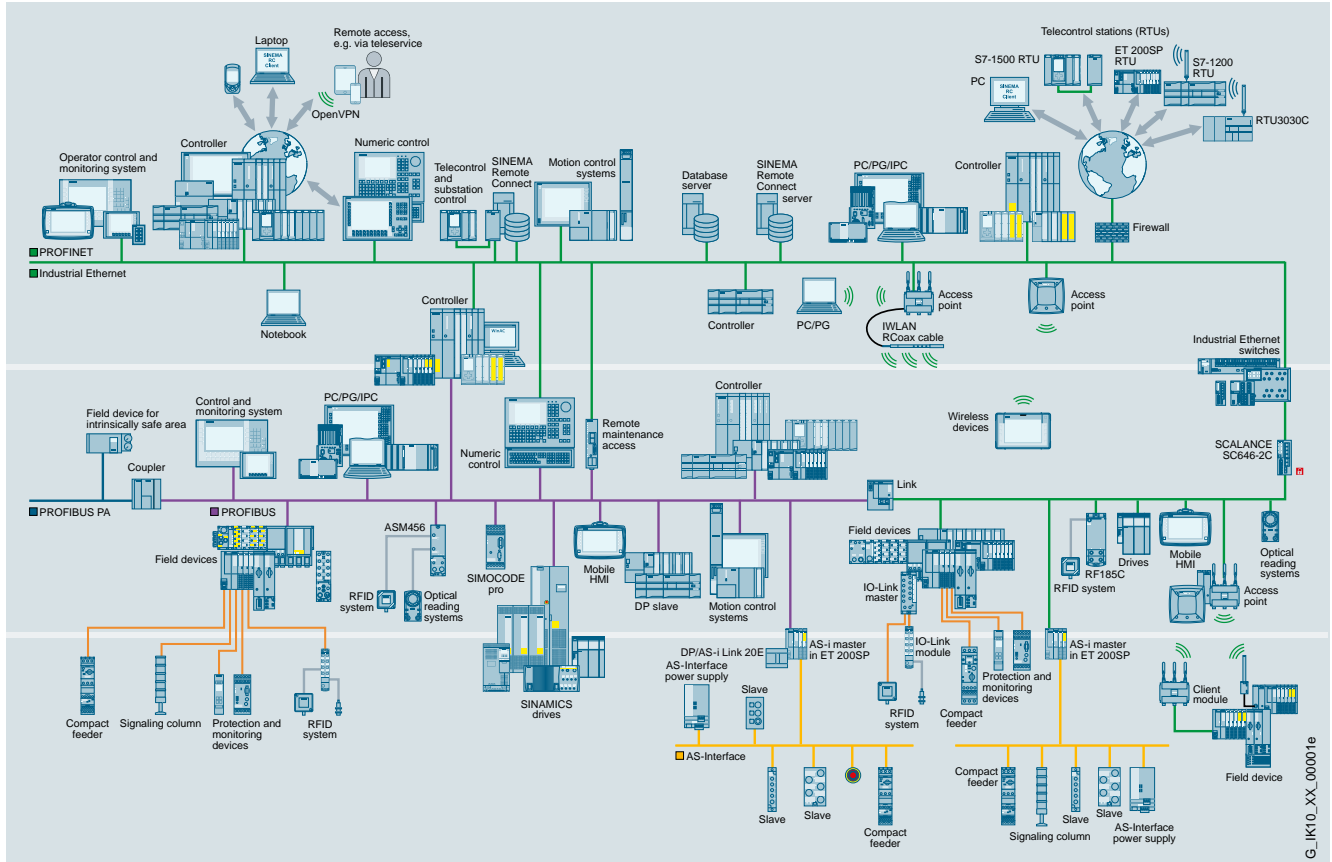

Many supplementary add-on products for SIMATIC PCS 7 have been developed by Siemens as well as by external partners (see Catalog ST PCS 7 AO, Add-ons for the SIMATIC PCS 7 Process Control System). These software packages and hardware components authorized by the system manufacturer enable cost-effective implementation of SIMATIC PCS 7 for special automation tasks.

# Overviews SIMATIC NET

## Introduction

### Overview

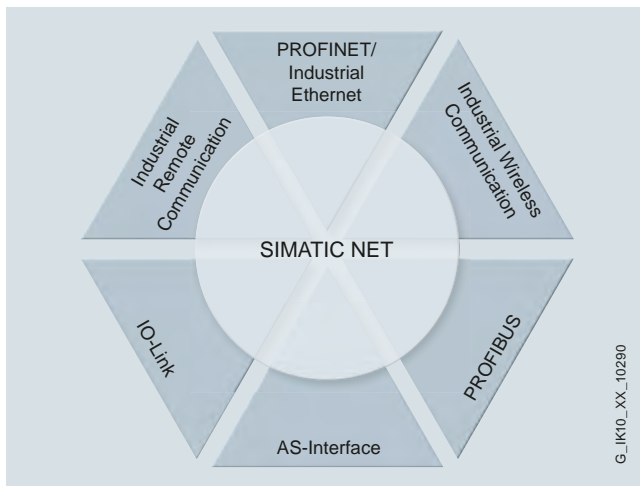

#### **SIMATIC NET** *Industrial communication – the backbone of automation*

Powerful and open communication systems ensure trouble-free communication for automation systems, covering

- data communication or
- process or field communication.

Openness and flexibility of the individual communication systems in different topologies enable linking of a wide variety of systems and their subsequent expansions. By using standardized communication systems, it is possible to connect standardized components from different suppliers without any problems. This ensures maximum protection of investment, as existing networks can be extended without any adverse effects.

**Overview**

**More information**

- Internet:  
[www.siemens.com/industrial-communication](http://www.siemens.com/industrial-communication)

SIMATIC NET provides components for an integrated overall solution beyond network boundaries.

These include:

- Passive network components, e.g. FastConnect cabling systems
- Active network components, e.g. SCALANCE X Industrial Ethernet switches as well as RUGGEDCOM devices for harsh ambient conditions.
- Interfaces for connecting programmable controllers to the communication systems:
  - Integrated interfaces
  - Communications processors
- Components for wireless networks, e.g. Industrial Wireless LAN, SCALANCE W Access Points, and Client Modules (incl. latest Wi-Fi 6 devices) as well as first 5G components
- Components for industrial security, e.g. network security with Industrial Security Appliances SCALANCE S
- Components for Industrial Remote Communication, worldwide access to outlying plants, distant machines, and for mobile applications such as TeleControl.
- Simple remote access for TeleService and remote maintenance with SCALANCE M and SINEMA Remote Connect
- Network transitions, e.g. IE/PB LINK PN IO
- Components for AS interface
- SINEC software family for efficient network management

## SIMATIC Ident

### Introduction

#### Overview

**Let the data journey begin.**

**SIMATIC Ident: Industrial Identification for company-wide data intelligence**

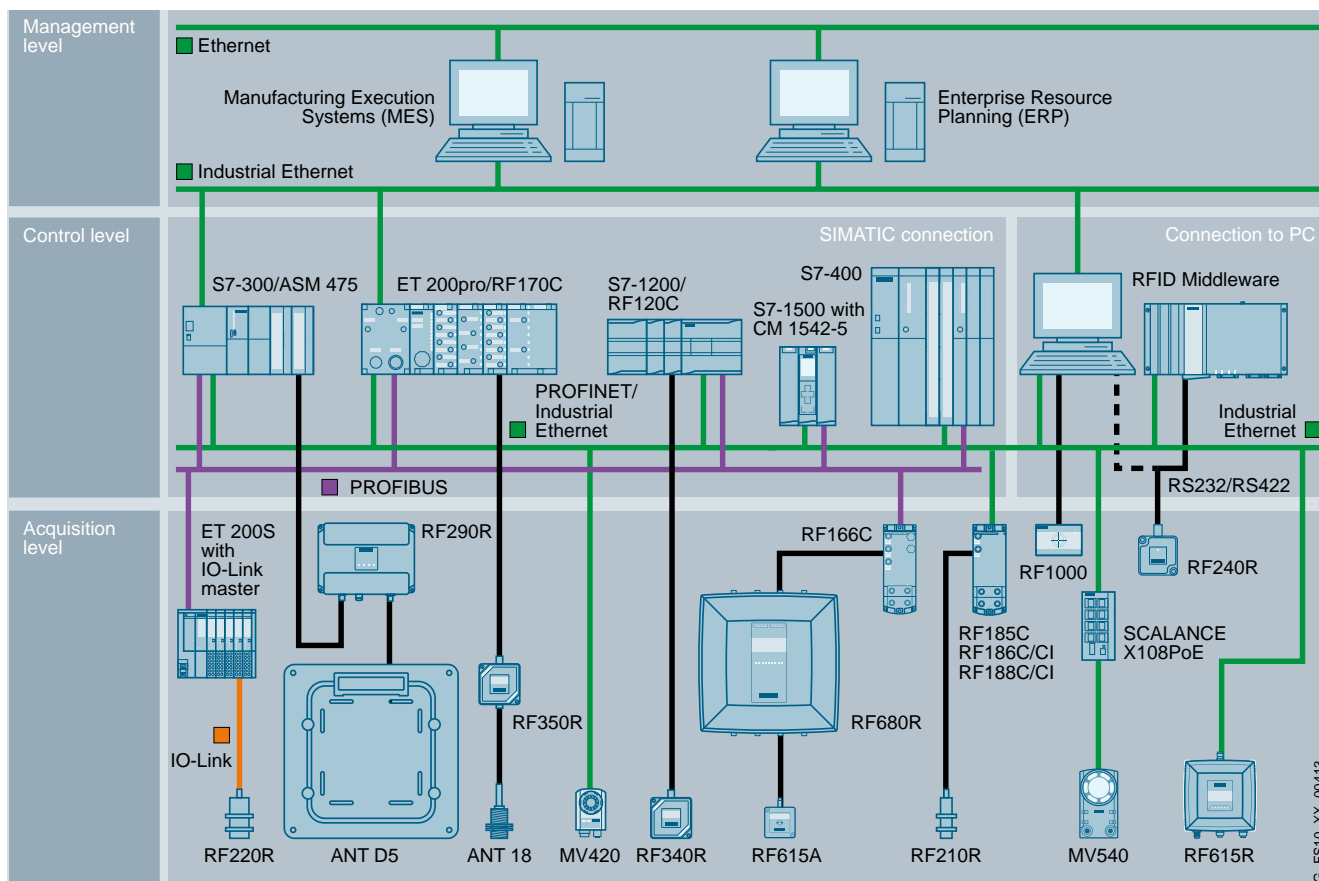

Small batch sizes, a wide range of increasingly complex products, an extremely high degree of customization and complicated processes present major challenges for industry.

For all these challenges Siemens offers SIMATIC Ident, a unique integrated and scalable range of RFID and optical identification systems. These enable virtual data flows from IT systems to be synchronized with the actual flow of goods – throughout the value chain. This provides the necessary clarity and answers the question: When is which product in which location and what is its status? Because data transparency is becoming an increasingly central factor of success, especially in the industrial environment.

With SIMATIC Ident, quality requirements can be reliably met, production can be more flexibly structured, the number of manual operations reduced, and potential sources of faults identified and removed immediately. This means greater efficiency in logistics, material management, production, and service. For competitiveness and for a flexible future.

In addition, SIMATIC Ident supplies production data to cloud applications, e.g. MindSphere – the cloud-based, open IoT operating system from Siemens..

This makes SIMATIC Ident a key technology for the digital enterprise. Our solutions close the gap between the real and the digital world – and open up new added value potential for our customers.

G\_FS10\_XX\_00413

**Overview**
RFID systems

Openness and flexibility of the individual communication systems in different topologies enable linking of a wide variety of systems and their subsequent expansions. By using standardized communication systems, it is possible to connect standardized components from different suppliers without any problems. This ensures maximum protection of investment, as existing networks can be extended without any adverse effects.

Line of sight between the write/read device and the transponder is not necessary. Rugged, compact readers in a high degree of protection with either integrated or external antennas are available for interference-free data communication. Cost-efficient, maintenance-free, passive labels and passive transponders in various designs and with various memory capacities are likewise available, as are powerful antennas.

Optical identification systems

The SIMATIC MV optical readers are powerful, intelligent reading devices for both standard, high-contrast 1D/2D codes as well as difficult-to-read DPM codes applied straight onto the different product surfaces. The optical readers also permit text recognition, object recognition, and inspection of marking quality. The readers of the SIMATIC MV family boast powerful image acquisition capabilities for different resolutions and integrated lighting, allowing them to be used in a range of applications. device configuration via web-based management and system integration via the TIA Portal ensure easy handling.

