

Configurable globe valve actuator for 2-way and 3-way globe valves

- Actuating force 2500 N
- Nominal voltage AC/DC 24 V
- Control modulating 2...10 V variable
- Stroke 40 mm

Technical data

Electrical data	Nominal voltage	AC/DC 24 V		
	Nominal voltage frequency	50/60 Hz		
	Nominal voltage range	AC 19.228.8 V / DC 21.628.8 V		
	Power consumption in operation	11 W		
	Power consumption in rest position	1.5 W		
	Power consumption for wire sizing	18 VA		
	Connection supply / control	Cable 1 m, 4 x 0.75 mm ²		
	Parallel operation	Yes (note the performance data)		
Functional data	Actuating force motor	2500 N		
	Operating range Y	210 V		
	Input Impedance	100 kΩ		
	Operating range Y variable	Start point 0.530 V End point 2.532 V		
	Operating modes optional	Open/close		
		3-point (AC only)		
	Position feedback U	Modulating (DC 032 V) 210 V		
	Position feedback U note	Max. 0.5 mA		
	Position feedback U variable	Start point 0.58 V		
	rosition recuback o variable	End point 2.510 V		
	Position accuracy	±5%		
	Manual override	with push-button, can be locked		
	Stroke	40 mm		
	Running time motor	35 s / 40 mm		
	Running time motor variable	3590 s		
	Adaptation setting range	manual (automatic on first power-up)		
	Adaptation setting range variable	No action		
		Adaptation when switched on		
		Adaptation after pushing the manual override button		
	Override control	MAX (maximum position) = 100%		
		MIN (minimum position) = 0%		
		ZS (intermediate position, AC only) = 50%		
	Override control variable	MAX = (MIN + 33%)100% ZS = MINMAX		
	Sound power level, motor	65 dB(A)		
	Position indication	Mechanically, 540 mm stroke		
Safety data	Protection class IEC/EN	III, Safety Extra-Low Voltage (SELV)		
	Power source UL	Class 2 Supply		
	Degree of protection IEC/EN	IP54		
	Degree of protection NEMA/UL	NEMA 2		

Technical data sheet

EVC24A-MF

ety data	Enclosure	UL Enclosure Type 2		
	EMC	CE according to 2014/30/EU IEC/EN 60730-1 and IEC/EN 60730-2-14 cULus according to UL60730-1A, UL60730-2-14 and CAN/CSA E60730-1 The UL marking on the actuator depends on the production site, the device is UL-compliant in any case		
	Certification IEC/EN			
	UL Approval			
	Mode of operation	Type 1		
	Rated impulse voltage supply / control	0.8 kV		
	Pollution degree	3		
	Ambient humidity	Max. 95% RH, non-condensing		
	Ambient temperature	050°C [32122°F]		
	Storage temperature	-4080°C [-40176°F]		
	Servicing	maintenance-free		
Weight	Weight	3.7 kg		

Safety notes

 This device has been designed for use in stationary heating, ventilation and air-conditioning systems and must not be used outside the specified field of application, especially in aircraft or in any other airborne means of transport.

- Outdoor application: only possible in case that no (sea) water, snow, ice, insolation or aggressive gases interfere directly with the device and that it is ensured that the ambient conditions remain within the thresholds according to the data sheet at any time.
- Only authorised specialists may carry out installation. All applicable legal or institutional installation regulations must be complied during installation.
- The switch for changing the direction of motion and so the closing point may be adjusted only by authorised specialists. The direction of motion is critical, particularly in connection with frost protection circuits.
- The device may only be opened at the manufacturer's site. It does not contain any parts that can be replaced or repaired by the user.
- Cables must not be removed from the device.
- The device contains electrical and electronic components and must not be disposed of as household refuse. All locally valid regulations and requirements must be observed.

Product features

Mode of operation	The actuator is connected with a standard control signal of 010 V and drives to the position defined by the control signal. The measuring voltage U serves for the electrical display of the actuator position 0.5100% and as control signal for other actuators.
Parametrisable actuators	The factory settings cover the most common applications. Single parameters can be modified with the Belimo Service Tools MFT-P or ZTH EU.
Simple direct mounting	Simple direct mounting on the globe valve by means of form-fit hollow clamping jaws. The actuator can be rotated by 360° on the valve neck.
Manual override	Manual override with push-button possible (the gear train is disengaged for as long as the button is pressed or remains locked). The stroke can be adjusted by using a hexagon socket screw key (5 mm), which is inserted into the top of the actuator. The stem extends when the key is rotated clockwise.
High functional reliability	The actuator is overload protected, requires no limit switches and automatically stops when the end stop is reached.

Technical data sheet

Home position	Factory setting: Actuator stem is retracted.		
	When valve-actuator combinations are shipped, the direction of motion is set in accordance with the closing point of the valve.		
	The first time the supply voltage is switched on, i.e. at the time of commissioning, the actuator carries out an adaptation, which is when the operating range and position feedback adjust themselves to the mechanical setting range.		
	The actuator then moves into the position defined by the control signal.		
Adaptation and synchronisation	An adaptation can be triggered manually by pressing the "Adaptation" button or with the PC- Tool. Both mechanical end stops are detected during the adaptation (entire setting range).		
	Automatic synchronisation after pressing the manual override button is configured. The synchronisation is in the home position (0%).		
	The actuator then moves into the position defined by the control signal.		
	A range of settings can be adapted using the PC-Tool (see MFT-P documentation)		
Setting direction of motion	When actuated, the stroke direction switch changes the running direction in normal operation.		

