

PRACHT®

Declaration of REACH

Name and address of the manufacturer: Alfred Pracht Lichttechnik GmbH
Am Seerain 3
35232 Dautphetal-Buchenau
Germany

With reference to the Regulation (EG) No. 1907/2006 (REACH), we can confirm the following.

Pracht as a compounder is using material mixtures and no chemical substances. REACH requires substances only to be registered at REACH, consequently PRACHT does not need to preregister or register any material. We have been informed by our raw material suppliers that none of them is going to stop or change a product because of REACH.

According Art. 33 of REACH, there is an obligation to inform customers about substances of very high concern in products of their concentration is more than 0,1% (weight).

We require from our non-EU suppliers to inform us about products with substances of very high concern according to latest version of the candidate list.

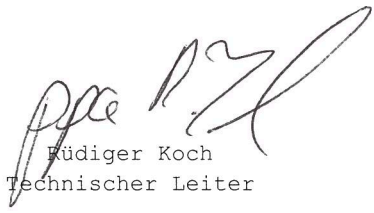

Up to now no information is available to us, that substances of very high concern with a concentration of more than 0,1% (weight) according to the candidate list appear in the products delivered by us.

For this reason please understand that we cannot accept any liability for the information which we provide in good faith.