### SINAMICS drive system

#### Overview

#### The SINAMICS range

- Totally integrated range of drives for any application and every industry
- Wide range of power ratings from 0.05 kW to 85 MW
- Broad functional scope, from simple U/f control through to highly dynamic servo control
- Designed for problem-free interaction with other Siemens automation components
- Shared platform concept with uniform functionality, engineering, commissioning, operation as well as a uniform diagnostics concept and communication mechanisms

Low voltage										Direct voltage	Medium voltage
Standard performance frequency converters		Distributed frequency converters	Industry-specific frequency converters		Servo drives			High performance frequency converters		DC converters	Converters for applications with high outputs

## Overview

**SINAMICS V20 –  
the perfect solution for basic applications**

- Power range from 0.12 kW to 30 kW
- Voltage:
  - 230 V 1 AC: 200 V to 240 V 1 AC (-15 % to +10 %)
  - 400 V 3 AC: 380 V to 480 V 3 AC (-15 % to +10 %)
- Integrated USS and Modbus RTU interfaces
- Integrated braking module for 7.5 kW to 30 kW
- Parameter readout and cloning without power supply
- Integrated connection and application macros
- ECO mode for  $U/f$ ,  $U^2/f$
- Integrated hibernation mode in idle state
- Wireless commissioning, operation and diagnostics via mobile device or laptop thanks to optional SINAMICS V20 Smart Access web server module
- Expansion of 400 V converters with two digital inputs and two digital outputs (relay outputs) thanks to optional SINAMICS V20 I/O Extension Module
- SINAMICS CONNECT 300 for connecting up to eight converters to the MindSphere cloud

**SINAMICS V90 basic servo drive system –  
the performance-optimized, easy-to-operate  
servo drive system**

- SINAMICS V90 and SIMOTICS S-1FL6 form an optimized servo drive system for positioning as well as speed and torque control. Thanks to the optimized design, the system permits enhanced servo performance combined with a high level of ruggedness in a simple, low-cost way.
- SINAMICS V90 is designed for all-purpose servo applications while taking into consideration the challenges for machine builders and system integrators in terms of costs and time-to-market.
- The SINAMICS V90 system can essentially be commissioned effortlessly by means of a simple plug-and-play procedure. The SINAMICS V90 drive offers optimum servo performance, can be integrated quickly into SIMATIC PLCs and provides a high level of reliability. The connection can be made via PROFINET, by means of a pulse-direction interface or via analog inputs/outputs. A seamless drive system can be created by combining the SINAMICS V90 servo drive with our SIMOTICS S-1FL6 servomotor.
- SINAMICS V90 offers internal positioning, positioning with pulse sequence, and speed and torque control.
- With integral auto-tuning in real time and automatic suppression of machine resonances, the system automatically optimizes itself to achieve a highly dynamic performance and smooth operation. In addition, it makes it easier for the pulse sequence input to achieve excellent positioning accuracy on the basis of its high frequency limit of up to 1 MHz.

## Supplementary components

### Drive systems

#### SINAMICS drive system

##### Overview

#### **SINAMICS G120P – the specialist for pumps, fans, and compressors**

- Power range from 0.37 kW to 630 kW
- Automatic switchover to line operation at rated speed
- Variety of functions for pumps, fans and compressors, e. g. energy-saving mode, Pt1000/LG-Ni1000/DIN-Ni1000 temperature sensor interface, cascade connection, programmable time switches, bypass mode, multi-zone control
- Communication: RS 485, USS, Modbus RTU, BACnet MS/TP, FLN P1, PROFINET, EtherNet/IP, PROFIBUS DP
- Integrated in the TIA Portal with SINAMICS Startdrive
- Energy efficient through minimal apparent power losses, automatic adaptation of the motor current to the actual load conditions with ECO mode

##### More information

- Catalog D 35
- Internet:

<http://www.siemens.com/industrymall>

#### **SINAMICS G120X – the infrastructure converter for HVAC/water/wastewater**

- Power range from 0.75 kW to 630 kW
- The specialist for pump, fan and compressor applications
- Thanks to the integrated DC link reactor with a maximum output of 250 kW and optional resistance to harmful gases up to environmental class 3C3, the rugged and dependable design ensures reliable, stable and largely robust operation.
- Variety of functions relevant for pumps, fans and compressors, e.g. deragging or pipe fill mode, automatic restart, flying restart, flux reduction, cascade connection, hibernation mode and real-time clock
- Functions especially for building technology as well as heating/air conditioning/ventilation applications, e.g. four integrated PID controllers, essential service mode, bypass mode and programmable time switches
- Communication: PROFINET, EtherNet/IP, PROFIBUS DP, USS, Modbus RTU, BACnet MS/TP
- SINAMICS CONNECT 300 for connecting up to eight converters to the MindSphere cloud
- Innovative hardware and software functions for saving energy, e.g. for controlling synchronous reluctance drive systems with SIMOTICS reluctance motors

**Overview**

**SINAMICS G120C –  
the compact and versatile frequency converter with  
optimum functionality**

- Compact unit
- Highest power density in its class
- Power range from 0.55 kW to 132 kW
- Easy commissioning and maintenance
- With BOP-2 or IOP-2 operator panel
- Safety Integrated: STO
- Available communication: PROFIBUS DP, USS, Modbus RTU, PROFINET, EtherNet/IP
- Wireless commissioning, operation and diagnostics via mobile device or laptop thanks to optional SINAMICS G120 Smart Access web server module
- SINAMICS CONNECT 300 for connecting up to eight converters to the MindSphere cloud
- Integrated in the TIA Portal with SINAMICS Startdrive

**SINAMICS G120 –  
the modular single-motor drive for low to medium  
power ratings**

- Power range from 0.37 kW to 250 kW
- Safety Integrated: STO, SS1, SBC, SLS, SDI and SSM encoderless
- Communication via PROFIBUS, PROFINET, EtherNet/IP, RS485, USS, Modbus RTU, CANopen, BACnet MS/TP
- Energy efficient thanks to regenerative feedback and low line harmonic distortion
- Parameter copy function for standard commissioning
- Wireless commissioning, operation and diagnostics via mobile device or laptop thanks to optional SINAMICS G120 Smart Access web server module
- SINAMICS CONNECT 300 for connecting up to eight converters to the MindSphere cloud
- Integrated in the TIA Portal with SINAMICS Startdrive

## Supplementary components

### Drive systems

#### SINAMICS drive system

##### Overview

#### **SINAMICS G115D – the distributed wall-mounted or motor-mounted drive system**

Example: SINAMICS G115D distributed drive system, wall-mounted

The SINAMICS G115D distributed drive system meets all the requirements that system manufacturers place on drives for applications in conveyor technology with a focus on the intralogistics and airport industries as well as for simple, horizontal applications in the automotive and food and beverage industries. The converter is supplied with degree of protection up to IP66 and sets standards in terms of efficiency – from the installation phase to commissioning and all the way to handling. The SINAMICS G115D drive system is the first choice for users who want to move conveyed material quickly and efficiently.

Integration via PROFINET communication with PROFIsafe, AS-Interface, EtherNet/IP into a higher-level control system is very easy thanks to full TIA Portal integration, which provides a tool as well as an operating and data management concept. In addition, an optional web server module is available with the web server module SINAMICS G120 Smart Access (SAM) – a WLAN-based web server solution for simple and fast wireless setup with tablets or smartphones during commissioning and for diagnostics.

#### **SINAMICS G120D – the distributed single drive for high-performance solutions**

- Positioning capability
- Power range from 0.75 kW to 7.5 kW
- Energy-efficient due to regenerative feedback and low line harmonic distortion
- Safety Integrated: STO, SS1, SDI, SSM and SLS encoderless
- Thanks to the modular design, electronics stocks are minimal
- Interchangeable memory card
- Communication via PROFIBUS DP, PROFINET, EtherNet/IP
- Integrated in the TIA Portal with SINAMICS Startdrive

## Overview

### **SINAMICS G130/SINAMICS G150 – the universal frequency converters for high-performance single drives**

- Available as a standardized control cabinet or built-in units
- Output range from 75 kW to 800 kW or 2700 kW with parallel switching
- Specially for drives with quadratic and constant load characteristics, medium performance requirements, but no regenerative feedback capability
- Service-friendly thanks to easy-to-access device modules
- Communication via PROFIBUS DP, PROFINET, EtherNet/IP, CANopen
- Energy-efficient due to variable-speed operation
- Sensorless vector control
- Safety Integrated: STO, SBC, SS1 with SBR/SAM; SLS, SSM, SDI, SBT
- Simple commissioning and parameterization via the AOP30 Advanced Operator Panel or PC-supported using the STARTER IOP commissioning tool

## Supplementary components

### Drive systems

#### SINAMICS drive system

##### Overview

### **SINAMICS G180 – the specific converter for the oil & gas, chemical and process industries**

The LOHER DYNAVERT T frequency converter integrated as SINAMICS G180 into the SINAMICS range has been deployed for over forty years for applications where maximum reliability and availability of the drive are of paramount importance.

SINAMICS G180 converters can be supplied for standard voltages 400, 500 and 690 V in the power range up to 6.6 MW. They are available as a compact unit, a cabinet system or a cabinet unit, with air or liquid cooling, for operation with synchronous and asynchronous motors.

- A wide range of add-on electrical components allow the drive system to be optimized for specific requirements
- Simplified configuring and shortened commissioning due to predefined interfaces and pre-parameterized factory settings
- Sensorless vector control without additional speed actual value encoder (encoder evaluation units are available if required)
- Can be flexibly integrated in all automation concepts
- Communication: Apart from the standard converter interface (compliant with Namur NE37), PROFINET, PROFIBUS DP, Modbus RTU, Modbus TCP, CANopen can also be used optionally

Optionally available peripheral boards can be selected to add the following inputs/outputs to the converter:

- Digital and analog inputs and outputs
- 2 PTC thermistor inputs for ATEX-certified motor temperature monitoring for motors in hazardous zones (prewarning/trip)

  - <http://www.siemens.com/industrymall>

**Overview**
**SINAMICS S210 –  
 the single-axis servo drive for highly dynamic applications**

The new servo drive system comprises a SINAMICS S210 servo converter, a SIMOTICS S-1FK2 servomotor and a matching One Cable Connection (OCC) for connecting the motor to the converter. The SINAMICS S210 is a single-axis AC/AC servo converter system with high performance and dynamic response for mid-range Motion Control applications.

SINAMICS S210 servo converters are available for line voltages of 200 ... 240 V 1 AC (1 AC series) and 200 ... 480 V 3 AC (3 AC series), and the SIMOTICS S-1FK2 servomotors for a torque range from 0.16 ... 3.2 kW with shaft heights of 20 mm, 30 mm and 40 mm in High Dynamic (HD) and Compact (CT) versions.

## Supplementary components

### Drive systems

#### SINAMICS drive system

##### Overview

**SINAMICS S120 – the flexible, modular drive system for demanding single-axis and multi-axis applications from the low-end to the high-end performance range**

- Modular drive system for single-axis and multi-axis applications in all areas of machine and plant manufacturing
- Servo/vector control, U/f control
- Power range from 0.12 kW to 5700 kW
- Various types of construction for different application areas
- Highly flexible due to, for example, modular system architecture, different cooling methods, support for a wide range of motors/encoders, easy expansion
- High degree of scalability with regard to performance, number of axes, functionality
- Integrated safety functions
- Comprehensive motion control functionality
- High availability and efficiency, even in unstable networks
- Automatic parameterization and easy drive commissioning/optimization

##### More information

  - <http://www.siemens.com/industrymall>

**Overview**
**SINAMICS S150 –  
 the sophisticated drive solution for single drives in the  
 medium to top performance ranges**

- Particularly suitable for applications with high requirements regarding precision and dynamic response in the mid to upper performance range, as well as for frequent braking cycles with high braking energies and four-quadrant operation
- Ready-to-operate control cabinet
- Power range from 75 kW to 1200 kW
- Straightforward configuring and commissioning provided by the SIZER for Siemens Drives and STARTER engineering tools
- High availability and efficiency, even in unstable networks
- Efficient operation through standard energy recovery
- Line-friendly operation thanks to Clean Power Filter (line feedback < 1 %)
- Reactive power compensation possible
- Equipped as standard with PROFIBUS DP interface for connection to higher-level controls

More information

**SINAMICS DCP –  
 the compact DC/DC converter for smart applications**

With the SINAMICS DCP, Siemens is offering a new generation of bidirectional DC/DC converters. In these, Siemens is combining its expertise in DC technology with the advantages of the well-proven SINAMICS family. SINAMICS DCP is setting new standards when it comes to quality, reliability and technical functionality.

The SINAMICS DCP is suitable for industrial and multi-generator applications in the renewable energy sector. As a bidirectional boost and buck converter with scalable power rating, it combines multiple functions in one single device. With variable voltage levels, current can flow in both directions. This makes the SINAMICS DCP ideal for charging and discharging batteries and supercapacitors.