Accessories

Electrical accessories	Description	Туре
	Auxiliary switch 2 x SPDT add-on	S2A-H
Tools	Description	Туре
	Service Tool, with ZIP-USB function, for parametrisable and communicative Belimo actuators, VAV controller and HVAC performance devices	ZTH EU
	Belimo PC-Tool, Software for adjustments and diagnostics	MFT-P
	Adapter for Service-Tool ZTH	MFT-C
	Connection cable 5 m, A: RJ11 6/4 ZTH EU, B: 6-pin for connection to service socket	ZK1-GEN
	Connection cable 5 m, A: RJ11 6/4 ZTH EU, B: free wire end for connection to MP/PP terminal	ZK2-GEN

Electrical installation

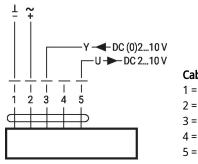

Supply from isolating transformer.

Parallel connection of other actuators possible. Observe the performance data. Direction of stroke switch factory setting: Actuator stem retracted (\blacktriangle).

+

Functions with basic values (conventional mode)

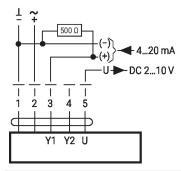

Override control with AC 24 V with relay contacts

Minimum limit with positioner SG..

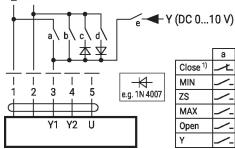

Control with 4...20 mA via external resistor

Caution:

The operating range must be set to DC 2...10 V. The 500 Ω resistor converts the 4...20 mA current signal to a voltage signal DC 2...10 V

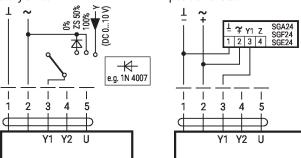

Functions with specific parameters (parametrisation necessary) Override control and limiting with AC 24 V with relay contacts

Y		\langle	\langle	\langle	Ľ

rotary switch

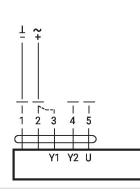

Override control with AC 24 V with Control remotely 0...100% with positioner SG..

Primary/secondary operation (position-dependent)

Functional check

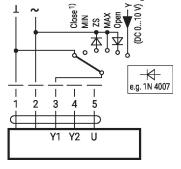

Procedure

direction

1. Apply 24 V to connection 1 and 2 2. Disconnect connection 3: - with upwards direction of motion: closing point at top - with downwards direction of motion: closing point at bottom 3. Short circuit connections 2 and 3: - Actuator runs in the opposite

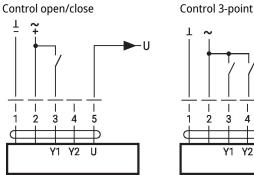

Override control and limiting with AC 24 V with rotary switch

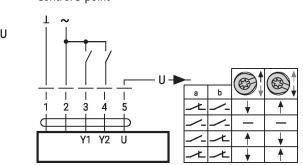

1) Caution: This function is only guaranteed if the start point of the operating range is defined as min. 0.5 V.

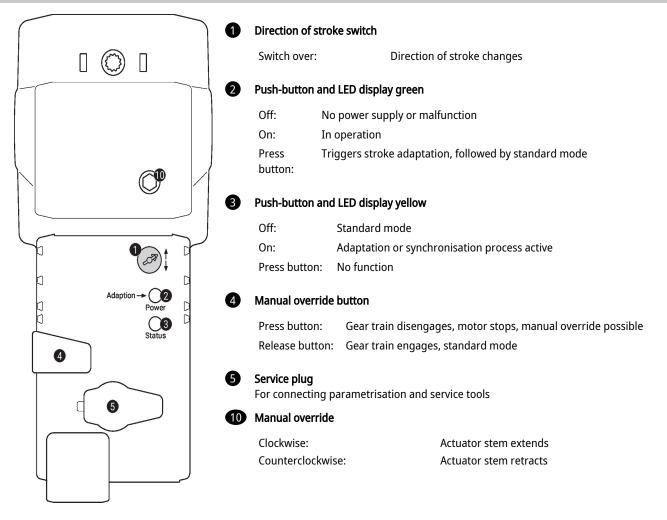

Technical data sheet

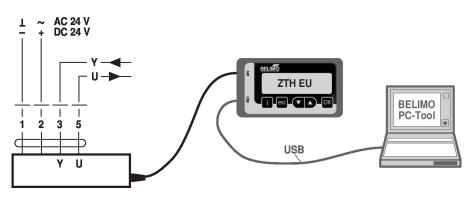

Operating controls and indicators

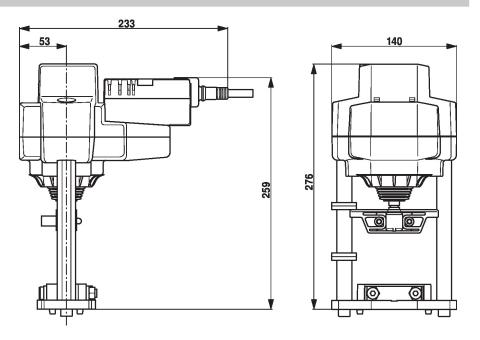

Tools connection The actuator can be parametrised by ZTH EU via the service socket. For an extended parametrisation the PC tool can be connected.

Connection ZTH EU / PC-Tool
