

Butterfly valve with Lug types

• For open and closed cold and warm water systems

• For switching heat generators or cooling machines on/off

Technical data sheet

Type overview

| Туре | DN | kvmax [m³/h] | kvs [m³/h] | PN | n(gl) |
|---------|-----|-----------------|---------------|----------|-------|
| D625NL | 25 | 50 | 24 | 10 / 16 | 3.2 |
| D632NL | 32 | 55 | 25 | 10 / 16 | 3.2 |
| D640NL | 40 | 65 | 27 | 10 / 16 | 3.2 |

| D6150NL | 150 | 1400 | 400 | 10 / 16 | 3.2 |
| D6350NL | 350 | 10300 | 3010 | 16 | 3.2 |
| D6400NL | 400 | 14200 | 4140 | 16 | 3.2 |
| D6450NL | 450 | 18800 | 5490 | 16 | 3.2 |
| D6500NL | 500 | 24100 | 7060 | 16 | 3.2 |
| D6600NL | 600 | 37300 | 10900 | 10900 16 | |
| D6700NL | 700 | 42800 | 11760 | 16 | 3.2 |

The types D6200NL, D6250NL and D6300NL have been replaced by the types D6200WL, D6250WL and D6300WL. For technical data please check the datasheet D6..WL.

Technical data

| unctional data | Fluid | Cold and warm water, water with glycol up to max. 50% vol. |
|----------------|----------------------------|--|
| | Fluid temperature | -20120°C [-4.0248°F] |
| | Flow characteristic | 060% opening angle: equal percentage 0100% opening angle: S-form |
| | Flow characteristic note | 0100% opening angle: linear (only with PR BAC actuator) |
| | | For butterfly valves with PRBAC actuator, the flow characteristic can be parametrised to equal percentage or linear using the Belimo Assistant App. |
| | Leakage rate | tight, leakage rate A (EN 12266-1) |
| | Angle of rotation | 90° |
| | Installation position | upright to horizontal (in relation to the stem) |
| | Suitable connection flange | In accordance with ISO 7005-2 and EN 1092-2 |
| | Servicing | maintenance-free |
| Materials | Valve body | EN-GJS-400-15 (GGG 40) |
| | Body finish | polyester powder coated |
| | Closing element | Stainless steel AISI 304 (1.4301) |

Technical data sheet

| | Worm gear for butterfly valves DN 500 | ZD6N-S500 |
| | Worm gear for butterfly valves DN 600 | ZD6N-S600 |
| | Worm gear for butterfly valves DN 700 | ZD6N-S700 |

Recommended installation positions

The butterfly valves may be mounted upright to horizontal. The butterfly valves may not be installed in a hanging position i.e. with the spindle pointing downwards.

| Water quality requirements | The water quality requirements specified in VDI 2035 must be adhered to. |
|----------------------------|---|
| Spindle heater | In cold water applications and warm humid ambient air can cause condensation in the actuators. This can lead to corrosion in the gear box of the actuator and causes a breakdown of it. In such applications, the use of a spindle heater is provided. |
| | The spindle heater must be enabled only when the system is in operation, because it does not have temperature control. |
| Servicing | Butterfly valves and rotary actuators are maintenance-free. |
| | Before any service work on the control element is carried out, it is essential to isolate the rotary actuator from the power supply (by unplugging the electrical cable if necessary). Any pumps in the part of the piping system concerned must also be switched off and the appropriate slide valves closed (allow all components to cool down first if necessary and always reduce the system pressure to ambient pressure level). |
| | The system must not be returned to service until the butterfly valve and the rotary actuator have been reassembled correctly in accordance with the instructions and the pipeline has been refilled by professionally trained personnel. |
| | To avoid a torque increase during off season shut down, exercise the butterfly valve (full open and close) at least once a month. |
| Flow setting | The Belimo butterfly valves have an approximate equal percentage characteristic curve between |

Flow setting The Belimo butterfly valves have an approximate equal percentage characteristic curve between 0...60% opening angle.

| | | 10% | 20% | 30% | 40% | 50% | 60% | 70% | 80% | 90% | 100% |