Special features

- Bidirectional boost and buck converter in one unit
- High efficiency
- High switching frequency
- Compact: The reactor, power unit and control station form one unit

Software feature

- Voltage and current regulation
- 3 overload profiles
- Stable voltage in the DC link
- Voltage control
- Overload capability
- Temperature-controlled fans (only for DCP 120 kW)
- Incorporated MPPT (Maximum Power Point Tracker)
- No-load voltage limitation of a PV field
- Battery charging characteristic
- Communications interfaces: EtherNet/IP, Modbus TCP, PROFIBUS, PROFINET

The functionality can be expanded with other SINAMICS components such as Active Line Modules.

## Supplementary components

### Drive systems

#### SINAMICS drive system

##### Overview

#### **SINAMICS DCM – the scalable drive system for basic and sophisticated DC drive applications**

- Power range 6 kW to 30 MW
- For machinery and plants in industry
  - Steel/aluminum
  - Plastic
  - Printing
  - Paper
  - Hoisting gear
  - Mining
  - Oil and gas
  - Static excitation units
  - Heating applications
  - Magnet applications
- New systems and retrofit business
- Communication as standard via PROFIBUS DP, RS485 or USS, and optionally via PROFINET, EtherNet/IP or Modbus RTU
- Safety Integrated: STO, SS1 acc. to IEC 61508 SIL 3 as well as EN ISO 13849-1 PL e
- Control unit variance
- Field power supply in line with requirements
- Electronics power supply for connection to 24 V DC
- Power unit isolated to ground (isolated voltage sensing)
- Free function blocks and Drive Control Chart (DCC)
- Expandable functionality using SINAMICS components
- Single-phase operation possible
- Coated modules and nickel-plated copper busbars
- Wide temperature range
- High overload capability
- Low torque ripple at low speeds
- Very compact design

##### More information

#### **SINAMICS PERFECT HARMONY GH180**

##### Core Applications

- Single and multi-motor applications (sync transfer) such as pumps, fans, compressors, mills, crushers, conveyor systems, retrofit projects, etc.

##### Product Highlights

- Integrated and optimized drive and transformer design – Minimized plant footprint, combined cooling system and plug-and-play drive system setup.
- Over 16,000 drives sold worldwide – The most trusted and proven drive on the market today with installations in every major process industry.
- Extremely motor-friendly – Capable of being configured with virtually any motor thanks to an almost sinusoidal output voltage
- Cell bypass, cell redundancy and blower redundancy – Maximize process availability thanks to its Advanced Cell Bypass feature for maintaining a balanced output voltage without torque or speed reductions.

##### More information

- Internet:
  - <http://www.siemens.com/sinamics-perfect-harmony-gh180>

**Overview**
**SINAMICS PERFECT HARMONY GH150**

**Core Applications**

- Single motor applications such as pumps, fans, compressors, conveyor systems (uphill) and retrofit projects.

**Product Highlights**

- Transformer flexibility – Able to utilize separate dry type or oil-filled standard converter transformers or high primary voltages or number of pulses
- Flexible cooling arrangement perfect for any installation requirements – Water or air cooled design, duct air outside, use integral or separate air-to-air or integral air-to-water heat exchanger, stand alone control cabinet.
- Extremely motor-friendly – Capable of being configured with virtually any motor thanks to an almost sinusoidal output voltage up to 13.8 kV.
- Cell bypass and cell redundancy – Maximize process availability thanks to a high speed cell bypass feature for maintaining a balanced output voltage without torque or speed reduction.

**More information**

- Internet: <http://www.siemens.com/sinamics-perfect-harmony-gh150>

**SINAMICS GM150**

**Core Applications**

- Single-motor applications such as basic pump, fan and compressors applications, and mine hoists, especially in marine and offshore applications.

**Product Highlights**

- Easy to maintain and operate safely and reliably – Fuseless, tested arc proof design.
- Optimized footprint and design – Compact, rugged; saves costs and space.
- Common housing / system for IGBT and IGCT cooling principles – Freely selected based on customer needs to meet requirements.
- Transformer flexibility – Able to utilize dry type or oil-filled standard converter transformers or high primary voltages or number of pulses.

**More information**

- Internet: <http://www.siemens.com/sinamics-gm150>

## Supplementary components

### Drive systems

#### SINAMICS drive system

##### Overview

##### **SINAMICS GL150**

##### Core Applications

- Mainly used in large high-power and high-speed applications such as pumps, fans, compressors, main marine propulsion, extruders and rolling mills, boiler feed pumps, wire rod mills, starting generators, pump storage and starting applications (e.g., blast furnaces).

##### Product Highlights

- Compared to VSI drives, most cost-competitive solution for large power ratings – Power density per M2.
- Mature and proven LCI topology – With over 40 years of experience and large installed base.
- Rugged and compact design for complex high-power applications – Fault tolerant, high MTBF, utilized in marine, starting and high-power applications, most rugged thyristor technology. Regenerative capability for energy-saving drive system solutions.

##### More information

- Internet: <http://www.siemens.com/sinamics-gl150>

##### **SINAMICS SH150**

##### Core Applications

- Special applications such as shaft generators on ships, onshore power supply for ships and offshore platforms, regenerating test stands, 50/60 Hz grid coupling, VAR compensation by AFE-drives.

##### Product Highlights

- Extremely motor- and line-friendly – Motors of literally any type - old or new - can be operated with standard winding insulation without additional stress. Transformer-less connection to local grids on request.
- Active Front End (AFE) for grid applications – Dedicated U/f droop control to create an island grid or to co-supply together with other generators. Additionally supply dynamic reactive power for voltage stabilization (STATCOM).
- Active Front End (AFE) for regenerating motors – Simultaneous 2Q or 4Q operation and grid VAR compensation with AFE and motor-side inverter. Also for rotating generators.
- Robust & reliable – Cell redundancy with automatic cell bypass for increased availability. Marine classification for ship and offshore applications.

##### More information

- Internet: <http://www.siemens.com/sinamics-sh150>

**Overview**
**SINAMICS SM150**

**Core Applications**

- Single- and multi-motor applications such as mills, crushers, conveyor belts, test stands, rolling mills and mine hoists.

**Product Highlights**

- 4-quadrant operation – Regenerative capability for energy-saving drive system solutions.
- Single- and multi-motor capability – Utilizing a common DC link.
- Optimized footprint and design – Compact, rugged; saves costs and space.
- High dynamic performance

**More information**

- Internet: <http://www.siemens.com/sinamics-sm150>

**SINAMICS SL150**

**Core Applications**

- Perfect for complex high-torque and low-speed applications such as rolling mills, mine hoists, mine winders, ore and cement crushers, excavators and conveyors

**Product Highlights**

- Fewest drive components for any given power rating - Low component variety to reduce capital investment and associated costs for storage and logistics.
- Compact and rugged design for extreme environments - High altitudes, temperatures and air quality, plus service friendliness for remote areas.
- Optimal configuration and operation - Integrated test routines, feedback and self-diagnostics, including thyristors, improved commissioning and tuning.
- Use of standard HV cable due to the typical low switching speed of thyristors (no screened or armored cables required).

**More information**

- Internet: <http://www.siemens.com/sinamics-sl150>

## Supplementary Components

### Overvoltage protection

#### SICROWBAR overvoltage protection

##### Overview

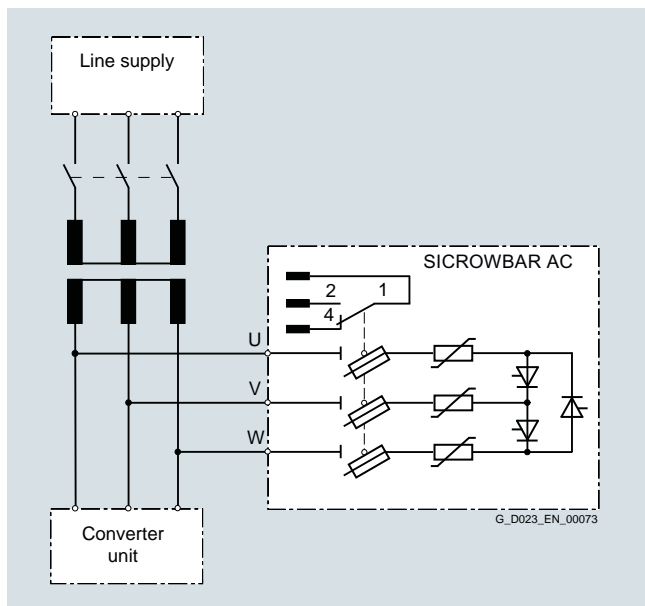

##### SICROWBAR AC

**SICROWBAR AC** is used to protect power semiconductors in converters (thyristors and diodes) against overvoltage that occurs between the phases of a three-phase network. The range of applications is not restricted to protecting DC drive converters, but also comprises infeed/regenerative feedback units of the AC drive technology that are equipped with thyristors.

Overvoltage that occurs on the AC side of converters is mainly caused by switching operations when disconnecting from the line supply at the transformer's primary side. This applies both to operational switching operations (shutdown at no-load) as well as in the case of a fault (shutdown under load).

The overvoltage protection is mainly used in the following configuration:

##### More information

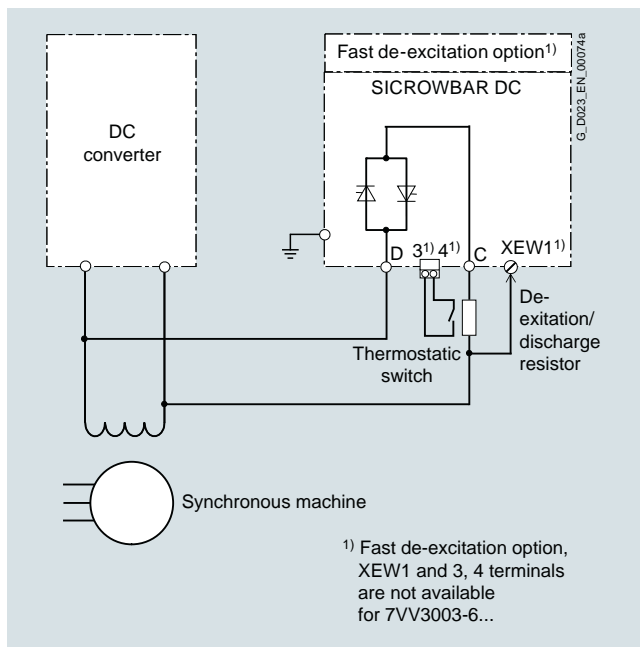

- Catalog D 23.1
- Internet:  
<http://www.siemens.com/sinamics-dcm>  
<http://www.siemens.com/industrymall>

##### SICROWBAR DC

**SICROWBAR DC** protects coils and converters against overvoltage conditions when they are used to supply large inductances, for instance, the excitation coils of synchronous machine motors, DC machine motors or hoisting solenoids. An appropriate de-excitation/discharge resistor must be provided. A thermostatic switch can be ordered as an option for the resistor from the manufacturer.

The fast de-excitation option G11 (module 7VV3003-7FG00) makes it possible to initiate fast de-excitation, triggered by a higher-level signal, for the 7VV3003-5... units.

#### Overview

#### SIRIUS relays – one range for every application

Our range of SIRIUS relays offers you everything you need for a motor feeder application. Easy and convenient – and all from one source. Whether you require compact timing relays or reliable monitoring relays, particularly narrow coupling relays, plug-in relays, low-noise power relays or signal converters – it will not be easy to find a more complete and comprehensive range of relays anywhere. Quite simply, there is one for every possible need. What is more: all SIRIUS relays are particularly easy to use. So take a closer look at our range and convince yourself – you will be surprised.

#### SIRIUS 3UG, 3RR, 3RN, 3RS monitoring relays Reliable monitoring and protection

SIRIUS relays from Siemens offer maximum protection for machines and plants, and they communicate with the control level thanks to IO-Link. The SIRIUS relays for IO-Link reliably monitor network quality, power values, voltages, speeds and temperatures and at the same time they open up an even wider field of applications for you.

**3UG monitoring relays** are used to monitor electric and non-electric variables which cannot (or should not) be directly recorded by an automation system.

- Monitoring of networks for overvoltage or undervoltage, direction of rotation, or asymmetry
- Monitoring of loads using Cos-phi or current measurement
- Monitoring for insulation faults and fault currents
- Monitoring of levels or speeds of rotation

**The 3RR current monitoring relays** are suitable not only for monitoring motors or other loads, but are also well suited to monitoring multiphase currents of the entire plant or the driven process. In this way, for example, an idling pump or an overload is promptly detected and reported in good time. The 3RR2 monitoring relays can be set up individually or integrated directly into the load feeder.

**3RN thermistor motor protection devices** monitor the winding temperature of motors fitted with a PTC sensor.

- Compliance with the ATEX directive 2014/34/EC through conformity with EN 50495 and EN 60947-8 standards.
- Compliance with the safety requirements for PL c according to ISO 13849 or SIL 1 according to IEC 61508
- Fast fault diagnostics through display of open-circuit and short-circuit.
- Solid-state compatible output due to hard gold-plated contacts.

#### Note:

The 3RN1 relays have been replaced by the 3RN2 thermistor motor protection devices.

The **3RS2 temperature monitoring relays** can be used to measure temperatures in solid, liquid and gas media. The temperature is acquired by means of sensors in the medium, evaluated by the device and monitored for overshoot, under-shoot or location within a specified range (window function).

The family comprises an analog multi-function device which can be set using DIP switches and potentiometers, and digital devices which can be parameterized via an intuitive LCD display. The digital device is also available as a version with IO-Link.

All 3RS26 digital devices, including the 3RS28 versions with IO-Link, have safety certification according to IEC 61508/62061 or ISO 13849 up to SIL 1/PL c as well as EN 14597 for heat generating systems and EN 50156 for burners.

Furthermore, the functionality of the 3RS26/3RS28 digital devices can be expanded using a 3RS29 sensor expansion module with two additional resistance sensors, e.g. for monitoring three-phase motors or transformers.

The 3RS29 sensor expansion module also features an additional relay for outputting the sensor status, and an additional analog input 4 to 20 mA. This analog input allows ATEX applications to be implemented when using an intrinsically safe temperature sensor or other appropriate type of protection. The 3RS29 is connected wirelessly via a SIL 1-certified infrared communication interface.

#### Notes:

The SIRIUS 3RS2 temperature monitoring relays fully replace the 3RS1 predecessor.

#### SIRIUS speaks IO-Link

With the SIRIUS monitoring relay for IO-Link you are opting for maximum flexibility: As well as the autonomous monitoring function that is still available, measured values and data can also be transferred directly to the controller via IO-Link. Parameters can also be assigned locally or via IO-Link. This means that the SIRIUS relays for IO-Link are fully integrated into Totally Integrated Automation, our open system architecture for integrated automation. You also profit from significantly simplified device replacement – thanks to data matching and automatic re-parameterization via a parameter server.

## Supplementary components

### Timing, coupling and monitoring relays

#### SIRIUS relays

##### Overview

##### **SIRIUS 3RP, 7PV timing relays**

Electronic timing relays are used for all delayed switching operations in open-loop control, starting, protection and closed-loop control circuits.

Thanks to their sophisticated and compact design, the 3RP timing relays are ideal timer modules for control cabinet, switchgear and controller manufacturers from the industry. Due to their narrower design, the 7PV timing relays are particularly suitable for use in heating, ventilation and air-conditioning systems and compressors.

##### **SIRIUS 3RA28 function modules and solid-state time-delayed auxiliary switch blocks**

The 3RA281. function modules permit the construction of starters and contactor combinations for direct and star-delta starting. They include the essential control functions that are needed for the respective feeder – for example, timing and electrical interlocking functions. Function modules that function as timing relays can easily and quickly be fitted to SIRIUS contactors – without any significant wiring effort. They permit both ON-delay and OFF-delay switching of contactors.

The 3RA283. solid-state time-delayed auxiliary switch blocks can be connected to contactors and are designed for contactor coil voltages in the 24 to 240 V AC/DC wide voltage range. Auxiliary switches for control and alarm signals are used specially for switching the smallest signals for electronics applications. They are used, for example, for allowing a pump or fan to run on, in a similar way to an OFF-delay time relay or for the delayed activation of a gate drive. Simply by snapping and locking it into place, both the electrical and mechanical connection is made. To attenuate switching overvoltages of the contactor coil, a varistor is integrated in the time-delayed auxiliary switch.

##### **SIRIUS 3RQt to 3RQ3, 3TG10 and LZS coupling relays**

The SIRIUS coupling relays are ideally suitable for coupling to and from controllers and are thus the perfect partner for SIMATIC controllers. They can be used for electrical isolation, for voltage conversion, for signal amplification and for overvoltage and EMC protection.

The force-guided **3RQ1 coupling relays** (up to SIL 3 / PL e) are available in widths of 17.5 mm and 22.5 mm. Due to the forced guidance according to IEC 60947-5-1 (IEC 61810-3), the contacts of the installed relays are mechanically connected to each other in such a way that NO and NC contacts are never closed simultaneously. As a result, an opening failure can be reliably detected and maximum safety can be ensured. 3RQ1 coupling relays serve to reliably couple safe controllers, also for safety applications up to SIL 3 / PL e.

The **3RQ2 coupling relays** for universal use replace the 3RS18 coupling relays and set standards: as they have the same terminal assignment as the previous model the existing products can simply be changed over. The reduced variety of components simplifies product selection and standardization. With a wide voltage range from 24 V to 240 V AC/DC they are the star attraction on the coupler market. In this series, we offer you devices in the field-proven 22.5 mm industrial enclosure with one, two or three changeover contacts and with screw-type or spring-loaded connections (push-in technology). The versions with hard gold-plated contacts ensure an especially high contact reliability even at low currents. Thanks to the well-proven industrial enclosure, you can enjoy the benefits of user-friendly connection systems with permanent wiring, just the same as with our timing relays.

As the successors to the familiar 3TX7 coupling relays, the **3RQ3 coupling relays** are now available in a new uniform enclosure design. With their narrow width of 6.2 mm and low installation depth/height, they are ideal for space-optimized use in control cabinets with short gaps between tiers, and in flat control boxes. All versions are available with screw-type or spring-loaded terminals (push-in technology). Wiring time is reduced because conductors are inserted and clamped from the front.

3RQ3 coupling relays are available as:

- Coupling relay with relay output (not plug-in)
- Coupling relay with plug-in relay
- Coupling relay with semiconductor output (not plug-in)

**3TG10 power relays/miniature contactors** prove their worth wherever small, low-noise relays or contactors are required at a reasonable price. This makes them ideal for simple controllers, especially for use in large-series manufactured devices and controllers. For applications that do not require an overload relay and need only one auxiliary switch – and which therefore need more switching power, higher switching voltage, and a longer service life.

**LZS coupling relays with plug-in relays** are available as complete devices or as individual modules for self-assembly or spare parts requirements. This series is divided into three designs: RT, PT, and MT.

- Can be used for contact multiplication, adaptation of potential, or for switching small loads.
- Max. 4 changeover contacts in one device:
  - Wide-voltage versions with or without hard gold-plated contacts.
  - With screw-type or push-in spring-loaded terminals.

##### **SIRIUS 3RS70 signal converters**

The 3RS70 (previously 3RS17) signal converters (also innovated) share the enclosure concept with the 3RQ3 coupling relays. They are used mainly for the electrical isolation and conversion of analog signals. Sensors/actuators and controllers usually have different potentials and therefore require electrical isolation in the signal circuit. This is done either in the controller or by means of signal converters.

The conversion of one signal into another is required if, for example, a voltage signal has to be converted into a current signal for transmission over a longer distance, or if the output of a sensor and the input of a controller do not match.

The implemented frequency outputs offer another application. The input signal is converted to a proportional frequency here. This means that analog signals can be processed with digital inputs.

This is important if a controller offers no possibility for an analog input, or if all analog inputs are already occupied, for example, in the case of retrofits.

## Supplementary components

### Measuring systems, Automation systems

#### Motion Control Encoder measuring systems

##### Overview

- Measuring systems are encoders for recording distances, angles of rotation, and speeds.
- Can be used on machines in various industries, such as production machines, handling equipment, machine tools, and special-purpose machines.
- Can be connected to SIMATIC, SINAMICS, SINUMERIK and SIMOTION
- Couplings, mounting material, connectors, and completely pre-assembled signal cables are available as accessories.
- Built-on encoders are available as incremental or absolute encoders.
- Incremental encoders:
  - Interfaces RS422 (TTL), 1 V<sub>pp</sub> and HTL
  - Operating voltage 5 V DC or 10 V to 30 V DC

- Absolute encoders:
  - All absolute encoders are available in single-turn and multiturn versions.
  - Synchronous serial interface (SSI) or connection for EnDat, PROFIBUS DP, PROFINET IO with RT/IRT and DRIVE-CLiQ.
  - Encoders with PROFIBUS DP support Class 1 ... 3 profiles as well as isochronous mode, slave-to-slave communication, and application-specific supplementary functions. They are parameterizable.
  - Encoders with PROFINET IO support Class 1 ... 4 profiles.

All measuring systems are available in synchro flange or clamp flange versions. The absolute encoders are available in a hollow shaft design.

#### SIMOTION Motion Control System

##### Overview

##### **SIMOTION system**

The well-proven, modular and scalable SIMOTION Motion Control System with high-end functions for motion control is the ideal solution for applications in mechanical engineering, in which modularity, maximum precision and speed are vital.

SIMOTION ensures a high level of flexibility at low engineering outlay with the modular technology object approach. Object-oriented programming and a programming model with units and libraries enable the creation of reusable software modules and the effective implementation of large quantity structures.

SIMOTION simplifies the development and integration of standard modules in an executable project with libraries for industry-specific applications and the SIMOTION easyProject project generator.

## Supplementary components

### Automation systems

#### SIMOTION Motion Control System

##### Overview

The SIMOTION system is made up of three components:

##### Engineering system

The SCOUT engineering system enables Motion Control, PLC and technology functions to be incorporated in one comprehensive, integrated system and provides all the necessary tools:

From programming and parameterization through testing and commissioning, to diagnostics.

SCOUT can be used in SIMATIC STEP 7, either with standardized data management and configuring procedures, or as a stand-alone engineering tool (SCOUT Stand-Alone). SCOUT TIA (SIMOTION in the TIA Portal) is available as an optional package for TIA Portal V13 and above and is included in the scope of supply of SCOUT.

The following options, for example, are available in the engineering system for programming:

- Graphic programming with Motion Control Chart (MCC)
- Ladder Diagram (LAD)/Function Block Diagram (FBD)
- High-level language Structured Text (ST), including object-oriented programming

##### Runtime system

The runtime system offers a high-performance execution system for cyclic and sequential tasks. The runtime software modules make the different PLC, Motion Control and technology functions available. By selecting the appropriate modules, the overall functionality of the system can be flexibly adapted to the machine.

##### Hardware platforms

The hardware platforms are the basis of the SIMOTION Motion Control System. The application created with the engineering system and the associated runtime software modules can be implemented on different hardware platforms. The scalable SIMOTION hardware supports centralized, distributed and mixed topologies for all machine designs with up to 128 axes per controller.

##### **SIMOTION D – Compact and integrated in the drive**

- The complete machine automation with drive control, PLC, Motion Control and technology functionality in one compact unit of SINAMICS S120 design.
- Particularly fast response
- Versatile networking options via PROFINET, PROFIBUS or Ethernet
- Scalable since multiple performance versions available
- SIMOTION D is available in two configurations:
  - As a single-axis system SIMOTION D410-2 with multi-axis option (blocksize configuration). The Control Units are available in D410-2 DP and D410-2 DP/PN versions and are snapped onto the SINAMICS S120 PM240-2 Power Modules in blocksize format.
  - As a multi-axis system SIMOTION D4x5-2 in four performance variants for as many as 128 axes (booksize format)
- Ideal for:
  - Compact machines
  - Distributed automation concepts, e.g. on machines with a large number of axes
  - Modular machines
  - Time-critical demands on the axis couplings

##### **SIMOTION P – Open for other tasks**

- This PC-based, open Motion Control System is available in two versions:
  - SIMOTION P320-4E for embedded PC solutions running on the Windows Embedded Standard 7 operating system
  - SIMOTION P320-4S for high-performance applications running on the Windows 7 Ultimate operating system
- Control, Motion Control, and HMI functions are executed together with standard PC applications on one platform. The advantage for the user:
  - Using the PC platform and the Microsoft Windows operating system, with a real-time expansion for SIMOTION – the advantages of both worlds are combined in SIMOTION P:
    - Openness thanks to the Windows operating system
    - Real-time capability thanks to the SIMOTION operating system
- Ideal for:
  - Applications requiring an open PC world
  - Applications with particularly high performance requirements, e.g. hydraulics applications
  - Applications requiring control and visualization on one hardware system
  - Extensive data storage, evaluation and logging

##### **SIMOTION C – Modularity and flexibility**

- Controllers in SIMATIC S7-300-design
- 2 versions, optionally with PROFINET interface or with integrated drive interfaces for analog and stepper drives
- Onboard inputs/outputs expandable using I/O modules from the SIMATIC S7-300 range of products
- With integrated isochronous PROFIBUS interfaces
- Ideal for:
  - Highest possible level of freedom for drive selection
  - Broad range of process signals
  - Retrofit applications by means of integrated analog interfaces

## Overview

### SINUMERIK 828D – the powerhouse among the compact CNCs

With their unique CNC performance, SINUMERIK 828D CNCs set productivity benchmarks when it comes to milling and turning on standard machines as well as functions for easy automation of grinding machines.

### Rugged and maintenance-free

Their die-cast magnesium operator panel fronts, the panel-based CNC design with minimal interfaces, as well as a high degree of protection, make SINUMERIK 828D CNCs reliable partners even in harsh environments.

Designed without a fan or hard disk, with NVRAM memory technology and no back-up battery, SINUMERIK 828D CNCs are completely maintenance-free.

### User-friendly

The SINUMERIK 828D CNCs are very easy to operate thanks to a full QWERTY CNC keyboard with short-stroke keys and a high-resolution 10.4" TFT color display or 15.6" touch display.

CNC data are quickly and easily transferred via USB, CF card (for 10.4") and RJ45 interfaces on the operator panel front.

### Optimum scalability

Based on the three CNC performance versions SW24x, SW26x and SW28x of the SINUMERIK 828D CNCs, favorably-priced compact as well as more complex machines with additional axes/spindles and 2 machining channels can be implemented.

### Preconfigured technology for use in standard turning and milling machines

SINUMERIK 828D is perfectly adapted for use in standard machines and provides optimum support for turning and milling technologies. With two preconfigured system software variants for machining technology, the SINUMERIK 828D CNC systems are ready for use in turning and milling machines on dispatch from the factory.

### The ideal basis for implementing a compact grinding machine

The G-Tech technology variant provides grinding machine manufacturers with a perfect platform for designing grinding machines – both cylindrical and surface grinding machines are supported.

Since grinding machine manufacturers want to fully incorporate their specific process know-how so that it is even reflected in the operating philosophy of the CNC, the G-Tech variant of the SINUMERIK 828D offers a number of sophisticated grinding and dressing cycles. Additionally, SINUMERIK Run MyScreens provides manufacturers with the option of designing their own HMI.

## Supplementary components

Automation systems

SINUMERIK CNC automation systems

### SINUMERIK 840D sl

#### Overview

#### **SINUMERIK 840D sl – ultimate performance in the premium class**

The SINUMERIK 840D sl CNC offers modularity, openness, flexibility and uniform structures for operation, programming, and visualization. It provides a system platform with trend-setting functions for almost all technologies.

Integrated into the SINAMICS S120 drive system and complemented by the SIMATIC S7-300 automation system, the SINUMERIK 840D sl forms a complete digital system that is ideally suited for the mid- to upper-performance range.

The SINUMERIK 840D sl is characterized by:

- A high degree of flexibility
- Excellent dynamic response and precision
- Optimum integration into networks

#### **Benefits**

- Outstanding performance and flexibility for multi-axis systems of average to high complexity thanks to scalable hardware and software
- Universal openness of the user interface, the PLC and the NCK area to allow integration of your specialist know-how
- Integrated safety functions for man and machine: SINUMERIK Safety Integrated
- Comprehensive range of products for integrating machine tools into communication, engineering and production processes: SINUMERIK Integrate

#### **Application**

The SINUMERIK 840D sl can be deployed around the world for the following technologies:

- Turning
- Drilling
- Milling
- Grinding
- Laser machining
- Nibbling
- Punching
- Tool and mold making
- High-speed cutting applications
- Woodworking and glass processing
- Handling
- Transfer lines
- Rotary indexing machines
- Mass production
- JobShop production

The SINUMERIK 840DE sl is available as an export version for use in countries where approval is required.

## Overview

### **SINUMERIK ONE: the next level CNC in the premium class**

SINUMERIK ONE – the digital native CNC with the pioneering CNC system for highly productive machine tools. Thanks to its digital twin, the key element in digital transformation, SINUMERIK ONE helps to simulate and test work processes completely virtually - saving time, resources and costs.

### **Boosting productivity with SINUMERIK and digitalization solutions**

Shorter product introduction times and increasing individualization of products influence production with machine tools. High productivity is more important than ever for machine manufacturers and users. The key factor is optimum interaction of automation and CNC solutions and sophisticated technology – and the effective integration of digital solutions. This applies to all areas: from design and construction of a machine to operation and service. SINUMERIK connects automation, competence in technology, and digitalization to form a single solution offering for more productivity. SINUMERIK CNC systems are the optimum solution for the production of individual parts or series production, for simple or complex workpieces.

## Benefits

Merging the real world with the virtual world

The new SINUMERIK ONE is specifically designed for smart manufacturing.

- The digital twin is an integral part of the CNC system; virtual and real CNC merge and complement each other
- Significant reduction in product development and market launch times thanks to the **digital first** strategy
- Improved networking and data communication capabilities
- Significant reduction in the duration of real commissioning thanks to virtual commissioning preparation
- Significantly increased CNC performance
- Significantly shorter downtimes and complete integration into the TIA Portal thanks to the integrated SIMATIC S7-1500F PLC

This means that the SINUMERIK ONE can be seamlessly integrated into digital solutions and workflows.

SINUMERIK CNC automation systems

### SINUMERIK MC

#### Overview

#### **SINUMERIK MC – the universal and open CNC which can be easily integrated into existing machine solutions**

Thanks to its integrated SINUMERIK CNC, SIMATIC controller and Windows 10 operating system, the SINUMERIK MC is the ideal solution for machine tools with customized user interfaces.

The areas of application range from machining wood, stone and glass and adhesive application to simple grinding applications and special machine tool technologies such as sheet metal cutting, laser and water jet cutting, as well as additive manufacturing.

- The integrated Windows operating system allows the user interface to be designed simply and matched to customer requirements. The **open operating concept** and extensive interfaces make the SINUMERIK MC an integrated and open control system.
- The proven SINUMERIK CNC technology enables maximum precision in motion control and – thanks to **G code programming** – freedom and flexibility in machine control.
- Shorter response times of the latest SIMATIC S7-1500F PLC enable **increased processing speed** and significantly boost automation performance.
- Symbolic programming, modern programming languages and extensive toolboxes for implementing standard applications make **engineering in the TIA Portal** simple and efficient.
- SINUMERIK MC offers **Safety Integrated** as a uniform Siemens industry safety standard and implements the multi-level defense-in-depth concept for IT security.
- **Attractive option packages** offer the best possible adaptation to individual machine requirements.

#### Overview

MOTION-CONNECT includes connection systems and components which are optimally tailored to individual areas of application. MOTION-CONNECT cables feature state-of-the-art connection systems to ensure fast, reliable connection of different components, and offer maximum quality as well as system-tested reliability.

MOTION-CONNECT power cable and signal cable

MOTION-CONNECT cables are available as fully-assembled power and signal cables or sold by the meter. The pre-assembled cables can be ordered in length units of 10 cm (3.94 in) and can be extended, if necessary.

Whatever your machine requirements, MOTION-CONNECT offers the solution.

- **Robust, high-performance and easy to use** thanks to pre-assembled cables with a rugged metal connector in degree of protection IP67 and reliable SPEED-CONNECT quick-release lock
- **Outstanding and proven quality** achieved by consistent quality management and system-tested cables

Cables are available in two different qualities – MOTION-CONNECT 500 and MOTION-CONNECT 800PLUS.

MOTION-CONNECT 500	MOTION-CONNECT 800PLUS
<ul style="list-style-type: none"> <li>• Cost-effective solution for predominantly fixed installation</li> <li>• Tested for travel distances up to 5 m (16.4 ft)</li> </ul>	<ul style="list-style-type: none"> <li>• Meets requirements for use in cable carriers</li> <li>• Oil-resistant</li> <li>• Tested for travel distances of up to 50 m (164 ft)</li> </ul>

### SITRAIN – Digital Industry Academy

#### Introduction

#### **Time for learning**

Today's demands on our knowledge are every bit as diverse and dynamic as our profession itself. We keep learning more and longer – for our work, for our career and for ourselves. Advancing digitalization entails new topics and is also changing the way we absorb and process knowledge. SITRAIN – Digital Industry Academy offers the right source of knowledge here, which we can use anytime in just the way we need it. The time for learning is now.

#### Knowledge for every need

With its three areas – SITRAIN open, SITRAIN access and SITRAIN personal – SITRAIN offers you an all-encompassing range of options for an ongoing expansion of your knowledge and skills, suited for every type of learner. And SITRAIN uses advancing digitalization to continuously expand content and offer new training methods.

#### Knowledge you can always find

SITRAIN open bundles useful information, worthwhile data and up-to-date expert knowledge about Siemens products for industry. Search it anytime, find anything – and always the right stuff.

#### Knowledge that gets you ahead

SITRAIN access is learning in the digital age. It offers you individualized ways to build your knowledge and access to exclusive digital training courses. Take advantage of sustainable learning success with a wide range of learning methods. Improve your skills – whether working in groups with others, or by yourself. Whenever, wherever and however you need to.

#### Knowledge you can experience

We all want to learn from the best. And SITRAIN personal's training courses let you benefit from our well-practiced trainers' expert knowledge, along with direct access to our training equipment. That's the best way to convey knowledge – whether at your company, in our training classrooms or as online training.

## Overview

The SIMATIC manual collection brings together the manuals of Totally Integrated Automation in the smallest possible package. It is eminently suitable for startup and service, replaces the space-consuming paper version in the office and provides fast access to the information.

The manual collection contains manuals in 5 languages for

- LOGO!
- SIMADYN
- SIMATIC bus components
- SIMATIC C7
- SIMATIC Distributed I/O
- SIMATIC HMI
- SIMATIC Sensors
- SIMATIC NET
- SIMATIC PC-based Automation
- SIMATIC PCS 7
- SIMATIC PG/PC
- SIMATIC S7
- SIMATIC Software
- SIMATIC TDC

Manuals that are not yet available in all 5 languages will at least be included in English and German.

There is an update contract for the SIMATIC Manual Collection that encompasses supply of the up-to-date collection and three subsequent updates which is valid for one year. If the update contract is not cancelled, it is automatically extended and the list price will be charged to the customer.

## Ordering data

### SIMATIC Manual Collection

Electronic manuals on DVD, multilingual:  
 LOGO!, SIMADYN, SIMATIC bus components, SIMATIC C7, SIMATIC Distributed I/O, SIMATIC HMI, SIMATIC Sensors, SIMATIC NET, SIMATIC PC-based Automation, SIMATIC PCS 7, SIMATIC PG/PC, SIMATIC S7, SIMATIC Software, SIMATIC TDC

### SIMATIC Manual Collection update service for 1 year

Current "Manual Collection" DVD and the three subsequent updates

### Standards and approbations

#### CE marking

##### Overview

The electronic products described in this catalog comply with the requirements and protection objectives of the following EU directives insofar as they relate to the product concerned. They also comply with the corresponding harmonized European standards (EN) published for these products in the Official Journals of the European Community.

- 2014/30/EU "Electromagnetic Compatibility" (EMC Directive)
- 2014/35/EU "Electrical equipment designed for use within certain voltage limits" (Low Voltage Directive)
- 2014/34/EU "Equipment and protective systems intended for use in potentially explosive atmospheres" (Explosion Protection Directive)
- For F-modules, the following also applies: 2006/42/EC "Machinery Directive"

The originals of the declarations of conformity are kept available by us for the responsible supervisory authorities.

##### **Note on the EMC Directive:**

In terms of their interference emissions, SIMATIC products are designed for industrial applications.

If individual products deviate from this specification, it is noted in the catalog with the products.

The installation instructions in the manuals must be adhered to when installing and operating the products described in this catalog. These contain, for example, important information on installation in cabinets and on the use of shielded cables.

##### Notes for machine manufacturers

The SIMATIC automation system is not a machine within the context of the EU machine guidelines. Therefore a declaration of conformity with regard to the EU machine directive 89/392/EEC or 2006/42/EU (new edition, applicable from end of 2009) may not be provided for SIMATIC.

The EU machine directive regulates the requirements placed on a machine or a part thereof. A machine is understood for the purposes of this guideline to be a combination of interconnected parts or mechanisms (see also EN 292-1, Paragraph 3.1).

SIMATIC is part of the electrical equipment of a machine, and must therefore be integrated into the evaluation of the complete machine by the machine manufacturer.

As electrical equipment, SIMATIC is subject to the low-voltage directive which, as a "total safety directive", covers all dangers just like the machine directive.

The EN 60204-1 standard (safety of machines, general requirements for the electrical equipment of machines) is applicable to the electrical equipment of machines.

The following table will help you in the provision of your declaration of conformity, and shows which criteria according to EN 60204-1 (2006-06) apply to SIMATIC. You can obtain further information from the enclosed declaration of conformity according to the low-voltage and EMC directives (with list of included standards).

EN 60204-1	Topic/criterion	Notes
Paragraph 4	General requirements	The requirements are met when the equipment is assembled/installed in accordance with the installation guidelines. Please note the relevant information in the manuals.
Paragraph 11.2	Digital input/output interfaces	The requirements are met
Paragraph 12.3	Programmable equipment	The requirements are met when the equipment is installed in lockable cabinets to protect against alteration of the memory contents by unauthorized persons
Paragraph 20.4	Voltage tests	The requirements are met

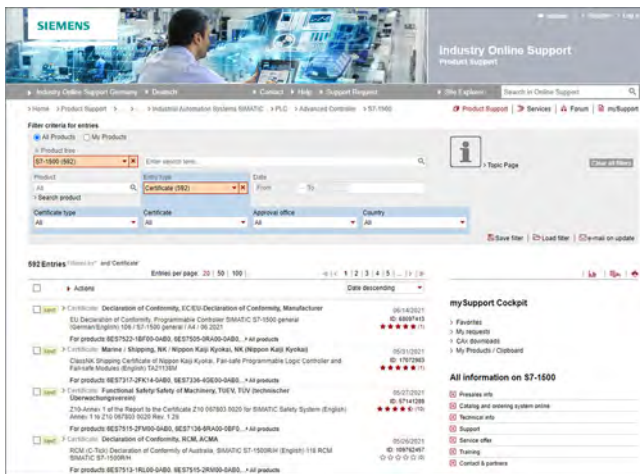

### Certificates, authorizations, approbations, declarations of conformity

An overview of the certificates available for SIMATIC products (CE, UL, CSA, FM, shipping authorizations) can be found in the internet at

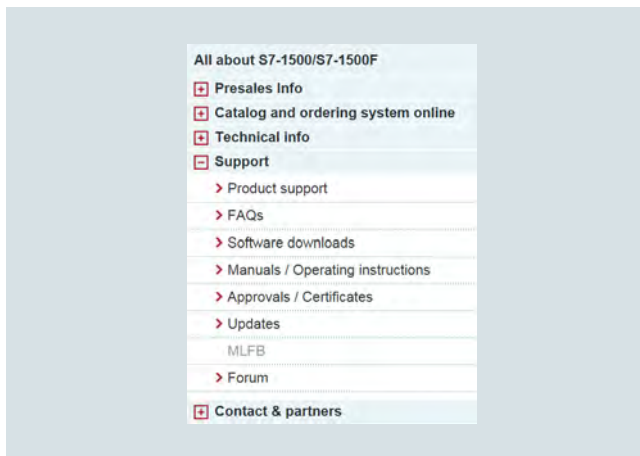

<http://www.siemens.com/simatic/certificates>

The lists are continuously updated. The data for products which have not yet been included in the overview is continuously collected and prepared for the subsequent edition.

You can also find certificates, approbations, verification certificates or characteristic curves under Product support "Entry list"

or by going directly to the Link Box:

### Quality management

The quality management system of the Siemens Operating Company Digital Industries, Business Unit Factory Automation, complies with the international standard ISO 9001.

The products and systems described in this catalog are sold under application of a quality management system certified by DQS in accordance with DIN EN ISO 9001.

The DQS certificate is recognized in all IQ Net countries.

Reg. No.: 001323 QM15

## Appendix

### Siemens Automation Cooperates with Education (SCE)

#### Teaching made easy - Comprehensive support on the way to Industry 4.0

#### Knowledge & technology – the keystones to success in digitalization

**Digitalization is quickly and radically changing our world. What does this mean for education?**

In the world of Industry 4.0, companies can expect a host of new opportunities and challenges. New systems are verified on the spot through simulations. Automated mass production processes can make every product on the conveyor belt a unique product.

New products are now market-ready much faster. Siemens is shaping this transformation as a technology leader in the field of automation and process lifecycle management (PLM).

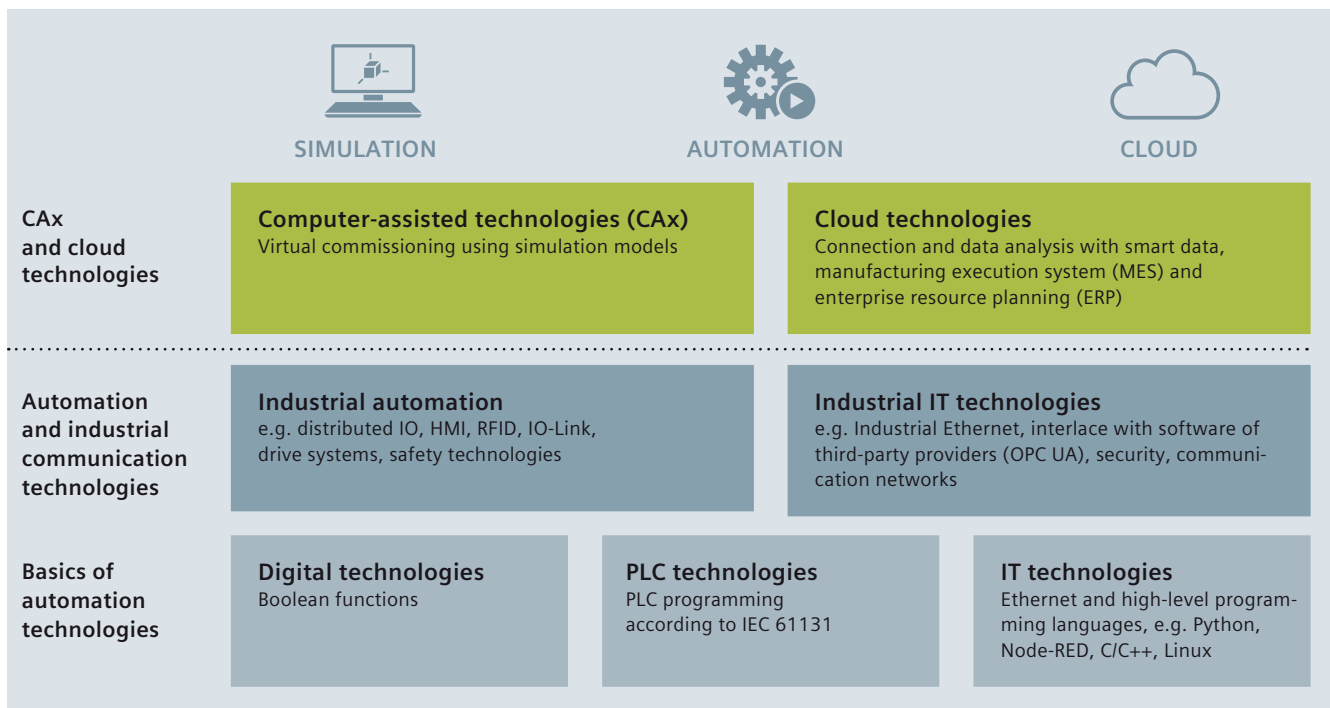

These new digitalization processes are changing the know-how requirements for employees. Many educational institutions are facing the challenge of conveying Industry 4.0 know-how as part of their teaching and training. The Siemens Automation Cooperates with Education (SCE) program is supporting educators on the way to Industry 4.0.

#### The SCE digitalization concept for educators

**The SCE digitalization concept presented here shows how digitalization can be implemented in educational institutions – from vocational schools to universities.**

Digitalization (or Industry 4.0) know-how is now introduced through CAx and cloud technologies. It is founded on the basics of automation, such as digital technologies, PLC and information technologies, and on advanced automation and industrial communication technologies.

The level of digitalization knowledge can be weighted, depending on the vocational field or branch of study – e.g. mechanical engineering, automation engineering or computer science.

**The SCE digitalization concept for educators** (continued)

As part of their project work, students at Vocational School 2 in Wolfsburg, Germany, have implemented the three levels of the SCE Industry 4.0 concept. A virtual twin created with the Siemens NX Mechatronics Designer (MCD) CAD software was used for the design and virtual commissioning. This enables fast and efficient assembly of the real automation system, e.g. with SIMATIC S7-1500/ET 200SP/RFID, for use in classes. Production data, such as the number of bottles filled, production date and system parameters, are uploaded to a cloud using SIMATIC IOT2000.

[siemens.com/sce/iot2000](https://siemens.com/sce/iot2000)

[siemens.com/nx](https://siemens.com/nx)

**The SCE offers****Learning and training documents**

More than 100 didactically prepared learning and training documents are available through SCE and incorporate the digitalization concept. They are designed for use in classes, but can also be customized or used for individual study. These documents are available for free download, most of them in 7 languages.

[siemens.com/sce/documents](https://siemens.com/sce/documents)

**Educator courses**

Excellent teaching content is needed to introduce students to digitalization. For this purpose, SCE holds educator courses in certain regions. Based on our learning and training documents and through practical exercises, educators acquire the latest Industry 4.0 know-how.

[siemens.com/sce/courses](https://siemens.com/sce/courses)

**Trainer packages**

The 90 SCE trainer packages help educators teaching and implementing the SCE digitalization concept. Trainer packages comprise specially compiled, genuine Siemens hardware and software products. The trainer packages are based on the learning and training documents and are offered to schools, colleges and universities at special terms.

[siemens.com/sce/tp](https://siemens.com/sce/tp)

**Support for your projects / textbooks**

We support you on selected projects with advice and assistance from SCE contact partners.

As a special service, we support textbook authors. We maintain a list of textbooks on the SCE website.

[siemens.com/sce/contact](https://siemens.com/sce/contact)

[siemens.com/sce/books](https://siemens.com/sce/books)

## Appendix

### Siemens Automation Cooperates with Education (SCE)

#### Teaching made easy - Comprehensive support on the way to Industry 4.0

##### Partnerships for proliferation of Industry 4.0 in education

##### **Partnership with WorldSkills**

As a technology powerhouse, we support vocational training of students around the world. Since 2010, we have partnered with WorldSkills as a Global Industry Partner in order to amplify this cause.

WorldSkills is an international organization whose mission is to raise the profile and recognition of skilled people, and show how important vocational skills are in achieving economic growth and personal success. Every two years, WorldSkills hosts the world championships of skills.

Siemens provides the competitors with automation products, such as SIMATIC S7-1500 and LOGO!, for the disciplines: industrial control, electrical installations, Polymechanics/Automation and manufacturing technology.

Additionally, we support selected continental and regional competitions.

[siemens.com/worldskills](https://www.siemens.com/worldskills)

##### **Partnerships with educators**

We provide support to educators and educational organizations in the form of one-on-one advice through SCE contact partners and Siemens experts as well as long-term cooperation.

[siemens.com/sce/contact](https://www.siemens.com/sce/contact)

##### **Partnerships with producers of learning systems**

For practical training in classrooms and labs, numerous producers of learning systems offer a wide range of complete didactic solutions based on SCE trainer packages.

[siemens.com/sce/learningsystems](https://www.siemens.com/sce/learningsystems)

##### Information portal

To facilitate your teaching assignment and/or for selfstudy, we offer educators and students a comprehensive SCE information portal. At this portal you have quick access to all SCE offers, e.g. learning and training documents including projects, Getting Started information, videos, manuals, trial software and newsletters.

[siemens.com/sce](https://www.siemens.com/sce)

**Overview****Siemens Solution and Approved Partner –  
Partners for your success****Highest competence in automation and drive technology**

Siemens works closely together with selected partner companies around the world in order to ensure that customer requirements for all aspects of automation and drives are fulfilled as best as possible – wherever you are, and whatever the time.

We place great value on our customers acting in accordance with the same ideals which characterize Siemens as a whole: Competence, professionalism and quality. That is why continuous development through qualification and certification measures in line with global standards is a central aspect of our Partner Program. This means that with our partners, you benefit from the same high quality standards all over the world. The partner emblem is the symbol for tried and tested quality.

**The partner network for industry**

The Siemens Partner Program offers you expertise and experience close at hand.

Within our global network, we distinguish between Solution Partners and Approved Partners. We currently work with more than 1,500 Solution Partners around the world. Our network of over 150 Approved Partners continues to grow. In more than 80 countries worldwide

**Siemens Solution Partner – Automation Drives**

At present we are working with more than 1,500 **Solution Partners** worldwide. They are characterized by extensive application, system and sector knowledge, as well as proven project experience, and are able to implement future-proof tailored solutions of the highest quality, based on our product and system portfolio.

**Siemens Approved Partner – Value Added Reseller**

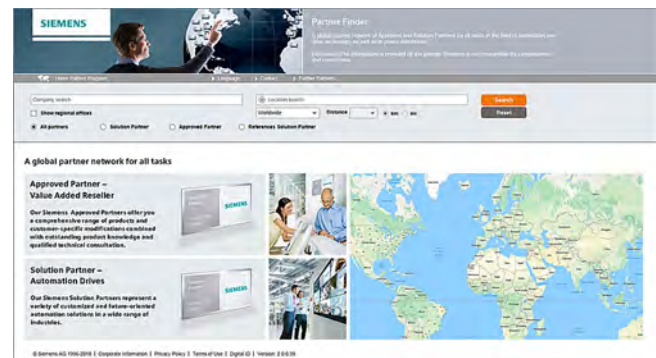

With their detailed technical knowledge, **Siemens Approved Partners – Value Added Resellers** offer a combination of products and services that range from specialist technologies and customized modifications to the provision of high-quality system and product packages. They also provide qualified technical support and assistance.

**Siemens Approved Partner – Industry Services**

**Siemens Approved Partner – Industry Services** put their unique expertise entirely at the service of enhancing your productivity and can be instrumental in ensuring the availability of your plants.

**Partner Finder**

The ideal partner for your task is just a mouse click away!

In the Siemens global Solution Partner program, customers are certain to find the optimum partner for their specific requirements – with no great effort. The Partner Finder is basically a comprehensive database that showcases the profiles of all our partners.

**Easy selection:**

Set filters in the search screen form according to the criteria that are relevant to you. You can also directly enter the name of an existing partner.

**Skills at a glance:**

Gain a quick insight into the specific competencies of any particular partner with the reference reports.

**Direct contact option:**

Use our electronic query form:

[www.siemens.com/partnerfinder](http://www.siemens.com/partnerfinder)

Additional information of the Siemens Partners for industry is available online at:

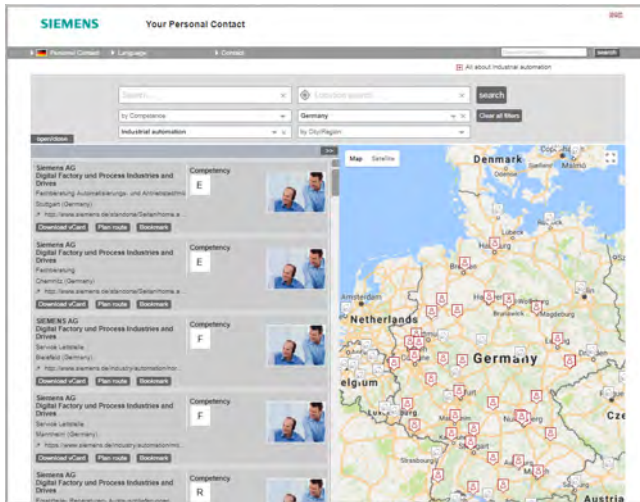

[www.siemens.com/partnerprogram](http://www.siemens.com/partnerprogram)

## Appendix

### Partners

#### Partners at Siemens

#### Overview

At your service locally, around the globe for consulting, sales, training, service, support, spare parts on the entire portfolio of Digital Industries.

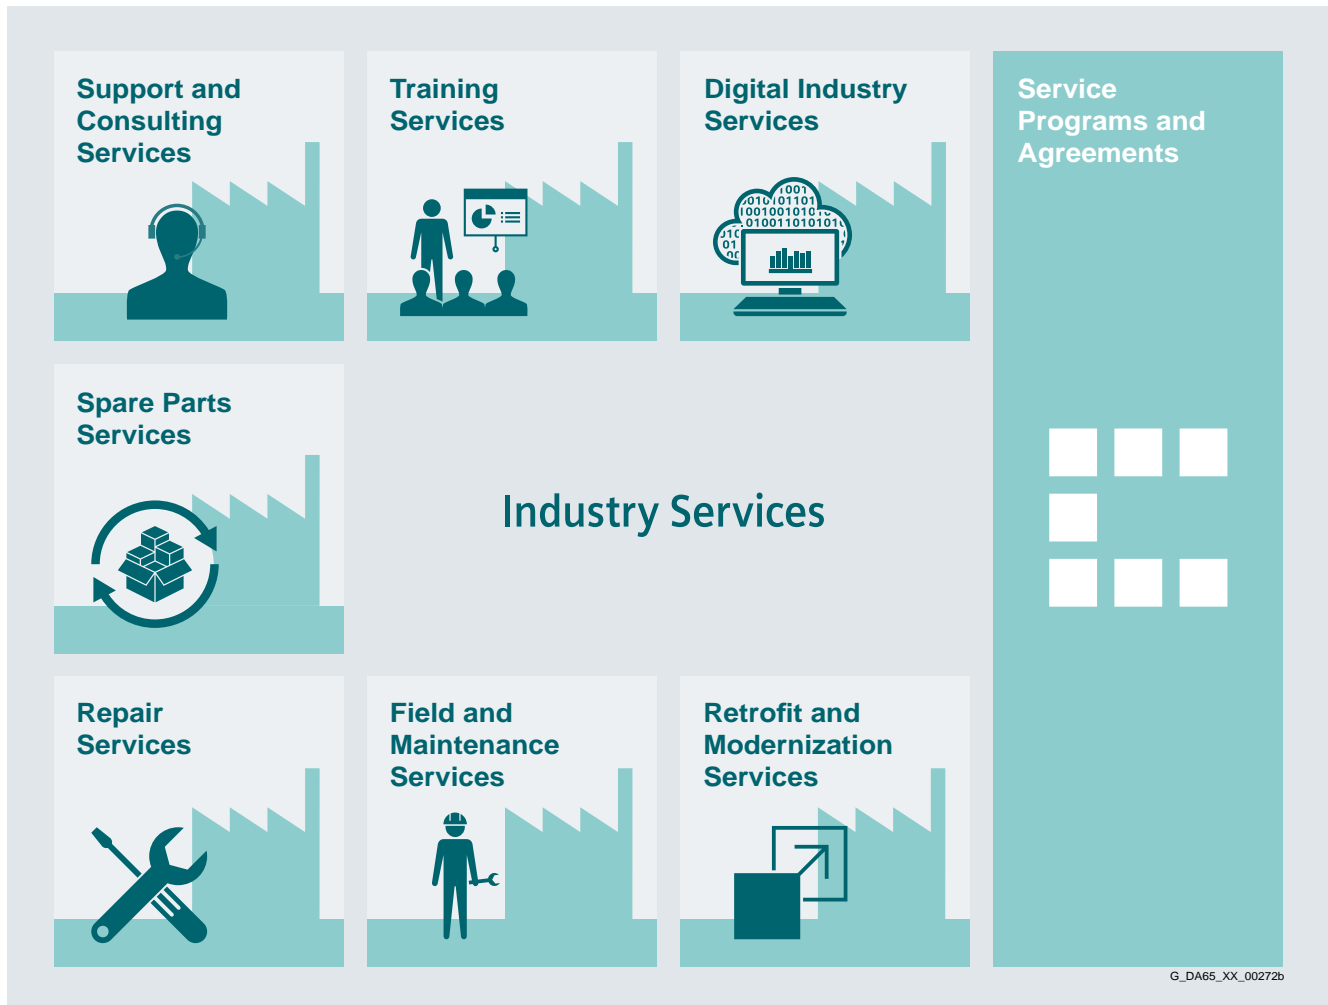

Your partner can be found in our Personal Contacts Database at: [www.siemens.com/automation-contact](http://www.siemens.com/automation-contact)

You start by selecting

- the required competence,
- products and branches,
- a country and a city

or by a

- location search or free text search.

**Overview**

**Keep your business running and shaping your digital future – with Industry Services**

Optimizing the productivity of your equipment and operations can be a challenge, especially with constantly changing market conditions. Working with our service experts makes it easier. We understand your industry's unique processes and provide the services needed so that you can better achieve your business goals.

You can count on us to maximize your uptime and minimize your downtime, increasing your operations' productivity and reliability. When your operations have to be changed quickly to meet a new demand or business opportunity, our services give you the flexibility to adapt. Of course, we take care that your production is protected against cyber threats. We assist in keeping your operations as energy and resource efficient as possible and reducing your total cost of ownership. As a trendsetter, we ensure that you can capitalize on the opportunities of digitalization and by applying data analytics to enhance decision making: You can be sure that your plant reaches its full potential and retains this over the longer lifespan.

You can rely on our highly dedicated team of engineers, technicians and specialists to deliver the services you need – safely, professionally and in compliance with all regulations. We are there for you, where you need us, when you need us.

[www.siemens.com/industryservices](http://www.siemens.com/industryservices)

## Appendix

### Industry Services

#### Overview

#### Digital Industry Services

Digital Industry Services make your industrial processes transparent to gain improvements in productivity, asset availability, and energy efficiency.

Production data is generated, filtered and translated with intelligent analytics to enhance decision-making.

This is done whilst taking data security into consideration and with continuous protection against cyber-attack threats.

[www.siemens.com/global/en/products/services/industry/digital-industry-services.html](http://www.siemens.com/global/en/products/services/industry/digital-industry-services.html)

#### Training Services

From the basics and advanced to specialist skills, SITRAIN courses provide expertise right from the manufacturer – and encompass the entire spectrum of Siemens products and systems for the industry.

Worldwide, SITRAIN courses are available wherever you need a training course in more than 170 locations in over 60 countries.

<https://support.industry.siemens.com/cs/ww/en/sc/2226>

#### Support and Consulting Services

**Industry Online Support** site for comprehensive information, application examples, FAQs and support requests.

**Technical and Engineering Support** for advice and answers for all inquiries about functionality, handling, and fault clearance. The Service Card as prepaid support for value added services such as Priority Call Back or Extended Support offers the clear advantage of quick and easy purchasing.

**Information & Consulting Services**, e.g. SIMATIC System Audit; clarity about the state and service capability of your automation system or Lifecycle Information Services; transparency on the lifecycle of the products in your plants.

<https://support.industry.siemens.com/cs/ww/en/sc/2235>

#### Spare Parts

Spare Parts Services are available worldwide for smooth and fast supply of spare parts – and thus optimal plant availability. Genuine spare parts are available for up to ten years. Logistic experts take care of procurement, transport, custom clearance, storage and order management.

Reliable logistics processes ensure that components reach their destination as needed.

Since not all spare parts can be kept in stock at all times, Siemens offers a preventive measure for spare parts provisioning on the customer's premises with optimized **Spare Parts Packages** for individual products, custom-assembled drive components and entire integrated drive trains – including risk consulting.

**Asset Optimization Services** help you design a strategy for parts supply where your investment and carrying costs are reduced and the risk of obsolescence is avoided.

<https://support.industry.siemens.com/cs/ww/en/sc/2110>

#### Repair Services

Repair Services are offered on-site and in regional repair centers for fast restoration of faulty devices' functionality.

Also available are extended repair services, which include additional diagnostic and repair measures, as well as emergency services.

<https://support.industry.siemens.com/cs/ww/en/sc/2154>

#### Field and Maintenance Services

Siemens specialists are available globally to provide expert field and maintenance services, including commissioning, functional testing, preventive maintenance and fault clearance.

All services can be included in customized service agreements with defined reaction times or fixed maintenance intervals.

<https://support.industry.siemens.com/cs/ww/en/sc/2265>

#### Retrofit and Modernization Services

Provide a cost-effective solution for the expansion of entire plants, optimization of systems or upgrading existing products to the latest technology and software, e.g. migration services for automation systems.

Service experts support projects from planning through commissioning and, if desired over the entire extended lifespan, e.g. Retrofit for Integrated Drive Systems for an extended lifetime of your machines and plants.

<https://support.industry.siemens.com/cs/ww/en/sc/2286>

#### Service Programs and Agreements

A technical Service Program or Agreement enables you to easily bundle a wide range of services into a single annual or multi-year agreement.

You pick the services you need to match your unique requirements or fill gaps in your organization's maintenance capabilities.

Programs and agreements can be customized as KPI-based and/or performance-based contracts.

<https://support.industry.siemens.com/cs/ww/en/sc/2275>

## Online Support for Siemens Industry Products

Siemens Industry and Online Support with some 1.7 million visitors per month is one of the most popular web services provided by Siemens. It is the central access point for comprehensive technical know-how about products, systems and services for automation and drives applications as well as for process industries.

In connection with the challenges and opportunities related to digitalization you can look forward to continued support with innovative offerings.

## Appendix

### Software licenses

#### Overview

##### Software types

Software requiring a license is categorized into types. The following software types have been defined:

- Engineering software
- Runtime software

##### Engineering software

This includes all software products for creating (engineering) user software, e.g. for configuring, programming, parameterizing, testing, commissioning or servicing.

Data generated with engineering software and executable programs can be duplicated for your own use or for use by third-parties free-of-charge.

##### Runtime software

This includes all software products required for plant/machine operation, e.g. operating system, basic system, system expansions, drivers, etc.

The duplication of the runtime software and executable programs created with the runtime software for your own use or for use by third-parties is subject to a charge.

You can find information about license fees according to use in the ordering data (e.g. in the catalog). Examples of categories of use include per CPU, per installation, per channel, per instance, per axis, per control loop, per variable, etc.

Information about extended rights of use for parameterization/configuration tools supplied as integral components of the scope of supply can be found in the readme file supplied with the relevant product(s).

##### License types

Siemens Industry Automation & Drive Technologies offers various types of software license:

- Floating license
- Single license
- Rental license
- Rental floating license
- Trial license
- Demo license
- Demo floating license

##### Floating license

The software may be installed for internal use on any number of devices by the licensee. Only the concurrent user is licensed. The concurrent user is the person using the program. Use begins when the software is started.

A license is required for each concurrent user.

##### Single license

Unlike the floating license, a single license permits only one installation of the software per license.

The type of use licensed is specified in the ordering data and in the Certificate of License (CoL). Types of use include for example per instance, per axis, per channel, etc.

One single license is required for each type of use defined.

##### Rental license

A rental license supports the "sporadic use" of engineering software. Once the license key has been installed, the software can be used for a specific period of time (the operating hours do not have to be consecutive).

One license is required for each installation of the software.

##### Rental floating license

The rental floating license corresponds to the rental license, except that a license is not required for each installation of the software. Rather, one license is required per object (for example, user or device).

##### Trial license

A trial license supports "short-term use" of the software in a non-productive context, e.g. for testing and evaluation purposes. It can be transferred to another license.

##### Demo license

The demo license support the "sporadic use" of engineering software in a non-productive context, for example, use for testing and evaluation purposes. It can be transferred to another license. After the installation of the license key, the software can be operated for a specific period of time, whereby usage can be interrupted as often as required.

One license is required per installation of the software.

##### Demo floating license

The demo floating license corresponds to the demo license, except that a license is not required for each installation of the software. Rather, one license is required per object (for example, user or device).

##### Certificate of License (CoL)

The CoL is the licensee's proof that the use of the software has been licensed by Siemens. A CoL is required for every type of use and must be kept in a safe place.

##### Downgrading

The licensee is permitted to use the software or an earlier version/release of the software, provided that the licensee owns such a version/release and its use is technically feasible.

##### Delivery versions

Software is constantly being updated.

The following delivery versions

- PowerPack
- Upgrade

can be used to access updates.

Existing bug fixes are supplied with the ServicePack version.

##### PowerPack

PowerPacks can be used to upgrade to more powerful software. The licensee receives a new license agreement and CoL (Certificate of License) with the PowerPack. This CoL, together with the CoL for the original product, proves that the new software is licensed.

A separate PowerPack must be purchased for each original license of the software to be replaced.

##### Upgrade

An upgrade permits the use of a new version of the software on the condition that a license for a previous version of the product is already held.

The licensee receives a new license agreement and CoL with the upgrade. This CoL, together with the CoL for the previous product, proves that the new version is licensed.

A separate upgrade must be purchased for each original license of the software to be upgraded.

**Overview****ServicePack**

ServicePacks are used to debug existing products. ServicePacks may be duplicated for use as prescribed according to the number of existing original licenses.

**License key**

Siemens Industry Automation & Drive Technologies supplies software products with and without license keys.

The license key serves as an electronic license stamp and is also the "switch" for activating the software (floating license, rental license, etc.).

The complete installation of software products requiring license keys includes the program to be licensed (the software) and the license key (which represents the license).

**Software Update Service (SUS)**

As part of the SUS contract, all software updates for the respective product are made available to you free of charge for a period of one year from the invoice date. The contract will automatically be extended for one year if it is not canceled three months before it expires.

The possession of the current version of the respective software is a basic condition for entering into an SUS contract.

You can download explanations concerning license conditions from [https://mall.industry.siemens.com/legal/ww/en/terms\\_of\\_trade\\_en.pdf](https://mall.industry.siemens.com/legal/ww/en/terms_of_trade_en.pdf)

**Appendix**  
Software licenses

### 1. General Provisions

By using this catalog you can purchase products (hardware, software and services) described therein from Siemens Aktiengesellschaft subject to the following Terms and Conditions of Sale and Delivery (hereinafter referred to as "T&C"). Please note that the scope, the quality and the conditions for supplies and services, including software products, by any Siemens entity having a registered office outside Germany, shall be subject exclusively to the General Terms and Conditions of the respective Siemens entity. The following T&C apply exclusively for orders placed with Siemens Aktiengesellschaft, Germany.

#### 1.1 For customers with a seat or registered office in European Union

For customers with a seat or registered office in European Union, the following terms and conditions apply subordinate to T&C:

- for products, which include specific terms and conditions in the description text, these specific terms and conditions shall apply and subordinate thereto,
- for stand-alone software products and software products forming a part of a product or project, the "General License Conditions for Software Products for Automation and Drives for Customers with a Seat or registered Office in Germany"<sup>1)</sup> and/or
- for consulting services the "Allgemeine Geschäftsbedingungen für Beratungsleistungen der Division DF – Deutschland" (available only in German) and/or
- for other services, the „Supplementary Terms and Conditions for Services ("BL")"<sup>1)</sup> and/or
- for other supplies the "General Conditions for the Supply of Products and Services of the Electrical and Electronics Industry"<sup>1)</sup>.

In case such supplies should contain Open Source Software, the conditions of which shall prevail over the "General Conditions for the Supply of Products and Services of the Electrical and Electronics Industry"<sup>1)</sup>, a notice will be contained in the scope of delivery in which the applicable conditions for Open Source Software are specified. This shall apply mutatis mutandis for notices referring to other third party software components.

#### 1.2 For customers with a seat or registered office outside European Union

For customers with a seat or registered office outside European Union, the following terms and conditions apply subordinate to T&C:

- for products, which include specific terms and conditions in the description text, these specific terms and conditions shall apply and subordinate thereto,
- for consulting services the "Standard Terms and Conditions for Consulting Services of the Division DF for Customers with a Seat or Registered Office Outside of Germany"<sup>1)</sup> and/or
- for other services the "International Terms & Conditions for Services"<sup>1)</sup> supplemented by "Software Licensing Conditions"<sup>1)</sup> and/or
- for other supplies of hard- and software the "International Terms & Conditions for Products"<sup>1)</sup> supplemented by "Software Licensing Conditions"<sup>1)</sup>

#### 1.3 For customers with master or framework agreement

To the extent our supplies and/or services offered are covered by an existing master or framework agreement, the terms and conditions of that agreement shall apply instead of T&C.

### 2. Prices

The prices are in € (Euro) ex point of delivery, exclusive of packaging.

The sales tax (value added tax) is not included in the prices. It shall be charged separately at the respective rate according to the applicable statutory legal regulations.

Prices are subject to change without prior notice. We will charge the prices valid at the time of delivery.

To compensate for variations in the price of raw materials (e.g. silver, copper, aluminum, lead, gold, dysprosium and neodym), surcharges are calculated on a daily basis using the so-called metal factor for products containing these raw materials. A surcharge for the respective raw material is calculated as a supplement to the price of a product if the basic official price of the raw material in question is exceeded.

The metal factor of a product indicates the basic official price (for those raw materials concerned) as of which the surcharges on the price of the product are applied, and with what method of calculation.

An exact explanation of the metal factor can be downloaded at: [https://mall.industry.siemens.com/legal/ww/en/terms\\_of\\_trade\\_en.pdf](https://mall.industry.siemens.com/legal/ww/en/terms_of_trade_en.pdf)

To calculate the surcharge (except in the cases of dysprosium and neodym), the official price from the day prior to that on which the order was received or the release order was effected is used.

To calculate the surcharge applicable to dysprosium and neodym ("rare earths"), the corresponding three-month basic average price in the quarter prior to that in which the order was received or the release order was effected is used with a one-month buffer (details on the calculation can be found in the explanation of the metal factor).

### 3. Additional Terms and Conditions

The dimensions are in mm. In Germany, according to the German law on units in measuring technology, data in inches apply only to devices for export.

Illustrations are not binding.

Insofar as there are no remarks on the individual pages of this catalog – especially with regard to data, dimensions and weights given – these are subject to change without prior notice.

<sup>1)</sup> The text of the Terms and Conditions of Siemens AG can be downloaded at [https://mall.industry.siemens.com/legal/ww/en/terms\\_of\\_trade\\_en.pdf](https://mall.industry.siemens.com/legal/ww/en/terms_of_trade_en.pdf)

## Appendix

### Notes

#### 4. Export Regulations

We shall not be obligated to fulfill any agreement if such fulfillment is prevented by any impediments arising out of national or international foreign trade or customs requirements or any embargoes and/or other sanctions.

Export may be subject to license. We shall indicate in the delivery details whether licenses are required under German, European and US export lists.

Our products are controlled by the U.S. Government (when labeled with "ECCN" unequal "N") and authorized for export only to the country of ultimate destination for use by the ultimate consignee or end-user(s) herein identified. They may not be resold, transferred, or otherwise disposed of, to any other country or to any person other than the authorized ultimate consignee or end-user(s), either in their original form or after being incorporated into other items, without first obtaining approval from the U.S. Government or as otherwise authorized by U.S. law and regulations. Products labeled with "AL" unequal "N" are subject to European / national export authorization.

The export indications can be viewed in advance in the description of the respective goods on the Industry Mall, our online catalog system. Only the export labels "AL" and "ECCN" indicated on order confirmations, delivery notes and invoices are authoritative.

Products without label, with label "AL:N" / "ECCN:N", or label "AL:9X9999" / "ECCN: 9X9999" may require authorization from responsible authorities depending on the final end-use, or the destination.

If you transfer goods (hardware and/or software and/or technology as well as corresponding documentation, regardless of the mode of provision) delivered by us or works and services (including all kinds of technical support) performed by us to a third party worldwide, you shall comply with all applicable national and international (re-)export control regulations. In any event of such transfer of goods, works and services you shall comply with the (re-) export control regulations of the Federal Republic of Germany, of the European Union and of the United States of America.

Prior to any transfer of goods, works and services provided by us to a third party you shall in particular check and guarantee by appropriate measures that

- there will be no infringement of an embargo imposed by the European Union, by the United States of America and/ or by the United Nations by such transfer, by brokering of contracts concerning those goods, works and services or by provision of other economic resources in connection with those goods, works and services, also considering the limitations of domestic business and prohibitions of by-passing those embargoes;
- such goods, works and services are not intended for use in connection with armaments, nuclear technology or weapons, if and to the extent such use is subject to prohibition or authorization, unless required authorization is provided;
- the regulations of all applicable Sanctioned Party Lists of the European Union and the United States of America concerning the trading with entities, persons and organizations listed therein are considered.

If required to enable authorities or us to conduct export control checks, you, upon request by us, shall promptly provide us with all information pertaining to the particular end customer, the particular destination and the particular intended use of goods, works and services provided by us, as well as any export control restrictions existing.

You acknowledge that under the EU embargo regulations against Iran, Syria and Russia respectively the sale of certain listed goods and related services is subject to authorization by the competent export control authorities of the European Union. If (i) the goods or services ordered by you are destined for Iran, Syria or Russia, and (ii) the contract for our supplies and/or services is subject to prior authorization of the competent export control authorities of the European Union, the contract between you and us shall come into force in this respect only upon granting of such authorization.

The products listed in this catalog may be subject to European/German and/or US export regulations. Any export requiring approval is therefore subject to authorization by the relevant authorities.

Errors excepted and subject to change without prior notice.

## Selection and ordering at Siemens Industry Mall, downloading and ordering catalogs

### Easy product selection and ordering: Industry Mall

### Industry Mall

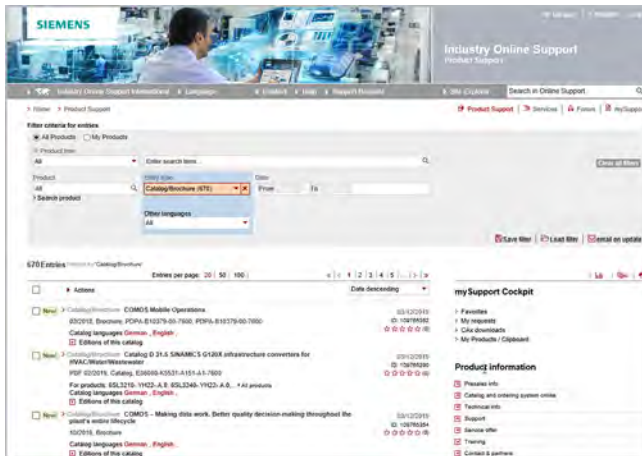

The Industry Mall is a Siemens AG Internet ordering platform. It provides you with online access to a comprehensive product spectrum that is presented in an informative, well-organized way.

Powerful search functions help you select the required products, while configurators enable you to configure complex product and system components quickly and easily. CAx data are also available for you to use.

Data transfer allows the entire procedure, from selection through ordering to tracking and tracing, to be carried out online. Availability checks, individual customer discounting, and quotation preparation are also possible.

[www.siemens.com/industrymall](http://www.siemens.com/industrymall)

### Downloading catalogs

### Siemens Industry Online Support

You can download catalogs and brochures in PDF format from Siemens Industry Online Support without having to register.

The filter box makes it possible to perform targeted searches.

## Security information

Siemens provides products and solutions with industrial security functions that support the secure operation of plants, systems, machines and networks.

In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial security concept. Siemens' products and solutions constitute one element of such a concept.

Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place.

For additional information on industrial security measures that may be implemented, please visit

**<http://www.siemens.com/industrialsecurity>.**

Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats.

To stay informed about product updates, subscribe to the Siemens Industrial Security RSS Feed under
